01 Welcome

All companies operate for financial gain. Creative sector industries are no exception. Therefore, this academic program aims to instruct professionals in the creative sector in everything related to the management of this industry, carrying out the processes in an adequate manner to promote success in the organization. All of this is based on a six week syllabus that aims to become a before and after for the student's professional career.

Postgraduate Certificate in Creative Business Management.
TECH Technological University

“

Make your professional profile shine in a booming sector with this highly valuable Postgraduate Certificate”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

The ultimate and crucial objective of all TECH programs is to internalize the latest knowledge in the market and to use it as a means to advance in their professional careers. To make this possible, this university has made a major effort to provide the student with the most complete content and the largest team of experts in the field who will act as teachers during the Postgraduate Certificate. In this way, TECH is realizing its objectives and helping students to begin to achieve theirs.

“

TECH's goal is clear: to develop the best professionals in the industry and see them succeed wherever they go"

Your goals are our goals.

We work together to help you achieve them.

The **Postgraduate Certificate in Creative Business Management** will allow the student to:

01

Acquire and understand knowledge useful for the training of students, providing them with skills for the development and application of original ideas in their personal and professional work.

02

Understand how creativity and innovation have become the drivers of the economy.

03

Problem solving novel environments and in interdisciplinary contexts in the field of creativity management.

04

Integrate one's own knowledge with that of others, making informed judgments and reasoning on the basis of the information available in each case.

05

Know how to manage the process of creation and implementation of novel ideas on a given topic.

06

Acquire specific knowledge for the management of companies and organizations in the new context of the creative industries.

07

Progressive and constant updating in autonomous training environments.

08

Possess the tools to analyze the economic, social and cultural realities in which the creative industries develop and transform today.

09

Help students acquire the necessary skills to develop and evolve their professional profile in both business and entrepreneurial environments.

10

Gain knowledge to manage companies and organizations in the new context of creative industries.

11

Organize and plan tasks with the use of available resources in order to face them in precise time frames.

12

Use new information and communication technologies such as tools for training and the exchange of experiences in the field of study.

13

Develop communication skills, both written and oral, as well as the ability to make effective professional presentations in daily practice.

14

Acquire market research skills, strategic vision, digital and co-creation methodologies.

05

Structure and Content

The syllabus of this Postgraduate Certificate has been designed to be studied and internalized in a comfortable and effective way by the student. Through 10 units that are developed over 6 weeks, the student will learn everything related to business management in the creative sector, following a methodology based on high didactics and the latest developments in the sector. A unique academic program that will lay the foundations for the student's professional growth and will allow them to compete comfortably with the best professionals in the sector.

“

An academic syllabus designed on the basis of the latest developments in the sector and taught using the best teaching methodology”

Syllabus

Traditionally, creativity and management have been conceived as antagonistic disciplines. Today, however, creativity and innovation have become the main drivers of economic progress alongside technology. This reality demands new professional profiles capable of harmoniously and efficiently developing these tools in the management of the so called creative industries.

Through this comprehensive Postgraduate Certificate, the student obtains mastery of all the necessary topics for the management of companies and organizations in the new context of the creative industries. The program does not focus solely on arts management, but aims to provide the tools to analyze the economic, social and cultural realities in which the creative industries develop and transform today.

Likewise, this program is designed to be studied with a methodology that promotes the acquisition of skills in the field of market research, strategic vision, digital tools and co-creation.

On the other hand, jobs in this sector are constantly evolving. Therefore, the program aims to provide students with the necessary skills to develop and evolve their professional profile in both business and entrepreneurial environments.

All of this, condensed into an academic program divided into ten academic modules taught over 6 weeks, is intended to represent a turning point in the student's professional career. This way, and after completing the Postgraduate Certificate, the student will be able to start working in companies in the creative industry with a higher success rate.

This Postgraduate Certificate is developed over 6 weeks consists of 1 module:

Module 1

Consumer or User Management in Creative Businesses

- 1.9.2. Buyer persona
- 1.9.3. Methodology of Analysis

1.10. Research Resources and Techniques

- 1.10.1. Techniques in Context
- 1.10.2. Visualization and Creation Techniques
- 1.10.3. Voice Contrast Techniques

“

Academic experiences like these are what students like you need. Don't miss this great opportunity”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“ *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Certificate is aimed at university graduates who have previously completed a degree in the field of Business Administration, Marketing, Design or Communication.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The program is also open to professionals who, being university graduates in any field, have two years of work experience in the field of creative industries management.

“

TECH wants to count among its ranks students who are committed to their growth and who do everything possible to achieve their goals. We are sure you are one of them"

Average Age

Between **35** and **45** years old

Years of Experience

Training

Geographical Distribution

Ariadna González Suárez

CEO of a Textile Company

"I am a staunch advocate of online education, however, I must admit that the internet is riddled with programs that do not live up to expectations. This Postgraduate Certificate is the opposite... It has more than fulfilled what I expected, and it has done so with a methodology and learning that is second to none. I will definitely choose TECH again in the future for my next courses"

08

Course Management

This program includes a teaching faculty made up of a group of active professionals who contribute their years of experience in a booming sector to this program. Likewise, experts from other related areas belonging to prestigious organizations and universities have participated in the development of the syllabus, completing the faculty in a transversal and interdisciplinary way. This way, the student is guaranteed to learn from leading professionals in the sector in a unique and effective way.

“

We have a teaching team with extensive experience that will help you to specialize in this sector”
