01

Introduction

This program offers specialized knowledge to adequately create a bond with the dogs trained for Assisted Interventions while respecting their nature and understanding their way of learning. All the work done with Assisted Intervention dogs must be built around the animals' well-being to ensure quality work commitment and due responsibility toward them.

“

You will have at your disposal a complete compendium of materials in multimedia format that will facilitate your learning”

Throughout these weeks of training, students will develop transversal competences at a theoretical and practical level, specifically in therapies conducted with different types of patients and in the management of animals most commonly used in AAI. They will have the ability to develop Assisted Therapy methodologies based on specific patient objectives and/or a systematic methodology that guarantees learning

For many years the company of dogs in society has resulted in a series of dog-human activities that take advantage of the sociable potential that dogs have to interact with complex social systems. The high domestication of the canine species throughout history has given rise to the opportunity to understand their instinctive, cognitive and emotional states, giving greater relevance to the quality of life offered to them. Psychologists will be able to develop structured methodologies for Animal-Assisted Interventions, adjusted to each user (patient or trainee) and marked by clear and achievable objectives

All this in a 100% online update program, which will allow students to increase their professional knowledge and grow as psychologists while balancing their studies with the rest of their activities. Thus, professionals will be able to grow and position themselves in the field without leaving aside any aspect of their life

This **Postgraduate Certificate in Canine-Assisted Interventions** contains the most complete and up-to-date academic program on the market. The most important features of the program include:

- » Practical cases presented by experts in Animal-Assisted Therapies
- » The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- » Breakthroughs in Animal-Assisted Therapies
- » Practical exercises where the self-assessment process can be carried out to improve learning
- » Special emphasis on innovative methodologies in Animal-Assisted Therapies
- » Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- » Content that is accessible from any fixed or portable device with an Internet connection

Welcome to the Postgraduate Certificate that will help you achieve your professional goals and position yourself as a leading Psychologist”

“

This program is the opportunity you were waiting for to take your career to the next level and become a prestigious Psychologist in a booming sector”

Invest in knowledge and differentiate yourself from the competition by taking this complete academic program.

Psychologists must continue learning to adapt to new developments in the field.

The program's teaching staff includes professionals from the field of Psychology, who bring their experience to this training program, as well as renowned specialists from leading communities and prestigious universities

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program designed to train in real situations

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic program. For this purpose, the professional will be assisted by an innovative, interactive video system created by renowned and experienced experts in Animal-Assisted Therapies

02

Objectives

After completing this training, Psychologists will be fully capable of designing and implementing this type of interventions with dogs, offering optimal conditions for both the animals and the users participating in the therapy. This will not only increase their professional skills, but will also turn them into first-level practitioners

“

A high-level specialization that stands out thanks to the quality of its contents and its excellent teaching staff, made up of professionals with years of experience”

General Objectives

- » Analyze the natural behaviors displayed by the canine species in order to convert them into capacities and potentialities in the use of assisted interventions
- » Make an objective assessment of the characteristics and minimum requirements that an Assisted Intervention dog must have in terms of its behavioral development
- » Generate skills and management tools in guide animal through the understanding of canine learning to facilitate the development of a working session
- » Identify the minimum care dogs require and the problems that may arise in a working session

“

This 100% online Postgraduate Certificate will allow you to balance your studies with your work while increasing your knowledge in the field”

Specific Objectives

- » Examine the development of the natural behaviors of dogs, both instinctive and acquired, and the influence of human behavior in each of them
- » Conduct a detailed evaluation of the positive behaviors in the dog to be incorporated into an Assisted Intervention Program, as well as the behaviors that could generate problems in the learning process
- » Adequately interpret the results of behavioral selection tests performed on the dogs to be included in the Assisted Intervention Program
- » Generate a training protocol according to the qualities of the dog and the work objectives in each session
- » Propose methodological alternatives in the intervention sessions based on the objectives previously set for each user
- » Routinely assess the health status of intervention dogs, identifying red flags or signs of discomfort for timely psychological response
- » Identify behavioral problems that develop in intervention dogs before, during, and after sessions with users

03

Course Management

The program includes in its teaching staff experts from different areas related to Animal-Assisted Therapy. Thus, those who decide to take the program will benefit from the professional experience and prestige our professors have in the area of psychology, who will help students better understand how Animal-Assisted Therapies work from a multidisciplinary approach by becoming more familiar with the conditions and characteristics for which these interventions have a higher success rate.

“

*A unique specialization meticulously
designed by professionals of prestigious”*

Management

Mr. Alarcón Rodríguez, Óscar Fabián

- ♦ Veterinary ethologist in charge of consultations within the specialty, and dog selection evaluator for Assisted Interventions Red Cross Canine Center
- ♦ Training and veterinary care for day care dogs Canino Gopet Center
- ♦ Care and management of horses and birds of prey Served as support in animal interventions for people with functional diversities Teanima Association
- ♦ Care, training and handling of birds of prey at Weltvogelpark Zoo
- ♦ Planning and execution of Canine and Equine Assisted Therapies Colombian Center for Neurosensory Stimulation (CECOEN)
- ♦ Master's Degree in Animal-Assisted Intervention and Applied Ethology Autonomous University of Madrid
- ♦ Diploma in Clinical Ethology Center for Veterinary Medical Specialties (CEMV) (Buenos Aires, Argentina)
- ♦ Veterinarian and Zootechnician. San Martín University Foundation (Bogotá, Colombia)
- ♦ TAC Norte Canine-Assisted Intervention Specialty Course Trainings
- ♦ Red Cross Canine Center Courses in canine training and Canine-Assisted Intervention AMKA Dog Day Care Center Courses in Ethology and Canine Training

**Ms. Fernández Puyot, Marisol**

- ♦ Animal-Assisted Therapy Coordinator
- ♦ Therapy Session Coordinator; around 120 monthly therapies with dogs, horses, birds of prey and small mammals
- ♦ Leads a multidisciplinary team of nine made up of psychologists, physiotherapists, animal-assisted therapy technicians, equestrian guides, trainers, stable hands, etc.
- ♦ Collaborator and volunteer at the PE&CO Association
- ♦ Founder and creator of the Teanima Association
- ♦ Animal-Assisted Therapy, Complutense University of Madrid
- ♦ Trainee Instructor at Teanima Association for graduates in TAFAD and TECO from different institutes of the Community of Madrid and for graduates in Sociology and Pedagogy from the Complutense University of Madrid

Professors**Ms. Prittwitz Sanz, Clara**

- » Psychologist at Teanima Association (Animal-Assisted Therapy)
- » Degree in Psychology, Complutense University Madrid
- » Postgraduate Diploma in Equine Ethology and Equestrian Therapies, Universidad Autónoma de Madrid
- » Internship tutor at Teanima Association for Complutense University, UNED and Rey Juan Carlos University students

04

Structure and Content

The content structure has been designed by the best professionals in the Animal-Assisted Therapy sector, with extensive experience and recognized prestige in the profession, backed by the volume of cases reviewed, studied, and diagnosed, with extensive knowledge of new technologies applied to veterinary medicine. This ensures that after completing the program, Psychologists will be fully qualified to work in Animal-Assisted Interventions from a multidisciplinary approach that favors both humans and animals.

“

This Postgraduate Certificate contains the most complete and up-to-date program on the market”

Module 1. Canine-Assisted Interventions

- 1.1. Canine Ethology
 - 1.1.1. Behavioral Genetics
 - 1.1.2. Behavioral Developmental Processes in Puppies
 - 1.1.3. Canine Communication
 - 1.1.4. Intraspecies and Interspecies Hierarchies
 - 1.1.5. Hormonal Influence on the Development of Canine Behaviors
 - 1.1.6. Play Behavior
- 1.2. Canine Intelligence
 - 1.2.1. Understanding Human Language
 - 1.2.2. Problem Solving Skills
 - 1.2.3. Studies on the Most Intelligent Breeds
- 1.3. Dog Characteristics for Assisted Interventions
 - 1.3.1. Physical Characteristics
 - 1.3.2. Behavioral Characteristics
 - 1.3.3. Selectively Bred or Pedigreed Dogs
 - 1.3.4. Dogs from Shelters or Pounds
- 1.4. Canine Selection Methods for Assisted Interventions
 - 1.4.1. Campbell's Test
 - 1.4.2. Canine Behavioral Assessment and Research Questionnaire (C-BARQ)
 - 1.4.3. The Ecological Test Ethotest
 - 1.4.4. Other Protocols for Canine Selection
- 1.5. Training Techniques
 - 1.5.1. Traditional Training
 - 1.5.2. Positive Training
 - 1.5.3. Shaping
 - 1.5.4. Luring
 - 1.5.5. Targeting
 - 1.5.6. Clicker Use
- 1.6. Management Training Techniques
 - 1.6.1. Propaedeutics for Learning
 - 1.6.2. Attention to Calling
 - 1.6.3. Walking Side by Side
 - 1.6.4. Standing Orders
 - 1.6.5. Muzzle Use
- 1.7. Training Techniques by Objectives
 - 1.7.1. Grasping, Bringing and Releasing Objects
 - 1.7.2. Going to a Place
 - 1.7.3. Barking on Command
 - 1.7.4. Behavior Imitation
- 1.8. Canine Handling during Sessions
 - 1.8.1. Canine Handling and Activity Elements
 - 1.8.2. Controlled Approach with Users
 - 1.8.3. How to End a Session with the Dog
- 1.9. Veterinary Care
 - 1.9.1. Preventive Medicine
 - 1.9.2. Basic First Aid
 - 1.9.3. Genetic Problems of Common Intervention Breeds
 - 1.9.4. Nutrition and Diet
- 1.10. Detecting Canine Behavior Problems
 - 1.10.1. Stress Factors
 - 1.10.2. Aggressiveness
 - 1.10.3. Fear, Anxiety and Phobia
 - 1.10.4. Impulsiveness
 - 1.10.5. Senility

“

*An academic experience that
will lay the foundation for your
professional growth”*

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

05

Certificate

The Postgraduate Certificate in Canine-Assisted Interventions guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Canine-Assisted Interventions** contains the most complete and up-to-date program the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by job markets, competitive professional career evaluation committees.

Title: **Postgraduate Certificate in Canine-Assisted Interventions**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
