01

Welcome

Nowadays, the protection of personal data has become essential, especially in the health sector, which may contain sensitive information of patients and staff. For this reason, a program divided into ten topics has been developed to expose and unravel the main aspects in this field in the current legal work. This refers to the incidence of special and sensitive data, such as genetic and biometric information.

**Postgraduate Certificate in Study on Health
Data as a Special Category of Personal Data.**
TECH Global University

“

As a healthcare lawyer, you need to be aware of the regulations protecting patient information”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to study with a team of world-renowned teachers.

04

Objectives

This Postgraduate Certificate program will help students to develop and strengthen their skills in the area of data protection, making it a perfect opportunity to redirect their career path towards a position that requires management skills. Upon completion of the program, students will be able to approach real situations thanks to the use of case studies in each of the lessons that make up the program, which is the best way to learn.

“

You will achieve your professional objectives by completing a program that combines theory and practice to generate didactic learning"

TECH makes the goals of their students their own goals too.
Working together to achieve them.

The **Postgraduate Certificate in Study on Health Data as a Special Category of Personal Data** will enable students to:

01

Obtain the necessary skills to address health issues, identifying the major problems

02

Identify health data, with particular emphasis on sensitive or special data

03

Acquire the necessary skills in the analysis of health data processing

04

Interrelate health data with scientific or biomedical research

05

Understanding the treatment of health data in times of pandemics

06

Identify the parameters for conducting biomedical research

05

Structure and Content

This Postgraduate Certificate program will become a complete tour to expose and unravel the main issues in the field of health and health data protection that arise in the legal work at present. All the content is developed in a 100% Online mode for the student's convenience.

“

This program is different thanks to its innovative approach and online support"

Syllabus

The Postgraduate Certificate in the Study on Health Data as a Special Category of Personal Data will become a unique opportunity to prepare students to face work challenges from a classroom.

The content of the program is designed to enhance the managerial skills of legal professionals seeking to broaden their professional horizons.

In each class, you will have the opportunity to comprehensively study the main issues in health and health data protection that arise in the legal field today, with special emphasis on special and sensitive data, which will be studied in detail, addressing genetic data, biometric data, taking into account the main theoretical and practical disquisitions.

The Postgraduate Certificate is designed for the professionals who seeks to achieve excellence in the field of management and business management. For this reason, it will understand the needs of the business through an innovative content, based on the latest trends and demands of this labor market.

This Postgraduate Certificate is developed over 6 weeks with 1 study module:

Module 1

Study on Health Data as a Special Category of Personal Data

Where, when, and how it is taught

TECH offers you the possibility of taking this program completely online. Throughout the 6 weeks of training, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

1.1. The Concept of Health

- 1.1.1. Concept of Health. The right to health as a fundamental right
- 1.1.2. Concept of global health
- 1.1.3. From a traditional health system to the so-called "digital health"

1.2. Bioethics Health Personal Data

- 1.2.1. Bioethics and the principles that inform it
- 1.2.2. Bioethics and health
- 1.2.3. Bioethics and personal data

1.3. Patients' rights in the personal data environment

- 1.3.1. Patients' rights: healthy and sick
- 1.3.2. Patients and personal data
- 1.3.3. Autonomy of will, personal data and patients

1.4. Health Biomedical Research Protection of Personal Data

- 1.4.1. Scientific research and biomedical research and health
- 1.4.2. Scientific research and biomedical research and personal data
- 1.4.3. Relevant regulations

1.5. Health-related data. Special categories of data

- 1.5.1. Conceptual framework
- 1.5.2. Legislative Framework
- 1.5.3. Sensitive or protected data as a modality of personal rights

1.6. Genetic data

- 1.6.1. Conceptual framework
- 1.6.2. Legislative Framework
- 1.6.3. Genetic data and personal data. Main doctrinal and practical disquisitions. Right to genetic information versus the right not to know

1.7. Biometric data

- 1.7.1. Conceptual framework
- 1.7.2. Legislative Framework
- 1.7.3. Biometric data and personal data. Main doctrinal and practical disquisitions

1.8. Treatment of the category of special or sensitive data

- 1.8.1. Basic principles of the processing of special data
- 1.8.2. Rights of individuals with regard to the processing of sensitive health data
- 1.8.3. The issue of profiling

1.9. Protection of health data

- 1.9.1. Health data protection. Notes that inform it
- 1.9.2. Medical History. Its impact on the processing of personal health data
- 1.9.3. Informed Consent Its impact on the processing of personal health data

1.10. Processing of health data in times of pandemics

- 1.10.1. Global health and personal data processing
- 1.10.2. Treatment of health data and patients' rights in times of pandemic
- 1.10.3. Legislative study. Analysis of Order SND/297/2020, of 27 March, which entrusts the Secretary of State for Digitalization and Artificial Intelligence, of the Ministry of Economic Affairs and Digital Transformation, with the development of various actions for the management of the healthcare crisis caused by COVID-19

“

Learn about the latest developments in the management of the health crisis caused by COVID-19”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Certificate is aimed at university graduates who have previously completed a qualification in law. In this way, they are students who understand the need to continue with academic training throughout their working life. All this, in order to continue advancing in the sector in which they work.

Likewise, professionals who, being university graduates in any area, have two years of work experience in the field of legal counseling, may also take the Postgraduate Certificate.

“

Be part of an elite group of graduates who have gone on to managerial positions in their careers”

Average Age

Between **35** and **45** years

Years of Experience

Training

Educational Profile

Geographical Distribution

Minerva Toledo

Data protection officer in a multinational company.

"With the current healthcare crisis by COVID-19 the treatment of sensitive patient information has gone through an exhaustive evaluation. With this program I have been able to keep myself updated on this subject, favoring my professional work within the legal department where I work. This is a great professional advantage for all lawyers who wish to take the program"

08

Course Management

In order to guarantee the excellence of the contents taught in the program, we have a team of highly qualified teachers with many years of experience in the sector of interest. For this reason, a qualified group has been carefully selected to ensure that those interested in this sector receive training in line with current market demands.

“

Learn from the best and train yourself to be a professional who understands the conceptual framework of data protection"

International Guest Director

Francesca Santoro is a leading specialist in law associated with technological innovation. Her career has been focused on fields such as legal informatics, virtual contracts, signatures and e-commerce, privacy and cybersecurity around ICT. She has also focused on cybercrime and new Internet governance strategies. In this way, she has addressed various legal and ethical challenges posed by the digitization of society, as well as the development of disruptive solutions for data protection.

On the other hand, she has played key roles in Deloitte, a company globally recognized for its leadership in audit and consulting services. She has been a senior member in the area of Privacy and Cyber Risk, where she acquired skills in privacy management and covered GDPR compliance. Her experience includes guidance to multinational companies in the design of data protection strategies and risk management in complex environments.

She has also been recognized for her contribution to the development of ICT law, being invited to participate in events and conferences of great relevance to this field. Her work has been valued for her ability to anticipate and address the legal challenges brought about by the digital transformation. Her participation as an Associate in the Legal Center of the Information Society has positioned her as a reference figure in the regulation of cyberspace.

In addition, she has made contributions to the academic and professional community through research and publications on privacy, data protection and cybersecurity. Similarly, she has led analytical projects exploring the impact of digitization on law and society, providing a theoretical framework for understanding the changes facing the legal world in the digital age.

Ms. Francesca, Santoro

- Head of Cyber Risk and Data Privacy at Deloitte, Milan, Italy
- Managing Member of Deloitte, in the area of Privacy Services
- Manager at Deloitte, in Privacy, GDPR compliance, cyber risk, risk management, DPO
- Residential Affiliate at ISLC, in the Information Society Law Center
- Researcher at the Information Society Law, at Università degli Studi di Milano
- Legal and Public Affairs Office at Poste Italiane
- Trainee at the Italian Ministry of Economy and Finance
- Master's Degree in New Technologies and Information Law at the University of Bologna, Alma Mater Studiorum
- Degree in Jurisprudence, Università degli Studi di Roma Tre

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

09

Impact on Your Career

Business professionals must adapt to the new times and, nowadays, data protection has arrived to lead the way. That is why the effort you put into this program becomes a professional and, of course, personal investment, of which we are aware.

The ultimate goal of carrying out this great effort should be to achieve professional growth in the students' field of interest.

“

This program will mean a before and after in your professional improvement"

Are you ready to take the leap? Excellent professional development awaits you

The Postgraduate Certificate in the Study on Health Data as a Special Category of Personal Data of TECH - Technological University is an intensive and highly valuable program aimed at improving students' job skills in an area of broad competence. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

Generating Positive Change.

Increase your chances of obtaining a management position by knowing how to manage sensitive user data in the health sector.

TECH offers you the opportunity to be better in your work environment with this innovative program.

Time of Change

Type of change

Salary increase

This program represents a salary increase of more than **25.22%** for our students

10

Benefits for Your Company

The implementation of this TECH program will be fundamental for the development of companies, since data protection is currently of great importance, due to the new regulations that have been introduced to promote the security of personal and confidential information.

Participating in this Postgraduate Certificate is a unique opportunity to access a powerful network of contacts in which to find future professional partners, customers or suppliers.

“

Takes on new challenges brought on by regulations of sensitive patient information affected by healthcare crisis”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Certificate in Study on Health Data as a Special Category of Personal Data guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

After passing our program, you will receive a certificate that will be a plus for your CV”

This program will allow you to obtain your **Postgraduate Certificate in Study on Health Data as a Special Category of Personal Data** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
