We give you the opportunity to train with a team of world renowned teachers.

04

Objectives

The objectives of this program are based on alleviating the educational needs of Labor Relations professionals in this field. In this sense, a complete and optimal training has been realistically established to lead the student to educational excellence and to propel him/her to achieve an efficient progression in their professional career. For all these reasons, this program will be a journey of personal and professional growth that will lead him/her to the highest quality in his/her intervention as a Labor Relations professional.

“

If your goal is to expand your professional career as a specialist in Labor and Special Relationships, with the qualifications that will enable you to compete among the best, look no further. This program will give your career the boost it needs”

TECH makes the goals of their students their own goals too.
Working together to achieve them.

The Postgraduate Certificate in Outsourcing, Self-Employment and Special Employment Relationships will Special Needs teach the student to:

01

Manage and use strategies that promote work flexibility with the objective of improving work performance and productivity

02

Possess Knowledge and management of special labor regimes, as well as their contracting and contribution systems

03

Knowledge and management of labor subcontracting mechanisms through the *outsourcing* strategy, as well as its legal limits

04

Management of hiring agreements with workers in the Special Regime for Self-Employed Workers (RETA)

05

Structure and Content

The syllabus of this Postgraduate Certificate has been designed and created by a team of specialists in the field to respond specifically to the needs of Labor Relations professionals. This compendium of content has also been designed with a focus on applied learning, which will allow professionals to successfully intervene, by means of a broad vision connected to real environments in the profession. Therefore, this syllabus will become the student's main asset when it comes to successfully entering a labor market that increasingly demands more and more professionals specialized in the field.

“

A complete program created to offer the professional an efficient and fast learning process, compatible with his personal and professional life"

Syllabus

Currently, organizations of all sizes and sectors are becoming aware that labor Relationships asset in within companies, and is also the master key to achieving the growth goals set. This is largely due to the union that is created between the company and its workers, which, if created correctly, can exponentially promote productivity in the processes.

That is why, in this complete program, created by TECH professionals, you will find the definitive guide to become a true expert in Labor Relations and take your professional career to the next level. During the program, you will gather all the aspects that are key and fundamental to carry out a correct hiring process in companies, taking into account both the legal aspects and the rights and duties of employees and employers.

Likewise, the program will also address both special labor regimes and *Outsourcing*. The in-depth knowledge that the Postgraduate Certificate will provide in this field will allow the professional

to know when to make use of each type of regime, always taking care of both the interests of the employee and the employer, as a means to respect and care for the welfare of the work environment. These skills will be a great asset in the development of the student's professional career.

This Complete compendium of contents offered by TECH is designed to be taught in 100% digital format. As such, the student all you need is an electronic device with an Internet connection, and you will have access to the largest information bank imaginable. In addition, since it is in online format, you will be the one who decides when, how and where to study, so you will not have to give up the rest of your daily activities to continue your education.

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“ *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07
