Welcome

Digital transformation has revolutionized businesses and within this environment has emerged Design Thinking, a methodology which allows for the creation of innovative solutions in a short space of time. This innovative model allows businesses to improve their results both in terms of commercialization or searching for new challenges. Therefore it has become an essential technique for entrepreneurship. If you want to improve yourself, make a positive change at a professional level, and

network with the best, then this is the place for you.

08 | Why Study at TECH?

TECH - Technological University

Innovation

We offer you an online learning model that combines the latest educational technology with the most efficient learning systems of the moment. A unique method with the best international recognition.

International Recognition

The success of our way of working has resulted in international recognition and awards: Our innovative Interactive Multimedia Video system received the "Microsoft Europe Success Story" award and our way of working received the Entrepreneur Award at the most important Spanish-speaking event: Expoelearning World Congress.

Vocation of Excellence

Our workline is very simple: we train the best professionals. For that reason we provide you will the best human and technological resources to boost you ability for growth. But the effort, commitment and drive that will take you to the top are provided by you. An unbeatable combination.

Networking

We offer you an incomparable environment to exchange knowledge and high quality networking opportunities.

38,000

23

executives trained each year

different nationalities

Empowerment

Grow hand in hand with the best, most prestigious and influential companies and professionals. We have developed strategic partnerships and a valuable network of contacts with major economic players both in Europe and America.

500+

collaborative agreements with leading companies

Talent

We offer you a space to exchange ideas, experiences and reflections among executives, professionals, entrepreneurs and opinion leaders.

PhD degrees from prestigious universities

Analysis

We boost your professional development in a transversal manner, ensuring that your capacity for growth remains at the highest level after completing the training. With a critical and analytical spirit that will become your best ally in creating your own path to success.

Why Study at TECH? | 09

What makes us unique

Academic Excellence

We offer the most efficient study methodology on the current online market. A system in which the traditional and successful Case Studies of Harvard Business School are combined with the innovative *Relearning* model, the methodology with the best evaluation results at international level. A combination that turns your effort into results as quickly and surely as possible.

The Capacity of a Great University, Within your Reach

Our quality has allowed us to consolidate ourselves as the biggest university in the online teaching market in the Spanish speaking world. More than 1500 postgraduate courses, 17 faculties and the most state of the art qualifications in the current professional world in a high quality training offer. A capacity that allows us to provide you with elite training at the most competitive prices.

Being the biggest allows us to offer you the most competitive prices on the market: a chance to achieve your high level training that will make a difference to your CV"

12 | Methodology

A learning method that is different and innovative.

Our course offers you a revolutionary method for developing your managerial skills. Our goal is to strengthen your skills in a changing, competitive, and highly demanding environment. That's why we base our training on the Harvard Business School case studies.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

In a given situation, what would you do? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, you will be presented with multiple real management cases. You will have to combine all your knowledge, and research, argue, and defend your ideas and decisions.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining 8 different elements in each lesson, which represent a revolution with respect to simply studying and analyzing cases.

It is the student themselves who builds their professional kills through different teaching models such as that of Roger Schank (Learning by doing, Stanford, Yale) or of George Kembler (Design Thinking, d.school, Stanford) and becomes the active protagonist in the teaching-learning process.

Studying in a practical way converts learning into real skills. That's why we use the case study method from Harvard as our way of working.

We will promote practical learning through the resolution of complex situations extracted from reality"

Re-Learning Methodology

14 | Methodology

With more than 150,000 professionals trained in this methodology and an international satisfaction level of 8.01, relearning has proven to be at the height of the most demanding evaluation environments.

It is a technique that develops critical skills and prepares the nursing professional to make decisions, defend their arguments, and contrast opinions.

Exclusive state-of-the-art teaching: Re-learning

Our methodology, at the forefront of world teaching, is called *Relearning*. Our business school is the only one in Spanish-speaking countries licensed to incorporate this successful method. In 2015, we have managed to improve the overall satisfaction levels of our students (teaching quality, quality of teaching materials, course structure, objectives...) as far as the indicators of the best online university in Spanish are concerned.

In our system, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 150,000 university graduates with unprecedented success. In fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

The Postgraduate Certificate in Innovation Methodologies: Design Thinking is presented as a training program that favors connection, learning, participation, and knowledge acquisition.

You will embark on a training course with us, designed to be practical, active, and participatory.

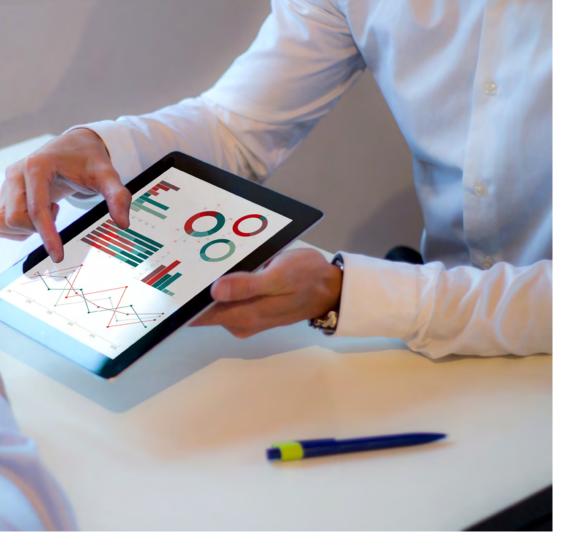

Each student has a personal mentor assigned to them who ensures that the program is used to its best advantage.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed: internal messaging, telephone answering service, e-mail contact with the technical secretary, chat and video conferences.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success"

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called **Neurocognitive context-dependent** e-learning, the different elements in our **Postgraduate Certificate in Innovation Methodologies: Design Thinking** program are connected to the context where the individual carries out their professional activity.

We promote your intelligence. Your skills. Your ability to solve problems. With a teaching model of the highest standards.

The student will be able to learn with the advantages of having access to simulated learning environments and the learning-by-observation approach, "Learning from an Expert".

16 | Methodology

The Postgraduate Certificate in Innovation Methodologies: Design Thinking at TECH Global University you will have access to the best educational material, prepared with you in mind.

Study Material

After a complex production process, we transform the best content into high-quality educational and audiovisual multimedia.

We select **the best syllabus** and make it available to you. Everything you need to acquire in-depth knowledge of a discipline, from A to Z.

Lessons written and selected by senior executives who are specialists in each of the subjects.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. *Learning from an expert* strengthens knowledge and memory, and generates confidence in our future difficult decisions.

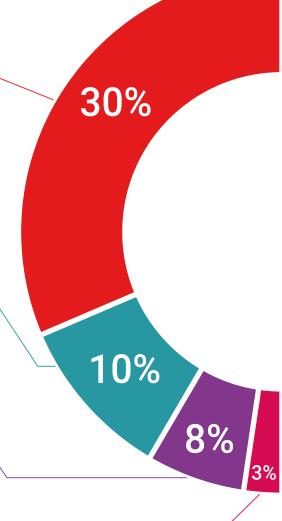

Management Skills Exercises

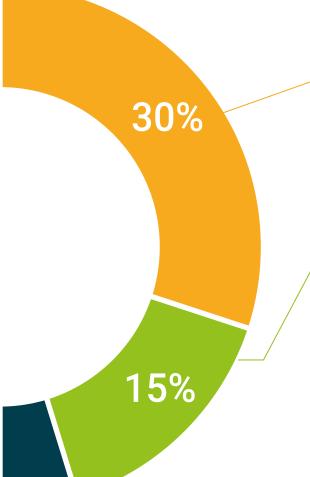

You will carry out activities to develop **specific managerial skills in each subject area.** Practical and dynamic activities to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents, international guides... in our virtual library you will have access to everything you need to complete your.

Case Studies

You will complete a selection of the best *business cases* used at **Harvard Business School**. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

Testing & Re-testing

We assess and re-assess your knowledge periodically throughout the **Postgraduate Certificate in Innovation Methodologies: Design Thinking**We do this on 3 of the 4 levels of Miller's Pyramid.

20 | Objectives

Your goals are our goals.

Make this training a before and after in your career, propelling you towards excellence.

The Postgraduate Certificate in Innovation Methodologies: Design Thinking will train you to:

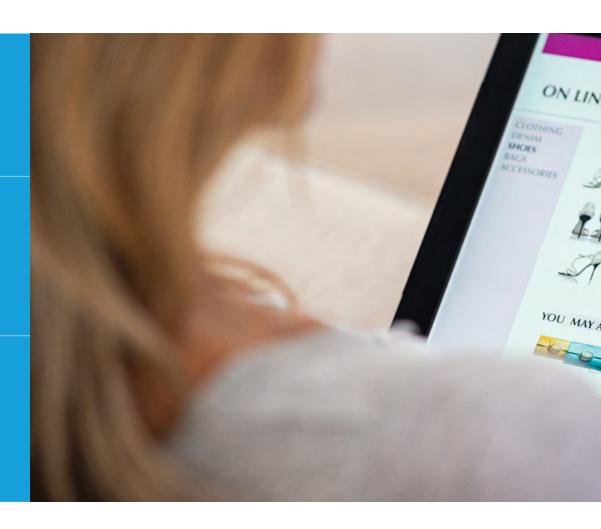

Use Design Thinking as a tool in the creation and optimization of products and services, from a professional perspective.

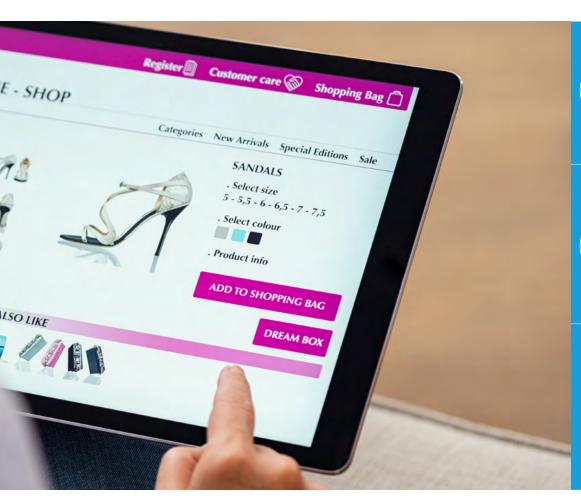

Apply the main applications in the field of innovation and the digital context.

Deepen understanding of the different applicable methodologies during the process.

Discover the benefits and opportunities offered by user experience research.

Be aware of its limitations and learn to avoid the most common mistakes.

"You are TECH"

International Guest Director

Shahzeb Rauf is a leading telecommunications professional with over 18 years of experience. Specializing in complex program management and implementation of technology solutions, he combines advanced technical skills with management, analytical and teamwork capabilities. In fact, his approach is goal-oriented, standing out for his innovative capacity and his ability to negotiate and influence, which allows him to manage successful working relationships and meet business objectives.

As such, throughout his career, he has worked in key roles such as, for example, Group Technical Director at Huawei, Pakistan, where he has led strategic projects in the IP Optics Access and Core domains, mastering strategic transformation programs, such as the modernization of IP and broadcast networks, as well as the launch of VoLTE and LTE Roaming. These experiences have allowed him to hone his skills in strategic project execution and cross-functional team management.

Likewise, he has been internationally recognized for his ability to align methodical tactics with business objectives, as well as for his ability to build strong relationships with stakeholders. His expertise in risk management, resource allocation and optimization has been instrumental in his success in the telecommunications industry.

In addition to his professional background, Rauf has contributed to the industry through project management and team mentoring. In turn, his focus on Huawei Level-5 solution architecture and technical management has been key to the success of his projects. Likewise, his expertise in network modernization and advanced technology implementation underscores his commitment to excellence and innovation in a constantly evolving field such as telecommunications.

Mr. Shahzeb, Rauf

- Group Technical Director at Huawei, Islamabad, Pakistan
- Network Performance and Optimization Manager at NSN, Pakistan
- Wireless Networks Manager at Motorola, Pakistan
- L2 Wireless Support Team Leader at Motorola, Pakistan
- GS Systems Engineer at Motorola, Pakistan
- B.Sc. in Electronics and Communication

Syllabus

The Postgraduate Certificate in Innovation Methodologies: Design Thinking at TECH Global University is an intensive program that prepares you to design and implement the tools and strategies needed in this form of sales and customer relationship.

The content of the **Postgraduate Certificate in Innovation Methodologies: Design Thinking** is designed to promote the development of skills that enable more rigorous decision making in uncertain environments.

Over the course of 180 hours, the student analyzes a plethora of practical cases through individual and team work. It is, therefore, an authentic immersion in real business situations.

This program deals in depth with different areas of the company and is designed to specialize managers who understand project management from a strategic, international and innovative perspective.

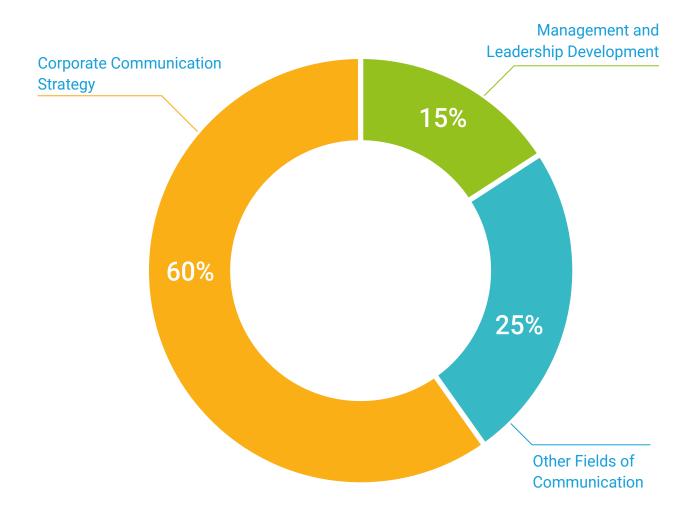

A plan designed for you, focused on improving your career and preparing you to achieve excellence in occupational hazard prevention. A program that understands both yours and your company's needs through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the skills to solve critical situations, creatively and efficiently.

Module 1

Innovation Methodologies: Design Thinking

Structure and Content | 29

The distribution of study of the different materials is the following:

Where, when, and how it is taught

From your electronic device with online connection, or after downloading the contents, you will be able to study wherever you want with total comfort.

With a total flexibility approach, you will always be the one who decides when to study.

This high quality course is designed to be taken totally online with a study plan centered on practice which converts your studies into practical skills in an efficient way.

London

Valencia

34 | Our Students' Profiles

This program is aimed at:

- **Graduates** who want to specialize and acquire specific knowledge and latest trends in cultural diversity, innovation leadership and the latest technologies offered for digital transformation in their organization or to improve their professional projection.
- **Entrepreneurs** who are looking to successfully create an impact in the processes of innovation in their organizations.
- **Technical C-levels** who want to gain a broader strategic view of how technologies can transform their business operations.
- Functional Managers that are undergoing digital transformation processes and want to create new business models and optimize their current operations.
- Entrepreneurs of Technological Start-ups with innovative vocation.

If you are looking to acquire new skills to boost your business and perfectly combine your studies with other commitments, this is the program for you"

Manuel Pérez

Digital Business Manager

"This is the best training on the digital impact in businesses that I could have done. The multimedia methodology and the huge number of practical cases has allowed me to quickly acquire the knowledge. Also, everything I have learnt I have been able to implement it in my daily work"

38 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Innovation Methodologies:Design Thinking** endorsed by TECH Global University, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Innovation Methodologies: Design Thinking

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

has successfully passed and obtained the title of:

Postgraduate Certificate in Innovation Methodologies:Design Thinking

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

^{*}Apostille Convention In the event that the student wishes to have their paper diploma Apostilled, TECH Global University will make the necessary arrangements to obtain it at an additional cost of €140 plus shipping costs of the Apostilled diploma.
