01 Welcome

In a world where work environments are diverse and embody different types of risks that compromise the health of workers, it is vital for there to be a figure that guarantees the well-being of these people, whether on a physical or psychological level. For this reason, TECH professionals have designed this very complete Postgraduate Certificate that aims to train professionals to understand the importance of occupational medicine as a means to carry out an in-depth study of the pathologies and accidents that occur due to or as a result of work, as well as the preventive measures that must be adopted to avoid them or reduce their consequences.

Thus, after completing this training action, the student will ensure that, in addition to being prepared to successfully enter the labor market, he/she will be fully capable of undertaking his/her own business project, being able to prevent the risks of his/her sector and learning the legal aspects about them

Postgraduate Certificate in Occupational Medicine. TECH - Technological University

“

This course will be the ideal tool for the manager or professional, as it will allow him/her to understand the importance of using occupational medicine to analyze and prevent accidents in the workplace"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. We are an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

Our value proposition is shaking the foundations of traditional business schools. We have the best academic resources, a teaching staff made up of the most outstanding practicing professionals and the most demanding methodology. And all at a disruptive price”

TECH - Technological University

Innovation

We offer you an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system into our programs. In addition, our team received the "Entrepreneur Award" at the Expoelearning 2010 World Congress, the most important elearning event in Spanish-speaking countries.

The highest standards

Our admissions criteria are not economic. You don't need 100,000 US\$ to study with us. However, to become a TECH graduate, we will push your intelligence and problem-solving skills to the limit. Our academic standards are very high...

95 % | of TECH students successfully complete their studies

Networking

We offer you an incomparable environment to exchange knowledge and for high quality networking.

38000
executives trained each year

23
different nationalities

Empowerment

Grow hand in hand with the best, most prestigious and influential companies and professionals. We have developed strategic partnerships and a valuable network of contacts with major economic players both in Europe and America.

+500 | collaborative agreements with leading companies

Talent

We offer you a space to exchange ideas, experiences and reflections among executives, professionals, entrepreneurs and opinion leaders.

> 150,000 alumni
400 E-seminares every year
40 research groups

Multicultural Context

Share a unique experience with us. You will be studying in a multicultural context. In a program with a global vision.

+ 35 nationalities

What makes us unique

Academic Excellence

We offer you the best online learning methodology. We combine the re-learning method (the most internationally recognized postgraduate learning methodology) with Harvard Business School's *case studies*. A complex balance of traditional and state-of-the-art methods within the most demanding training framework.

Economy of Scale

We are the biggest. The TECH group has a portfolio of more than 1,500 postgraduate university courses. And in today's new economy, *volume + technology = a ground-breaking price*. At TECH, it's not about getting started, it's about finishing your studies successfully.

Learn with the best

In the classroom, our teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context.

Analysis

But above all, we explore your critical side, your ability to question things, your problem-solving skills, as well as your interpersonal skills.

We are not the most expensive. We are the best. Because of our innovative methodology, because of our collaboration with Harvard Business School and because we have the best teaching staff"

03

Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Business School we use the Harvard case method.

Our program offers you a revolutionary approach to developing your managerial skills. Our goal is to strengthen your skills in a changing, competitive, and highly demanding environment.

“

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world”

Our school is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This TECH School of Business program is an intensive training program that prepares you to face business challenges and decisions on a managerial level, both on a national and international level. The main objective is to promote your personal and professional growth. For this purpose, we rely on the case studies of Harvard Business School, with which we have a strategic agreement that allows us to use the materials used in the most prestigious business school in the world: HARVARD.

We are the only online university to offer Harvard's materials in its School of Business"

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

In a given situation, what would you do? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, you will be presented with multiple real cases. You will have to combine all your knowledge, and research, argue, and defend your ideas and decisions.

Re-learning Methodology

Our school is the first in the world to combine Harvard Business School case studies with a 100%-online learning system based on repetition, which combines 16 different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Re-learning.

In 2019 we obtained the best learning results of all Spanish-language online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Re-learning.

Our business school is the only one in Spanish-speaking countries licensed to incorporate this successful method. In 2019 we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best Spanish online university indicators.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success. In fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

Based on the latest evidence in neuroscience, not only do we know how to organize information, ideas, images, memories, but we also know that the place and context where we have learned something is crucial for us to be able to remember it and store it in the hippocampus, and retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Management Skills Exercises

You will carry out activities to develop specific managerial skills in each subject area. Exercises and activities to acquire and develop the skills and abilities that a senior manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents, international guides... in our virtual library you will have access to everything you need to complete your training.

Case Studies

You will complete a selection of the best business cases used at Harvard Business School. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique training system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

04 Objectives

This comprehensive training program is specially designed to train professionals in all aspects to be taken into account when implementing and making use of occupational medicine in work environments and learning the knowledge, techniques and skills related to the prevention of risks that may affect human health as a result of working circumstances and conditions. In this way, the professional will acquire specific analysis and planning management skills that will enable him/her to become an expert in the field. All this, accompanied by the best teaching material and the best teachers in the sector.

“

The main objective that TECH pursues with this training is to enable you to manage the prevention of occupational risks through the use of occupational medicine"

Your goals are our goals.

We work together to help you achieve them

The Postgraduate Certificate in Occupational Medicine will train you to:

01

Analyze the difference between an occupational accident and a professional disease

02

Identify the classification of professional diseases and their preventive techniques.

05

Structure and Content

The **Postgraduate Certificate in Occupational Medicine** is a tailor-made program that is taught 100% online so that you can choose the time and place that best suits your availability, schedule, and interests, and with the most complete and updated contents on the educational market.
