01 **Welcome**

Today, it is essential to have a specialized sales team to develop more effective sales strategies and to be able to attract customers to our market in an increasingly competitive world. With this degree, the student will develop the necessary skills to manage the commercial activity of the organization and lead sales teams, allowing them to access more and better management positions in the training field. During the training, some of the most essential lessons in management skills, talent management, sales organization and sales oriented coaching will be taught.

tech 08 | Why Study at TECH?

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95%

of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

200+

executives trained each year

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

Learn with the best

Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Why Study at TECH? | 09 tech

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

tech 12 | Why Our Program?

This program will provide students with a multitude of professional and personal advantages, particularly the following:

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

tech 20 | Structure and Content

Syllabus

The Postgraduate Diploma in Training High Performance Sales Teams at TECH Technological University is an intensive program that prepares students for the challenge of leading sales teams, with the appropriate training of professionals in charge of them and mentoring them throughout their professional career.

Throughout 450 hours of training, the student will analyze a multitude of practical cases through individual and team work. It is, therefore, an authentic immersion in real sales teams management situations.

This Postgraduate Diploma deals in depth with the techniques and intricacies of sales and marketing, with special emphasis on the relevance of sales organization and talent management in the process of managing large sales teams.

A plan with which students can aspire to significantly improve not only their professional results, but also their own work and personal situation, gaining access to positions of greater responsibility and economic rewards.

This Postgraduate Diploma takes place over 6 months and is divided into four modules:

Module 1	Management Skills
Module 2	Talent Management. Change Management
Module 3	Commercial and Sales Team Organization
Module 4	Selection, Training and <i>Coaching</i> in Sales Networks

Where, When and How is it Taught?

TECH offers you the possibility of taking this program completely online. Throughout the 6 months of training, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

4.5. Motivation

4.5.3. Needs Theory

4.5.2. Expectations Theory

The Nature of Motivation

4.5.4. Motivation and Financial Compensation

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

tech 28 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 29 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

 \bigcirc

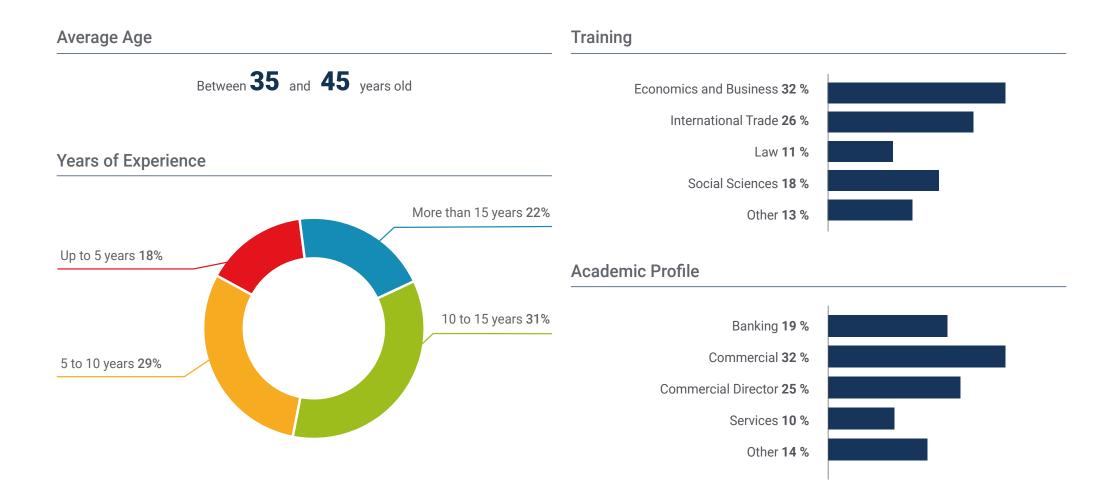

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Sonia Ortiz

Commercial Director

"Being part of this educational community, through completing this Postgraduate Diploma in Training High Performance Sales Teams, has helped me grow personally and professionally. The syllabus is the most complete I could find and, thanks to this training, I am advancing every day in my profession"

International Guest Director

Glen Lally is a leading transformational executive with an established career in Silicon Valley, where he has advised technology giants such as Amazon, Cisco, Google, SAP and LinkedIn. Specializing in performance analytics, transformational leadership and digitalization, he has been dedicated to empowering the ability of large organizations to adapt and excel in an ever-changing business environment. In addition, his expertise spans sales enablement, competency modeling and performance consulting, which has enabled him to guide companies towards innovation and success.

Likewise, throughout his career, he has accumulated vast experience in more than 20 countries, performing in key areas such as leadership, talent development, coaching, organizational and digital transformation. He has also held the role of General Director of Sales Enablement at AWS, which has given him the opportunity to lead different techniques for more than 40,000 professionals in cloud services and technologies.

He has also been recognized internationally for his ability to drive business success through **digital transformation solutions**. In fact, his focus on leading organizational change and his ability to adapt to different business cultures have been instrumental in his ability to excel globally. In turn, his work has been essential in adapting companies to new **market demands**.

In this way, in his professional career, Glen Lally has contributed to numerous investigations on transformational leadership, sales enablement and digital transformation. His experience and expertise are reflected in his practical approach and the effective solutions he has implemented for world-class organizations, especially in the field of talent development, making a significant difference in the way companies address their challenges and opportunities.

Mr. Lally, Glen

- General Director of Sales Enablement at AWS, Seattle, United States
- Board Member at Brighter Children
- Advisor to the Executive Team at SalesDirector.ai
- Global Vice Chair Sales Enablement at Cisco
- Master's Degree in Computer Science
- Executive Program in Leadership: The Effective Use of Power

tech 40 | Course Management

International Guest Director

Dr. Aric Rindfleisch is a leading international authority in the field of Marketing and innovation. In addition, his dedication to research in key areas such as 3D printing, new product development and consumer values is noteworthy.

He has held senior roles such as President of Marketing and Executive Director at Illinois MakerLab, the world's first Business School 3D Printing Lab. Here, he has focused on providing professors and students with the knowledge and resources needed to be at the forefront of the emerging Maker Movement, teaching users how to design, manufacture and market physical objects.

His professional career has been marked by exceptional dedication and extensive experience in a variety of areas. For example, he has worked in Account Management at J. Walter Thompson Japan, an experience that has given him a deep understanding of the business world and market dynamics. He has also practiced in Hospital Administration at Connecticut Valley Hospital, where he has acquired very useful skills in management and leadership.

But his contribution extends beyond research, as he has played important roles in publishing, serving on the editorial board and as editor of renowned journals related to Marketing, consumer psychology and supply chain management. His excellence in teaching has also been recognized with several awards, including being named to The Princeton Review's list of "Top 300 Professors" in America.

Undoubtedly, Dr. Rindfleisch has left an indelible mark on the global community. In fact, he has published numerous articles in internationally renowned academic journals, addressing relevant and current topics in the field of Marketing.

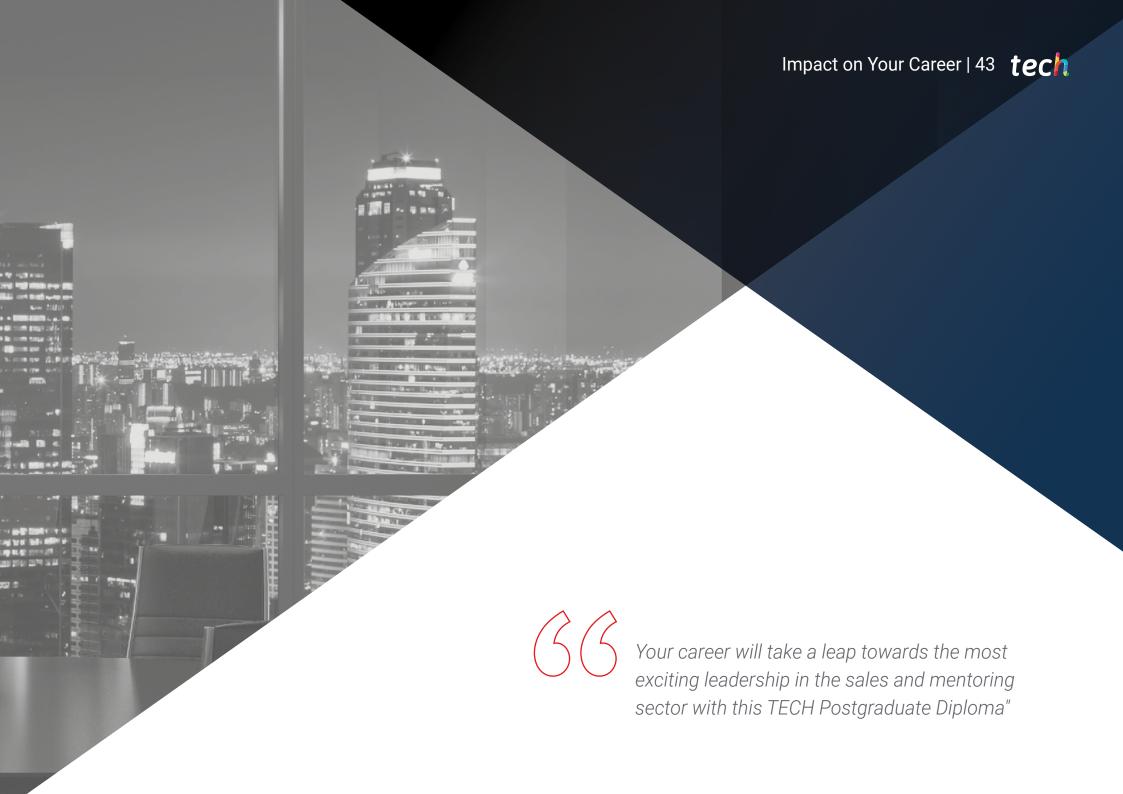

Dr. Rindfleisch, Aric

- President of Marketing and Chief Executive Officer at Illinois MakerLab, Urbana-Champaign, United States
- Assistant Advertising Account Manager at J. Walter Thompson Japan
- Hospital Administration Assistant at Connecticut Valley Hospital, Connecticut, U.S.A.
