Postgraduate Diploma
Enabling Technologies

- » Modality: **online**
- » Duration: **6 months**
- » Certificate: **TECH Global University**
- » Credits: **24 ECTS**
- » Schedule: **at your own pace**
- » Exams: **online**
- » Target Group: **Engineers, architects and graduates who want to learn and update themselves on the latest technological trends and digitalization processes that will help them lead technological innovation and business transformation. It is also highly recommended for innovation managers who want to create value within their area and organizations, relying on the emerging technologies of Industry 4.0, knowing them and making an intelligent selection and application of them to meet customer expectations.**

01
Welcome

New technologies related to blockchain, online reality and big data have revolutionized production processes in many industries around the globe. From hyper-secure data encryption to the analysis of thousands of statistics through powerful artificial intelligence, companies require professionals trained in all these new trends that can greatly improve their production chain. TECH has prepared this complete training so that students can expand their cutting-edge knowledge and opt for these newly emerging positions, with higher salaries and professional conditions, which will ultimately result in a beneficial personal growth for the student and their own technological projects.

Postgraduate Diploma in Enabling Technologies
TECH Global University

Learn how to successfully apply the most up-to-date and innovative tools in enabling technology in industry and other sectors and set yourself up for success"

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

tech

"

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Global University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000 executives prepared each year

+200 different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500 collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level"

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve *soft skills* and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to study with a team of world-renowned teachers.

Objectives

The Postgraduate Diploma in Enabling Technologies aims to pursue the total professional improvement of students, providing them with better opportunities to grow professionally with advanced and cutting-edge knowledge that will distinguish them as experts of reputed prestige. Thus, the student will be a reference in the use of technologies such as blockchain or artificial intelligence in their field of action.

Give a quality twist to your technology career by training yourself in the use of the latest techniques most in demand in today's market"

TECH makes the goals of their students their own goals too Working together to achieve them

The **Postgraduate Diploma in Enabling Technologies** trains the student to:

01 Deepen the knowledge of the fundamental principles of artificial intelligence

02 Master the techniques and tools of this technology (machine learning/deed learning)

03 Obtain a practical knowledge of one of the most widespread applications such as Chatbots and virtual assistants

04 Acquire knowledge of the different transversal applications that this technology has in all fields

05 Acquire expert knowledge on the characteristics and fundamentals of virtual reality, augmented reality and mixed reality, as well as their differences

06 Use applications of each of these technologies and develop solutions with each of them individually and in an integrated manner, combining them to define immersive experiences

07 Acquire in-depth knowledge of the fundamentals of blockchain technology and its value propositions

08 Lead the creation of blockchain-based projects and apply this technology to different business models and the use of tools such as Smart Contracts

09 Acquire important knowledge about one of the technologies that will revolutionize our future, such as quantum computing

05

Structure and Content

The syllabus of this program is written by a team of professionals who, having extensive experience in the use of cutting-edge technologies, have used their own methodologies in all the didactic material so that the student can begin to apply changes to their way of working even before finishing the program. For this reason, teaching begins to benefit the learner during the training program itself.

Grow professionally with TECH, supported by a quality syllabus, developed by a team of experts who will not hesitate to help you achieve your greatest goals"

Syllabus

This program focuses its efforts on training the student in all the most practical and cutting-edge issues related to new technologies such as advanced artificial intelligence, big data or blockchain. This prepares the student to face the most common challenges at the head of technology departments.

Throughout the 450 hours of study that make up this program, the student will also analyze real case studies proposed by the teaching staff, where the program's methodologies are applied to solve problems that would otherwise have been complex. Thus, the student is getting a first class education in an authentic and truthful context.

A curriculum whose purpose is to prepare the student for substantial professional improvement in the field of enabling technologies. By understanding the current needs of the industry, the graduate will be able to meet them thanks to an integral and versatile knowledge.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1	Big Data and Artificial Intelligence
Module 2	Virtual, Augmented and Mixed Reality
Module 3	Blockchain and Quantum Computing

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Enabling Technologies completely online. Throughout the 6 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Big Data and Artificial Intelligence

1.1. Fundamental principles of Big Data
1.1.1. Big Data
1.1.2. Tools to Work With Big Data

1.2. Data Mining and Warehousing
1.2.1. Data Mining Cleaning and Standardization
1.2.2. Information Extraction, Machine Translation, Sentiment Analysis, etc
1.2.3. Types of Data Storage

1.3. Data Intake Applications
1.3.1. Principles of Data intake
1.3.2. Data Ingestion Technologies to Serve Business Needs

1.4. Data Visualization
1.4.1. The Importance of Data Visualization
1.4.2. Tools to Carry It Out Tableau, D3, matplotlib (Python), Shiny®

1.5. Machine Learning
1.5.1. Understanding Machine Learning
1.5.2. Supervised and Unsupervised Learning
1.5.3. Types of Algorithms

1.6. Neural Networks (Deep Learning)
1.6.1. Neural Network: Parts and Functionality
1.6.2.   Types of Networks CNN, RNN

1.6.3. Applications of Neural Networks; Image Recognition and Natural Language Interpretation
1.6.4. Generative Text Networks: LSTM

1.7. Natural Language Recognition
1.7.1. PLN (Processing Natural Language)
1.7.2. Advanced PLN Techniques: Word2vec, Doc2vec

1.8. Chatbots and Virtual Assistants
1.8.1. Types of Assistants: Voice and Text Assistants
1.8.2. Fundamental Parts for the Development of an Assistant: Intents, Entities and Dialog Flow
1.8.3. Integraciones: Web, Slack, Whatsapp,

Facebook
1.8.4. Assistant Development Tools: dialog Flow, Watson Assistant

1.9. Emotions, Creativity and Personality

in IA
1.9.1. Understand How to Detect Emotions Using Algorithms
1.9.2. Creating a Personality: Language, Expressions and Content

1.10. Future of Artificial Intelligence

1.11. Reflections

Module 2. Virtual, Augmented and Mixed Reality

2.1. Market and Tendencies
2.1.1. Current Market Situation
2.1.2. Reports and Growth by Different Industries

2.2. Differences Between Virtual, Augmented and Mixed Reality
2.2.1. Differences Between Immersive Realities
2.2.2. Immersive Reality Typology

2.3. Virtual Reality Cases and Uses
2.3.1. Origin and Fundamentals of Virtual Reality
2.3.2. Cases Applied to Different Sectors and Industries

2.4. Augmented Reality Cases and Uses
2.4.1. Origin and Fundamentals of Augmented Reality
2.4.2. Cases Applied to Different Sectors and Industries

2.5. Mixed and Holographic Reality
2.5.1. Origin, History and Fundamentals of Mixed and Holographic Reality
2.5.2. Cases Applied to Different Sectors and Industries

2.6. 360º Photography and Video
2.6.1. Camera Typology
2.6.2. Uses of 360 Images
2.6.3. Creating a Virtual Space in 360 Degrees

2.7. Virtual World Creation
2.7.1. Platforms for the Creation of Virtual Environments
2.7.2. Strategies for the Creation of Virtual Environments

2.8. User Experience (UX)
2.8.1. Components in the User Experience
2.8.2. Tools for the Creation of User Experiences

2.9. Devices and Glasses for Immersive Technologies
2.9.1. Device Typology on the Market
2.9.2. Glasses and Wearables Functioning, Models and Uses
2.9.3. Smart Glasses Applications and Evolution

2.10. Future Immersive Technologies
2.10.1. Tendencies and Evolution
2.10.2. Challenges and Opportunities

Module 3. Blockchain and Quantum Computing

3.1. Aspects of Decentralization

3.1.1. Market Size, Growth, Companies and Ecosystem
3.1.2. Fundamentals of Blockchain

3.2. Background: Bitcoin, Ethereum, etc.

3.2.1. Popularity of Decentralized Systems
3.2.2. Evolution of Decentralized Systems

3.3. Blockchain Operation and Examples

3.3.1. Types of Blockcahin and Protocols
3.3.2. Wallets, Mining and More

3.4. Characteristics of Blockchain Networks

3.4.1. Functions and Properties of Blockchain Networks
3.4.2. Applications: Cryptocurrencies, Reliability, Chain of Custody, etc

3.5. Types of Blockchain

3.5.1. Public and Private Blockchains
3.5.2. Hard and Soft Forks

3.6. Smart Contracts

3.6.1. Intelligent Contracts and Their Potential
3.6.2. Smart Contract Applications

3.7. Industry Use Models

3.7.1. Blockchain Applications by Industry
3.7.2. Blockchain Success Stories by Industry

3.8. Security and Cryptography

3.8.1. Objectives of Cryptography
3.8.2. Digital Signatures and Hash Functions

3.9. Cryptocurrencies and Uses

3.9.1. Types of Cryptocurrencies Bitcoin, HyperLedger, Ethereum, Litecoin, etc.
3.9.2. Current and Future Impact of Cryptocurrencies
3.9.3. Risks and Regulations

3.10. Quantum Computing

3.10.1. Definition and Keys
3.10.2. Uses of Quantum Computing

A unique educational experience that will take you to the zenith of your professional career"

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

"

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

" *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.
Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07
Our Students' Profiles

The students who decide to take this program come mainly from the field of technology and information technology, although it is also taken by professionals from the business or entrepreneurship areas. This is, therefore, a great opportunity for people related to technology who are looking for key training for their development.

"With your experience in the technological world and the tools TECH puts at your fingertips, you will gain access to the best jobs in the industry"

Mercedes Moya López

Project Manager

"I doubted whether I would be able to combine my studies with my work, but the methodology has allowed me to do so without a problem. A good experience that has allowed me to advance safely and quickly in this field"

Course Management

The teachers of this Postgraduate Diploma in Enabling Technologies have mastered the updating processes in this sector and are highly skilled in both professional and educational areas. People with great prestige who understand the importance of higher education to achieve a better qualified community, capable of adapting to the changes in society and the demands of companies. In this way, TECH teachers have compiled the most updated information on this subject to offer it to their students in a faithful and didactic way.

Take advantage of the opportunity to learn directly from specialists in this field, acquiring all the latest news in this area of intervention"

Management

Mr. Pablo Segovia Escobar

- Industrial Engineer, Project Management Professional (PMP) por el Program Management Institute
- Master's Degree in Business Administration and Management
- Postgraduate in Strategic Management Function
- Sales Manager and Program Manager with extensive experience (more than 12 years) in project management
- Current commercial manager of the Aftermarket and Industry 4.0 area applied to the support of systems at Indra

Mr. Pedro Diezma López

- Entrepreneur, writer, TEDx speaker and expert in emerging and exponential technologies
- Founder of the technology companies Acuilae (Artificial Intelligence), Ethyka and Zerintia Technologies
- Wearable "Best Initiative" Award in eHealth 2017 and "Best Technological "Solution" 2018 for occupational safety
- One of the world's leading experts (Source: Onalytica) in Wearable Technology and Internet of Things

Professors

Ms. Cristina Sánchez López

- Degree in Statistics from the Complutense University Madrid
- Master's Degree in Data Science
- 20 years of experience as IT (Software Engineer) for the Accenture Group in large clients such as Banco de Santander, BBVA, Endesa or Barclays Bank
- CEO and founder of Acuilae and ETHYKA

Mr. Álvaro Asenjo Sanz

- Technical Engineer in Computer Systems from the UCM
- More than 12 years of experience in the IT world
- Has participated in software development, consulting and IT project management
- Part of the Kolokium team
- Professor of Computer Science at Madrid European University
- Part of the faculty of the EOI and Kschool where he participates in several Blockchain programs

Impact on Your Career

TECH Global University is aware that taking a program of these characteristics is a great economic, professional and, of course, personal investment for the student. The ultimate goal of this great effort should be to achieve professional growth. And this is achieved thanks to an academic program that offers the best educational offer of the moment in this sector. A program designed to support students at the educational level, so that they develop the necessary skills to successfully manage in this field.

tech

" TECH puts all of its academic resources at the disposal of its students so they acquire the necessary skills that will lead them to success"

Are you ready to take the leap?
Excellent professional development awaits you

TECH Global University's Postgraduate Diploma in Enabling Technologies is an intensive, high-value program aimed at enhancing students' job skills in an area of broad competence. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

A program of high academic standing to lead your career to success.

Generating Positive Change

This Postgraduate Diploma in will enable students to acquire the necessary competitiveness to make a radical change in their career.

10

Benefits for Your Company

This program contributes to the growth of all its students by providing them with advanced knowledge in the field of enabling technologies, which in turn benefits the companies that will incorporate into their workforces an expert who will be able to deal with any kind of problem, both managerial and related to new technologies.

You will be the key piece of your business organization chart thanks to your expertise in big data, artificial intelligence and blockchain"

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11
Certificate

The Postgraduate Diploma in Enabling Technologies guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Diploma in Enabling Technologies** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
