Introduction

Today's world is driven by digitalization. The Internet has gone from being a means of information to a place of digital business, where you can talk to a person on the other side of the world and purchase online. Because of all the facilities provided by this medium, it is undeniable that there is a need to have a strong presence on the web to achieve this approach with the user and provide a service tailored to their needs. In this blended program, the student will have the opportunity to be trained in business sciences so that they can design, create, and manage a company with the greatest guarantee of success.

“

Mastering the most advanced strategies for building a business in this digital world is an indispensable skill today"

The way in which the business sector is undertaken, managed, and operated has changed in recent years. Setting up a business today is not the same as it used to be, basically because you don't need a defined physical space to start up a business. Based on this fact, many people have started to become entrepreneurs, although it is not a simple task and requires specialized knowledge.

In this sense, the Hybrid Professional Master's Degree in TECH will help all business people and entrepreneurs who want to enter this sector. To achieve this, they must first complete an online program and then complete a practical internship at a prestigious international agency. In this way, they will be able to design, create, and manage companies in the digital sector with greater guarantees of success.

Throughout the course of the syllabus, the student will analyze a multitude of practical cases to understand in depth the functioning of the digital environment. It will also address the most effective Digital Marketing strategies that facilitate a memorable user experience. This is essential to build a good reputation for the organization and ensure that the customer will return to purchase on future occasions.

After completing the theoretical program, the student will be able to carry out an on-Practice internship in a prestigious agency. Here, you will carry out a series of activities that will prepare you to face any situation in your daily practice. In addition, you will not be alone, as you will have the support and guidance of an assistant specialist, who will teach you how to adapt to the new context that involves intervening and developing in the digital company, carrying out the management and administration of your own company.

This **Hybrid Professional Master's Degree in Creation and Entrepreneurship of the Digital Company** contains the most complete and up-to-date program on the market.

The most important features include:

- ♦ Development of more than 100 practical case studies presented by experts in business sciences
- ♦ The graphic, schematic and practical contents with which they are conceived, gather Specific information on those disciplines that are essential for professional practice
- ♦ Integral plans for systematized action in the business field
- ♦ An algorithm-based interactive learning system for decision-making in the situations students are posited
- ♦ Practical guides for the use of the main business science tools
- ♦ Special emphasis on the most innovative methodologies for the application of leadership techniques in business
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Furthermore, you will be able to carry out a business internship in one of the best business environments

A unique opportunity to learn alongside the best in the industry. You will be able to develop your skills in an ever-growing environment"

“

For three weeks, you will undergo intensive learning that will allow you to understand the main functions of the management of a digital company”

In this Master's program, of a professionalizing nature and hybrid learning modality, is aimed at updating professionals specialized in business sciences who require a high level of qualification. The contents are based on the latest scientific evidence and are organized in a didactic way to integrate theoretical knowledge into your daily practice and theoretical elements. In this way, the theoretical-practical elements will facilitate the updating of knowledge and will allow decision-making in complex environments.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations. This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Develop the skills that will allow you to make decisions with greater rigor in uncertain environments such as the digital world.

Access new opportunities thanks to this practical program, in which you will be able to integrate new technologies into your business or entrepreneurship.

02

Why Study this Hybrid Professional Master's Degree?

In order to move forward in an era of constant advances and where digital updates are the order of the day, professionals who want to start a business must have the financial, organizational, and strategic knowledge to be able to evaluate the opportunities offered by the market to invest in a specific sector. In this sense, the multiple options offered by the Internet and globalization have opened the doors to a series of possibilities for commercial expansion through digital media.

“

This is the only university where you will find such a complete program where you can verify the theory with your own practice. Undoubtedly a unique opportunity that can't be missed”

1. Updating from the latest technology available

To learn all the latest news about business creation and digital entrepreneurship, TECH has chosen a distinctly modern and avant-garde environment. Therefore, from the moment you enter its virtual platform, you will enjoy a series of multimedia resources that facilitate learning. Likewise, to understand the processes of Creation and Entrepreneurship of the Digital Enterprise, it has selected successful business models that will share their experiences from the first moment. Therefore, they will get to know an avant-garde environment with the systems that are needed today.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

TECH chooses the best specialists in the area of study so that the student learns alongside those who know. This program counts on expert teachers who have chosen the syllabus to be developed and have elaborated on each of the study materials. In addition, you will be accompanied in the work environment for 3 weeks by a multidisciplinary team that will show you all the functions to be performed in order to obtain the best results.

3. Entering first-class Corporate environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious business environment in the area of Creation and Entrepreneurship of the Digital Company. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Combining the Best Theory with State-of-the-Art Practice

This program has been created so that the student can apply his knowledge from the very first moment in order to make the most of the 3 weeks of Practical Training. For this reason, a set of activities has been designed according to the function of their role so that they can direct actions to improve their professional profile, thanks to the support of an assigned tutor.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of doing this Internship Program, not only in national, but also in international centers. In this way, the specialist will be able to expand their boundaries and keep up to date with the best professionals, who practice in first class Business Environments and in different continents. A unique opportunity that only TECH could offer.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

This Hybrid Professional Master's Degree is designed to meet the training needs of business professionals who wish to undertake in the digital environment. To this end, a program has been designed that brings together the most current approaches in the area in a realistic and comprehensive manner. This will lead the student to academic excellence and propel their career toward success.

“

This program gives you the unique opportunity to spend a stay in the classroom and to learn everything you have learned in the online modality"

General Objective

- The main objective of this Hybrid Professional Master's Degree in Creation and Entrepreneurship of the Digital Company is to achieve that the student integrates into their professional environment the new digital technologies required to have a greater presence on the web and the world in general. To do this, they will have a complete program that unifies theory and practice in a coherent manner

*In a practical and simple way,
you will be able to understand
the workings of the business
panorama within the digital world"*

Specific Objectives

- Know how to correctly administrate and manage companies of all sizes and sectors

“

Don't wait any longer and enroll in this Hybrid Professional Master's Degree that contains all the innovations to take the entrepreneurial path in the digital era"

Module 1. Business Administration: Introduction and Organization

- 1.1. The Company and its Components
 - 1.1.1. The Concept of Business
 - 1.1.2. Functions and Classifications of Business Objectives
 - 1.1.3. Entrepreneurship
 - 1.1.4. Types of Companies
- 1.2. The Company as a System
 - 1.2.1. Concepts of the System
 - 1.2.2. The models
 - 1.2.3. Company Subsystems
 - 1.2.4. Subsystem of Values
- 1.3. The Company Setting
 - 1.3.1. Setting and Value
 - 1.3.2. General Environment
 - 1.3.3. Specific Environment
 - 1.3.4. Analysis Tools
- 1.4. Management Function
 - 1.4.1. Basic Concepts
 - 1.4.2. What Is Managing?
 - 1.4.3. Decision-Making
 - 1.4.4. Leadership
- 1.5. Business Planning
 - 1.5.1. Business Plan
 - 1.5.2. Elements of Planning
 - 1.5.3. Stages
 - 1.5.4. Planning Tools
- 1.6. Business Control
 - 1.6.1. Concept, Types and Terminology
 - 1.6.2. Management Control
 - 1.6.3. Quality Control
 - 1.6.4. Balanced Scorecard

- 1.7. Business Organization
 - 1.7.1. Basic Concepts
 - 1.7.2. Organizational structure
 - 1.7.3. Cultural Dimensions
 - 1.7.4. Model Structures
- 1.8. Management of Human Resources
 - 1.8.1. Motivation
 - 1.8.2. Recruitment and Selection
 - 1.8.3. Personnel Training
 - 1.8.4. Performance Assessment
- 1.9. Elements of Marketing and Finance
 - 1.9.1. Concept and Stages
 - 1.9.2. Marketing and the Markets
 - 1.9.3. Strategic Marketing
 - 1.9.4. Relationship and Synergies

Module 2. Introduction to ICTs

- 2.1. Information Systems: Features, Functions and Types
 - 2.1.1. Introduction to ICTs
 - 2.1.2. Principles
 - 2.1.3. Features
 - 2.1.4. Beginnings
 - 2.1.5. Advantages and Disadvantages
 - 2.1.6. Typology
 - 2.1.7. Types of Information Systems
 - 2.1.8. Business Processes
- 2.2. Information Systems: Influence, Competitive Advantage and Strategies Based on Networks and Web 2.0.
 - 2.2.1. ICT Influences
 - 2.2.2. Current
 - 2.2.3. Global
 - 2.2.4. Competitive Advantages
 - 2.2.5. Strategies Based on Web 2.0.
 - 2.2.6. Network Strategies

- 2.3. Information and Communication Technologies (ICTs)
 - 2.3.1. Components
 - 2.3.2. Concept
 - 2.3.3. Types of Components
 - 2.3.4. Applications
 - 2.3.5. Infrastructure Evolution
 - 2.3.6. History
 - 2.3.7. Current Situation and Development
 - 2.3.8. ICT Infrastructure Administration
 - 2.3.9. Drivers
 - 2.3.10. Administration
- 2.4. Hardware and Trends
 - 2.4.1. Hardware
 - 2.4.2. Concept
 - 2.4.3. Hardware Evolution
 - 2.4.4. Hardware and Software Classification
 - 2.4.5. Hardware Trends
 - 2.4.6. Data Processing
 - 2.4.7. Accelerating Processes
 - 2.4.8. Storing Processed Data
 - 2.4.9. Graphic Visualization
- 2.5. Integration of Processing and Telecommunication Platforms
 - 2.5.1. Integration
 - 2.5.2. Conceptualization
 - 2.5.3. Evolution
 - 2.5.4. Business Interdependence
 - 2.5.5. Integration and Competition
 - 2.5.6. Integration Tools
 - 2.5.7. Big Data
- 2.6. Processing Modes, Virtualization and Multi-Core Processors
 - 2.6.1. Different Models
 - 2.6.2. Multiprocessor Systems
 - 2.6.3. Concept of Processing
 - 2.6.4. Virtualization
 - 2.6.5. Requirements
 - 2.6.6. Hypervisors
 - 2.6.7. Paravirtualization
- 2.7. Software and Software Platforms
 - 2.7.1. Software
 - 2.7.2. Context
 - 2.7.3. Concepts and Definitions
 - 2.7.4. Applications
 - 2.7.5. Software Platforms
 - 2.7.6. Current Platforms
 - 2.7.7. The Evolution of Platforms
- 2.8. Java Language and Business Application Integration
 - 2.8.1. Java
 - 2.8.2. Concepts
 - 2.8.3. Features
 - 2.8.4. Highlights
 - 2.8.5. Business Applications Architecture
 - 2.8.6. Concept
 - 2.8.7. Integration in Companies
 - 2.8.8. Transcoding
 - 2.8.9. Adapting Semantic Content

- 2.9. Networks: Corporate Networks and Connectivity Technologies
 - 2.9.1. Corporate Networks and Connectivity Technologies
 - 2.9.2. Transformation
 - 2.9.3. Connectivity in Companies
 - 2.9.4. Connectivity Solutions
 - 2.9.5. Transmission Types and Means
 - 2.9.6. Concept and Definitions
 - 2.9.7. Transmission Maps
- 2.10. Internet, the Web, Web 2.0. and Web 3.0.
 - 2.10.1. What Is the Internet?
 - 2.10.2. Conceptualization
 - 2.10.3. Applications
 - 2.10.4. Web 1.0.
 - 2.10.5. Conceptualization
 - 2.10.6. Static Content
 - 2.10.7. Dissemination
 - 2.10.8. Web 2.0.
 - 2.10.9. Conceptualization
 - 2.10.10. Dynamic Content
 - 2.10.11. Development
 - 2.10.12. Web 3.0.
 - 2.10.13. Conceptualization
 - 2.10.14. Multidevice Content
 - 2.10.15. The Intelligent Web
- 2.11. Business Tools for Communication and Coordination
 - 2.11.1. Business Tools
 - 2.11.2. Distance Management
 - 2.11.3. Planning Communication
 - 2.11.4. Coordination Methods
 - 2.11.5. International Coordination
 - 2.11.6. International Coordination
 - 2.11.7. Concept of Online

- 2.12. Traditional File Organization, Data Management Systems, and Data Warehouses and Mining
 - 2.12.1. Data Storage
 - 2.12.2. Data Analysis
 - 2.12.3. Types of Storage
 - 2.12.4. Type of Storable Information
 - 2.12.5. Data Variability
 - 2.12.6. Data Management Systems
 - 2.12.7. Balanced Scorecard
 - 2.12.8. Planning Process
 - 2.12.9. Management Indicators
 - 2.12.10. Data Mining
 - 2.12.11. Concept
 - 2.12.12. Computational Complexity Theory
 - 2.12.13. Trends
- 2.13. Company Systems: Business Management and Decision Support Systems
 - 2.13.1. Decision Support Systems
 - 2.13.2. Support Systems: DSS
 - 2.13.3. Decision Making Based on Data Management
 - 2.13.4. Business Management Processes
 - 2.13.5. Concept of Management
 - 2.13.6. Stages of the Process
- 2.14. E-Commerce
 - 2.14.1. e-Commerce Significance
 - 2.14.2. Concept
 - 2.14.3. B2B
 - 2.14.4. Implications
 - 2.14.5. e-Commerce Challenges
 - 2.14.6. Main Types of e-Commerce
 - 2.14.7. Types of e-Commerce
 - 2.14.8. Trading Markets
 - 2.14.9. Evolution and Repercussion
 - 2.14.10. Expansion
 - 2.14.11. Global Repercussion

Module 3. Financial Accounting

- 3.1. Financial Accounts: Components and Formulation
 - 3.1.1. Balance Sheet, Income Statement and Financial Statement Notes
 - 3.1.2. Statement of Changes in Equity
 - 3.1.3. Cash Flow Statement
 - 3.1.4. Financial Annual Accounts Formulation Rules
 - 3.1.5. Financial Statement Templates
- 3.2. Assessment Criteria
 - 3.2.1. Historical Cost
 - 3.2.2. Fair Value
 - 3.2.3. Net Realizable Value
 - 3.2.4. Utilization Value
 - 3.2.5. Book or Carrying Value
 - 3.2.6. Creative Accounting
- 3.3. Property, Plant and Equipment and Intangible Assets
 - 3.3.1. Regulations and Method of Acquisition
 - 3.3.2. Amortization
 - 3.3.3. Impairment or Disposal Losses
 - 3.3.4. Real Estate Investments
- 3.4. Financial Instruments
 - 3.4.1. Financial Assets
 - 3.4.2. Financial Liabilities
 - 3.4.3. Risk Assessment, Identification and Management
 - 3.4.4. Hedging and Trading
 - 3.4.5. Equity Instruments Accounting
- 3.5. Equity Study and Valuation
 - 3.5.1. Equity on the Balance Sheet
 - 3.5.2. Grants, Donations and Legacies
 - 3.5.3. Equity and Adjustments for Changes in Value

- 3.6. Restructuring Operations
 - 3.6.1. Mergers
 - 3.6.2. Demergers
 - 3.6.3. Non-Monetary Contributions
 - 3.6.4. Value Exchanges
- 3.7. Income Tax
 - 3.7.1. Corporate Income Tax Structure
 - 3.7.2. Calculation and Recording of the Accrued Corporate Income Tax Expense
 - 3.7.3. Permanent and Temporary Differences
- 3.8. Foreign Currency Accounting
 - 3.8.1. Functional and Presentation Currency
 - 3.8.2. Valuation of Monetary and Non-Monetary Items
 - 3.8.3. Temporary Transaction Differences in Foreign Currencies

Module 4. Commercial Management I

- 4.1. Market Research
 - 4.1.1. Consumer Behavior
 - 4.1.2. Market Research Techniques
 - 4.1.3. Data Analysis Tools
 - 4.1.4. Scope and Limitations
- 4.2. Advertising
 - 4.2.1. The Importance of Public Companies
 - 4.2.2. Purchase Experience
 - 4.2.3. Advertising and Digital Media
- 4.3. Media Planning
 - 4.3.1. Audiences and Advertising Markets
 - 4.3.2. Selecting Media and Support
 - 4.3.3. Measuring Sustainability
- 4.4. Commercial Management
 - 4.4.1. Internal and External Analysis. SWOT Analysis
 - 4.4.2. Sector and Competitive Analysis
 - 4.4.3. CANVAS Model

Module 5. Business Management

- 5.1. Manager Functions: Organizational Culture and Approaches
 - 5.1.1. Manager Functions
 - 5.1.2. Management Strategy
 - 5.1.3. Organizational Culture
- 5.2. Change Management Process
 - 5.2.1. Types
 - 5.2.2. Resistance
 - 5.2.3. Stimulating Innovation
 - 5.2.4. Management Models
- 5.3. Decision-Making
 - 5.3.1. Management and Decision-Making Processes
 - 5.3.2. Management Styles
 - 5.3.3. Types of Decisions
- 5.4. Strategic Planning
 - 5.4.1. Objectives
 - 5.4.2. Methods
 - 5.4.3. Planning Dynamic Environments
- 5.5. The Process of Strategic Management
 - 5.5.1. Types of Processes
 - 5.5.2. Processes Mission and Analysis
 - 5.5.3. Implementing Processes and Assessment
- 5.6. Organizational Structures
 - 5.6.1. General Concepts
 - 5.6.2. Mechanistic Structures
 - 5.6.3. Organic Structures
- 5.7. Organizational Designs
 - 5.7.1. Purpose behind Organization
 - 5.7.2. Contingency Factors
 - 5.7.3. Types of Design
- 5.8. Team Development and Performance
 - 5.8.1. Definition and General Concepts
 - 5.8.2. Efficient Teams
 - 5.8.3. Global Teams
- 5.9. Company Communication
 - 5.9.1. Function of Company Communication
 - 5.9.2. Communication Methods
 - 5.9.3. ICT Influences
- 5.10. Interpersonal and Organizational Communication
 - 5.10.1. Basic Concepts
 - 5.10.2. Interpersonal Communication
 - 5.10.3. Organizational Communication
- 5.11. Company Motivation
 - 5.11.1. Concept of Motivation and Application
 - 5.11.2. Theories of Motivation
 - 5.11.3. Motivation Implementation
- 5.12. Company Leadership
 - 5.12.1. Contingency Theories
 - 5.12.2. Types of Leadership
 - 5.12.3. Company Leadership Implementation
- 5.13. Operations Control
 - 5.13.1. Concepts of Control and Management Control
 - 5.13.2. Control Processes
 - 5.13.3. Measurements and Assessment
- 5.14. Operations Control Management
 - 5.14.1. Control Tools
 - 5.14.2. Correction Systems
 - 5.14.3. Operations Control Advantages and Problems
- 5.15. Operations Management
 - 5.15.1. The Importance of Management
 - 5.15.2. Value Chain
 - 5.15.3. Quality Management
- 5.10.4. Storage Costs, *Picking and Packing*
- 5.10.5. Distribution Costs

Module 6. Company Tax Regime

- 6.1. Concept and Characteristics of Taxes
- 6.2. Judicial Relationship and Tax Liability
- 6.3. Exemption, Non-Taxation, Accrual and Enforceability

 - 10.10.4. Online Service Centers

07

Clinical Internship

Upon completion of the online program, the student will be ready to take an internship in an agency of great relevance in the digital sector. It will last three weeks, from Monday to Friday, with 8 hours of continuous work. At all times that the student is in the program, they will have the support and guidance of an adjunct specialist.

“

This hybrid learning program will help you get off to a good start in the digital environment, increasing your confidence in managing a business in this medium"

The on-site stay will allow the student to perform a certain number of practical activities, such as valuation, identification and risk management of financial instruments, planning of digital campaigns, implementation of communication technologies, and other related activities, completing the learning process.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for daily practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

“

This program will help you develop in a real business, with the support of a group of professionals trained to help you make a business plan from the beginning"

Module	Practical Activity
Founding and Managing Companies in the Digital Environment	Develop company's corporate and Technological strategy
	Implementing Online Business Models
	Manage the Supply Chain Management Systems
	Practicing web 2.0 and social media monetization
	ROI Analysis in a Digital Marketing Plan
	Recognize the digital marketing strategies implemented in the company and improve them: Closed Loop Marketing, Continuous Loop Marketing and Multichannel Marketing
Organization and Business Management	Use planning tools
	Participate in strategic marketing actions and establish relationships and synergies
	Formulate annual accounts using the models for financial statements using the valuation criteria
	Valuing, identifying and managing risks of financial instruments
	Recognize the different taxes applicable to the company
	Calculate corporate income tax and determine personal income tax and VAT
Management and innovation in the company	Use market research techniques, CANVAS model, and other tools for data analysis
	Propose media planning: audiences and advertising market
	Perform Internal and External Analysis. SWOT, as well as sectoral and competitive analysis
	Implement leadership and motivation through different motivational theories
	Implement the Strategic Innovation Intelligence: Coolhunting and search for business opportunities
	Manage Startup financial metrics, control legal aspects, Lean Management, and financing of a Startup
Technology and Information in Digital Companies	Managing business information systems
	Plan and formulate strategies for information systems and business coordination
	Use CRM, software, and intelligence in the enterprise
	Review e-commerce and social media strategies
	Use integration tools and <i>Big Data</i>
	Verify the Corporate Networks and Connectivity Technologies

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General conditions of practical training

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Hybrid Professional Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the student does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

08

Where Can I Do the Internship?

TECH knows the needs of the business sector, and for this reason, it has made several agreements with the most prestigious agencies at an international level. This is a unique opportunity for students to continue to grow in their work area alongside the best specialists in marketing and business management.

“

Different marketing companies are at your disposal thanks to this hybrid learning TECH program"

- MBA in Digital Marketing

09

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

09

Certificate

The Hybrid Professional Master's Degree in Creation and Entrepreneurship of the Digital Company guarantees students, in addition to the most rigorous and up-to-date education, access to a Hybrid Professional Master's Degree diploma issued by TECH Technological University

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”
