01

Welcome

Applying cybersecurity techniques to prevent malicious software requires having extensive and detailed knowledge of how the applications work, from communication protocols to algorithms, so as to identify the potential route of a computer attack. Reverse engineering techniques, such as static code analysis and dynamic analysis for decrypting communication protocols, lead to a sufficient understanding of the protocol involved in developing proprietary programs. Moreover, there are also other useful techniques that facilitate the detection of potential computer system vulnerabilities, which is why TECH has designed this program to teach business professionals how to act to detect and solve them, thus ensure secure computer use.

Postgraduate Certificate in Reverse Engineering in Cybersecurity
TECH Global University

“

Learn to detect potential vulnerabilities in your IT systems and apply the most appropriate reverse engineering techniques to work with total security”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This program includes the best information on the market and the latest teaching resources with the sole purpose of offering students high-quality, practical knowledge. TECH intends to offer students these necessary tools so they can apply them to their daily work and thus stand out among their competitors. Undoubtedly, a unique program that will help students achieve academic and professional excellence.

“

Reach your academic goals thanks to the quality training you can obtain with this Postgraduate Certificate”

**TECH makes the goals of their students their own goals too
Working together to achieve them**

The **Postgraduate Certificate in Reverse Engineering in Cybersecurity** qualifies students to:

01

Analyz reverse engineering and its different techniques

04

Apply reverse engineering to cybersecurity environments

02

Examine the different architectures and how they affect reverse engineering

03

Determine under what conditions to use different reverse engineering techniques

05

Analyze the phases of a compiler

06

Examine x86 processor architecture and ARM processor architecture

08

Apply Sandboxing in different environments

09

Develop different malware analysis techniques

07

Determine the various types of analysis

10

Establish the tools used in malware analysis

05

Structure and Content

The structure of this Postgraduate Certificate in Reverse Engineering in Cybersecurity has been designed as a high-quality academic path where students will learn the most updated concepts in the field, from theory to practical application. This method enables students to learn autonomously, which is ideal for those who take online programs like this one, where students must self-manage their time and study.

“

This curriculum covers the main concepts and techniques used in reverse engineering in cybersecurity”

Syllabus

The Postgraduate Certificate in Reverse Engineering in Cybersecurity is an intensive program that prepares students to face challenges and business decisions in computer security. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Throughout 150 hours of study, you will analyze a multitude of practical cases through individual work, which will allow you to acquire the necessary skills to develop successfully in your daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals with the different areas of a company in depth, and it is designed for managers to understand cybersecurity from a strategic, international and innovative perspective.

A study plan designed especially for students, focused on their professional development, which prepares them to achieve excellence in the field of information security management and administration. A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the competencies to solve critical situations in a creative and efficient way.

It is a program which is carried out in six weeks and is divided into one module:

Module 1.

Reverse Engineering

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Reverse Engineering in Cybersecurity completely online. Over the course of 6 weeks, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Reverse Engineering

1.1. Compilers

- 1.1.1. Types of Codes
- 1.1.2. Phases of a Compiler
- 1.1.3. Table of Symbols
- 1.1.4. Error Manager
- 1.1.5. GCC Compiler

1.2. Types of Analysis in Compilers

- 1.2.1. Lexical Analysis
 - 1.2.1.1. Terminology.
 - 1.2.1.2. Lexical Components
 - 1.2.1.3. LEX Lexical Analyzer
- 1.2.2. Parsing
 - 1.2.2.1. Context-free Grammars
 - 1.2.2.2. Types of Parsing
 - 1.2.2.2.1. Top-down Analysis
 - 1.2.2.2.2. Bottom-up Analysis

- 1.2.2.3. Syntactic Trees and Derivations
- 1.2.2.4. Types of Parsers
 - 1.2.2.4.1. LR (Left To Right) Analyzers
 - 1.2.2.4.2. LALR Analyzers
- 1.2.3. Semantic Analysis
 - 1.2.3.1. Attribute Grammars
 - 1.2.3.2. S-attributes
 - 1.2.3.3. L-attributes

1.3. Data Structures in Assembler

- 1.3.1. Variables
- 1.3.2. Arrays
- 1.3.3. Pointers
- 1.3.4. Structures
- 1.3.5. Objects

1.4. Assembler Code Structures

- 1.4.1. Selection Structures
 - 1.4.1.1. *If, else if, Else*
 - 1.4.1.2. Switch
- 1.4.2. Iteration Structures

- 1.4.2.1. *For*
- 1.4.2.2. While
- 1.4.2.3. Break Use
- 1.4.3. Functions

1.5. x86 Hardware Architecture

- 1.5.1. x86 Processor Architecture
- 1.5.2. x86 Data Structures
- 1.5.3. x86 Code Structures

1.6. ARM Hardware Architecture

- 1.6.1. ARM Processor Architecture
- 1.6.2. ARM Data Structures
- 1.6.3. ARM Code Structures

1.7. Static Code Analysis

- 1.7.1. Disassemblers
- 1.7.2. IDA
- 1.7.3. Code Rebuilders

1.8. Dynamic Code Analysis

- 1.8.1. Behavioral Analysis
 - 1.8.1.1. Communication
 - 1.8.1.2. Monitoring
- 1.8.2. Linux Code Debuggers
- 1.8.3. Windows Code Debuggers

1.9. Sandbox

- 1.9.1. Sandbox Architecture
- 1.9.2. Sandbox Evasion
- 1.9.3. Detection Techniques
- 1.9.4. Avoidance Techniques
- 1.9.5. Countermeasures
- 1.9.6. Sandbox on Linux
- 1.9.7. Sandbox on Windows
- 1.9.8. Sandbox on MacOS
- 1.9.9. Sandbox on Android

1.10. Malware Analysis

- 1.10.1. Malware Analysis Methods
- 1.10.2. Malware Obfuscation Techniques
 - 1.10.2.1. Executable Obfuscation
 - 1.10.2.2. Restriction of Execution Environments
- 1.10.3. Malware Analysis Tools

A unique education program that will help you reach the highest quality standards during the training”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This TECH program is aimed at students with extensive professional experience that are looking for a way to update their knowledge through high-level academic training. People who understand the need to keep their computer systems protected to prevent confidential business information from being in the hands of the wrong people. And, thus, they decide to specialize in a field of great interest to cybersecurity.

“

TECH students are professionals with extensive experience who understand the importance of continuing education during their working life”

Average Age

Between **35** and **45** years old

Years of Experience

Training

Educational Profile

Geographical Distribution

Jaime Díaz

Chief Revenue Officer

"Thanks to this TECH program, I was able to learn, first hand, the main reverse engineering tools that I can apply to cybersecurity, which has allowed me to acquire a deeper understanding of the field, which has boosted my confidence to solve any type of computer vulnerability. Without a doubt, a program that I would highly recommend to all those who wish to specialize in this field"

08

Course Management

This program has been developed by a high-level teaching team. Professionals with extensive experience in the field of cybersecurity who have decided to compile the most up-to-date information on Reverse Engineering for students to specialize in an area of great importance, which will allow them to increase the security protection of their computer systems. Undoubtedly, professors who believe in quality teaching through the most advanced teaching methodologies and new technologies applied to education.

“

A top-notch teaching staff that will teach you the ins and outs of reverse engineering”

International Guest Director

Dr. Frederic Lemieux is internationally recognized as an innovative expert and inspirational leader in the fields of **Intelligence, National Security, Internal security, Cybersecurity and Disruptive Technologies**. His constant dedication and relevant contributions in Research and Education position him as a key figure in the promotion of security and the understanding of today's emerging technologies. During his professional career, he has conceptualized and directed cutting-edge academic programs at various renowned institutions, such as the **University of Montreal, George Washington University and Georgetown University**.

Throughout his extensive background, he has published multiple books of great relevance, all related to **criminal intelligence, policing, cyber threats and international security**. He has also contributed significantly to the field of Cybersecurity with the publication of numerous articles in academic journals, which examine crime control during major disasters, counter-terrorism, intelligence agencies and police cooperation. In addition, he has been a panelist and keynote speaker at various national and international conferences, establishing himself as a reference in the academic and professional arena.

Dr. Lemieux has held editorial and evaluative roles in different academic, private and governmental organizations, reflecting his influence and commitment to excellence in his field of expertise. As such, his prestigious academic career has led him to serve as Professor of Practice and Faculty Director of the MPS programs in **Applied Intelligence, Cybersecurity Risk Management, Technology Management and Information Technology Management** at Georgetown University.

Dr Lemieux. Frederic

- ♦ Director of the Master's Program in Information Technology Management at Georgetown University
- ♦ Director of the Master in Technology Management at Georgetown University
- ♦ Director of the Master in Cybersecurity Risk Management at Georgetown University
- ♦ Director of the Master's Program in Applied Intelligence at Georgetown University
- ♦ Professor of Internship at Georgetown University
- ♦ PhD in Criminology from the School of Criminology, University of Montreal
- ♦ B.A. in Sociology, Minor Degree in Psychology, University of Laval, France
- ♦ Member of New Program Roundtable Committee, by Georgetown University

“

Thanks to TECH you will be able to learn with the best professionals in the world"

Management

Ms. Fernández Sapena, Sonia

- ◆ Computer Security and Ethical Hacking Trainer National Reference Center of Getafe in Informatics and Telecommunications Madrid
- ◆ Certified E-Council Instructor Madrid
- ◆ Trainer in the following certifications: EXIN Ethical Hacking Foundation and EXIN Cyber & IT Security Foundation Madrid
- ◆ Accredited Expert Trainer, CAM; certificates of professionalism: Computer Security (IFCT0190), Voice and Data Network Management (IFCM0310), Departmental Network Administration (IFCT0410), Alarm Management in Telecommunications Networks (IFCM0410), Voice and Data Network Operator (IFCM0110), and Internet Services Administration (IFCT0509)
- ◆ External Collaborator CSO/SSA (Chief Security Officer/Senior Security Architect) University of the Balearic Islands

A stimulating journey of professional growth designed to keep you interested and motivated throughout the entire program"

09

Impact on Your Career

Business professionals who wish to expand their knowledge of cybersecurity must be aware of the need of continuing education throughout their working lives, as this is a changing field that requires keeping up with updates and new developments. For this reason, those who enrol in this Postgraduate Certificate will improve their careers and compete with greater confidence and guarantees of success.

“

Completing this program will be a unique opportunity to considerably launch your career”

Are you ready to take the leap? Excellent professional development awaits you

The TECH Global University Postgraduate Certificate in Reverse Engineering in Cybersecurity is an intensive and highly valuable program aimed at improving students' professional skills in a fiercely competitive field. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

This Postgraduate Certificate program will increase the visibility of your CV.

Achieve the promotion you seek by improving your TECH training.

Time of Change

Type of Change

Salary Increase

This program represents a salary increase of more than **25.22%** for our students.

10

Benefits for Your Company

Companies are looking for professionals with extensive experience that can get the job done in an agile and efficient manner; but they also require people who have the necessary qualifications and who are interested in updating their knowledge and improving in their careers. Therefore, the completion of this Postgraduate Certificate will not only be an advantage for students, but also for the companies where they work, as they will be better able to engage in cybersecurity.

“

A high-value academic program that will make a difference in your professional practice”

Developing and retaining talent in companies is the best long-term investment.

01

Intellectual Capital and Talent Growth

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the executive and opens new avenues for professional growth within the company.

03

Building agents of change

The professional will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

Managers will be able to work on a real project or develop new projects in the R&D or Business Development area of their company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11 Certificate

The Postgraduate Certificate in Reverse Engineering in Cybersecurity guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Reverse Engineering in Cybersecurity** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
