01

Introduction

Learning disabilities are usually related to problems in reading, writing, attention or memory, aspects that have a negative influence on school performance and the ability to acquire new knowledge in children. As a result, techniques for detection and intervention have been enhanced from a psychological perspective, which means that professionals must apply them in their daily practice to optimize care for their patients. Because of this, TECH has developed this program, which will provide the psychologist with an excellent handling of the leading methods to evaluate and treat ADHD or visual and hearing impairment. All of this while enjoying exclusively practical experience in a first level clinical center.

Through this program, you will master the leading mechanisms to assess and intervene psychologically in cases of patients with ADHD or visual and hearing impairment"

Learning disabilities usually lead to a decrease in the ability to understand, process and retain information in young people who experience them. This fact can have a negative impact on both their academic performance and their ability to cope in their daily lives, impacting the mental health of children and adolescents. Therefore, psychologists are obliged to handle recent techniques that allow them to assess and treat with solvency these disorders, in order to contribute to improve the quality of life of these patients.

This is why TECH has chosen to design this program, which will enable the professional to obtain the most up-to-date competences in the field of Psychological Intervention in Learning Disabilities, in an exclusively practical way. During 3 weeks, you will enjoy the possibility of accessing a highly prestigious clinical environment. With the help of the best specialists in this area of Psychology, you will master the performance of advanced tests to diagnose LD or therapeutic strategies to address Dyslexia or motor disability. Likewise, you will delve into the management of disorders related to attention and memory disorders.

Throughout this practical experience, the student will be accompanied and guided at all times by a specially assigned tutor. Thanks to the role of the experts, the high quality of the learning process will be guaranteed, since they will be responsible both for ensuring the correct teaching and for resolving any doubts you may have.

02

Why Study an Internship Program?

In the vast majority of fields, practical experience is fundamental to achieve outstanding professional success. In the area of Psychology, it is not enough to have theoretical knowledge about the advances in Psychological Intervention in Learning Disabilities, but it is essential to know how to apply them in the daily work. In order to meet this need, TECH has developed this program, with which students will have the opportunity to be part of a leading clinical environment for 3 weeks. Along with expert professionals in this field, they will acquire skills that will boost their professional development in this branch of Mental Health.

Enjoy the unique opportunity to perfect and update your competencies in Psychological Intervention in Learning Disabilities in an exclusively practical way”

1. Updating from the Latest Technology Available

In recent years, the field of Psychological Intervention in Learning Disabilities has evolved significantly thanks to advances in the methods of evaluation, approach and treatment of these disorders. Because of this, TECH has created this Internship Program, which will enable the students to incorporate these innovations into their daily practice and place themselves at the forefront of Psychology.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

Throughout the duration of the program, students will have the opportunity to be part of an exceptional work team, composed of the most prominent experts in the world of Psychology, who will teach them the most up-to-date skills in Psychological Intervention in Learning Disabilities. In addition, each student will receive personalized guidance from a tutor who will help them improve their skills.

3. Entering first-class Professional environments

TECH carries out an exhaustive selection process of the centers where the Internship Program will take place, with the objective of guaranteeing that the students can develop in a first class clinical environment. In this way, they will be able to work in highly demanding teams and with an exceptional professional quality.

4. Putting the acquired knowledge into daily practice from the very first moment

Nowadays, it is common to find educational programs that do not meet the daily needs of workers, providing theoretical content with little real application. For this reason, TECH has created a program with an innovative pedagogical approach, based on internships, which will allow students to solidly improve their skills in a high-level professional environment.

5. Expanding the Boundaries of Knowledge

TECH offers students the opportunity to take this Internship Program in prestigious hospitals, in order to learn from professionals with extensive experience in Psychological Intervention in Learning Disabilities. This is an exclusive opportunity that only this educational institution can offer its students.

You will have full practical immersion at the center of your choice"

03

Objectives

The objective of this Internship Program is to provide a complete update to the professional in the field of Psychological Intervention in Learning Disabilities. Therefore, students will have the opportunity to delve into the manifestations of these disorders, handle the most advanced techniques for their assessment and master the latest techniques for their intervention. All this, in only 120 hours and in an exclusively practical way.

General Objectives

- Make reliable diagnoses and provide appropriate interventions in each psycho-educational setting
- Apply specific intervention techniques and programs for Learning Disabilities
- Carry out psycho-pedagogical reports and intervention proposals for learning disabilities

This is the best opportunity to get up to date on Psychological Intervention in Learning Disabilities”

Specific Objectives

- ♦ Delve into the concepts of learning disabilities and developmental disorders
- ♦ Examine the main characteristics and associated disorders of dyslexia, dysgraphia and dysorthography
- ♦ Provide support to guidance teams in education centers, as well as specialized EOEPS
- ♦ Analyze the different learning theories, with the main authors and studies on the subject
- ♦ Study cognitive learning models, as well as constructivist teaching models
- ♦ Discern the specificities of diversity care and the psycho-educational challenges it raises
- ♦ Study the concept of memory, as well as its implication in Learning Disabilities
- ♦ Delve into the cognitive and neurofunctional models of numerical processing
- ♦ Study, in-depth, the main neuropsychological and psycholinguistic models in reading and writing
- ♦ Study Dyslexia, Dyscalculia, Dysgraphia, ADHD, Severe Behavioral Disorder and more possible Learning Disabilities
- ♦ Analyze the characteristics of high abilities and why it is considered a Learning Disability
- ♦ Assess the role of socio-educationally disadvantaged children
- ♦ Outline the evaluation protocols to be followed by formal education centers at different educational levels
- ♦ Examine different standardized assessment tests in reading and writing
- ♦ Analyze assessment protocols in non-formal education, higher education or teaching skills
- ♦ Study the characteristics of speech disorders such as aphasia, dyslalia, dysglossia or dysphonia
- ♦ Diagnose intellectual disability, in conjunction with psycho-educational assessment and classroom intervention
- ♦ Classify psycho-educational intervention guidelines in classrooms with visually and hearing-impaired children

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the Internship Program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program certificate in Psychological Intervention in Learning Disabilities** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery*.

The certificate issued by TECH will reflect the grade obtained in the test.

Title: **Internship Program in Psychological Intervention in Learning Disabilities**
