01 Welcome

Today, losses due to cyber-attacks are estimated to be well into the millions. Such is the exposure to cyber-attack that even states can be targeted by cyberincidents. This has highlighted the importance of having managers who are specialized in Cybersecurity Policy Management, with the right knowledge in organization, implementation and monitoring tools to coordinate all cybersecurity efforts. This program prepares the manager to face uncertain scenarios with confidence and advanced knowledge, providing quality solutions in IT Security. Through exhaustive theoretical content, based on real practical cases, you will obtain a modern and comprehensive perspective of all the functions that a cybersecurity manager must perform. All of this in a 100% online format, free of on-site classes and fixed schedules, with total flexibility.

Postgraduate Diploma in Information Security Threat Management
TECH Technological University

“

It brings incalculable value to your Cybersecurity Policies by providing you with advanced knowledge of all the nuances, from the security systems themselves to the procedures in threat analysis that will give you the keys to position yourself with an advantage in your organization"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04

Objectives

Cybersecurity threats can be of all kinds and can severely affect the company's performance. For this reason, this Postgraduate Diploma focuses precisely on the most important areas that managers must master in order to manage them correctly. Information security policies, auditing systems and operational security, among other topics of great interest, will be exhaustively reviewed.

“

Master the most outstanding skills and competencies in the security field to position yourself as an expert manager in Threat Management”

**TECH makes the goals of their students their own goals too
Working together to achieve them**

This **Postgraduate Diploma in Computer Security Threat Management** will enable the students to:

01

Determine the involvement of an ISMS in the internal organization of the entity, as well as its status

04

Establish the phases for the implementation of an ISMS

02

Analyze the existing standards and the types of entities for which they are related

03

Design and develop the implementation of an ISMS

05

Implement and develop a business continuity plan according to each type of entity and its needs

06

Develop procedures to manage information security incidents

08

Manage Cybersecurity Assets

09

Develop a Business Process Analysis

07

Check the involvement of an ISMS in the internal organization of the company

10

Implement measures in the HR department regarding IT security

11

Establish security policies in the company

14

Implement and develop good practices in Information Security

12

Analyze operational countermeasures

13

Establish the regulations related to the whole process

15

Generate specialized knowledge on threat control

16

Determine the phases of preventive threat management

18

Classify threats by impact and severity

19

Practically implement security policies for the preventive treatment of threats

17

Develop methodologies for computer threat analysis

20

Design a proprietary methodology for the analysis and preventive control of threats

05

Structure and Content

Based on the Relearning methodology, all the contents of this program reiterate key concepts and important terms in a progressive manner. This makes the educational experience much smoother, easing the teaching load and saving numerous hours of study time for the manager, as knowledge is acquired naturally as each topic progresses. The virtual classroom will also be available 24 hours a day from any device with an Internet connection, being accessible even from the comfort of the Smartphone of your choice.

“

You will be able to download all the contents to review and study them whenever you want, without the pressure of presential classes or fixed schedules”

Syllabus

The Postgraduate Diploma in Computer Security Threat Management is an intensive program that prepares the student to face the main cyber threats in high-level business fields.

The content of the Postgraduate Diploma in Computer Security Threat Management is designed to promote the development of managerial skills that allow for more rigorous decision-making in uncertain environments.

This Postgraduate Diploma deals in depth with the integral management of Information Security and the organizational aspects of policies in this same area. It is designed to train professionals who understand cyber threats and their management from a strategic, international and innovative perspective.

This Postgraduate Diploma takes place over six months and is divided into three modules:

Module 1

Information Security Management System (ISMS)

Module 2

Organizational Aspects of Information Security Policy

Module 3

Security Policies for the Analysis of Threats in Computer Systems

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Computer Security Threat Management completely online. Throughout the 6 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Information Security Management System (ISMS)

- 1.1. Information Security. Key Aspects**
- 1.1.1. Information Security
 - 1.1.1.1. Confidentiality
 - 1.1.1.2. Integrity
 - 1.1.1.3. Availability
 - 1.1.1.4. Information Security Measurements

- 1.2. Information Security Management Systems**
- 1.2.1. Information Security Management Models
- 1.2.2. Documents to Implement an ISMS
- 1.2.3. Levels and Controls of an ISMS

- 1.3. International Norms and Standards**
- 1.3.1. International Standards in Information Security
- 1.3.2. Origin and Evolution of the Standard
- 1.3.3. International Information Security Management Standards
- 1.3.4. Other Reference Standards

- 1.4. ISO/IEC 27,000 Standards**
- 1.4.1. Purpose and Areas of Application
- 1.4.2. Structure of the Standard
- 1.4.3. Certification
- 1.4.4. Accreditation Phases
- 1.4.5. Benefits of ISO/IEC 27,000 Standards

- 1.5. Design and Implementation of a General Information Security System**
- 1.5.1. Phases of Implementation of a General Information Security System
- 1.5.2. Business Continuity Plans

- 1.6. Phase I: Diagnosis**
- 1.6.1. Preliminary Diagnosis
- 1.6.2. Identification of the Stratification Level
- 1.6.3. Level of Compliance with Standards/Norms

- 1.7. Phase II: Preparation**
- 1.7.1. Context of the Organization
- 1.7.2. Analysis of Applicable Safety Regulations
- 1.7.3. Scope of the General Information Security System
- 1.7.4. General Information Security System Policy
- 1.7.5. Objectives of the General Information Security System

- 1.8. Phase III: Planning**
- 1.8.1. Asset Classification
- 1.8.2. Risk Assessment
- 1.8.3. Identification of Threats and Risks

- 1.9. Phase IV: Implementation and Follow-up**
- 1.9.1. Analysis of Results
- 1.9.2. Assigning Responsibilities
- 1.9.3. Timing of the Action Plan
- 1.9.4. Monitoring and Audits

- 1.10. Incident Management Security Policies**
- 1.10.1. Phases
- 1.10.2. Incident Categorization
- 1.10.3. Incident Management and Procedures

Module 2. Organizational Aspects of Information Security Policy**2.1. Internal Organization**

- 2.1.1. Assigning Responsibilities
- 2.1.2. Segregation of Duties
- 2.1.3. Contacts with Authorities
- 2.1.4. Information Security in Project Management

2.2. Asset Management

- 2.2.1. Liability for Assets
- 2.2.2. Classification of Information
- 2.2.3. Handling of Storage Media

2.3. Security Policies in Business Processes

- 2.3.1. Analysis of the Vulnerabilities of Business Processes
- 2.3.2. Business Impact Analysis
- 2.3.3. Classification of Processes with Respect to Business Impact

2.4. Security Policies Linked to Human Resources

- 2.4.1. Before Hiring
- 2.4.2. During Contracting
- 2.4.3. Termination or Change of Position

2.5. Management Security Policies

- 2.5.1. Management Guidelines on Information Security
- 2.5.2. BIA - Analyzing the Impact
- 2.5.3. Recovery Plan as a Security Policy

2.6. Acquisition and Maintenance of Information Systems

- 2.6.1. Information Systems Security Requirements
- 2.6.2. Development and Support Data Security
- 2.6.3. Test Data

2.7. Security with Suppliers

- 2.7.1. IT Security with Suppliers
- 2.7.2. Management of Service Delivery with Assurance
- 2.7.3. Supply Chain Security

2.8. Operational Safety

- 2.8.1. Operational Responsibilities
- 2.8.2. Protection Against Malicious Code
- 2.8.3. Backup Copies
- 2.8.4. Activity and Supervision Records

2.9. Safety and Regulatory Management

- 2.9.1. Compliance with Legal Requirements
- 2.9.2. Information Security Reviews

2.10. Business Continuity Management Security

- 2.10.1. Continuity of Information Security
- 2.10.2. Redundancies

Module 3. Security Policies for the Analysis of Threats in Computer Systems

3.1. Threat Management in Security Policies

- 3.1.1. Risk Management
- 3.1.2. Security Risk
- 3.1.3. Threat Management Methodologies
- 3.1.4. Implementation of Methodologies

3.2. Phases of Threat Management

- 3.2.1. Identification
- 3.2.2. Analysis
- 3.2.3. Localization
- 3.2.4. Safeguard Measures

3.3. Audit Systems for Threat Localization

- 3.3.1. Classification and Information Flow
- 3.3.2. Analysis of Vulnerable Processes

3.4. Risk Classification

- 3.4.1. Types of Risk
- 3.4.2. Calculation of Threat Probability
- 3.4.3. Residual Risk

3.5. Risk Treatment

- 3.5.1. Implementation of Safeguard Measures
- 3.5.2. Transfer or Assume

3.6. Control Risks

- 3.6.1. Continuous Risk Management Process
- 3.6.2. Implementation of Security Metrics
- 3.6.3. Strategic Model of Information Security Metrics

3.7. Practical Methodologies for Threat Analysis and Control

- 3.7.1. Threat Catalog
- 3.7.2. Catalog of Control Measures
- 3.7.3. Safeguards Catalog

3.8. ISO 27005

- 3.8.1. Risk Identification
- 3.8.2. Risk Analysis
- 3.8.3. Risk Evaluation

3.9. Risk, Impact and Threat Matrix

- 3.9.1. Data, Systems and Personnel
- 3.9.2. Threat Probability
- 3.9.3. Magnitude of Damage

3.10. Design of Phases and Processes in Threat Analysis

- 3.10.1. Identification of Critical Organizational Elements
- 3.10.2. Determination of Threats and Impacts
- 3.10.3. Impact and Risk Analysis
- 3.10.4. Methods

The entire teaching staff has gone 100% out of their way to give you supplemental readings, in-depth videos, real case studies and more content of great educational value"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma is aimed at Graduates who have previously completed any of the degrees in the field of Social and Legal Sciences, Administration and Economics.

The diversity of participants with different academic profiles and from multiple nationalities, make up the multidisciplinary approach of this program.

The Postgraduate Diploma can also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of cybersecurity policy management.

“

You will not have to put aside your responsibilities in order to enroll in this Postgraduate Diploma. At TECH you decide how, where and when to take on the teaching load"

Average Age

Between **35** and **45** years old

Years of Experience

Training

Educational Profile

Geographical Distribution

Inés López Hernández

Chief Information Security Officer

"After going through several departments in my company, I became interested in Computer Security and, especially, Threat Management in this environment. I started looking for theoretical material on the subject and ended up finding this TECH program, with which I was able to learn the keys that helped me to position myself as CISO in my company today"

08

Course Management

The teaching staff selected by TECH for this qualification brings together multidisciplinary skills in the field of cybersecurity. Thanks to this, all the theoretical contents of the program are based on the most demanding professional practice, giving a necessary real perspective of the field of Computer Security. In this way, the manager is assured of an education focused exclusively on improving those areas of interest that will take them to the top of Computer Security Threat Management in their business environment.

“

You will have access to educational content created specifically to enhance your skills and career projection in the field of cyber threat security"

Management

Ms. Fernández Sapena, Sonia

- ◆ Trainer in Computer Security and Ethical Hacking at the National Reference Center of Getafe in Computer Science and Telecommunications in Madrid
- ◆ Certified E-Council instructor
- ◆ Trainer in the following certifications: EXIN Ethical Hacking Foundation and EXIN Cyber & IT Security Foundation. Madrid
- ◆ Accredited expert trainer by the CAM of the following certificates of professionalism: Computer Security (IFCT0190), Voice and Data Network Management (IFCM0310), Departmental Network Administration (IFCT0410), Alarm Management in Telecommunications Networks (IFCM0410), Voice and Data Network Operator (IFCM0110), and Internet Services Administration (IFCT0509)
- ◆ External collaborator CSO/SSA (Chief Security Officer/Senior Security Architect) at the University of the Balearic Islands
- ◆ Degree in Computer Engineering from the University of Alcalá de Henares, Madrid
- ◆ Master's Degree in DevOps: Docker and Kubernetes. Cas-Training

- ♦ Financial markets and IT systems maintenance specialist at Iberia Financial Software
- ♦ Web developer and accessibility specialist at Indra
- ♦ Degree in Systems Engineering at the University of Wales/CESINE
- ♦ Diploma in Technical Engineering in Computer Systems Engineering from the University of Wales/ CESINE

Ms. López García, Rosa María

- ♦ Management Information Specialist
- ♦ Teacher at Linux Professional Institute
- ♦ Collaborator at Incibe Hacker Academy
- ♦ Cybersecurity Talent Captain at Teamciberhack
- ♦ Administrative and accounting and financial manager at Integra2Transportes
- ♦ Administrative assistant in purchasing at the Education Center Cardenal Marcelo Espínola
- ♦ Higher Technician in Cybersecurity and Ethical Hacking
- ♦ Member of Ciberpatrulla

09

Impact on Your Career

TECH is aware of the effort that the manager must make to take on a degree of these characteristics, so it devotes special effort to ensure that all content and teaching materials provided meet the highest quality standards. Therefore, the multimedia library to which access is gained serves as an exceptional reference in the area of cybersecurity, and can even be downloaded in its entirety to continue using it once the qualification is completed.

“

The entire management team of this Postgraduate Diploma will give you the practical keys to make the job improvement you are looking for a reality"

Are you ready to take the leap? Excellent professional development awaits.

The Postgraduate Diploma in Computer Security Threat Management is an intensive program that prepares students to face challenges and business decisions in the field of cybersecurity. The main objective is to promote your personal and professional growth. Helping students achieve success.

If your goal is to better yourself, make a positive change professionally and network with the best, this is the place for you.

It's time to take the step towards a better future, with specialized cybersecurity education that will make you the essential manager for any technology company.

Do not miss the opportunity to continue climbing positions in a field with great opportunities, specializing in Computer Security Threat Management.

Time of change

Type of change

Salary increase

The completion of this program represents a salary increase of more than **25%** for our students.

10

Benefits for Your Company

The Postgraduate Diploma in Computer Security Threat Management contributes to elevating organizational talent to its maximum potential through the instruction of high-level leaders.

Participating in this Postgraduate Diploma is a unique opportunity to access a powerful network of contacts where you can find future professional partners, clients, or suppliers.

“

Proper management of Computer Security Threats can make all the difference in avoiding countless losses. Be that undisputed leader and enroll now”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Diploma in Computer Security Threat Management guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Diploma in Computer Security Threat Management** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Diploma in Computer Security Threat Management**

Official N° of Hours: **450 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
