01 Welcome

The role of advertising has been fundamental in companies throughout history, since it is responsible for attracting potential customers through various strategies of persuasion. In this way, technology has reached the creation of advertisements and advertising communication with the firm purpose of executing innovative and highly creative strategies, and therefore, the high demand at the business level. Precisely for this reason, TECH launches a 100% online academic program that integrates different genres and advertising styles, in addition to psychological advertising models. At the same time, the mastery of these contents is supported by the *Relearningsystem*, a methodology that facilitates the deep assimilation of complex concepts and skills in students.

Postgraduate Diploma in Advertisement Creation and Advertising Communication
TECH Global University

“

Sign up and access a 100% online program that will allow you to fully address key concepts in building brands in an efficient way”

Structure and Content

The Postgraduate Certificate in Advertisement Creation and Advertising Communication is a program that is especially aimed at fundamental knowledge related to emotional and social intelligence, the concept of communication and the transgression of codes. This is why this program is oriented from a theoretical-practical structure integrated with the experience and background of a highly qualified team.

“

You will master creative content strategies in the creation of advertisements with this Postgraduate Diploma. Enroll now!”

Syllabus

This Postgraduate Diploma integrates 6 months of online learning, where TECH, through a top level education, will propel the graduates to the top of their professional careers, reaching the best positions in the advertising sector. In this way, they will face the different obstacles that the advertising industry has to face in the labor market. Accordingly, the qualification provides a variety of knowledge that specifically addresses the benefits of knowing the target and virtual and augmented reality.

The teaching staff has developed an important syllabus that integrates 3 modules, with the purpose that the student enhances their skills in detailing how the software of creative advertising thinking works.

Therefore, professionals specialized in this field are increasingly in demand in the advertising area, so they must be up to date on all the new resources in the creation of advertisements. That is why TECH launches this Postgraduate Diploma where it welcomes the latest trends for brand positioning and content attraction.

This academic program will take place on an innovative 100% online platform. From it, you will have the opportunity to study through disruptive methods such as the Relearning method, which facilitates the assimilation of content quickly and flexibly.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1

How to create ads

Module 2

How to create a brand

Module 3

Personal branding and political campaigns

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma is aimed at University Graduates and Undergraduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administrative and Economics.
