01 Welcome

Society lives immersed in the information and communication age, which enables us to be connected both at home and at work. Accessing information is just a click away, but as technology advances for the average citizen and employee, so do threats and attacks. The more new functionalities there are, the more potential and methods cybercriminals have to achieve their goals. That is why security defense and monitoring systems must also evolve, since, in a world where teleworking and cloud services are becoming more and more common, a traditional perimeter firewall proves insufficient, whereas a multilayered defense, also known as defense in depth, must be devised to cover all aspects of a corporate network. To improve the training of business professionals in this field, TECH offers this program that brings together concepts and systems that can also be used and applied in a home environment.

Postgraduate Certificate in Network Cybersecurity.
TECH Technological University

“

Completing this program will enable you to become an expert in network cybersecurity, which will allow you to apply the most appropriate techniques to improve your company's IT security”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

This program seeks to meet the qualification needs of business professionals in the field of cybersecurity. More and more managers are demanding further training in this field that can be adapted to the needs of their companies, so TECH has devised a complete and easy to understand syllabus for such professionals, those who seek to acquire multidisciplinary knowledge they can put to use in their daily practice.

“

Improve your cybersecurity skills and apply the most appropriate techniques to your daily work”

**TECH makes the goals of their students their own goals too
Working together to achieve them**

The **Postgraduate Certificate in Network Cybersecurity** qualifies students to:

01

Analyze the general framework, the importance of multilayer defense and monitoring systems

04

Evaluate new threat detection systems, as well as their evolution with respect to more traditional solutions

02

Examine the most important threat detection and prevention systems

05

Generate complete intelligent solutions to automate incident behaviors

03

Develop Firewall solutions on Linux Host and Cloud providers

06

Analyze current network architectures to identify the perimeter to protect

07

Develop specific Firewall and Linux configurations to mitigate the most common attacks

10

Determine the tools for network protection and demonstrate why they are fundamental to a multilayer defence

08

Compile the most commonly used solutions such as Snort and Suricata, as well as their configuration

11

Develop current SIEM architectures and work methods using these tools

09

Examine the different additional layers provided by Next-Generation Firewalls and network functionalities in Cloud environments

12

Present SOAR systems as the current system defense alongside SIEMs, and assess future challenges

05

Structure and Content

This TECH Technological University Postgraduate Certificate has been designed to meet the academic needs of business professionals, who, though extensively experienced and qualified in different business areas: finance, accounting, logistics, communication, etc., have neglected the study of more computerized subjects, which are absolutely necessary for Chief Revenue Officers or other managers, as they aid in applying security techniques to protect the digital information they handle. Therefore, this program provides the latest information on network cybersecurity.

“

*A very well-structured curriculum
that will allow you to advance in
your study in a self-directed manner”*

Syllabus

The Postgraduate Certificate in Network Cybersecurity is an intensive program that prepares students to face challenges and business decisions in computer security. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Over 150 hours of study, students will analyze a multitude of practical cases through individual work, which will allow them to acquire skills required to develop successfully in their daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals with the different areas of a company in depth, and it is designed for managers to understand cybersecurity from a strategic, international and innovative perspective.

A program designed especially for students, focused on their professional development, which prepares them to achieve excellence in the field of information security management and administration. A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the skills to solve critical situations in a creative and efficient way.

The program is carried out in six weeks and is divided into one module:

Module 1

Network Security (Perimeter)

Where, When and How is it Taught?

TECH offers students the opportunity to take this Postgraduate Certificate in Network Cybersecurity entirely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow the students to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Network Security (Perimeter)

1.1. Threat Detection and Prevention Systems

- 1.1.1. General Framework for Security Incidents
- 1.1.2. Current Defence Systems: Defence in Depth and SOC
- 1.1.3. Current Network Architectures
- 1.1.4. Types of Tools for Incident Detection and Prevention
 - 1.1.4.1. Network-based Systems
 - 1.1.4.2. Host-Based Systems
 - 1.1.4.3. Centralized Systems
- 1.1.5. Instance/Hosts, Container and Serverless Communication and Detection

1.2. Firewall

- 1.2.1. Types of Firewalls
- 1.2.2. Attacks and Mitigation
- 1.2.3. Common Firewalls in Linux Kernel
 - 1.2.3.1. UFW
 - 1.2.3.2. Nftables and Iptables
 - 1.2.3.3. Firewalls
- 1.2.4. Detection Systems Based on System Logs
 - 1.2.4.1. TCP Wrappers
 - 1.2.4.2. BlockHosts and DenyHosts
 - 1.2.4.3. Fail2ban.

1.3. Intrusion Prevention and Detection Systems (IDS/ IPS)

- 1.3.1. Attacks on IDS/IPS
- 1.3.2. IDS/IPS Systems
 - 1.3.2.1. Snort
 - 1.3.2.2. Suricata

1.4. Next Generation Firewalls (NGFW)

- 1.4.1. Differences between NGFW and Traditional Firewall
- 1.4.2. Main Capabilities
- 1.4.3. Commercial Solutions
- 1.4.4. Firewalls for Cloud Services
 - 1.4.4.1. Virtual Private Cloud (VPC) Architecture
 - 1.4.4.2. ACLs Cloud
 - 1.4.4.3. Security Group

1.5. Proxy

- 1.5.1. Types of Proxy
- 1.5.2. Proxy Use: Advantages and Disadvantages

1.6. Antivirus Engines

- 1.6.1. General Context of Malware and IOCS
- 1.6.2. Antivirus Engine Problems

1.7. Email Protection Systems

- 1.7.1. Antispam
 - 1.7.1.1. Black and White Lists
 - 1.7.1.2. Bayesian Filters
- 1.7.2. Mail Gateway (MGW)

1.8. SIEM

- 1.8.1. Components and Architecture
- 1.8.2. Correlation Rules and Use Cases
- 1.8.3. Current Challenges in SIEM Systems

1.9. SOAR

- 1.9.1. SOAR and SIEM: Friends or Foes
- 1.9.2. The Future of SOAR Systems

1.10. Other Network-Based Systems

- 1.10.1. WAF
- 1.10.2. NAC
- 1.10.3. HoneyPots and HoneyNets
- 1.10.4. CASB

“

A complete tour of the most innovative concepts in Network Cybersecurity”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“ *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

Students on this TECH Technological University Postgraduate Certificate in Network Cybersecurity are business professionals who, aware of the threats that can arise in IT environments, have decided to expand their training thanks to this high-level academic program, designed to improve the employability options its students. Undoubtedly, a study opportunity that will be a turning point in terms of professional training.

“

A program designed for business professionals who wish to increase their training in this field”

Average Age

Between **35** and **45** years old

Years of Experience

Training

Educational Profile

Geographical Distribution

Jaime Díaz

Chief Revenue Officer

"After many years of experience as an entrepreneur and manager, I decided to specialize in network cybersecurity, as I understood the field was essential in my line of work. Luckily, I found in TECH the study opportunity that has provided me with the knowledge to work successfully in digital environments"

08

Course Management

Professors with extensive experience have come together for this TECH program to offer business professionals the latest information in Network Cybersecurity, and adapt it to their needs. A fundamental area of knowledge for those who work in digital environments and seek a higher qualification that will enable them to work with total fluency and apply these tools to securely store information.

“

*The best teachers are at the best university.
Don't miss the opportunity to train with them”*

International Guest Director

Dr. Frederic Lemieux is internationally recognized as an innovative expert and inspirational leader in the fields of **Intelligence, National Security, Internal security, Cybersecurity and Disruptive Technologies**. His constant dedication and relevant contributions in Research and Education position him as a key figure in the promotion of security and the understanding of today's emerging technologies. During his professional career, he has conceptualized and directed cutting-edge academic programs at various renowned institutions, such as the **University of Montreal, George Washington University and Georgetown University**.

Throughout his extensive background, he has published multiple books of great relevance, all related to **criminal intelligence, policing, cyber threats and international security**. He has also contributed significantly to the field of Cybersecurity with the publication of numerous articles in academic journals, which examine crime control during major disasters, counter-terrorism, intelligence agencies and police cooperation. In addition, he has been a panelist and keynote speaker at various national and international conferences, establishing himself as a reference in the academic and professional arena.

Dr. Lemieux has held editorial and evaluative roles in different academic, private and governmental organizations, reflecting his influence and commitment to excellence in his field of expertise. As such, his prestigious academic career has led him to serve as Professor of Practice and Faculty Director of the MPS programs in **Applied Intelligence, Cybersecurity Risk Management, Technology Management and Information Technology Management** at Georgetown University.

Dr Lemieux. Frederic

- Researcher in Intelligence, Cybersecurity and Disruptive Technologies at Georgetown University
- Director of the Master's Program in Information Technology Management at Georgetown University
- Director of the Master in Technology Management at Georgetown University
- Director of the Master in Cybersecurity Risk Management at Georgetown University
- Director of the Master's Program in Applied Intelligence at Georgetown University
- Professor of Internship at Georgetown University
- PhD in Criminology from the School of Criminology, University of Montreal
- B.A. in Sociology, Minor Degree in Psychology, University of Laval, France
- Member of New Program Roundtable Committee, by Georgetown University

“

Thanks to TECH you will be able to learn with the best professionals in the world"

Management

Ms. Fernández Sapena, Sonia

- ♦ Trainer in Computer Security and Ethical Hacking at the National Reference Center of Getafe in Computer Science and Telecommunications in Madrid
- ♦ Certified E-Council instructor
- ♦ Trainer in the following certifications: EXIN Ethical Hacking Foundation and EXIN Cyber & IT Security Foundation. Madrid
- ♦ Accredited expert trainer by the CAM of the following certificates of professionalism: Computer Security (IFCT0190), Voice and Data Network Management (IFCM0310), Departmental Network Administration (IFCT0410), Alarm Management in Telecommunications Networks (IFCM0410), Voice and Data Network Operator (IFCM0110), and Internet Services Administration (IFCT0509)
- ♦ External collaborator CSO/SSA (*Chief Security Officer/Senior Security Architect*) at the University of the Balearic Islands
- ♦ Degree in Computer Engineering from the University of Alcalá de Henares, Madrid
- ♦ Master's Degree in DevOps: Docker and Kubernetes. Cas-Training
- ♦ Microsoft Azure Security Technologies. E-Council

- ◆ Degree in Telematics Engineering from the Polytechnic University of Madrid
- ◆ Professional Master's Degree in Cybersecurity and Ethical Hacking by CICE
- ◆ Advanced Course in Cybersecurity by Deusto Training

09

Impact on Your Career

By completing this program in Network Cybersecurity, business professionals will acquire a higher level of training that will boost their career, improving their CV and, therefore, their employability. In this way, they will not only be better prepared in this field of action, but will also be able to make a quality leap in their careers. A unique study opportunity that cannot be missed.

“

*Increase your potential employability
with this TECH program”*

Are you ready to take the leap? Excellent professional development awaits you

The TECH Technological University Postgraduate Certificate in Network Cybersecurity is an intensive and highly valuable program aimed at improving students' professional skills in a fiercely competitive field. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

Completing this program is a unique opportunity to improve your CV's appeal.

Immerse yourself in the study of this TECH program and achieve the professional goal you seek.

Time of Change

Type of Change

Salary Increase

This program represents a salary increase of more than **25.22%** for our students.

10

Benefits for Your Company

Digitalization has resulted in the computerization of practically every company and, therefore, it is necessary to have a high level of specialization in the field to avoid potential digital attacks. With this in mind, more and more business professionals are deciding to opt for this type of studies to bring greater benefits to the company where they work. And, for this reason, TECH has designed this comprehensive study plan.

“

*The completion of this program
will enable you to improve the IT
security of your company”*

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Certificate in Network Cybersecurity guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Network Cybersecurity** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Network Cybersecurity**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
