01 **Welcome**

Companies operate in highly competitive environments and must comply with a series of duties and obligations that affect them all. For this reason, companies have professionals specialized in labor and tax matters, either on their staff or as external consultants, who help them to stay up to date with all the obligations set by the regulations of their sector. Each operation, whether it is recruitment, dismissal or an economic transaction, involves a series of requirements that must be met, because in the event that all the steps are not complied with, it could lead to legal proceedings that end in financial penalties. In order to avoid these possible situations, TECH has designed this program aimed at business consultants, which provides the latest information on labor and tax consulting, so that these professionals acquire the skills that will allow them to improve in their daily practice and achieve success in their profession.

tech 08 | Why Study at TECH?

At TECH Global University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95%

of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

19.+

executives trained each year

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 19. different nationalities.

Why Study at TECH? | 09 tech

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 19.different nationalities.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

tech | Why Our Program?

This program will provide students with a multitude of professional and personal advantages, particularly the following:

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

tech 48 | Methodology

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 18.2 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 18.4, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

tech 50 | Methodology

Relearning Methodology

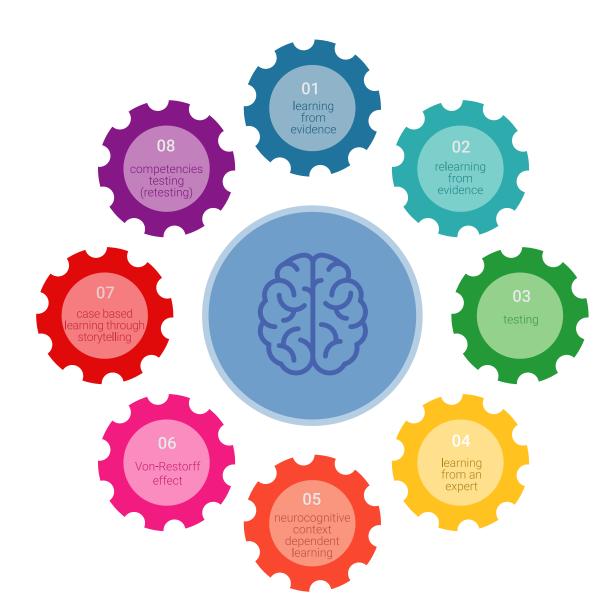

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 19.8. we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 51 **tech**

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 52 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

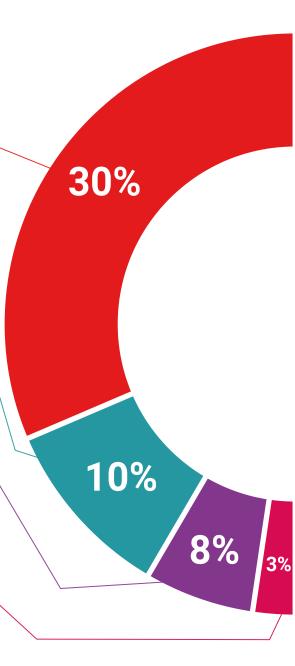

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Miguel Molina

Business Consultant

"This program has given me the opportunity to expand my learning in an area that is fundamental to my professional development. In this way, in this TECH Advanced Master's Degree I have found completely new information that I required for my professional practice, so that I have been able to update my knowledge and skills and now I am more confident when making decisions. In addition, the online modality has been a great plus, since I have been able to continue with my studies without having to put aside the rest of my committments"

Management

Dr. Taléns Visconti, Eduardo Enrique

- PhD in Law, Business and Justice. University of Valencia
- Degree in Law from the University of Valencia
- Master's Degree in Law, Business and Justice. University of Valencia
- Postgraduate Diploma in Mediation in Labor Relations University of Valencia
- XXVIII Congress of Labor Law and Social Security 'Productive decentralization: new forms of work and business organization'.
- Attendance at the XXVII National Congress of the AEDTSS (Spanish Labor Law Association) 'Balance and Perspectives of the European Labor and Social Policy'.
- Participation as lecturer in the course 'La Responsabilidad Empresarial 19.8., with a lecture on Employer's Liability.
- Author of Teaching Innovation and Legal Science. pp. 18. 210. (Spain): Aranzadi (Thomson Reuters), 19.7. Material Name: "The use of Facebook as a tool for teaching innovation in labor law". Taléns Visconti, Eduardo Enrique

Coordination

Ms. Alguacil Marí, María Pilar

- Professor of Financial and Tax Law
- Member of the editorial board of several scientific journals, such as Civitas Revista Española de Derecho Financiero, and CIRIEC, legal journal of Social and Cooperative Economy
- Author of more than 100 scientific publications, in the form of books, book chapters and collaborations in national and international journals
- She has carried out research periods at the Universities of Bologna, Catania, UQAM, Verona, and Sussex, as well as at the European agency EUROFOUND.
- She has advised the most representative organizations of the Social Economy
- She has participated as a speaker in sessions of the European Economic and Social Committee and in the Social Economy Intergroup of the European Parliament

Professors

Mr. De Buján y Arranz, Antonio Fernández

- Senior Associate of KPMG Lawyers
- Degree in Law from the ICADE (University of Pontificia Comillas)
- Degree in Business Administration from ICADE (University of Pontificia Comillas)
- Master's Degree in Public Law from UCM
- Academic Correspondent of the Royal Academy of Jurisprudence and Legislation
- Professor of Special Taxes for the Master's Degree in Tax Practice at Garrigues Center of Studies
- Member of the editorial board of Aranzadi Tax Expert in the chapters on Excise and Environmental Taxes and external evaluator of Técnica Tributaria Journal
- ISDE International Legal Award in the area of Fiscal and Tax Law, in the professional category, for his work "El denominado IVA asimilado a la importación" (The so-called VAT assimilated to importation)

tech 62 | Course Management

Dr. Bonet Sánchez, María Pilar

- Lawyer of the ICAV (Bar Association of Valencia).
- PhD in Law from the University of Valencia (19.5)
- Degree in Law from the University of Valencia (18.6)
- University Professor of Financial and Tax Law (19.0)
- Director of the University Certificate in tax and labor management for the self-employed (5 editions)
- Member of the Agricultural and Food Cooperatives Chair team.
- Researcher in several projects related to social economy and cooperativism.
- Advisor to several cooperatives, especially in relation to VAT.
- Anonymous external reviewer of scientific articles for publication in various journals

Dr. Aragón Gómez, Cristina

- PhD in Law. "Apto cum laude" unanimously by the Faculty of Social and Legal Sciences of Carlos III de Madrid University
- Degree in Law Complutense University of Madrid
- Extraordinary Doctorate Award from the Faculty of Law from Carlos III de Madrid University
- Master's Degree in Human Resources Management, Specialty in Work Relations Chamber of Commerce and Industry of Madrid and the Autonomous University of Madrid

Dr. Ramos Moragues, Francisco

- European PhD in Labor Law and Social Security Law Center. University of Bolonia
- PhD in Labor Law and Social Security Law Center. University of Valencia
- Degree in Central Law University of Valencia
- Diploma in Labor Relations. Faculty of Social Sciences of the University of Valencia

Dr. Nieto Rojas, Patricia

- PhD in Law. UC3M
- Bachelor's Degree in Labor Sciences. Carlos III University of Madrid
- Diploma in Labor Relations. Carlos III University of Madrid
- Master's Degree in Private Law
- Advanced level course "Design and implementation of equality plans and measures.
 Advanced Level II" Women's Institute, European Social Fund
- Advanced Industrial Relations and Human Resources Program. Carlos III University of Madrid/ Baker & Mackenzie

Dr. Moreno Solana, Amanda

- PhD in Law: "The organization of occupational risk prevention in companies. Configuring elements and problems derived from its legal regime". Carlos III University of Madrid.
 Outstanding Award in her Thesis
- Law Degree. Carlos III University of Madrid. Specialty: labor and company law
- Master's Degree in Occupational Hazard Prevention Carlos III University of Madrid.
 Speciality: Occupational Safety and Ergonomics and Psychosociology
- Master's Degree in Private Law. Carlos III University of Madrid
- Course on Pedagogical Adaptation. Complutense University of Madrid

Course Management | 63 tech

Dr. Díaz de Atauri, Pablo Gimeno

- PhD in Law from Carlos III University of Madrid with the qualification of Excellent cum Laude. Outstanding Award in his PhD
- Master's Degree in Provate Law from Carlos III University of Madrid
- Law degree from the Carlos III University of Madrid.
- Degree in Economics from Carlos III University of Madrid
- Participation in Projects Technological change and transformation of labor sources: law and collective bargaining agreements in the face of digital disruption, MERCADER UGUNIA, JESÚS R., Ministry of Innovation, Science and Universities

Dr. Correcher Mato, Carlos

• PhD in Financial and Tax Law

Ms. Puchol Tur, Teresa

- Currently studying a PhD in Tax Law
- Degree in Economics
- Master's Degree in Business Law
