01 **Welcome**

Knowing the market in which we operate is essential to achieving better performance and, therefore, higher profits. Only by knowing the tastes of the customers and the competition, will it be possible to plan an adequate sales strategy that will lead the company to success. To this end, it is essential to carry out effective market research that clearly indicates the business strategies to be followed and where to direct our company. TECH has specifically designed this program containing the latest information on market research management so as to become more effective in this field.

tech 08 | Why Study at TECH?

At TECH Global University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95%

of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

200+

executives trained each year

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Why Study at TECH? | 09 tech

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

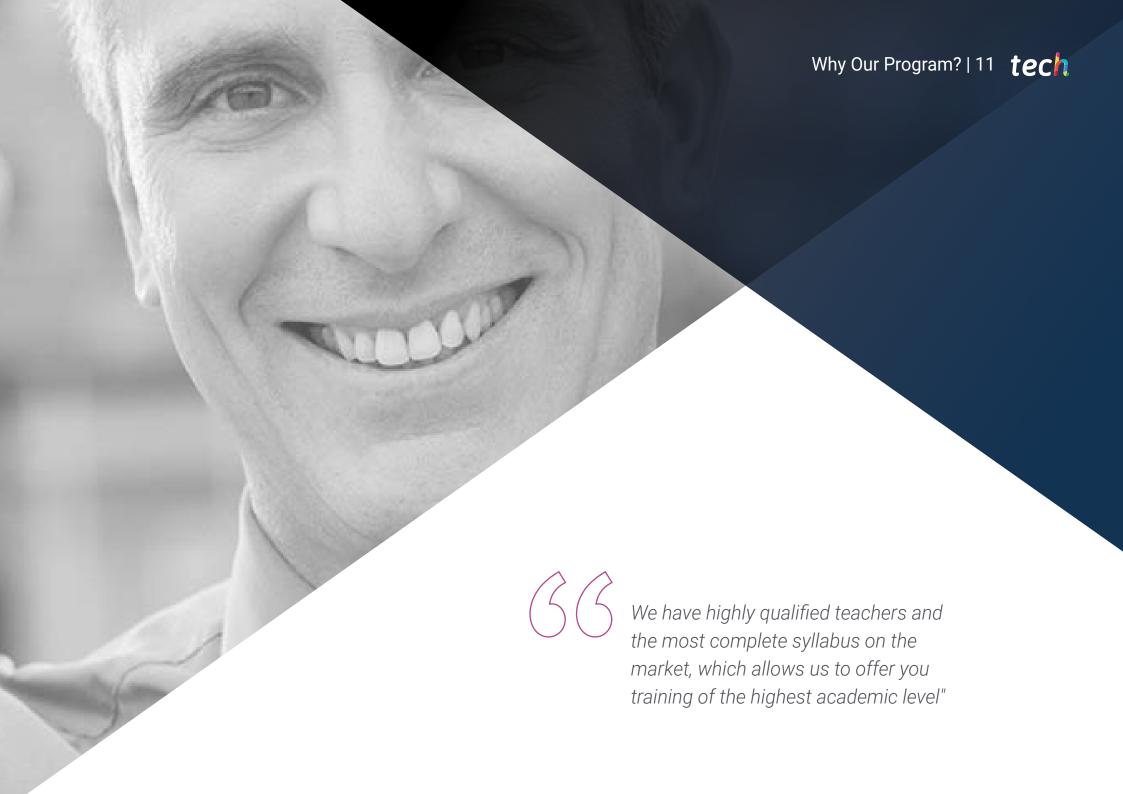

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

tech | Why Our Program?

This program will provide students with a multitude of professional and personal advantages, particularly the following:

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to train with a team of world renowned teachers.

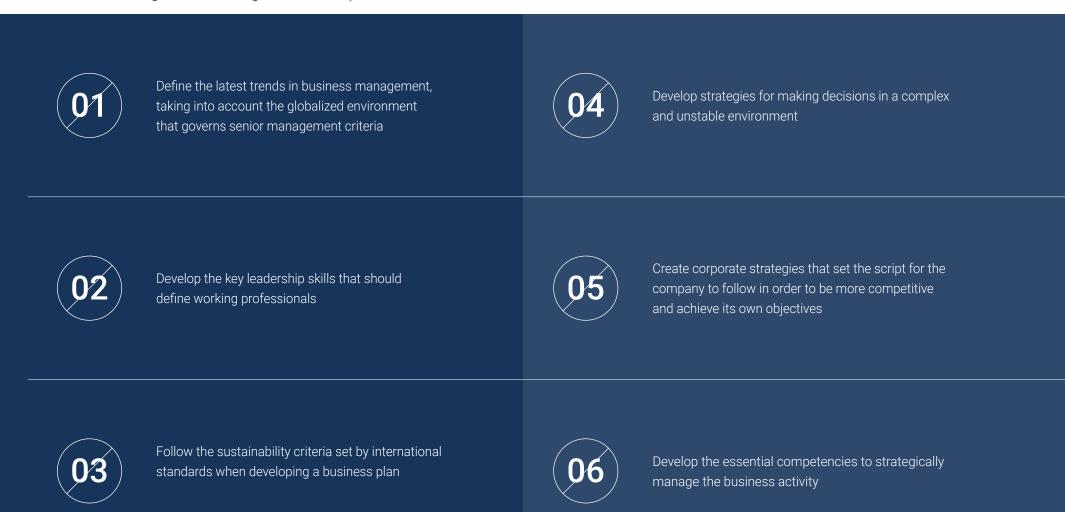

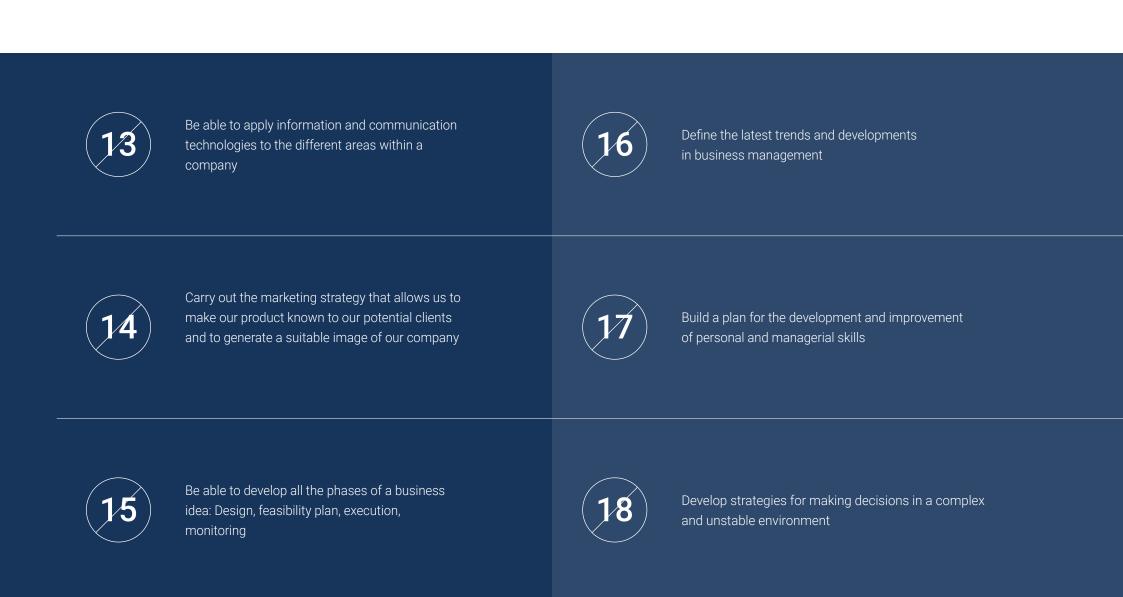

tech 16 | Objectives

Your goals are our goals.
We work together to help you achieve them

This MBA in Marketing Research Management will train you to:

Acquire management and leadership skills

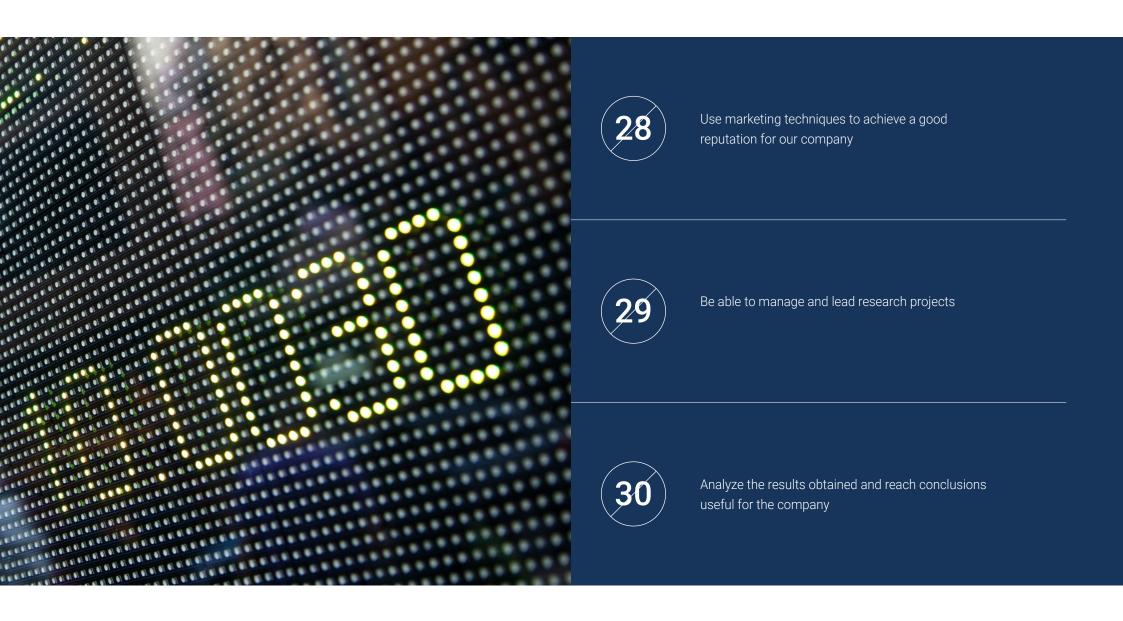

Know the different market segments and analyzing which ones our company should focus on

Know how to identify competitors and create strategies that differentiate between them

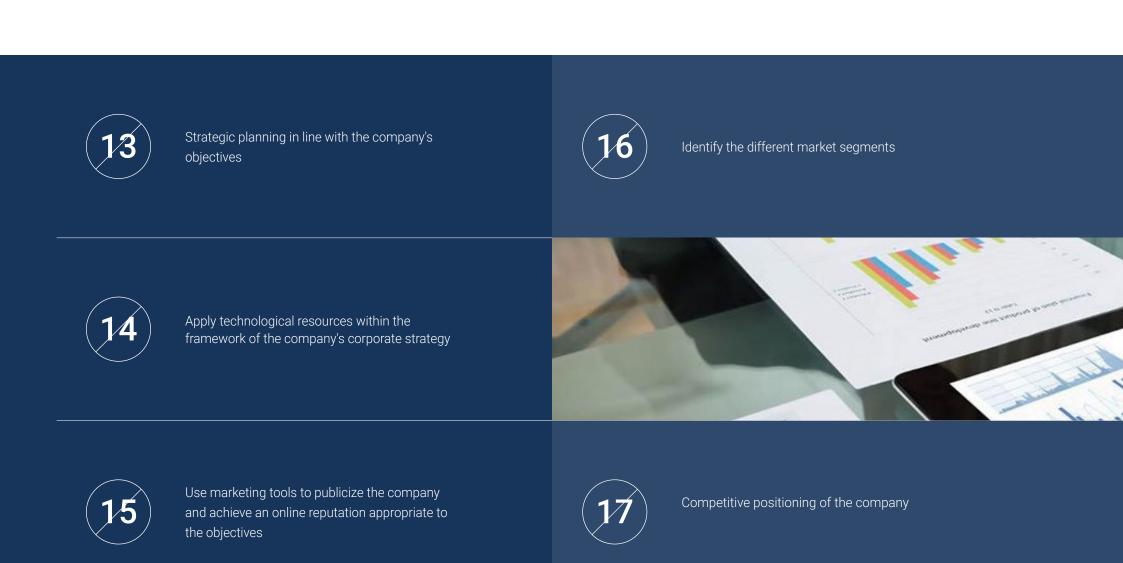

In-depth knowledge of the different types of market research and implementation of the most appropriate ones to meet the company's objectives

Know how to conduct questionnaires and interviews necessary for market research

21

Perform an adequate analysis of Internet metrics to obtain the necessary information to direct the company's strategy

Apply quantitative and qualitative research techniques

Conduct national and international market research

tech 30 | Structure and Content

Syllabus

This MBA in Market Research
Management from TECH Global
University is an intensive program that
prepares you to face challenges and
business decisions both nationally and
internationally. Its content is designed to
promote the development of managerial
skills that enable more rigorous decisionmaking in uncertain environments.

Throughout 3,000 hours of study, you will analyze a multitude of practical cases through individual work, achieving high quality learning that will be fundamental for your professional development. It is, therefore, an authentic immersion in real business situations.

This MBA in Market Research
Management deals in depth with the main
areas of the company, and is designed
for managers to understand marketing
research management from a strategic,
international and innovative perspective.

18.9. Feasibility Studies

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

tech 42 | Methodology

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

tech 44 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 45 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 46 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

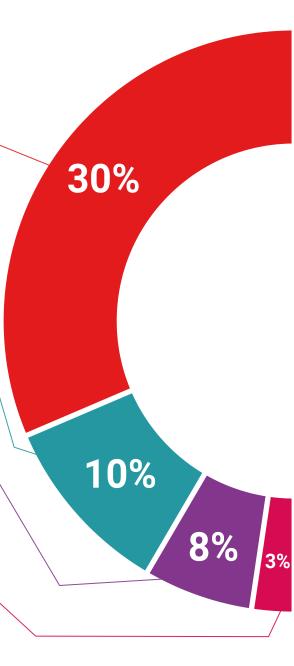

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

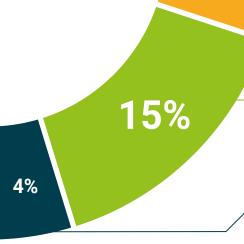

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

 \bigcirc

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Ms. Ruth Balcázar

Director of a multinational company

"This MBA in Market Research Management offered by TECH has allowed me to specialize in a sector that is indispensable for my daily work, since only by knowing the markets in depth, will I be able to plan action strategies that are beneficial for my company. Fortunately, the 100% online format of this program has allowed me to combine it with the rest of my obligations"

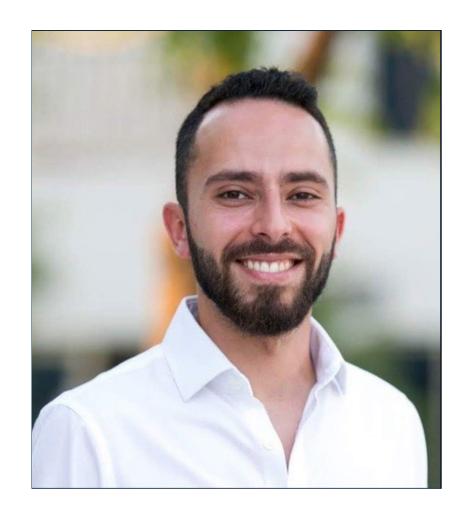

International Guest Director

Mina Bastawros is a prestigious Aerospace Engineer with more than 13 years of professional experience driving digital innovation, marketing and entrepreneurship in recognized institutions. He is highly specialized in generating new disruptive business opportunities, has demonstrated a visionary approach in creating and executing strategic projects that connect with diverse audiences and stakeholders. His passion for aviation and technology has led him to design campaigns that not only promote products, but also inspire his team and the market.

Throughout his career, he has held positions of responsibility as **Head of Creative and Digital Marketing** and **Director of Strategic Marketing** at Airbus. In doing so, he has led the transformation of Advertising within companies, ensuring that tactics are not only more effective, but reflect an approach **aligned with** industry **trends**. In addition, he has overseen the execution of **high-impact campaigns** that have increased enthusiasm for aircraft sales, enhancing the corporation's presence in the marketplace.

In addition, he has been recognized internationally for his ability to lead advertising initiatives that have redefined the way aerospace products are promoted. In this sense, his disruptive and results-oriented approach has earned him multiple recognitions in the industry, consolidating him as a key figure in this field. In addition, his ability to guide his team has made him a benchmark in promoting creativity in the industry.

On the other hand, he has also contributed to improving the understanding of these matters through various innovation projects. Therefore, his work has focused on the integration of digital technologies and the exploration of new forms of intrapreneurship.

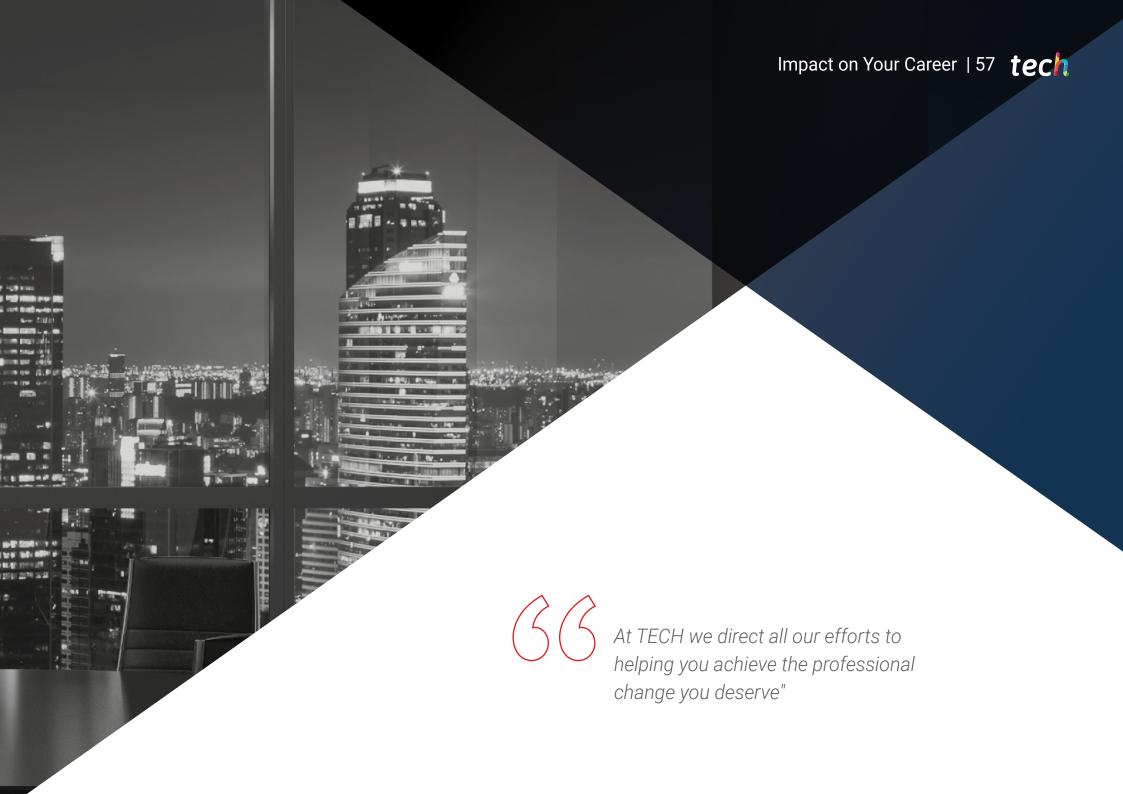

Mr. Bastawros, Mina

- Vice President of Creative and Digital Marketing at Airbus, Toulouse, France
- Strategic Marketing Director at Airbus
- Corporate Founder New Business Development at Airbus
- Supply Chain and Quality Lead Manager at Airbus
- Project Engineer at Airbus
- Stress Engineer at Airbus
- Aerospace Engineer at Air New Zealand
- MSc in Aerospace, Aeronautical and Astronautical Engineering from Loughborough University
- B.Sc. in Aerospace Engineering at the Polytechnic University of Turin

Thanks to TECH, you will be able to learn with the best professionals in the world"

Are you ready to take the leap? Excellent professional development awaits you

The MBA in Market Research Management at TECH Global University is an intensive program that prepares the professional to face challenges and business decisions both nationally and internationally. Its main objective is to promote your personal and professional growth, to help you achieve success.

If you want to improve yourself, make a positive change at a professional level and interact with the best, this is the place for you.

Acquire the necessary skills to improve your training and, therefore, your employability.

The completion of this program will give you the opportunity to improve in your daily work and get the job promotion you desire.
