01 **Welcome**

The transition from Market Research to Business Intelligence has defined the market strategies that today are applied on a global scale to influence consumer behavior. This evolution has meant the inclusion of the rise of new research techniques that link Neurosciences and their specific tools, such as Facial Coding and Eye Tracker, with surveys, interviews and conventional Focus Groups. By mastering these strategies, professionals can consolidate their leadership within the sectors dedicated to commerce and the sale of goods and services. For this reason, TECH has designed this 100% online program, which will allow you to specialize in just 6 weeks on the latest trends in this field and applying innovative teaching methods such as Relearning.

tech 08 | Why Study at TECH?

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95%

of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

200+

executives trained each year

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to Harvard Business School case studies"

tech 12 | Why Our Program?

This program will provide students with a multitude of professional and personal advantages, particularly the following:

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

tech 16 | Objectives

TECH makes the objectives of their students their own goals too Working together to achieve them

The Postgraduate Certificate in Market Research in Interaction with Neuromarketing enables the student to:

Understand the trajectory of market research and the role of Neuromarketing in the current panorama

Learn about techniques and tools applied to market research in combination with Neuromarketing

Analyze the contributions of Neuroscience to market research

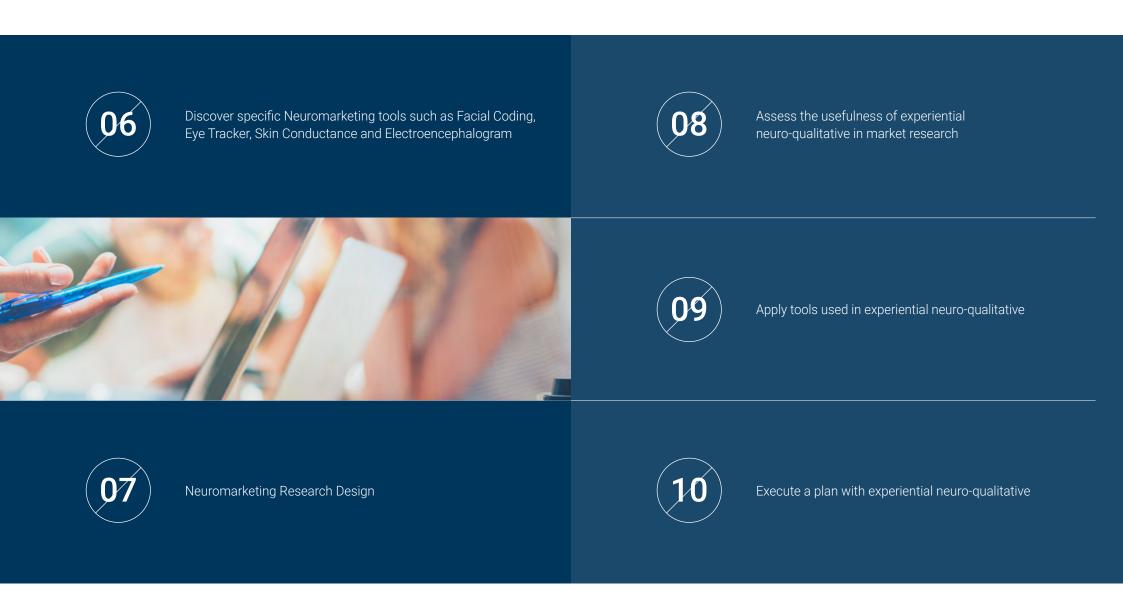

Explore the role of Neuromarketing in Business Intelligence

Learn about specific research techniques and their combination with Neuromarketing today

tech 20 | Structure and Content

Syllabus

This program offers a complete and up-to-date vision of the techniques and tools used in market research and their combination with Neuromarketing. Professionals will examine with special emphasis on the contributions of neuroscience to market research.

In addition, the program includes a section on *Business Intelligence* and its applications. In this way, graduate students will delve into the transition of *Market Research* and the role of Neuromarketing in that process.

The program also covers specific research techniques and combinations with other strategies such as surveys, interviews and *Focus Groups*. In addition, the operation of specific and innovative Neuromarketing tools will be analyzed, including Facial *Coding*, *Eye Tracker*, *Skin Conductance* and Electroencephalogram.

This program is designed for ambitious professionals looking to advance their careers and lead in the field of market research and Neuromarketing. After completing this program, they will have the most advanced knowledge and internship skills to advance their career and take on managerial roles in organizations.

This Postgraduate Certificate takes place over 6 week and consists of 1 module:

Module 1

Fundamentals and Tools in Market Research in Interaction with Neuromarketing

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Market Research in Interaction with Neuromarketing completely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow the students to selfmanage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Fundamentals and Tools in Market Research in Interaction with Neuromarketing

1.1. The Trajectory of Market Research and the Role of Neuromarketing

- 1.1.1. Market Research and Neuromarketing in Today's Scenario
- 1.1.2. Contributions of Neuroscience to Market Research
- 1.1.3. Neuromarketing and the Future of Income and Expense Market Research: Limitation on Deductibility of Expenses and Non-Deductible Expenses: Valuation Rules

1.2. Business Intelligence Applied to Market Research and Neuromarketing

- 1.2.1. From Market Research to Business Intelligence
- 1.2.2. Role of Neuromarketing in Business Intelligence
- 1.2.3. Techniques and Tools Applied to Market Research in Combination with Neuromarketing

1.3. Research Techniques and their Combination with Neuromarketing Today

- 1.3.1. Surveys in Combination with Neuromarketing and their Application to Market Research
- 1.3.2. Interviews and Focus Groups and their Combination with Neuromarketing applied to Market Research
- 1.3.3. Triangulation and its Importance in the Success of a Market Research Project

1.4. Neuromarketing Tools Application to Marketing Research

- 1.4.1. Facial Coding
- 1.4.2. Eve Tracker
- 1.4.3. Skin Conductance
- 1.4.4. Electroencephalogram
- 145 TAI

1.5. Neuromarketing Research Design

- 1.5.1. Briefing and Company Project
- 1.5.2. Recruitment Filter and Sample Recruitment
- 1.5.3. Field Work
- 1.5.4. Analysis and Interpretation of Results
- 1.5.5. Preparation and Presentation of Results
- 1.5.6. Lessons Learned and Conclusions

1.6. Experiential Neuroqualitative and its Application to Market Research

- 1.6.1. Transformational Insight
- 1.6.2. Experiential Neuro-Qualitatives
- 1.6.3. Usefulness of the Experiential Neuro-Oualitatives
- 1.6.4. Tools used in the Experiential Neuro-Oualitative
- 1.6.5. Execution of a Plan with Experiential Neuro-Oualitative

1.7. Ethnographic Research and its Combination with Neuromarketing Applied to Marketing Research

- 1.7.1. Ethnographic Research Combined with Neuromarketing
- 1.7.2. Objectives of Ethnography and Neuromarketing and its Powerful Combination from Market Research
- 1.7.3. Methodology in a Marketing Research Project: Ethnographic Research and Neuromarketing

Communication

1.8.1. Building Winning Brands

1.9. Ethics in Neuromarketing

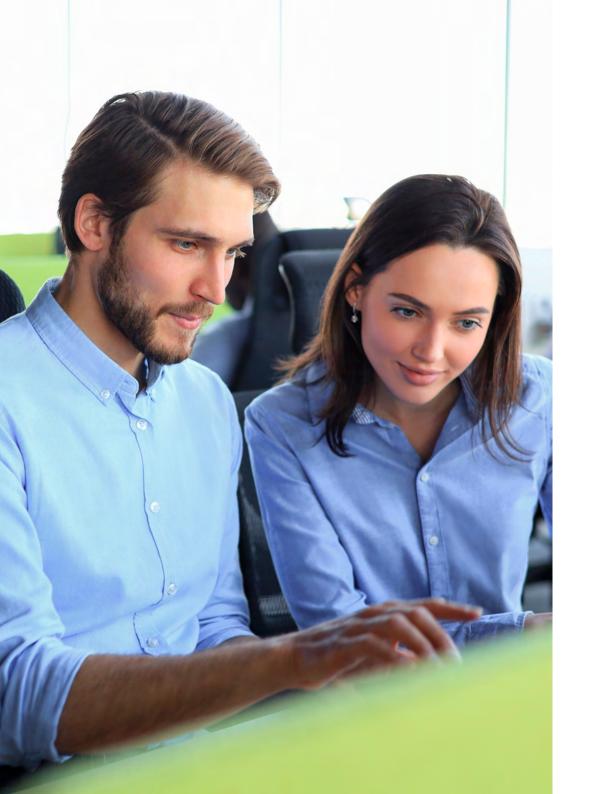

- 1.9.1. Ethics Applied to Neuromarketing
- 1.9.2. Ethics in Advertising
- 1.9.3. NMSBA Code of Ethics

1.10. Success Stories in **Neuromarketing Market** Research Projects

- 1.10.1. The Contributions of Neuromarketing to the Analysis of a Brand
- 1.10.2. Project Neuromarketing in the Cosmetics Sector
- 1.10.3. Neuromarketing Project in the Pharmaceutical Sector

1.8. Neuromarketing and Digital

- through Neuromarketing
- 1.8.2. Neuromarketing in Current Communication and Media Planning
- 1.8.3. Neuromarketing's Contributions to Traditional Communications

Do not miss this opportunity, enroll in this Postgraduate Certificate and support your learning in innovative teaching methods such as Relearning"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

tech 26 | Methodology

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

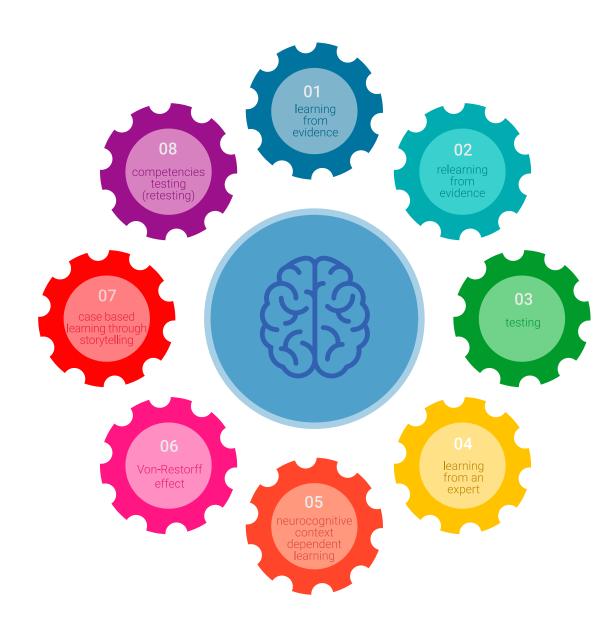

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 29 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

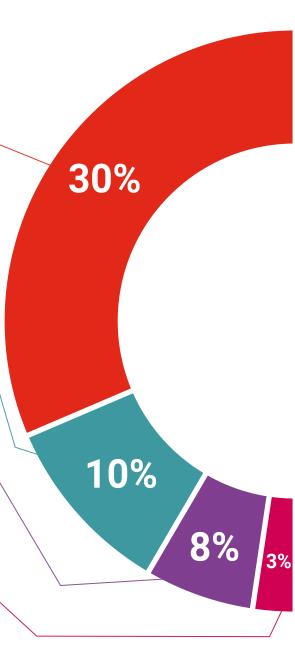

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

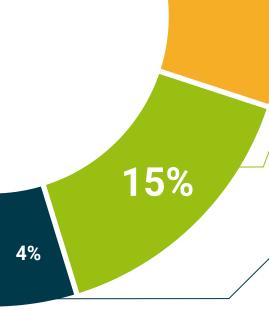

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

 \bigcirc

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
