

Postgraduate Certificate Selection Processes and Artificial Intelligence

Postgraduate Certificate Selection Processes and Artificial Intelligence

- » Modality: online
- » Duration: 6 weeks
- » Certificate: TECH Global University
- » Accreditation: 6 ECTS
- » Schedule: at your own pace
- » Exams: online
- » Intended for: University graduates who have previously completed any of the degrees in the fields of Human Social, Legal Sciences, or Administrative and Business Sciences.

01 Welcome

Digital transformation has significantly impacted the Human Resources field. One example of this is Artificial Intelligence, which gives experts the opportunity to automate routine tasks ranging from reviewing resumes to scheduling interviews. In this way, professionals can focus on strategic decisions and more relevant tasks. However, to enjoy the advantages of tools such as Machine Learning, specialists need to handle innovative predictive analytics techniques. For this reason, TECH is launching a pioneering program focused on Selection Processes and Artificial Intelligence. At the same time, it is taught in a flexible 100% online mode that adapts to the schedule of busy workers.

Postgraduate Certificate in Selection Processes and Artificial Intelligence
TECH Global University

“

Thanks to this program, based on Relearning, you will integrate Artificial Intelligence into your selection processes to incorporate the best talents in the institutions”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

Through this Postgraduate Certificate, experts will acquire solid skills to implement Artificial Intelligence tools in the various stages of the recruitment process. At the same time, students will handle state-of-the-art software (such as Hiretual, OutMatch or Harver) to optimize informed strategic decision making. In this sense, graduates will apply Machine Learning algorithms that eliminate unconscious bias in the recruitment phase, ensuring an unbiased evaluation of candidates according to objective criteria. In addition, they will automate communication with applicants through virtual assistants and chatbots.

“

You will handle the most modern predictive models to identify the best applicants for each position, based on skills as well as work history and performance characteristics”

TECH makes the goals of their students their own goals too.

Working together to achieve them

The **Postgraduate Certificate in Selection Processes and Artificial Intelligence** will enable students to:

01

Use Artificial Intelligence to monitor the work climate, proactively identifying problems and improving internal communication and employee satisfaction

02

Develop the ability to use Artificial Intelligence to identify and eliminate bias in selection, evaluation and development processes

03

Train students to implement Artificial Intelligence solutions that automate administrative and managerial tasks

04

Apply predictive analytics techniques in HR management, anticipating needs and improving strategic planning

05

Delve into the ethical and transparency principles necessary for the responsible implementation of Artificial Intelligence in Human Resources

06

Lead digital transformation projects in the Human Resources department, using Artificial Intelligence as a key tool to innovate and improve organizational processes

05

Structure and Content

The Postgraduate Certificate in Selection Processes and Artificial Intelligence is a tailor-made program that is taught in 100% online format so that you can choose the time that best suits your circumstances and schedule. In addition, it is based on the innovative Relearning system, of which TECH is a pioneer. This teaching method consists of the reiteration of key aspects, ensuring that they remain naturally in the minds of graduates without having to memorize.

“

You will be able to automate administrative tasks such as payroll, benefits management and employee attendance”

Syllabus

This program is designed to train true specialists in the integration of Artificial Intelligence in Human Resources. The curriculum will delve into issues such as the automation of tasks in the recruitment process, the analysis of Curriculum Vitae through algorithms or the recognition of patterns in professional platforms such as LinkedIn. At the same time, the syllabus will delve into the implementation of virtual interviewing systems with language and emotion analysis.

In this way, students will develop skills to efficiently automate each phase of the selection process by processing large volumes of data. Thanks to this, experts will be able to focus on more relevant aspects such as talent retention, work climate optimization and the elaboration of personalized professional development programs.

In this regard, all the experts will need is an electronic device with an Internet connection. They will then be able to access the Virtual Campus and enjoy a library of multimedia resources in various formats such as explanatory videos, case studies, specialized readings and interactive summaries.

This Postgraduate Certificate is developed over 6 weeks and is divided into 1 module:

Module 1

Selection Processes and Artificial Intelligence

Where, When and How is it Taught?

TECH offers the possibility to develop this Postgraduate Certificate in Selection Processes and Artificial Intelligence completely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow them to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Selection Processes and Artificial Intelligence

1.1. Introduction to the Application of Artificial Intelligence in Personnel Selection

- 1.1.1. Definition of Artificial Intelligence in the Human Resources Context. Entelo
- 1.1.2. Importance of Applying Artificial Intelligence in Selection Processes
- 1.1.3. Benefits of Using Artificial Intelligence in Selection Processes

1.2. Automating Tasks in the Recruitment Process

- 1.2.1. Using Artificial Intelligence to Automate Job Postings
- 1.2.2. Implementing Chatbots to Answer Candidates' Frequently Asked Questions
- 1.2.3. Tools. XOR

1.3. Resume Analysis with Artificial Intelligence

- 1.3.1. Using AI Algorithms to Analyze and Evaluate Resumes. Talview
- 1.3.2. Automatic Identification of Skills and Experience Relevant to the Position
- 1.3.3. Advantages and Disadvantages

1.4. Candidate Filtering and Ranking

- 1.4.1. Applying Artificial Intelligence to Automatically Filter Candidates Based on Specific Criteria. Vervoe
- 1.4.2. Ranking Candidates According to Suitability for the Position Using Machine Learning Techniques
- 1.4.3. Using Artificial Intelligence for Dynamic Customization of Filtering Criteria based on Job Needs

1.5. Pattern Recognition on Social Networks and Professional Platforms

- 1.5.1. Using Artificial Intelligence to Analyze Candidate Profiles on Social Networks and Professional Platforms
- 1.5.2. Identifying Behavioral Patterns and Trends Relevant to Recruiting
- 1.5.3. Assessing the Online Presence and Digital Influence of Candidates Using Artificial Intelligence Tools

1.6. Artificial Intelligence-Assisted Virtual Interviewing

- 1.6.1. Implementing Virtual Interviewing Systems with Language and Emotion Analysis. Talentoday
- 1.6.2. Automatic Evaluation of Candidate Responses Using Natural Language Processing Techniques
- 1.6.3. Developing Automatic and Personalized Feedback for Candidates Based on Artificial Intelligence Interview Analysis

1.7. Evaluation of Skills and Competencies

- 1.7.1. Using Artificial Intelligence-Based Assessment Tools to Measure Technical and Soft Skills. OutMatch
- 1.7.2. Automatically Analyzing Tests and Assessment Exercises Performed by Candidates. Harver
- 1.7.3. Correlation of Assessment Results with Success on the Job Using Artificial Intelligence Predictive Analytics

1.8. Elimination of Selection Biases

- 1.8.1. Applying Artificial Intelligence to Identify and Mitigate Unconscious Bias in the Selection Process
- 1.8.2. Implementing Unbiased and Fair Artificial Intelligence Algorithms in Decision Making
- 1.8.3. Training and Continuous Tuning of Artificial Intelligence Models to Ensure Fairness in Personnel Selection

1.9. Prediction of Fit and Retention

- 1.9.1. Using Predictive Artificial Intelligence Models to Predict Candidate Suitability and Likelihood of Retention. Hiretual
- 1.9.2. Analyzing Historical Data and Performance Metrics to Identify Patterns of Success
- 1.9.3. Artificial Intelligence Models for Simulating Job Scenarios and Their Impact on Candidate Retention

1.10. Ethics and Transparency in AI Selection

- 1.10.1. Ethical Considerations in the Use of AI in the Personnel Selection Processes
- 1.10.2. Ensuring Transparency and Explainability in Artificial Intelligence Algorithms Used in Hiring Decisions
- 1.10.3. Developing Audit and Review Policies for Automated Decisions

“

TECH's learning system follows the highest international quality standards to provide you with a comprehensive knowledge of Selection Processes through Artificial Intelligence. Enroll now!”

6

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

*TECH will prepare you to face new challenges
in uncertain environments and achieve
success in your career”*

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the quality of teaching, quality of materials, course structure and objectives is excellent. Not surprisingly, the institution became the best rated university by its students on the Trustpilot review platform, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise. This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge. This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

Case Studies

Students will complete a selection of the best *case studies* in the field. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Testing & Retesting

We periodically assess and re-assess your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an expert strengthens knowledge and memory, and generates confidence for future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

07

Our Students' Profiles

The Postgraduate Certificate is intended for university graduates, who have previously completed any of the following degrees in the field of Human, Social and Legal Sciences, Administration or Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The program is also open to professionals who, as university graduates in any field, have two years of work experience in the field Labor Relations.

“

You will implement performance appraisal systems that use Artificial Intelligence to provide continuous, unbiased feedback to candidates”

Average Age

Between **35** and **45** years old

Marta Medina Cáceres

Human Resources Director at a renowned law firm

"I am deeply grateful to TECH for the Postgraduate Certificate in Selection Processes and Artificial Intelligence. The curriculum has provided me with various Machine Learning techniques to automate Selection Processes and attract the best experts to my organization. In addition, I have been able to implement virtual systems to manage my time more efficiently"

08

Course Management

In its firm commitment to offer the most complete and updated university programs in the academic panorama, TECH carries out a meticulous process to form its teaching staff. Thanks to this, this Postgraduate Certificate has the collaboration of the best specialists in the adoption of Artificial Intelligence in the field of Human Resources. Therefore, they have created a myriad of teaching contents that stand out both for their excellent quality and for adapting to the demands of the current labor market. In this way, students will enjoy an immersive experience that will allow them to expand their professional horizons significantly.

“

Leading experts in Artificial Intelligence applied to Human Resources have come together in this university program to share the latest trends in this field”

Take the opportunity to learn about the latest advances in this field in order to apply it to your daily practice”

09

Impact on Your Career

This university program will mark a before and after in the students' professional careers. The experts will have at their disposal the most cutting-edge Artificial Intelligence techniques to automate Selection Processes and drive digital transformation in their companies. Along the same lines, students will design and implement Machine Learning algorithms and data analysis to make more informed strategic decisions.

At the same time, professionals will implement technological solutions that optimize the recruitment process based on relevant patterns, from filtering resumes to scheduling interviews and evaluating job platforms such as LinkedIn and even social networks. In addition, specialists will apply methodologies supported by Neural Networks to eliminate biases during selection processes, thus promoting both diversity and inclusion in hiring.

“

You will deepen your understanding of IBM Watson Legal Advisor, which will allow you to ensure that company policies and practices are aligned with current labor regulations”

Are you ready to take the leap? Excellent professional development awaits you

TECH's Postgraduate Certificate in Selection Processes and Artificial Intelligence is an intensive program that prepares you to face challenges and business decisions in the field of Human Resources. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

You will master specific Artificial Intelligence software for recruitment processes and increase the accuracy of your selection tasks.

With TECH's innovative Relearning system, you will consolidate key concepts in an immediate, natural and precise way.

When the change occurs

Type of change

Salary increase

This program represents a salary increase of more than **26.24%** for our students

10

Benefits for Your Company

Through this program, experts will lead the digital transformation in Human Resources Departments in order to streamline recruitment processes through Artificial Intelligence tools. In this way, students will handle specialized software based on Machine Learning and data analysis. Thanks to this, professionals will evaluate data from resumes and profiles of candidates, realizing which are the most appropriate for the positions offered.

In turn, graduates will use Neural Networks to delve into the skills of applicants objectively and accurately, avoiding any type of bias while promoting inclusion or diversity. On the other hand, they will be able to inform hiring decisions through analytical data and performance metrics. All this will enable companies to optimize their strategic functions considerably.

“

You will use Artificial Intelligence to eliminate unconscious biases in selection processes, ensuring an objective evaluation of candidates”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Certificate in Selection Processes and Artificial Intelligence guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This private qualification will allow you to obtain a **Postgraduate Certificate in Selection Processes and Artificial Intelligence** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Selection Processes and Artificial Intelligence**
