01

Introduction

Forensic psychology is fundamental in the administrative process of justice. This makes it essential for forensic psychologists to expand their knowledge in this field. In this case, TECH offers the most complete program related to childhood and adolescence. The professional should not miss this opportunity and specialize at the largest online university in the world.

“

Improve your knowledge in Childhood and Adolescence in Forensic Psychology, through this program, where you will find the best didactic material with real clinical cases”

Psychology is the science that studies human behavior, tries to give explanations for the behaviors performed by human beings and infers which behavior is more likely to occur under certain circumstances. The specialty of Forensic Psychology studies all this applied to the field of justice.

The objective of the Postgraduate Certificate in Childhood and Adolescence in Forensic Psychology is to cover a field of research that is booming thanks to the professionals who want to continue specializing in this area. This Postgraduate Certificate is intended to provide knowledge about the multiple topics that are developed within the Forensic Psychology, as well as the explanation and implementation of various questionnaires used in professional practice that help to know the current pathologies in the individual, to be able to make the assessment of them when appropriate.

In this program, topics related to the world of Forensic Psychology and its relationship with the courts will be studied. Specifically, it has several theoretical blocks where topics such as interviewing minors, sexual assaults on children or risk factors for crime, for example, will be developed.

In addition, this 100% online program will allow the student to continue with their learning while performing other duties in their daily life, as they can organize themselves and choose when and where to study, since they only need a device with an Internet connection. The professional should join this community of students and will notice how they advance in their career.

This **Postgraduate Certificate in Childhood and Adolescence in Forensic Psychology** contains the most complete and up-to-date program on the market. Its most notable features are:

- ♦ The development of case studies presented by experts in psychology and scientific research
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for carrying out research
- ♦ New developments and innovations in research in the different fields of Psychology
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- ♦ Special emphasis on research methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge through the Postgraduate Certificate in Childhood and Adolescence in Forensic Psychology”

“

This Postgraduate Certificate is the best investment you can make when selecting an updating program for two reasons: in addition to updating your knowledge in Childhood and Adolescence in Forensic Psychology, you will obtain a diploma from TECH Technological University"

The program includes in its teaching staff professionals belonging to the field of Legal and Forensic Psychology, who pour into this program the experience of their work, as well as recognized specialists from leading scientific societies.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program designed to learn in real situations.

The design of this program is based on Problem-Based Learning, by means of which the psychologist will have to try to solve the different professional practice situations that are presented to them. To do so, the professional will have the help of an innovative interactive video system developed by recognized experts in the field of Child and Adolescent Forensic Psychology and with great experience.

Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.

Take the opportunity to learn about the latest advances in Childhood and Adolescence in Forensic Psychology and develop yourself in this exciting field.

02

Objectives

The Postgraduate Certificate in Childhood and Adolescence in Forensic Psychology is designed to help Psychologists act in forensic and legal environments in which their clinical experience is required.

“

This Postgraduate Certificate will allow you to update your knowledge in Childhood and Adolescence in Forensic Psychology with the use of the latest educational technology to contribute with quality and confidence to decision making"

General Objectives

- ♦ Broaden the knowledge of psychology applied to the legal field
- ♦ Facilitate the acquisition of knowledge about forensic psychology, as well as to assess the different cases presented
- ♦ Promote the acquisition of skills and abilities in the forensic field
- ♦ Encourage the study of this program through a theoretical-practical basis

- ◆ Understand how to interview child victims of mistreatment or sexual abuse
- ◆ Analyze the most relevant aspects of child issues, custody assessment and sexual assault
- ◆ Analyze adolescent psychology and criminal careers, as well as the application of the penal code at early ages of growth
- ◆ Interpret psychometric tests used by specialists
- ◆ Learn about the most common diseases associated with sexual abuse

“

Take the step to get up to date on the latest developments in Childhood and Adolescence in Forensic Psychology”

03

Structure and Content

The structure of the contents has been designed by a team of professionals from the best forensic centers and universities, who are aware of the relevance of up-to-date knowledge to be able to intervene in situations that require a forensic and legal psychological approach, and are committed to quality teaching through new educational technologies.

“

We have the most complete and up-to-date academic program in the market. We strive for excellence and for you to achieve it too”

Module 1. Children and Adolescents in Court

- 1.1. Interviewing Minors
- 1.2. Contested Custody and Guardianship Evaluation
- 1.3. Sexual Assault in Children
- 1.4. Sexual Assault Assessment
- 1.5. Risk Factors for Delinquency
- 1.6. Psychopathic Disorders Associated with Delinquency
- 1.7. Assessment of Violent Behavior

“

A unique, key, and decisive experience to boost your professional development”

04

Methodology

This program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH, we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a “case”, an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to assess real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to balance the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has enabled more than 150,000 psychologists with unprecedented success in all clinical specialties. Our educational methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your education, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically assess and re-assess students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

05

Certificate

The Postgraduate Certificate in Childhood and Adolescence in Forensic Psychology guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“
