01 Welcome

The growing development of luxury products destined for the Asian continent based on the European concept, invites us to take a journey through time that shows us how the same business model evolves according to the historical period and the geographical situation in which it is developed.

Italian or French style is giving way to the luxury levels of the Middle East, Japan or China, where the market share of European brands is losing ground in favor of a nascent identity. The new marketing of luxury goes through art and conservation in international museums. For this reason, TECH has created this program that provides a solid and global foundation of what this new market means for fashion brands.

Postgraduate Certificate in Fashion and Luxury in Europe and Asia.
TECH Technological University

“

The Middle East is one of today's major economic powers and its flaunting of luxury and homegrown fashion has rethought the strategy of several Western brands. Enter this market and you will boost sales"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This Postgraduate Certificate is designed to strengthen the knowledge of how fashion and luxury are lived and understood in the continents of Europe and Asia. The students of this program will understand the impact of cultural legacies on marketing campaigns, the luxury product and consumer psychology, understanding that a garment for sale is only a visual message that is launched directly to the subconscious of a society from a global point of view. Thus, you will acquire the necessary tools to understand the role of marketing in a company or how to design a brand strategy focused on new potential consumers.

“

You are one step away from learning more about the mind of today's top luxury consumer”

TECH makes the objectives of its students its own.
Working together to achieve them.

The Postgraduate Certificate in Fashion and Luxury in Europe and Asia enables the student to:

01

Knowledge of Western and Eastern cultures for the correct development of consumer profiles and marketing campaigns at an international level

04

Acquire critical thinking in relation to sustainability and innovation in luxury marketing

02

Discover the triple approach brand-strategy-consumer

03

Understand the progress of new digital marketing tools

05

Expand the ability to analyze the commercial scenario of brands

06

Improve decision making in the business and business development context

07

Develop strategic skills to adapt to new labor market

08

Elaborate a correct Marketing Plan adapted to the client, brand and market needs

09

Plan marketing actions in line with the luxury industry, providing profitable solutions in the short and long term

10

Learn to project the brand's identity to society as a whole

11

Build predictable, flexible and sustainable marketing models that guarantee the survival and impact of the luxury product

12

Discover the evolution of public relations and the latest market trends, understanding the persuasive component of PR for luxury marketing and the role of social media in communication strategies

13

Understand the impacts of cultural legacies on marketing campaigns, the luxury product and consumer psychology

14

Understand that a garment for sale is only a visual message that I am launching directly into the subconscious of a society

05

Structure and Content

The program of this Postgraduate Certificate in Fashion and Luxury in Europe and Asia is developed by the best experts in the industry, who have poured their knowledge and experience in a complete and up-to-date syllabus, with a historical basis that reaches to the present day. It covers the latest developments in the sector, such as the fact that brands take into account their plural and global audience. Its 100% online format allows students to study it at the time and place that best suits their availability, schedules and interests, and in just 6 weeks they will have a quality program, typical of the sector.

“

Luxury as a generator of culture or art associated with luxury are two issues that you will explore in depth with this Postgraduate Certificate”

Syllabus

Today's highly globalized and competitive environment has forced companies to establish highly efficient work environments that allow them to achieve their objectives. To achieve this, companies must use the best tools to reach a competitive and efficient management level in order to be able to adapt at all times to the needs of the market. This Postgraduate Certificate teaches the necessary tools and knowledge to achieve this adaptation and to be able to compete in the best conditions.

Due to the need to constantly adapt to the changes that occur in the environment, which can be of all kinds, it is necessary for a company to act as an adaptable system. For this reason, it is essential that all professionals, even if they are responsible for only one area of the company, are aware of the impact on other areas and, above all, on the end customer. In other words, they must have transversal knowledge.

The Postgraduate Certificate in Fashion and Luxury in Europe and Asia at TECH Technological University is an intensive program that will prepare you to master the landscape of the fashion industry through new technologies. The content of the program is designed to promote the development of the skills required for this service.

The Postgraduate Certificate deals in depth with the global condition towards which fashion is oriented and does so through a journey through the history of fashion and haute couture. The best experts in the sector have designed a syllabus with which professionals will develop from a strategic, international and innovative perspective, with the objective that the student will achieve excellence in such a competitive field as fashion and luxury.

This Postgraduate Certificate is developed over 6 week and is divided into 1 module:

Module 1

Fashion and Luxury in Europe and Asia

- 1.10.2. The High Standards of Exclusivity
- 1.10.3. Temporary Exhibitions: Luxury as a Historic Testimony and a Showcase for Major Brands

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This Postgraduate Certificate is designed for professionals and students from various academic disciplines who wish to delve into the new scenario that arises in the world of luxury, those who are able to pose challenges and opportunities for growth and marketing. Therefore, there is no single profile, as the student body is diverse and coming from different sectors with a common interest: marketing, fashion and luxury.

This diversity of participants with different academic profiles and from multiple nationalities makes up the multidisciplinary approach of this program. The development of a deep knowledge of marketing in the luxury industry will enable them to find the balance between creative and analytical talent and to face economic and social changes with agility.

“

Specialize with this Postgraduate Certificate and learn how luxury can be extended to all social classes”
