Index

01
Introduction

The psychological expert must comply with the principles of welfare, justice, non-maleficence, fidelity, responsibility and integrity. The report is the document where all information gathered in the expert's assessment is presented and, therefore, it must comply with all these principles, since it is nothing more than the expert's voice.

The aim of this Postgraduate Certificate is to achieve specialist knowledge in this area. The course is unique in its design, allowing the to successfully master the process of completing an expert report"

The guarantee of the expert evidence has its basis in the Law itself. The law makes it explicit that the purpose of the psychological expert report is the analysis of human behavior within the framework of the law. Articles 1242 of the Civil Code, 610 of the Civil Procedure Law and 456 of the Criminal Procedure Law state that it is necessary (when convenient) to have scientific, artistic or practical knowledge in litigation.

This Postgraduate Certificate achieves this objective in a unique way, teaching the art of designing and writing everything that happens in the expert appraisal within the framework referred to in the aforementioned psychological expert report.

This **Postgraduate Certificate in Completing an Expert Report** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- Clinical cases presented by experts in psychology. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- The latest diagnostic and therapeutic techniques in Completing an Expert Report.
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- With special emphasis on evidence-based psychology and research methodologies in psychology
- Content that is accessible from any fixed or portable device with an Internet connection.

Update your knowledge through the Postgraduate Certificate in Completing an Expert Report, in a practical way and adapted to your needs"

This program may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge in Completing an Expert Report, you will obtain a Postgraduate Certificate from TECH Global University"

The course includes real clinical cases and exercises to bring the content of the course closer to the clinical practice of a psychologist.

Forming part of the teaching staff is a group of professionals in the world of psychology who bring to this course their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

Problem-Based Learning underpins this program design, and the doctor must use it to try and solve the different professional practice situations that arise throughout the Postgraduate Certificate. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of psychology with extensive teaching experience.

02
Objectives

The principal objective of the program is the development of both theoretical and practical learning, so that the professional can master, in a practical and rigorous way, the study of Completing an Expert Report.

"This program will provide you with the skills to carry out your psychological praxis with confidence and will help you to grow both personally and professionally"

General Objectives

- Facilitate the understanding of the expert report from the knowledge of the jargon and the literature of the legal professionals and social care bodies.

- Promote the knowledge of the instruments that discriminate between simulation and lying, as well as to know how to control the emotional state of the patient who is undergoing an expert appraisal.

- Encourage the psychology professional to maintain continuous training and develop their scientific knowledge.

- Master understanding of the code of ethics and the client's status, as well as all the regulations that must be met in order to perform their work within the law.

- Involve the professional in the drafting of a report that complies with the legality for which it has been requested.

Make the most of the opportunity and take the step to get up-to-date on the latest developments in Completing an Expert Report"

Specific Objectives

- Verify the implication of expertise within the professional framework of psychologists.

- Address new perspectives of psychological assessment.

- Development of the diagnostic itinerary both from the D.S.M. 5 as well as by C.I.E-10

- Be comfortable with the basics of the patient's right and the psychologist's code of ethics.

- Identify the divergent points between digital and analog communication within the framework of expert psychology.

- Describe the structure of the psychological report according to the area being assessed, so that it is within the law.

- Acquire the skills to prepare a report within the legal jargon and judicial literature.

- Manage stressful situations that may arise during the appraisal process.

- Ensure that the professional is trained to defend their report in a tribunal.

- Incorporate expertise into a global framework of psychological intervention.

03

Course Management

This program includes highly regarded health professionals in the field of psychology in its teaching staff, who bring the experience of their work to this training.

In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

Learn about the latest advances in Completing an Expert Report from leading professionals"

04
Structure and Content

The structure of the contents has been designed by a team of professionals who recognise the implications of training in psychology, aware of the relevance of current training to treat the patient with psychological disorders or needs with quality teaching using new educational technologies.

This Postgraduate Certificate in Completing an Expert Report contains the most complete and up-to-date scientific program on the market"

Module 1. Types of Reports and their Different Reporting Procedures

A unique, key, and decisive training experience to boost your professional development"

05
Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: *Re-learning*.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the *New England Journal of Medicine* have considered it to be one of the most effective.

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

## At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program students will be presented with multiple clinical symptoms simulated cases based on real patients in which they will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

> *Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.*

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.

2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.

3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.

4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a high socioeconomic profile and an average age of 43.5 years old.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All the teaching materials are specifically created for the course, by specialists who teach on the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.
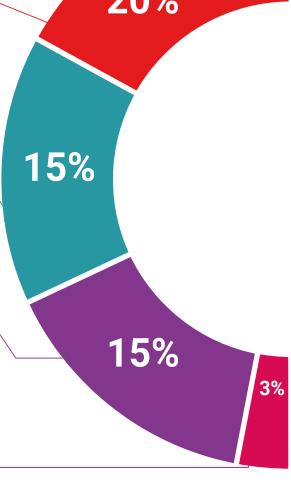

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques and educational advances at the forefront of psychology. All this, first-hand, with the maximum rigor, explained in detail to contribute to the assimilation and understanding of the students. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-Testing

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.
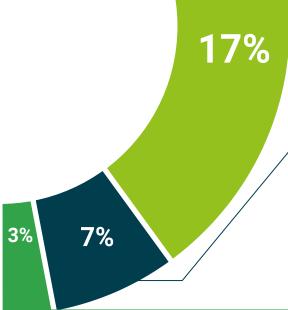

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

Certificate

The Postgraduate Certificate in Completing an Expert Report guarantees, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Global University.

Successfully complete this training and receive your diploma without the hassle of travel or paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Completing an Expert Report** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003.
