01 Welcome

To try to fight pollution and climate change, it is important that companies unite in the pursuit of "greener" objectives, in line with the principles of sustainability in the 21st century, by implementing appropriate environmental strategies, providing the criteria to reduce pollution and successfully incorporating environmental improvements in business management. To do so, this TECH program will analyze the carbon markets, examining their mechanisms and associated advantages; and will discuss the main standards and calculation methodologies, both for the carbon footprint of an organization, a product or an event, as well as for the water footprint, describing the main requirements and processes of each of the systematics. A comprehensive program that will allow business professionals to acquire a solid knowledge of the processes and competitive advantages of environmental and energy certifications in buildings and organizations.

Postgraduate Certificate in Environmental Management Tools in Organizations.
TECH Global University

“

Specialize in this field and become an expert in environmental management, capable of successfully advising companies”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

TECH has designed this program to bring students up to date on the main issues in the field of Environmental Management in Organizations, which they can then apply to their daily work. A high level program with which they will be able to achieve their academic objectives, resulting in greater competitiveness in the workplace and, above all, more benefits for their companies and the environment.

“

TECH offers you the best program on the market to specialize in Environmental Management Tools in Organizations"

Your goals are our goals.

We work together to help you achieve them.

This Postgraduate Certificate in Environmental Management Tools in Organizations prepares students to:

01

Obtain the necessary skills for the management of environmental and energy tools

04

Precisely establish the application of environmental management tools in organizations

02

Conduct energy audits

03

Conduct environmental impact assessments

05

Identify carbon markets and their utility

06

Master the calculation of the carbon footprint of organizations, products and events based on international reference standards

08

Calculate the water footprint and know the principles of the reference standards

09

Develop a life cycle analysis and identify its different approaches

07

Acquire all the necessary knowledge for the implementation of climate change mitigation tools

10

Gain an in depth understanding of the characteristics and principles of environmental and energy certifications of sustainable buildings

05

Structure and Content

The syllabus of this Postgraduate Certificate in Environmental Management Tools in Organizations from TECH includes the latest information in this field so that business professionals can carry out a self managed learning that will be fundamental for their professional development. Therefore, this academic program includes very comprehensive theoretical content that is perfectly complemented by the practical cases presented, which will help students to specialize in a short period of time.

“

This syllabus on Environmental Management Tools will allow you to gain a further learning and will be essential for your professional development"

Syllabus

This Postgraduate Certificate in Environmental Management Tools in Organizations by TECH Global University is an intensive program that prepares students to face challenges and business decisions in the field of Environmental Management. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Throughout 180 hours of study, students will analyze a multitude of practical cases through individual work, which will allow them to acquire the necessary skills to successfully carry out their daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals with different areas of the company in depth and is designed for managers to understand environmental management from a strategic, international and innovative perspective.

A plan designed especially for students, focused on their professional improvement and preparing them to achieve excellence in the field of Environmental Management.

A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the competencies to solve critical situations in a creative and efficient way.

It is a 6 week program, structured into one module:

Module 1

Environmental Management Tools

Where, when and how is it taught?

TECH offers the possibility of developing this Postgraduate Certificate in Environmental Management Tools in Organizations completely online. Over the course of 6 weeks, you will be able to access all the contents of this program at any time, allowing you to self manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Environmental Management Tools

1.1. Carbon Markets

- 1.1.1. KP Flexibility Mechanisms
- 1.1.2. CAP and Trade and Carbon Funds Schemes
- 1.1.3. Voluntary Carbon Markets

1.2. Organizational Carbon Footprint

- 1.2.1. Methodological Reference Standards
- 1.2.2. Scopes for Organizational Carbon Footprint
- 1.2.3. Calculation Process

1.3. Product and Event Carbon Footprint

- 1.3.1. Methodological Reference Standards
- 1.3.2. Scopes for Product Carbon Footprint
- 1.3.3. Scopes for Carbon Footprint of Events

1.4. Climate Change Mitigation Tools

- 1.4.1. Reduction and Limitation of Emissions
- 1.4.2. Emissions Offsets
- 1.4.3. Business Benefits: Certifications

1.5. Water Footprint

- 1.5.1. Stages and Units
- 1.5.2. Differentiation of Water for Calculations
- 1.5.3. The Water Footprint for Companies

1.6. Life Cycle Analysis

- 1.6.1. Differentiation of Approaches
- 1.6.2. LCA Process
- 1.6.3. Software Tools for LCA

1.7. Eco-Design and Eco-Labeling

- 1.7.1. Eco-Design Standardization
- 1.7.2. Types of Eco-Labeling
- 1.7.3. Eco-Labeling Process

1.8. LEED and BREEAM

- 1.8.1. The Value of Sustainable Building Certification
- 1.8.2. Approaches to Both Certifications
- 1.8.3. Technical Comparison between the Two Certifications

1.9. Other Sustainable Building Certifications

- 1.9.1. Passive House
- 1.9.2. Well
- 1.9.3. VERDE (Building Reference Efficiency Evaluation)

1.10. Energy Certification of Buildings

- 1.10.1. Energy Efficiency in Buildings
- 1.10.2. Technical Conditions and Procedures
- 1.10.3. Main Calculation Programs

“

*A fully up to date program
to promote your personal
and professional growth”*

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“ *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The students of this Postgraduate Certificate in Environmental Management Tools in Organizations by TECH, are business professionals who, for the most part, have years of experience in the sector, and have decided to broaden their skills thanks to this highly academic program. People who understand the importance of keeping up to date with the main developments in the sector and who are committed to online learning as a learning method.

“

A program aimed at business professionals who want to specialize in environmental management”

Undoubtedly, a high quality program that I would recommend to all those who wish to improve in this field, both for the great up to date content and its teachers' professionalism"

08

Course Management

The teaching staff of this Postgraduate Certificate in Environmental Management Tools in Organizations are professionals with extensive experience and prestige in the sector, who have come together in this program with the main objective of offering students the best qualification of its time. Therefore, from this team of experts, students will benefit not only from their knowledge, but also from the support required to understand the most up to date concepts in this field.

“

The best teaching staff of today has compiled the latest information on environmental management tools in organizations"

International Guest Director

With an exceptional professional career, Sarah Carson has focused her research on **environmental compliance and sustainability in higher education**. For more than 3 decades, she has been part of Cornell University's research team charged with implementing and analyzing the **impact of policies for the care of natural resources**. Thanks to her experience in this area of expertise, she has been chosen to lead the **Office of Campus Sustainability** at Cornell University.

In this way, this expert directs the **electricity supply projects**, aimed at **reducing the carbon footprint** of the higher education center. As such, she has implemented innovative technologies that help, for example, to maintain high temperatures during the winter in the educational facilities. Specifically, her team has opted to implement a **renewable geothermal heat source** called "ground-source heat", the beneficial results of which have already been reported in **several global impact reports**.

At the same time, she has actively participated in the **energy policy of New York**, related to the generation of renewable energy. To this end, she has collaborated in the volunteer program for the **Regional Greenhouse Gas Initiative** in this US state. The latter is based on the **Cap and Trade model**, which allows the university, the local government and other participants to **claim renewable energy credits**.

As for her academic life, Carson holds a degree in **Natural Resources Management and Policy** from North Carolina State University. She also holds a degree in **Environmental Science and Policy** from the School of Environmental Science and Forestry at the State University of New York.

Ms. Sarah, Carson

- Director, Office of Sustainability, Cornell University, New York, United States
- Head of Campus Climate Action, Cornell University, New York, USA
- Environmental Management Specialist, Cornell University
- Environmental Information Officer, Cornell University
- B.S. in Natural Resource Management and Policy from North Carolina State University
- B.S. in Environmental Science and Policy from the State University of New York
