01

Welcome

Before performing a machine learning technique, it is essential to translate the data for simplification. This process is known as "mining" and it is essential to know it to complete the knowledge in Data Science. This program will introduce interested students to the different statistical inference procedures to analyze and determine the study of variables, their distribution and values. In other words, those tools that will allow making the most of a company's information to make relevant decisions.

Postgraduate Certificate in Data Mining Processing and Transformation
TECH Technological University

“

Prepare yourself to play one of the most demanded roles in a company and position yourself as an expert in Data Science”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

executives trained each year

200+

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This Postgraduate Certificate in Data Mining Processing and Transformation has been developed with the aim of helping students to prepare in this field of study. Therefore, they will gain the appropriate knowledge to become a reference within their field of work, ensuring the extraction of maximum value from the data.

“

Create your own path to excellence with the tools provided by this Postgraduate Certificate”

TECH makes the goals of their students their own goals too.

Working together to achieve them.

The Postgraduate Certificate in Data Mining Processing and Transformation qualifies students to:

01

Generate specialized knowledge about the statistical prerequisites for any data analysis and evaluation

04

Examine the problems in high dimensional data environments

02

Develop the necessary skills for data identification, preparation and transformation

03

Asses the various methodologies presented and identify advantages and drawbacks

05

Implement algorithms used for data preprocessing

06

Demonstrate the ability to interpret data visualization for descriptive analysis

08

Examine the main selection, preprocessing and transformation techniques prior to a data mining process

09

Develop specialized knowledge on data preprocessing

07

Develop advanced knowledge of the different existing data preparation techniques for data cleaning, normalization and transformation

10

Analyze the different problems in a data analytics process

05

Structure and Content

The content of the Postgraduate Certificate in Data Mining Processing and Transformation is tailored to the student's needs. To this end, innovative and essential content will be taught to enhance the analysis skills of computer engineers.

“

Redirect your engineering career into a managerial role by acquiring the knowledge to achieve it”

Syllabus

The Postgraduate Certificate in Data Mining Processing and Transformation of TECH Technological University will become a complete experience that will help students to realize effective and efficient procedures for data processing according to the type of problem presented.

This program has been designed to promote the managerial skills that all computer engineers must possess if they wish to advance in their careers.

For this reason, in each class you will have the opportunity to learn, through case studies, to evaluate the different methodologies presented and identify advantages and disadvantages, and then develop the implementation of algorithms that help this process. In this way, they will complete the program by demonstrating advanced knowledge to clean, normalize and transform information.

By means of practical cases, students will have a much better understanding of the knowledge imparted. In turn, they will be encouraged to achieve excellence in the field of leadership and management of a technology department in a company. They will understand the needs of the business and be able to propose new and innovative strategies.

This Postgraduate Certificate takes place over 6 weeks with 1 module of study:

Module 1

Data Mining. Selection, Pre-Processing and Transformation

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Data Mining Processing and Transformation completely online. Over the course of 6 weeks, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Data Mining, Selection, Pre-Processing and Transformation

1.1. Statistical Inference

- 1.1.1. Descriptive Statistics vs. Statistical Inference
- 1.1.2. Parametric Procedures
- 1.1.3. Non-Parametric Procedures

1.2. Exploratory Analysis

- 1.2.1. Descriptive Analysis
- 1.2.2. Visualization
- 1.2.3. Data Preparation

1.3. Data Preparation

- 1.3.1. Integration and Data Cleaning
- 1.3.2. Normalization of Data
- 1.3.3. Transforming Attributes

1.4. Missing Values

- 1.4.1. Treatment of Missing Values
- 1.4.2. Maximum Likelihood Imputation Methods
- 1.4.3. Missing Value Imputation Using Machine Learning

1.5. Noise in the Data

- 1.5.1. Noise Classes and Attributes
- 1.5.2. Noise Filtering
- 1.5.3. The Effect of Noise

1.6. The Curse of Dimensionality

- 1.6.1. Oversampling
- 1.6.2. Undersampling
- 1.6.3. Multidimensional Data Reduction

1.7. From Continuous to Discrete Attributes

- 1.7.1. Continuous Data Vs. Discrete Data
- 1.7.2. Discretization Process

1.8. The Data

- 1.8.1. Data Selection
- 1.8.2. Prospects and Selection Criteria
- 1.8.3. Selection Methods

1.9. Instance Selection

- 1.9.1. Methods for Instance Selection
- 1.9.2. Prototype Selection
- 1.9.3. Advanced Methods for Instance Selection

1.10. Data Pre-processing in Big Data Environments

- 1.10.1. Big Data
- 1.10.2. Classical Versus Massive Pre-processing
- 1.10.3. Smart Data

“

Empower your data mining skills and face new professional challenges”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The TECH graduates are professionals capable of facing any work challenge. Being analytical, critical and ingenious, they are able to propose innovative solutions in their work team. This makes them capable of leading a work team of excellence. Therefore, this program is designed for computer engineers who are looking to go a step further in their careers.

“

At the end of the Postgraduate Certificate you will have gained the best experience to become the next leader of your company”

Average Age

Between **35** and **45** years old

Years of Experience

Training

Academic Profile

Geographical Distribution

Alicia Palacios

DataSet Analyst

"Nowadays, companies are looking for professionals who can analyze and process the data they generate. That is why this course is an excellent alternative to understand how the whole process works. For me it has meant a huge paradigm shift, making me worthy of a new position in my work team"

08

Course Management

This Postgraduate Certificate has a select group of experts with multiple years of experience in data development and analysis. Together, they have created a program that will enhance the students' skills in a practical and educational way.

“

You will not be alone. You will have an excellent group of teachers to help you prepare”

Management

Dr. Peralta Martín-Palomino, Arturo

- ♦ CEO and CTO at Prometheus Global Solutions
- ♦ CTO en Corporate Technologies in Corporate Technologies
- ♦ CTO in AI Shephers GmbH
- ♦ Doctorate in Psychology from the University of CastillaLa
- ♦ PhD in Economics, Business and Finance from the Camilo José Cela University. Outstanding Award in her PhD
- ♦ PhD in Psychology, University of CastillaLa Mancha
- ♦ Master's Degree in Advanced Information Technologies from the University of Castilla la Mancha
- ♦ Master MBA+E (Master's Degree in Business Administration and Organisational Engineering) from the University of Castilla la Mancha
- ♦ Associate lecturer, teaching undergraduate and master's degrees in Computer Engineering at the University of Castilla la Mancha
- ♦ Professor of the Master in Big Data and Data Science at the International University of Valencia
- ♦ Lecturer of the Master's Degree in Industry 4.0 and the Master's Degree in Industrial Design and Product Development
- ♦ Member of the SMILe Research Group of the University of Castilla la Mancha

Professors

Mr. Montoro Montarroso, Andrés

- ◆ Researcher in the SMILe Group at the University of Castilla-La Mancha
- ◆ Data Scientist at Prometheus Global Solutions
- ◆ Graduate in Computer Engineering from the University of Castilla-La Mancha
- ◆ Master's Degree in Data Science and Computer Engineering from the University of Granada
- ◆ Guest lecturer in the subject of Knowledge-Based Systems at the Escuela Superior de Informática de Ciudad Real, Giving the Lecture "Advanced Artificial Intelligence Techniques: Search and Analysis of Potential Social Media Radicals"
- ◆ Guest lecturer in the subject of Data Mining at the Escuela Superior de Informática de Ciudad Real giving the lecture: "Applications of Natural Language Processing: Fuzzy Logic to the analysis of messages in social networks"
- ◆ Speaker at the Seminar on Corruption Prevention in Public Administrations and Artificial Intelligence. Faculty of Law and Social Sciences of Toledo. Conference entitled "Artificial Intelligence Techniques" Speaker at the first International Seminar on Administrative Law and Artificial Intelligence (DAIA). Organised by Centro de Estudios Europeos Luis Ortega Álvarez and Institut de Recerca TransJus. Conference entitled "Sentiment Analysis for the prevention of hate speech on social media"

09

Impact on Your Career

This program involves a great economic, professional and, of course, personal investment, of which TECH is aware. The ultimate goal of carrying out this great effort should be to achieve professional growth in the students' field of interest.

“

*Explore a new career field and develop
new business skills”*

Are you ready to take the leap? Excellent professional development awaits you

The Postgraduate Certificate in Data Mining Processing and Transformation at TECH Technological University is an intensive program that prepares you to face challenges and business decisions in the field of data analysis. The main objective is to promote personal and professional growth. Helping students achieve success.

If you want to improve yourself, make a positive change professionally and network with the best, this is the place for you.

Assess the different methodologies presented and identify advantages and disadvantages and aspire to be the manager of your team.

If you want to make a positive change in your profession, the Postgraduate Certificate in Data Mining Processing and Transformation is for you.

When the change occurs

Type of change

Salary increase

This program represents a salary increase of more than **25.33%** for our students.

10

Benefits for Your Company

The Postgraduate Certificate in Data Mining Processing and Transformation contributes to elevate the organization's talent to its maximum potential by preparing high-level leaders.

Participating in this program is a unique opportunity to access a powerful network of contacts in which to find future professional partners, customers or suppliers.

“

You will be a new leader capable of meeting any business challenge in a technology department”

Developing and retaining talent in companies is the best long-term investment.

01

Intellectual Capital and Talent Growth

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

The student will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a current project or develop new projects in the field of R&D or Business Development within their company.

06

Increased competitiveness

This Postgraduate Certificate will equip your professionals with the skills to take on new challenges and therefore drive the organization forward.

11

Certificate

The Postgraduate Certificate in Data Mining Processing and Transformation guarantees students, in addition to the most rigorous and up-to-date education, access to a qualification issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Data Mining Processing and Transformation** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Data Mining Processing and Transformation**
Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
