01 Welcome

The financial system of the world powers is made up of a set of institutions, means and markets, whose primary purpose is to channel savings generated by lenders or surplus spending to borrowers. Most of the intervention work is carried out by economic specialists who are up to date in the economic-financial area. For this reason, TECH offers a degree that deals with the different types of Financial Markets, the supervisory bodies and the financial systems of the Spanish economy in a global perspective, as well as the economic bodies that intervene in the international economy. This Postgraduate Diploma is aimed at senior managers, graduates in economics, businessmen and financiers, among others, who seek to develop their strategic skills in international intervention through a 100% online modality that allows them to follow the subject in an adapted way.

Postgraduate Diploma in Financial Institutions and Markets.
TECH Technological University

“

Learn about the types of Financial Markets and their influence on national and international economy, thanks to this Postgraduate Diploma"

02

05

Structure and Content

The Postgraduate Diploma in Financial Institutions and Markets is an exhaustive program that is taught through a 100% online modality, making it possible to monitor in a flexible way. Thanks to its teaching methods, TECH offers a complete and rigorous qualification that is developed in only 6 months and with downloadable content that specialists can access at any time and place.

Expand your financial skills by mastering trading systems, CNMV and market regulation, thanks to TECH"

Syllabus

TECH's Postgraduate Diploma in Financial Institutions and Markets is a comprehensive and rigorous program aimed at graduates in economics and senior managers, among other professions in this science. Its main aim is focused on expanding and updating financial knowledge focused on institutions and Financial Markets, so that specialists master the options markets, OTC derivative products, the foreign exchange market, as well as investment funds and the liberation of Financial Markets, among many other concepts.

To achieve this, TECH provides students with theoretical and practical exercises that, in addition to teaching them academically, also enable their application in economic practice. With this in mind, the University has adopted the most innovative methodology to facilitate and guarantee the financial training of students in the shortest possible time and in the most accessible way.

Over the half-year period, students will analyze the productive system of the Spanish economy, as well as its structure and sectoral changes; the Spanish labor market, international development and its economic challenges; international investment flows and economic integration, as well as the different agents involved, such as the IMF, ICSID, IBRD, WB, UNCTAD, WTO, GATT and MIGA, among others.

It is a degree based on the Relearning methodology to bring all the knowledge and current economic tools to the specialists, without the need to invest long hours of study in it. In addition, TECH has experts in the sector who are aware of all business opportunities to ensure that enrolled students acquire high-level skills in the economic and financial field. All this, through a 100% online modality that offers the possibility of adapting the study to personal and professional needs.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1

Financial Institutions and Markets

Module 2

The Spanish Economy and World Economy

Module 3

International Economic Organizations

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Financial Institutions and Markets completely online. Throughout the 6 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

3.10. Regional Economic Integration Initiatives

- 3.10.1. The European Union
- 3.10.2. Regional Economic Integration in America
- 3.10.3. Reach to Other Countries

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma is aimed at Graduates who have previously completed any of the following degrees in the field of Economy for, companies to and Finances. Also provides tools to understand and be able to intervene in the intercommunity economic relationship.
