01 Welcome

Today's companies must strive to follow environmental criteria in their production processes that allow them to reduce waste while improving efficiency, with the aim of having the least possible impact on nature. For this reason, business professionals are increasingly looking for better programs that will enable them to increase their competitiveness in such a demanding field. This TECH program meets business professionals' demands for higher quality courses to develop their skills and competencies with a program that addresses the requirements of the ISO 14001 Environmental Management Systems, describing the points of the reference standard and analyzing the high-level structure. Likewise, a detailed study of the principles and requirements for the implementation and application of Environmental Management Systems in organizations is made, as established in the aforementioned regulation. In addition, at the end of the program, professionals will be able to identify, evaluate and address significant environmental aspects and set environmental objectives with the ultimate goal of continuous improvement of the environmental management system.

Postgraduate Certificate in Environmental Management Systems in
Organizations.

TECH Global University

“

Applying current regulations in environmental management systems will allow your company to be more efficient and environmentally friendly”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

TECH has designed this Postgraduate Certificate with the main objective that business professionals acquire that superior skills in the field of Environmental Management systems that are so necessary in today's organizations. A comprehensive program that will help them improve their qualifications and increase their competitiveness in a short time, with the best theoretical and practical content and the use of the most innovative teaching methodology on the market.

“

A first-class program that will help you achieve your academic and professional goals”

Your goals are our goals

We work together to help you achieve them

This Postgraduate Certificate in Environmental Management Systems in Organizations prepares students to:

01

Conduct environmental impact assessments

04

Develop and implement an ISO 14001 environmental management system.

02

Develop and implement environmental and energy improvements

05

Master the application and development of the environmental management system in organizations

03

Develop a solid understanding of energy and environmental certifications

06

Analyze and implement the requirements and specifications of the ISO 14001 standard: 2015

Identify non-conformities and corrective actions of an environmental management system

09

Establish in detail the differences between ISO 14001 and EMAS and study how to transition the management system from ISO 14001 to EMAS.

07

Identify and assess the significant environmental aspects, environmental impacts, and environmental risks and opportunities for organizations

10

Be able to carry out internal audits of management systems of organizations

05

Structure and Content

This Postgraduate Certificate in Environmental Management Systems in Organizations has been structured to facilitate the learning of business professionals in this field. In this way, each theoretical section has a series of practical cases that will be fundamental to consolidate knowledge easily. Undoubtedly, this is a high-quality academic course that will represent a turning point in the students' skill sets.

“

Get to know environmental management systems in depth and apply them in your organization with ease"

Syllabus

This Postgraduate Certificate in Environmental Management Systems in Organizations by TECH Global University is an intensive program that prepares students to face challenges and business decisions in the field of Environmental Management. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Throughout 180 hours of study, students will analyze a multitude of practical cases through individual work, which will allow them to acquire the necessary skills to successfully carry out their daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals with different areas of the company in depth and is designed for managers to understand environmental management from a strategic, international and innovative perspective.

A plan designed especially for students, focused on their professional improvement and preparing them to achieve excellence in the field of Environmental Management. A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the competencies to solve critical situations in a creative and efficient way.

This Postgraduate Certificate is developed over 6 weeks and is structured into 1 module:

Module 1

Environmental Management Systems

Where, when and how is it taught?

TECH offers the possibility of developing this Postgraduate Certificate in Environmental Management Systems in Organizations completely online. Over the course of 6 weeks, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Environmental Management Systems

1.1. Management Systems: ISO 14001

- 1.1.1. Environmental Management Systems
- 1.1.2. Benefits of the Environmental Management System
- 1.1.3. EMS Implementation Phases

1.2. Organizational Context and Leadership

- 1.2.1. Understanding of the Organization, its Context and Stakeholders
- 1.2.2. Scope of the System
- 1.2.3. Environmental Policies
- 1.2.4. Roles and Responsibilities

1.3. Planning: Environmental Aspects and Impacts

- 1.3.1. Environmental Aspects and Impacts: Cause and Effect Relationship
- 1.3.2. Identification of Environmental Aspects
- 1.3.3. Evaluation of Environmental Aspects

1.4. Planning: Objectives, Risks and Opportunities

- 1.4.1. Actions to Address Risks and Opportunities
- 1.4.2. Legal Requirements
- 1.4.3. Environmental Objectives and Planning to Achieve Them

1.5. Support: Resources, Competence and Awareness

- 1.5.1. Resources
- 1.5.2. Competition
- 1.5.3. Awareness

1.6. Support: Documented Communication and Information

- 1.6.1. Internal and External Environmental Communication
- 1.6.2. Documented Information
- 1.6.3. Documentation Control

1.7. Operation

- 1.7.1. Operational Planning and Control
- 1.7.2. Life Cycle Analysis Perspective
- 1.7.3. Emergency Preparedness and Response

1.8. Performance Evaluation

- 1.8.1. Monitoring, Measurement, Analysis and Evaluation
- 1.8.2. Internal Auditing
- 1.8.3. Management Review

1.9. Improvement

- 1.9.1. Non-Conformities and Corrective Actions
- 1.9.2. Continuous EMS Improvement
- 1.9.3. Continuous Environmental Performance Improvement

1.10. Transition from 14001 to EMAS

- 1.10.1. The EMAS Regulation
- 1.10.2. Transition from ISO 14001 to EMAS
- 1.10.3. ISO 14001 vs. EMAS

ISO 14001

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This Postgraduate Certificate in Environmental Management Systems in Organizations by TECH, is aimed at business professionals who already have previous knowledge in this field, but wish to update it in order to be more effective in their jobs, as well as recent graduates seeking a way to specialize in this booming sector. Undoubtedly, a very comprehensive program that will be a unique study opportunity for those who wish to improve in this field.

“

The best way to increase your skills is to continue studying and, for this reason, TECH offers you the opportunity to take this first-class Postgraduate Certificate"

Pablo Menéndez

Energy Consultant

"Without a doubt, increasing my skill set in environmental management systems in organizations has been fundamental to my professional development, as I have been able to update myself on the main developments in the sector. This TECH program has given me the opportunity to do it in a short time, but with great quality, so I recommend it to anyone"

08

Course Management

TECH has selected a first-class teaching team for this Postgraduate Certificate in Environmental Management Systems in Organizations. Professors with extensive knowledge in Environmental Management, who, aware of the importance of continued specialization in this field, have created the best program in the current academic panorama. Professionals with extensive academic and research experience who are committed to new educational technologies as the main teaching method.

“

A high-level teaching staff to help you improve in this field"

International Guest Director

With an exceptional professional career, Sarah Carson has focused her research on environmental compliance and sustainability in higher education. For more than 3 decades, she has been part of Cornell University's research team charged with implementing and analyzing the impact of policies for the care of natural resources. Thanks to her experience in this area of expertise, she has been chosen to lead the Office of Campus Sustainability at Cornell University.

In this way, this expert directs the electricity supply projects, aimed at reducing the carbon footprint of the higher education center. As such, she has implemented innovative technologies that help, for example, to maintain high temperatures during the winter in the educational facilities. Specifically, her team has opted to implement a renewable geothermal heat source called "ground-source heat", the beneficial results of which have already been reported in several global impact reports.

At the same time, she has actively participated in the energy policy of New York, related to the generation of renewable energy. To this end, she has collaborated in the volunteer program for the Regional Greenhouse Gas Initiative in this US state. The latter is based on the Cap and Trade model, which allows the university, the local government and other participants to claim renewable energy credits.

As for her academic life, Carson holds a degree in Natural Resources Management and Policy from North Carolina State University. She also holds a degree in Environmental Science and Policy from the School of Environmental Science and Forestry at the State University of New York.

Ms. Sarah, Carson

- Director, Office of Sustainability, Cornell University, New York, United States
- Head of Campus Climate Action, Cornell University, New York, USA
- Environmental Management Specialist, Cornell University
- Environmental Information Officer, Cornell University
- B.S. in Natural Resource Management and Policy from North Carolina State University
- B.S. in Environmental Science and Policy from the State University of New York

09

Impact on Your Career

Completing this Postgraduate Certificate in Environmental Management Systems in Organizations by TECH will provide a qualitative advantage in the students' expertise, as they will have the most up-to-date information available on the market in a field that is essential today. Therefore, at the end of this program, students will be better able to work with total fluency in their field of action, reducing waste and improving the environmental efficiency of their companies.

“

*A unique program that will help
you turn your career around”*

Are you ready to take the leap? Excellent professional development awaits you

This Postgraduate Certificate in Environmental Management Systems in Organizations at TECH Global University is an intensive and highly valuable program aimed at improving students' work skills in an area of broad competence. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

Acquire the skills that will make you stand out in personnel selection processes with this Postgraduate Certificate.

Most of this program's students achieve professional change in a short period of time.

When the change occurs

Type of change

Salary increase

This program represents a salary increase of more than **25.22%** for our students

10

Benefits for Your Company

This Postgraduate Certificate in Environmental Management Systems in Organizations by TECH will be essential to adapt the work in companies to the needs of today's market. In this way, students will be able to apply the main tools and strategies that will serve as a great support to improve the competitiveness of companies. Undoubtedly, a program that will be essential to improve the skill set of business professionals.

“

Bring a new business vision to your company that's more sustainable and adapted to the needs of the 21st century"

Developing and retaining talent in companies is the best long-term investment.

01

Intellectual Capital and Talent Growth

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the executive and opens new avenues for professional growth within the company.

03

Building agents of change

The professional will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

Professionals will be work on a current project or develop new projects in the field of R&D or Business Development within their company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

This Postgraduate Certificate in Environmental Management Systems in Organizations guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Environmental Management Systems in Organizations** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
