01 Welcome

The Digital Platforms Experience has become critical to the success of online businesses. The ability to provide a satisfactory user experience on digital platforms is essential to increase customer loyalty and retention, as well as enhance brand image and reputation. Technology is advancing rapidly, which means that companies must keep up-to-date and adapt to the latest trends to provide the best possible experience for their users. This 100% online university program will enable specialists to receive a complete program with the most cutting-edge advances to enhance customer experiences in the digital realm. Thanks to the program's format, students can organize their educational resources according to their needs, combining their work and personal responsibilities with their studies.

Postgraduate Certificate in Digital Platforms Experience.
TECH Technological University

“

Give a definitive boost to your professional career with a Postgraduate Certificate that will place you at the zenith of Customer Experience, demonstrating your ability to manage incidents of all kinds"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve *soft skills* and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

By pursuing this program, professionals will be able to achieve several objectives. First, they will acquire knowledge and skills to design and improve the user experience on digital platforms. They will also learn how to analyze and measure user experience results to make informed strategic decisions. In addition, this Postgraduate Certificate can help specialists understand current trends and best practices in the digital platform industry, enabling them to stay current in a constantly evolving environment.

“

You will meet your most ambitious goals thanks to an effective academic methodology, which focuses on the key aspects of the impact of technology on the shopping experience"

**TECH makes the goals of their students their own goals too.
Working together to achieve them.**

The **Postgraduate Certificate in Digital Platforms Experience** will enable students to:

01

Analyze the impact of technology on the shopping experience and how to use it to improve customer interaction in the physical store

02

Design an effective, multi-role, decision-oriented customer satisfaction governance model

03

Identify the best customer experience KPI based on the nature of the company

04

Use emotional marketing and storytelling to create a memorable shopping experience

05

Reflect on the importance of sustainability, social responsibility and the environmental impact of companies in the new consumer environment, and how they can improve their relationship with customers through these practices

06

Establish work methodologies that streamline and encourage creativity and continuous improvement

05

Structure and Content

The university program has been designed with the purpose of meeting the needs of Digital Marketing professionals. It is offered in an online format, which allows students the freedom to choose the time and place of study. Lasting six weeks, the Postgraduate Certificate offers a unique and motivating learning experience that provides an essential foundation to succeed in the Customer Experience field. Likewise, the structure of the program is flexible and accessible, allowing specialists to adapt their educational resources to their schedules and work responsibilities, in this way guaranteeing maximum use of the contents.

“

All program content is downloadable from any device with an Internet connection, allowing you to access it even from your own smartphone”

Syllabus

The Postgraduate Certificate in Digital Platforms Experience seeks to improve analytical skills and effective decision making in the field of Consumer Experience on digital platforms, from acquisition to after-sales support.

During six weeks, key topics such as digital channels, the web channel, mobile applications and social networks, Content Marketing, Chatbots, voice technology and the concept of Frictionless will be addressed. The syllabus aims to train leaders capable of leading high-performance teams in the digital sector, acquiring skills in decision-making and project management from a strategic, technological and innovative perspective.

The program adapts to the educational needs of each student by offering didactic materials in various multimedia and textual formats, which guarantees a personalized and efficient learning experience. It also promotes leadership and teamwork to develop skills from a strategic and technological perspective.

In conclusion, this Postgraduate Certificate program seeks to update and expand the skills of digital professionals with an innovative perspective and solid educational training. With this, students will be able to develop management skills and acquire practical knowledge to apply in their work environment, giving them an advantage in the competitive Digital Marketing field.

This Postgraduate Certificate is developed over 6 week and is divided into 1 module:

Module 1

Digital Platforms Experience

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Digital Platforms Experience completely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow the students to self-manage their study time.

A unique educational experience, key and decisive to boost your professional development and make the definitive leap.

Module 1. Digital Platforms Experience

1.1. Digital Channels

- 1.1.1. IoT Industrial Internet of Things and Its Role in Digital Channels
- 1.1.2. Digital Channel Types
- 1.1.3. Choosing the Right Digital Channels for Your Business

1.2. Web Channel

- 1.2.1. User Experience Analysis in the Web Channel
- 1.2.2. Search Engine Optimization (SEO)
- 1.2.3. Liquid Web Design: Mobile Devices Adaptation

- 1.8.1. Content Marketing
 - 1.8.1.1. Creation of Valuable and Relevant Content for the Customer in Digital Channels
- 1.8.2. Optimization of Digital Channels to Improve Positioning in Search Results
- 1.8.3. Use of Influencers and Celebrities to Provide an Emotionally Connected Customer Experience

1.9. Personalization

- 1.9.1. Omnichannel Personalization Personalized User Experience
- 1.9.2. Artificial Intelligence
 - 1.9.2.1. Clustering and Hyper-Customization
- 1.9.3. Personalization to Create Relevant and Attractive Offers and Promotions for Each Customer

1.10. Omnichannel and Frictionless

- 1.10.1. The Frictionless Concept and the Impact on Customer Experience
- 1.10.2. Customer Friction Identification and Management

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Certificate is aimed at University Graduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The Postgraduate Certificate may also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Digital Marketing.

“

Add an innovative and modern touch to your professional profile by integrating the skills acquired in this Postgraduate Certificate, and in this way improve your value proposition"
