01 Welcome

Success in business not only requires having a product that consumers want, but also a human team that brings added value to the company. They must be highly qualified professionals who, together, will add quality to the business, thereby improving profitability and productivity. In this sense, human resources managers should possess the appropriate skills to manage everything related to the company's personnel. In this particular case, TECH has designed a first-class program that focuses on trade union relations, so managers can become familiar with the main labor law regulations, in addition to acquiring the skills they need to intervene in conflicts that may arise between the company and employees, achieving the necessary balance to ensure the future progression of the company towards excellence.

Advanced Master's Degree in Senior HR Management, Expert in Trade Union Relations.
TECH Technological University

“

Specializing in HR management and trade union relations will be essential in helping to defend the rights of the business and the workers in an efficient way”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

- 12.1.4. Inductive Method
- 12.1.5. Cartesian Thought
- 12.1.6. Rules of the Cartesian Method
- 12.1.7. Methodical Doubt
- 12.1.8. The First Cartesian Principle
- 12.1.9. Induction Procedures According to John Stuart Mill

12.2. The General Process of Research: Quantitative and Qualitative Focus

- 12.2.1. Epistemological Assumptions
- 12.2.2. Approach to Reality and the Object of Study
- 12.2.3. Subject-Object Relationship
- 12.2.4. Objectivity
- 12.2.5. Methodological Processes
- 12.2.6. Integration of Methods

12.3. Research Paradigms and Methods Derived from These

- 12.3.1. How do Research Ideas Arise?
- 12.3.2. What is there to Research in Education?
- 12.3.3. Research Problem Statement
- 12.3.4. Background, Justification and Research Objectives
- 12.3.5. Theoretical Foundation
- 12.3.6. Hypotheses, Variables and Definition of Operational Concepts
- 12.3.7. Choosing a Research Design
- 12.3.8. Sampling in Quantitative and Qualitative Studies

12.4. Phases and Stages of Qualitative Research

- 12.4.1. Phase 1: Conceptual Phase
- 12.4.2. Phase 2 Planning and Design Phase
- 12.4.3. Phase 3 Empirical Phase
- 12.4.4. Phase 4: Analytical Phase
- 12.4.5. Phase 5: Diffusion Phase

12.5. Types of Quantitative Research

- 12.5.1. Historical Research
- 12.5.2. Correlation Research
- 12.5.3. Case Studies
- 12.5.4. Ex Post Facto or After-the-Fact Research
- 12.5.5. Quasi-Experimental Research
- 12.5.6. Experimental Research

12.6. Phases and Stages of Qualitative Research

- 12.6.1. Phase 1: Preparation Phase
- 12.6.2. Phase 2: Field Phase
- 12.6.3. Phase 3: Analytical Phase
- 12.6.4. Phase 4: Informative Phase

12.7. Types of Qualitative Research

- 12.7.1. Ethnography
- 12.7.2. Grounded Theory
- 12.7.3. Phenomenology
- 12.7.4. The Biographical Method and Life History
- 12.7.5. The Case Study
- 12.7.6. Content Analysis
- 12.7.7. Examining the Discourse
- 12.7.8. Participatory Action Research

12.8. Techniques and Instruments for Collecting Quantitative Data

- 12.8.1. The Structured Interview
- 12.8.2. The Structured Questionnaire
- 12.8.3. Systematic Observation
- 12.8.4. Attitude Scales
- 12.8.5. Statistics
- 12.8.6. Secondary Sources of Information

12.9. Techniques and Instruments for Collecting Qualitative Data

- 12.9.1. Unstructured Interviews
- 12.9.2. In-Depth Interviews
- 12.9.3. Focus Groups
- 12.9.4. Simple, Unregulated and Participant Observation
- 12.9.5. Life Stories
- 12.9.6. Diaries
- 12.9.7. Content Analysis
- 12.9.8. The Ethnographic Method

12.10. Data Quality Control

- 12.10.1. Requirements for a Measuring Instrument
- 12.10.2. Processing and Analysis of Quantitative Data
 - 12.10.2.1. Validation of Quantitative Data
 - 12.10.2.2. Statistics for Data Analysis
 - 12.10.2.3. Descriptive Statistics
 - 12.10.2.4. Inferential Statistics
- 12.10.3. Processing and Analysis of Qualitative Data
 - 12.10.3.1. Reduction and Characterization
 - 12.10.3.2. Clarify, Refine and Compare
 - 12.10.3.3. Programs for Qualitative Analysis of Textual Data

Module 13. Labor and Market Economics

13.1. Introduction to the Labor Market

- 13.1.1. Definition of the Labor Market
- 13.1.2. Functioning of the Labor Market
- 13.1.3. Economic Systems and the Market Economy
- 13.1.4. Distribution of the Population

13.2. The Law of Labor Demand and Supply

- 13.2.1. Economic Systems and the Market Economy

- 18.5.4. The Stakeholders
- 18.5.5. ISO 26000 Corporate Social Responsibility
- 18.5.6. Social Responsibility Management. RS10 Model

18.6. Social Marketing in the Context of Corporate Social Responsibility (CSR)

- 18.6.1. Key Aspects of Social Marketing
- 18.6.2. The Ethical Perspective of Social Marketing
- 18.6.3. Social Marketing Plan

18.7. Employee Assistance Program

- 18.7.1. Introduction and History of Employee Assistance Programs (EAP)
- 18.7.2. Benefits of Employee Assistance Program (EAP)

18.8. Employee Wellness Program

- 18.8.1. Concept of Labor Welfare
- 18.8.2. Elaborating Labor Welfare Programs

18.9. Equal Opportunity Plan in the Company

- 18.9.1. Equality in the Work Environment: Regulatory Framework
- 18.9.2. The Figure of the Equality Agent in the Company
- 18.9.3. Elaboration of a Needs Assessment on Corporate Equality Issues
- 18.9.4. Elaboration of the Corporate Equality Plan

18.10. Comprehensive Communication Plans in Companies

- 18.10.1. Internal Communication in a Company
- 18.10.2. External Corporate Communication Processes: Positioning, Briefing and Advertising Communication Strategies
- 18.10.3. Elaborating a Corporate Communication Plan

07

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

08

Our Students' Profiles

The TECH Technological University student profile is that of professionals with extensive experience who understand the importance of continuing their studies during their working life. In this particular case, these are professionals with previous knowledge in the field of business, who want to expand their scope of action toward managing human resources and they will achieve this through a high-quality syllabus.
