Introduction

Dieting is an achievement associated with feelings of self-rejection and control over body desires and other areas of their lives. In addition to pressures on women to fulfill themselves, to be useful, independent and competitive and also to maintain their traditional role of wife, housewife and mother, although all this is not sufficient for the development of AN or BN, but it does create an environment for the expression of these disorders in the case of individual predisposition.

“

With this specialized program, you will learn to analyze the role that the family plays in the development of this type of disorder and you will become a much more competent professional"

The reality of eating disorders has been changing over the last thirty years. Nowadays, there are many different groups of individuals who are very concerned about their figure, both women and men, although eating disorders are still more common in women. Anorexia Nervosa (AN) or Bulimia Nervosa (BN) generally affect more women, although the same is not true for Bigorexia, where the percentage of men is three times that of women.

The age of onset of these diseases has also changed, in the 80s of the last century, the diagnosis of AN or BN existed from the age of 18 years, today there are people who meet the criteria for AN and BN in adulthood, with children or maintaining a romantic relationship.

Individuals with extreme attitudes towards food control are very heterogeneous and differential diagnostic studies do not always detect Anorexia Nervosa (AN) or Bulimia Nervosa (BN). This is why the role of psychologists is so important.

That is why TECH has created this program, which serves the psychologist as a knowledge tool to treat eating disorders, including the influence of the family for each patient is specific. Therefore, it is a 100% virtual program, with audiovisual material and self-knowledge exercises.

This **Postgraduate Certificate in Family Influence in Eating Disorders** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Development of clinical cases presented by courses in psychology
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Diagnostic and therapeutic developments on the influence of the family in Eating Disorders.
- ♦ Decision-making on the clinical situations raised
- ♦ With a special emphasis on evidence-based medicine and research methodologies in emergencies
- ♦ All this will be complemented with theoretical lessons, course questions, discussion forums on controversial issues and individual reflection papers
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Expand your knowledge through the Postgraduate Certificate in Family Influence in Eating Disorders and adapted to your needs”

“

This Postgraduate Certificate may be the best investment you can make when selecting a refresher program for two reasons: in addition to updating your knowledge in Family Influence in Eating Disorders, you will obtain a qualification endorsed TECH Global University"

Forming part of the teaching staff is a group of professionals in the world of Psychology who bring to this training their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations.

This program is designed around Problem-Based Learning, where students must try to solve the different professional practice situations that arise during this academic course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of radiology with extensive teaching experience.

The Postgraduate Certificate includes real clinical cases and exercises to bring the development of the Family Influence in Eating Disorders closer to the psychologist's clinical practice.

Make the most of this opportunity to learn about the latest advances in Family Influence in Eating Disorders.

02

Objectives

The main objective of the program is the development of theoretical and practical learning, so that the psychologist can master in a practical and rigorous way the Family Influence in Eating Disorders.

“

This program will provide you with the skills to carry out your psychological praxis with confidence and will help you to grow both personally and professionally”

General Objectives

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in the daily practice of the psychologist in the Family Influence in Eating Disorders, aware of the current relevance of specialization to be able to act before the patient with Eating Disorders, with quality teaching through new educational technologies.

“

This Postgraduate Certificate in Family Influence in Eating Disorders contains the most complete and up-to-date program on the market”

Module 1. The Family in Eating Disorders

- 1.1. Study and Assessment of Family Functioning
 - 1.1.1. Family as a Trigger
 - 1.1.2. Clinical Role
 - 1.1.3. Family to Contain the Disorder
- 1.2. Identification of the Type of Family
 - 1.2.1. Functional Dependency and Functions
 - 1.2.2. Family Structure and Content
 - 1.2.3. Family Characteristics
- 1.3. Psychopedagogical Expertise
 - 1.3.1. School History
 - 1.3.2. General Development of the Students
 - 1.3.3. Teaching and Learning Process
 - 1.3.4. Influence of Family and Social Context
 - 1.3.5. Identification of Special Educational Needs
 - 1.3.6. Syllabus Proposal
- 1.4. Marital Separation
 - 1.4.1. Evaluation of Adults on an Individual Basis
 - 1.4.2. Individual Evaluation of Minors
 - 1.4.3. Family Environment Evaluation
 - 1.4.4. Interactions Analysis
 - 1.4.5. Conclusions
 - 1.4.6. Recommendations
- 1.5. Laboral Disability
 - 1.5.1. Deficiency, Disability and Handicap
 - 1.5.2. Civil Incapacity and Labor Incapacity
 - 1.5.3. Degrees of Permanent Disability
 - 1.5.4. Major Disability

- 1.6. Gender Violence
 - 1.6.1. Psychological Violence
 - 1.6.2. Psychological Consequences of Violence
- 1.7. Abuse
 - 1.7.1. Confirmation
 - 1.7.2. Psychological Consequences
 - 1.7.3. Causal Nexus
- 1.8. Psychological Appraisal of Family Members
- 1.9. Juvenile Expertise
- 1.10. Expert Guardian and Custody
- 1.11. Adoption Expertise
- 1.12. New Expressions of Eating Disorders
- 1.13. Toxicomania

A unique, key, and decisive educational experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically assess and re-assess students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Family Influence in Eating Disorders guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Family Influence in Eating Disorders** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (**official bulletin**). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Family Influence in Eating Disorders**
