01

Introduction

In general, the psychosocial intervention of schizophrenics is aimed primarily at informing and educating the patient about the symptoms, course university, prognosis and treatment of their illness, as well as the need for compliance and management of medication and identification of early signs of relapse.

“

This Postgraduate Certificate is unique in that it presents a whole arsenal of technology that the psychologist can offer to psychotic and personality disorders Always within a multidisciplinary environment, combining psychological and social intervention with pharmacotherapy”

It is not easy or quick to establish a differential diagnosis of Personality Disorders with specific psychiatric diseases. Detecting this alteration in medical practice is of utmost importance. In most patients the abnormal features become apparent as early as childhood and adolescence, and remain hidden or ignored until adulthood. Personality traits are considered abnormal only to the extent that they are conflicting for the subject or society. Undoubtedly, the most frequent additional diagnosis in subjects with personality disorders is depression (or affective disorders). An important trend in current psychopathological research is the description of Personality Disorders in terms that allow for a reliable differential diagnosis.

The term schizophrenia was introduced by Bleuler in 1911, who considered it more appropriate to emphasize the splitting that occurs in the association of ideas, emotions and contact with reality and social life. Today schizophrenia is still one of the greatest challenges of science, affecting, as is well known, about 1% of the population. Much progress has been made in the knowledge of this disease (or diseases), but if we analyze what is currently known and what is ignored, we could conclude that we know more and more, but we continue to ignore many of the enigmas of this or these diseases.

It is clear that the predominant symptom in these chronic patients is impaired social performance. Therefore, psychosocial care of schizophrenic patients is of fundamental importance, since most of them have to learn or relearn social and personal skills in order to survive in the community. Neuroleptics cannot teach the patient to develop vital and defensive resources nor can they improve a person's quality of life, except indirectly through their effect on cognitive disorganization and suppression of positive symptoms.

However, some personality disorders classically considered to be character-dependent (e.g., depressive, anxious, etc.) have actually been shown to be subsyndromal forms of specific diseases. Most patients tend to show behaviors (and problems) suggestive of a personality disorder, which may make the clinician forget syndromes unrelated to personality.

This **Postgraduate Certificate in Tools Used in the Diagnosis of Psychotic and Personality Disorders** contains the most complete and updated scientific program on the market. The most important features of the Postgraduate Certificate are:

- ♦ Clinical cases presented by experts in the different specialties. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional.
- ♦ New diagnostic and therapeutic developments on the performance of tools used in the diagnosis of psychotic and personality disorders.
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- ♦ With special emphasis on evidence-based psychology and research methodologies in Psychology
- ♦ All of this will be complemented by theoretical lessons, questions to the program, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Expand your knowledge through the Postgraduate Certificate in Tools Used in Psychotic and Personality Disorders adapted to your needs”

“

This Postgraduate Certificate may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge in the diagnosis of psychotic and personality disorders, you will obtain a certificate from TECH Global University"

The Postgraduate Certificate includes real clinical cases and exercises to bring the development of the program closer to the psychologist. s clinical practice

Forming part of the teaching staff is a group of professionals in the world of psychology who bring to this course their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

Problem-Based Learning underpins this program design, and the doctor must use it to try and solve the different professional practice situations that arise throughout the Postgraduate Certificate. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of diagnosis of psychotic and personality disorders with extensive teaching experience.

02

Objectives

The main objective of the program is the development of theoretical and practical learning, so that the psychologist can master in a practical and rigorous manner the tools used in the diagnosis of psychotic and personality disorders.

“

This updating program will provide you with a sense of confidence in the practice of psychology, which will help you grow both personally and professionally”

General Objectives

- ♦ Describe the fundamentals of psychodiagnosis of psychotic disorders and personality disorders
- ♦ Perform differential diagnosis between personality disorders and psychotic disorders
- ♦ Describe the different subspecialties in the field of psychosis and personality disorders
- ♦ Master the current knowledge on medication used in psychiatry and neurology
- ♦ Train to achieve the therapist-patient-medication link
- ♦ Identify the absorption properties of medication
- ♦ Develop mastery of the positive and negative symptoms of psychotic disorders
- ♦ Describe in protocols the intervention programs, taking into account the characteristics and specific aspects of these disorders
- ♦ Identify the evolution of the different disorders listed in the DSM-5 or ICD-10

Seize the opportunity and take the step to get up to date on the latest developments in Tools Used in the Diagnosis of Psychotic and Personality Disorders"

Specific Objectives

- ♦ Manage the clinical practice stage of the patient, as well as to provide the necessary skills to work multidisciplinary
- ♦ Identify and make decisions about patients taking into account the social and emotional fabric in which they find themselves
- ♦ Master the adverse and permanent effects of these diseases
- ♦ Manage and stabilize the emotional and affective deficiencies of the patient within the intervention
- ♦ Master and manage the differential characteristics of psychotic pathologies
- ♦ Identify and master the clinical and prognostic features of the different disorders of childhood and adolescence with pharmacological intervention due to these disorders
- ♦ Use the intervention to determine when it is necessary for other professionals to join process
- ♦ Developing and understanding mutations and new forms of disease in personality disorders
- ♦ Develop knowledge that discriminates an important problem of natural evolution within the process of family coexistence
- ♦ Manage and master the systemic psychopathology that causes these disorders
- ♦ Develop monitoring models that express the changes of stress pathologies and chronic pathological mental states

03

Course Management

This program includes highly regarded health professionals in the field of psychology in its teaching staff, who bring the experience of their work to this training.

In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

*Learn the latest advances in Tools
Used in the Diagnosis of Psychotic and
Personality Disorders"*

Management

Segovia Garrido, Domingo

- Degree in Psychology. Murcia University. 1994-1999
- Master's Degree in Occupational Hazard Prevention F.E.C.M.E.S. 2003
- Master's Degree in Integrated Systems Management. FEDA. 2005
- Master's Degree in Clinical and Health Psychology. ISEP. 2004-05
- Psychologist at LASSUS Association for help against Depressive Syndrome. 2003-2012
- Former President of the LASSUS Association for help against Depressive Syndrome. 2006-2010
- Director-Psychologist of the Tinte23 Psychology Center. Since 2014
- Psychologist at Asociación Mentes Abiertas of La Roda (Association that works with family members and people with severe mental illness). Since 2015

Coordinator

Aguado Romo, Roberto

- Psychologist specialized in clinical psychology
- European specialist psychologist in psychotherapy
- Managing Director of evaluation and psychotherapy centers in Madrid, Bilbao, and Talavera de la Reina
- Author of Time-Limited Psychotherapy
- Researcher at CerNet, Emotional Network, and European Institute for Time-Limited Psychotherapies.

Professors

De Dios González, Antonio

- ♦ Director of Avatar Psychologists
- ♦ Director of the Psychology Department of Quirón Hospital of Marbella.
- ♦ Master's degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapies.
- ♦ Transpersonal Therapist by the Spanish School of Transpersonal Development
- ♦ EFT Specialist by the World Center for EFT
- ♦ Master in Neuro-Linguistic Programming (NLP) by Richard Bandler's Society of Neuro-Linguistic Programming.
- ♦ Specialist in Clinical Hypnosis and Relaxation

González, Mónica

- ♦ Psychologist in charge of the Department of Child and Adolescent Psychology in the Quirón Hospital and Avatar Psychologists in Marbella.
- ♦ Master's degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapy (IEPTL).

Martínez-Lorca, Manuela

- ♦ Doctorate in Psychology from the University of Castilla-La Mancha
- ♦ Health Psychologist.
- ♦ Lecturer at the Department of Psychology at the UCLM
- ♦ Master's degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapies.
- ♦ Specialist in Clinical Hypnosis and Relaxation

Roldán, Lucía

- ♦ Health Psychologist
- ♦ Cognitive-behavioral intervention specialist
- ♦ Master's Degree in Time-Limited Psychotherapy and Health Psychology
- ♦ Expert in energy therapy intervention

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in daily medical practice of tools used in the diagnosis of psychotic and personality disorders, aware of the relevance of today to be able to act before the patient with psychotic and personality disorders with quality teaching through new educational technologies.

“

This Postgraduate Certificate in Tools Used in the Diagnosis of Psychotic and Personality Disorders contains the most complete and updated scientific program on the market”

Module 1. Questionnaires and Tests Used in the Diagnosis of Psychosis and Personality Disorders

- 1.1. Projective Techniques in Expert Appraisal
- 1.2. Rorchach Test
 - 1.2.1. Application
 - 1.2.2. Presentation of Sheets
 - 1.2.3. Reaction Time
 - 1.2.4. Time of the Patient in Front of the Sheet
 - 1.2.5. Removal of Sheets. The Survey
 - 1.2.6. Rorschach Assessment
- 1.3. Expressive Techniques
- 1.4. Drawing (HTP)
 - 1.4.1. From the House
 - 1.4.2. Tree
 - 1.4.3. Person
- 1.5. Free Drawing
- 1.6. Family Drawing
- 1.7. Düss Fables
- 1.8. Desiderative Test
- 1.9. Max Lüscher Color Test
- 1.10. Thematic Apperception Test TAT
- 1.11. Psychometric Tests in Expertise
- 1.12. Wechsler Intelligence Test
 - 1.12.1. WISC-IV
 - 1.12.2. WAIS-IV
- 1.13. Neuropsychological Maturity Questionnaire
 - 1.13.1. Revised Barcelona Test
- 1.14. Raven's Progressive Arrays
- 1.15. The Good-enough Test
- 1.16. The Personality Test

- 1.17. Millon Multiaxial Clinical Millon Inventory (MCMI- III)
 - 1.17.1. Modifying Scales: Desirability and Index of Alteration
 - 1.17.2. Basic Personality Scales: Schizoid, Avoidant, Depressive, Dependent, Histrionic, Narcissistic, Antisocial, Aggressive-Sadistic, Compulsive, Passive-Aggressive, Self-Destructive, and Self-Destructive.
 - 1.17.3. Severe Personality Scales: Schizotypal, Borderline, and Paranoid
 - 1.17.4. Moderate Clinical Syndromes: Anxiety, Hysteriform, Hypomania, Depressive Neurosis, Alcohol Abuse, Drug Abuse, p-Stress d-Trauma Severe Clinical Syndromes: Psychotic Thinking, Major Depression and Psychotic Delirium
- 1.18. Catell's 16 PF-5
 - 1.18.1. Agreeableness, Reasonableness, Stability, Dominance, Encouragement, Attention to Standards, Boldness, Sensitivity, Vigilance, Abstraction, Privacy, Apprehension, Openness to Change, Self-sufficiency, Perfectionism and Tension
 - 1.18.2. Incorporates a "Social Desirability" (SI), an "Infrequency" (s Degree in) and an "Acquiescence" (AQ) Scale to Control for Response Bias
- 1.19. BASC Behavioral Assessment System for Children and Adolescents.
- 1.20. Personality Assessment Inventory PAI.
- 1.21. Children's Personality Questionnaire CPQ.
 - 1.21.1. Reserved/Open, Low/High Intelligence, Emotionally Affected/Stable, Calm/Excitable, Submissive/Dominant, Sober/Enthusiastic, Unconcerned/Conscientious, Cohibited/Entrepid, Hard/Soft Sensitivity, Confident/Doubting, Simple/Astute, Serene/Apprehensive, Less or More Integrated and Relaxed/Tensed
- 1.22. Clinical Analysis Questionnaire- CAQ.
- 1.23. Trait-State Anxiety Questionnaire in Children STAIC and in Adults STAI
- 1.24. Multifactor Self-Assessment Test of Child Adjustment - TAMAI
- 1.25. Questionnaire for the Evaluation of Adopters, Caregivers, Guardians and Mediators - care
- 1.26. Short Symptom Checklist - SCL -90 R
- 1.27. Study of the Story's Credibility
 - 1.27.1. The Statement Validity Assessment (SVA) Udo Undeutsch
 - 1.27.2. SVA = Interview + CBCA + Validity Checklist

05

Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given clinical situation, what would you do? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Psychologists learn better, faster, and more sustainably over time.

With TECH, psychologists can experience a way of learning that is shaking the foundations of traditional universities around the world

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only grasp concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. The learning is solidly focused on practical skills that allow the psychologist to better integrate the knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 150,000 psychologists with unprecedented success, in all clinical specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, with the latest educational advances, and to the forefront of psychology. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06

Certificate

The Postgraduate Certificate in the Tools Used in the Diagnosis of Psychotic and Personality Disorders guarantees you, in addition to the most rigorous and updated training, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this University Course and receive your university certificate without travel or laborious paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Tools Used in the Diagnosis of Psychotic and Personality Disorders** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Tools Used in the Diagnosis of Psychotic and Personality Disorders**

Modality: **online**

Duration: **6 weeks**

Accreditation: **8 ECTS**
