05

Structure and Content

The program of this Postgraduate Certificate in Data Driven Marketing for Luxury Brands is developed by the best experts in the industry, who have poured their knowledge and experience in a complete and up-to-date syllabus, with a historical basis that reaches to the present day. Learn more about the developments in big data and lead generation, among others. Its 100% online format allows students to study it at the time and place that best suits their availability, schedules and interests, and in just 6 weeks they will have a quality program, typical of the sector.

“

The best fashion brands have iconic products, and this Postgraduate Certificate teaches you how to master the cycles they go through using the PLM (Product Lifecycle Management) tool”

Syllabus

Today's highly globalized and competitive environment has forced companies to establish highly efficient work environments that allow them to achieve their objectives. To achieve this, companies must use the best tools to reach a competitive and efficient management level in order to be able to adapt at all times to the needs of the market. This Postgraduate Certificate teaches the necessary tools and knowledge to achieve this adaptation and to be able to compete in the best conditions.

Due to the need to constantly adapt to the changes that occur in the environment which can be of all kinds, it is necessary for a company to act as an adaptable system. For this reason, it is essential that all professionals, even if they are responsible for only one area of the company, are aware of the impact on other areas and, above all, on the end customer. In other words, they must have transversal knowledge.

The Postgraduate Certificate in Data Driven Marketing for Luxury Brands at TECH Global University is an intensive program that will prepare you to master the landscape of the fashion industry through new technologies. The content of the program is designed to promote the development of the skills required for this service.

The Postgraduate Certificate deals in depth with the technological impact on the sales projection of luxury brands and their digital positioning, current trends or consumers have of the brand and what values they associate with them, among others. Quality content designed by the best experts in the sector in this curriculum with which professionals will develop from a strategic, international and innovative perspective, with the aim that the student achieves excellence in a field as competitive as fashion and luxury.

This Postgraduate Certificate is developed over 6 week and is structured into 1 module:

Module 1

- 1.10.2 Brand Growth through Internal Analysis
- 1.10.3 The Untouchables: The Scale of Priorities of a Fashion Brand

PASSION FOR FASHION

WE'RE OPEN

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This Postgraduate Certificate is designed for professionals and students from various academic disciplines who wish to delve into the new scenario that arises in the world of luxury, those who are able to pose challenges and opportunities for growth and marketing. Therefore, there is no single profile, as the student body is diverse and coming from different sectors with a common interest: marketing, fashion and luxury.

This diversity of participants with different academic profiles and from multiple nationalities makes up the multidisciplinary approach of this program. The development of a deep knowledge of marketing in the luxury industry will enable them to find the balance between creative and analytical talent and to face economic and social changes with agility.

“

You will master the prescriptive model in a fashion brand, and you will simulate innovation scenarios"

Average Age

Between **35** and **45** years old

Years of Experience

Geographical Distribution

Alfonso Hurtado Cano

CEO & Founder of a Sustainable Luxury Fashion Consultancy

"The content of this Postgraduate Certificate is everything I was looking for to train 100% of the team of the Marketing and Communication Department of my Fashion and Sustainable Luxury Consultancy. A great success that has already earned us an excellent positioning within the industry"

08

Course Management

The program includes in its teaching staff experts of reference in the field of marketing and fashion, who contribute their years of work experience to this syllabus as well as the link they have maintained throughout their professional careers with this exclusive environment. Other experts of recognized prestige in related areas also participate in its design and elaboration, completing the syllabus of the qualification in an interdisciplinary way, making it a unique experience at an academic level for the student.

“

Learn the latest Data Driven insights on Marketing for Luxury Brands and boost your career path to the 21st century luxury customer”

International Guest Director

Andrea La Sala is an experienced Marketing executive whose projects have had a significant impact on the Fashion sector. Throughout his successful career he has developed different tasks related to Product, Merchandising and Communication. All this linked to prestigious brands such as Giorgio Armani, Dolce&Gabbana, Calvin Klein, among others.

The results of this high-profile international executive have been linked to his proven ability to synthesize information in clear frameworks and execute concrete actions aligned to specific business objectives. In addition, he is recognized for his proactivity and adaptation to fast-paced work rhythms. To all this, this expert adds a strong commercial awareness, market vision and a genuine passion for products.

As Global Brand and Merchandising Director at Giorgio Armani, he has overseen a variety of marketing strategies for apparel and accessories. His tactics have also focused on retail and consumer needs and behavior. In this role, La Sala has also been responsible for shaping the marketing of products in different markets, acting as team leader in the Design, Communication and Sales departments.

On the other hand, in companies such as Calvin Klein or Gruppo Coin, he has undertaken projects to boost the structure, development and marketing of different collections. In turn, he has been in charge of creating effective calendars for buying and selling campaigns. He has also been in charge of the terms, costs, processes and delivery times of different operations.

These experiences have made Andrea La Sala one of the main and most qualified corporate leaders in Fashion and Luxury. A high managerial capacity with which he has managed to effectively implement the positive positioning of different brands and redefine their key performance indicators (KPI).

D. La Sala, Andrea

- Global Brand and Merchandising Director at Giorgio Armani
- Merchandising Director at Calvin Klein
- Brand Manager at Gruppo Coin
- Brand Manager at Dolce & Gabbana
- Brand Manager at Sergio Tacchini S.p.A
- Market Analyst at Fastweb
- Graduate of Business and Economics at the Università degli Studi del Piemonte Orientale

“

Thanks to TECH, you will be able to learn with the best professionals in the world”
