tech 06 | Introduction

The World Health Organization (WHO) indicates that 1 in every 100 children has autism, although this figure is an estimate, since in low- and middle-income countries the control of this spectrum is unknown. Scientific and multidisciplinary interest in autism has increased in the last decades, which has led to advances in both its detection and approach. This Postgraduate Certificate, mainly addressed to psychology professionals, gives the opportunity to access a syllabus with updated content in this field.

A 100% online program, which will allow students to delve into the clinical etiology of autism spectrum disorders, the role of the family in the development of children with ASD, the different assessment tools and recent developments in this area. Likewise, through the innovative multimedia teaching material offered by this postgraduate certificate, the Psychology professionals will be able to acquire knowledge that will allow them to be aware of the latest advances in differential diagnosis, intervention methodologies or Clinical Psychology in the treatment of intellectual deficit and ASD.

All of this, in a high-level university education experience that will allow students to combine their Communication Management responsibilities with a Postgraduate Certificate that is at the educational forefront. This will be possible thanks to the availability of the syllabus from the beginning, which will allow students to distribute the teaching load according to their needs, and the online modality without classes with fixed schedules. In this way, the psychology professionals will be able to access from any electronic device with internet connection (computer, tablet or cell phone), whenever and wherever they wish. An education that provides flexibility while facilitating the renewal of knowledge about Autism Spectrum Disorders.

This **Postgraduate Certificate in Autism Spectrum Disorders** contains the most complete and up-to-date program on the market. The most important features include:

- Practical cases presented by experts in Psychology
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

With this program, you will be aware of the methodologies of intervention in clinical cases in children and adolescents with ASD"

The library of multimedia resources and the complementary material will allow you to extend the syllabus of this Postgraduate Certificate"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

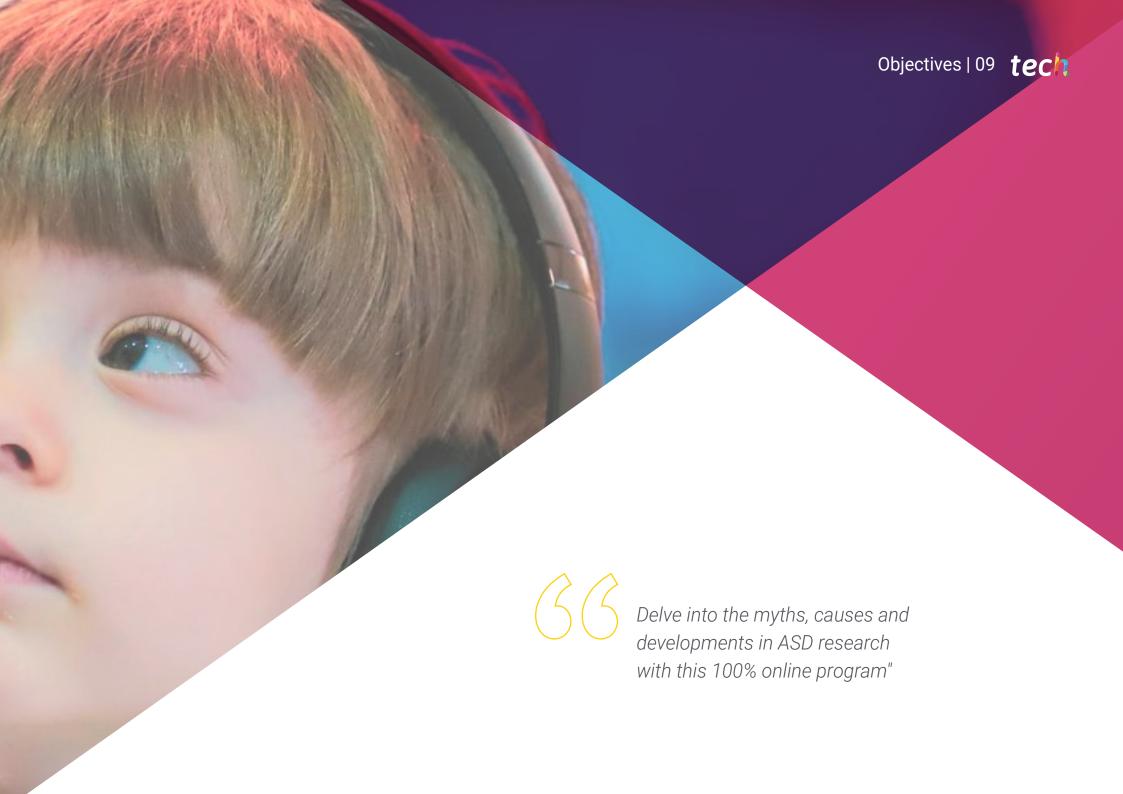

You have 150 hours of intensive high-level teaching on the Autism Spectrum, at your fingertips.

Delve into the changes produced in the diagnostic categorization of Autism Spectrum Disorders with this online program.

This Postgraduate Certificate provides the Psychology professionals with the most up-to-date content on the autism spectrum, which will allow them to renew their knowledge in this field. Thus, upon completion of this 6-week program, students will have delved into the myths and truths about autism, the different theories that explain ASD and the relevance that is having in recent years the correct early diagnosis. The Relearning system, based on the reiteration of content, offered by TECH in all its programs, will favor the renewal of knowledge in a more natural and progressive way.

tech 10 | Objectives

General Objectives

- Acquire complete and comprehensive education in Clinical and Health Psychology
- Provide the students with the conceptual and theoretical knowledge of Clinical and Health Psychology
- Differentiate illness from health
- Know the psychological models in Clinical and Health Psychology
- Conduct psychological evaluations
- Design prevention protocols for health psychology and health promotion
- Know the aspects that affect clinical practice
- Manage the knowledge, skills, techniques, resources, and strategies needed to perform clinical practice
- Understand professional guidelines for good practice within the psychology profession

Specific Objectives

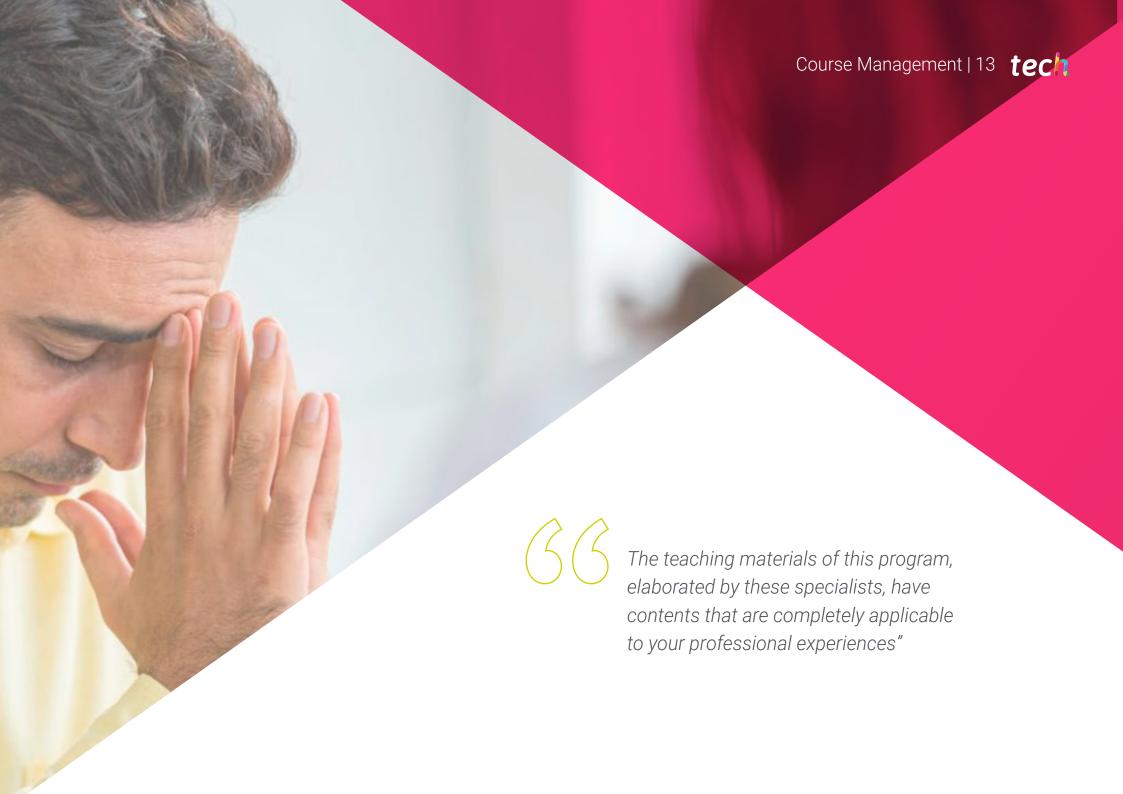

- Know the changes that have occurred in the diagnostic categorization of disorders on the autism spectrum
- Study the myths and truths of autism that exist in the world and that can cause stereotyping
- Identify the possible theories on the origin of ASD
- Study the main intervention methods for children with ASD
- Learn the importance of early diagnosis in children with ASD

A University Course that will allow you to renew your knowledge on early diagnosis with children with ASD"

International Guest Director

Dr. Bunmi Olatunji has a long career in research in the area of Psychology, and his main area of study focuses on Cognitive Behavioral Theory and Anxiety Disorder Therapy. In his position as Director of Clinical Training in the Department of Psychological Sciences, at Vanderbilt University, he has examined the role of basic emotions, with one of his main lines of study being the relationship between the experience of disgust and the specific symptoms of anxiety disorder.

Throughout his professional career, he has published more than 160 articles in scientific journals and book chapters specialized in Psychology. In addition, he has participated in more than 100 conferences on this subject. In fact, his relevant contributions have positioned him as a reference in this area of study. For this reason, he has received several awards, such as the Distinguished Scientist Award from the American Psychological Association.

In addition, Dr. Bunmi Olatunji has delved into the analysis of anxiety and behavioral changes. In particular, he has conducted a study in which he has observed the psychological predictors of anxiety and fear of contagion during the Swine Flu pandemic. Moreover, he has conducted research on obsessive-compulsive disorders and post-traumatic stress disorders in war veterans.

As a leading specialist in this field of study, he is on the editorial board of several journals, such as the International Journal of Cognitive Therapy and the Journal of Obsessive-Compulsive and Related Disorders. In this way, his commitment to excellence has been key in his career, disseminating his findings. In particular, his abilities to contribute to advances in clinical care and treatment of psychological conditions affecting individuals stand out.

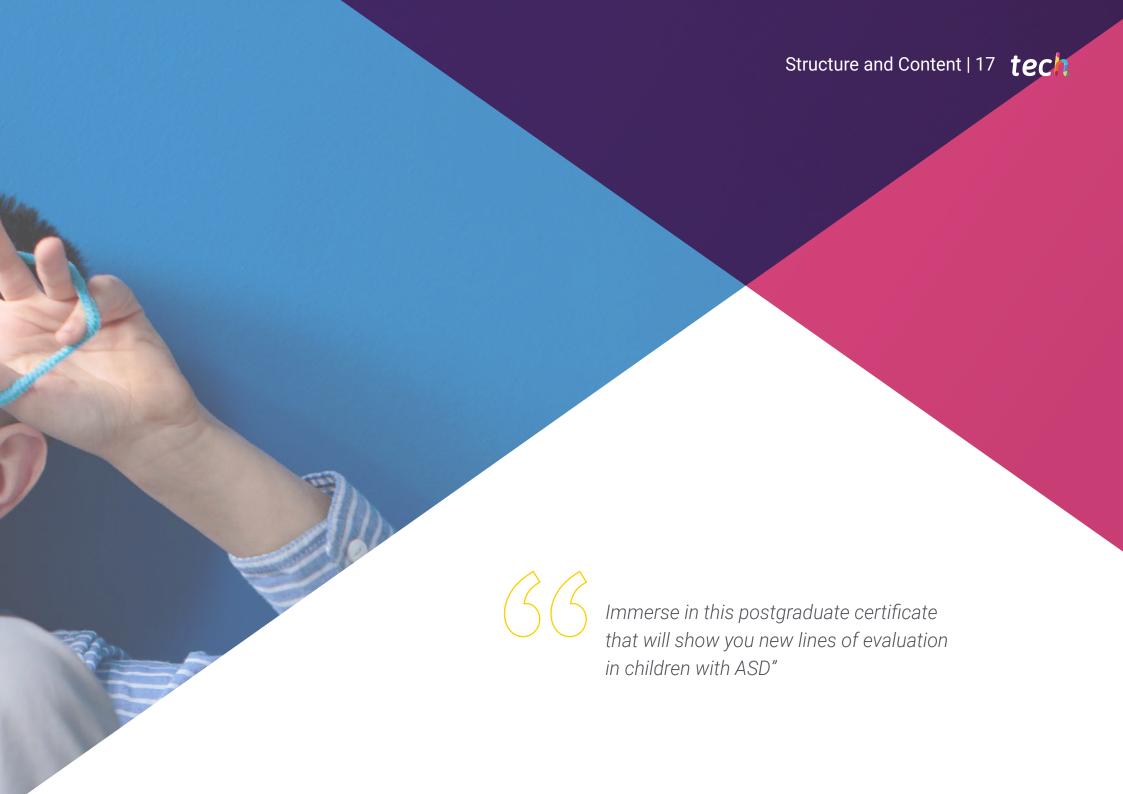

Dr. Olatunji, Bunmi

- Director of Clinical Training at Vanderbilt University, Nashville, United States
- Clinical Therapist
- Researcher specialized in Clinical Psychology
- Associate Editor of the Journal of Consulting and Clinical Psychology
- Ph.D. in Clinical Psychology from the University of Arkansas
- Graduate in Psychology from the University of Wisconsin-Stevens Point

tech 18 | Structure and Content

Module 1. Autism Spectrum Disorders

- 1.1. Myths About the Autism Spectrum Disorders
 - 1.1.1. Introduction to the Autism Spectrum
 - 1.1.2. Myths and Stereotypes on ASD
 - 1.1.3. The Truth About ASD
- 1.2. Autism Spectrum Disorders as a General Diagnostic Category
 - 1.2.1. ASD in the DSM-5-TR
 - 1.2.2. Categorization of ASD According to the DSM-5
 - 1.2.3. Positions on DSM-V Categorization
- 1.3. Clinical Etiology of Autism Spectrum Disorders
 - 1.3.1. Introduction to Etiology of ASD
 - 1.3.2. Main Theories on the Origin of ASD
- 1.4. Family Atmosphere in the Psychopathology of the Autism Spectrum: Consequences, Family Adaptation
 - 1.4.1. Introduction to the Role of the Family in the Development of Children with ASD
 - 1.4.2. Protective and Risk Factors in the Family
 - 1.4.3. Consequences in the Family When a Member Has ASD
- 1.5. Evaluation Instruments for Diagnosis in Autism Spectrum Disorders
 - 1.5.1. Introduction to Assessment and Diagnosis of ASD
 - 1.5.2. Main Evaluation Instruments for the Diagnosis of ASD
 - 1.5.3. New Lines of Research
- 1.6. Comorbidity and Differential Diagnosis
 - 1.6.1. Introduction
 - 1.6.2. ASD Comorbidity
 - 1.6.3. ASD Differential Diagnosis

Structure and Content | 19 tech

- 1.7. Intervention Method in Clinical Cases in Children and Adolescents With ASD
 - 1.7.1. Introduction to Intervention in ASD
 - 1.7.2. Main Intervention Methodologies
- 1.8. The Role of Early Care as a Tool of Clinical Psychology
 - 1.8.1. What is Early Care?
 - 1.8.2. Early Care in ASD
 - 1.8.3. The Current Importance of Early Care
- 1.9. Intellectual Deficit and Autism Spectrum Disorders
 - 1.9.1. Introduction to the Concept of Intellectual Deficit
 - 1.9.2. Relationship Between ASD and Intellectual Deficit
 - 1.9.3. Clinical Psychology in the Treatment of Intellectual Deficit and ASD

Thanks to this Postgraduate Certificate, you will delve into the relationship between ASD and Intellectual Deficit"

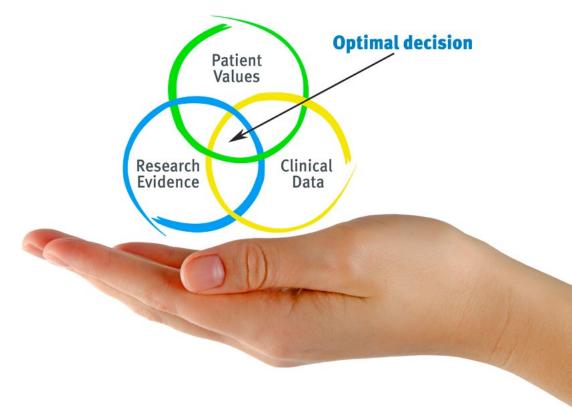

tech 22 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- 1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
- 2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

tech 24 | Methodology

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

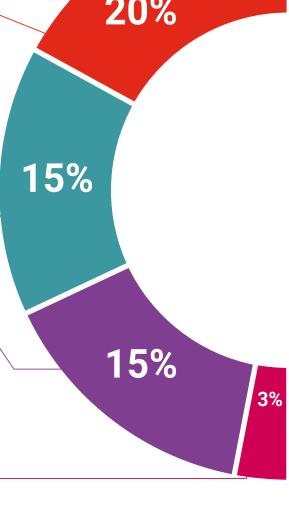

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

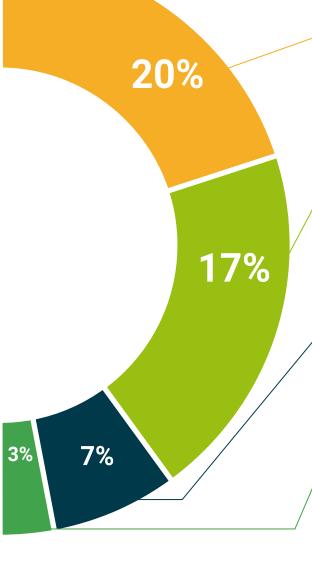

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Certificate** in **Autism Spectrum Disorders** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Autism Spectrum Disorders

Modality: online

Duration: 6 weeks

Mr./Ms. Cristian David Velasquez Granada, with identification document 31914606J has successfully passed and obtained the title of:

Postgraduate Certificate in Autism Spectrum Disorders

This is a program of 150 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
