

Postgraduate Diploma

Financial Process Automation and Risk Management with Artificial Intelligence

Postgraduate Diploma Financial Process Automation and Risk Management with Artificial Intelligence

- » Modality: online
- » Duration: 6 months
- » Certificate: TECH Global University
- » Accreditation: 18 ECTS
- » Schedule: at your own pace
- » Exams: online
- » Intended for: Graduates who have previously completed any degree in the field of Social and Legal Sciences, Administration and Business Administration

Welcome

Financial Process Automation has emerged as a crucial trend in today's digital era, where efficiency and accuracy are imperative for business success. In this sense, the integration of Artificial Intelligence allows organizations not only to optimize their operations, but also to manage their associated risks more effectively. Given this reality, professionals need to update their knowledge regularly to manage the most effective Machine Learning strategies to facilitate strategic decision making in an increasingly complex economic environment. For this reason, TECH launches a revolutionary online university program focused on the Automation of Financial Processes and Risk Management.

**Postgraduate Diploma in Financial Process Automation
and Risk Management with Artificial Intelligence
TECH Global University**

Through this Postgraduate Diploma, based on Relearning, you will handle the most innovative tools of Artificial Intelligence to automate Financial Processes and improve Risk Management in the short term”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

Through this Postgraduate Diploma, experts will have a solid understanding of the implementation of Artificial Intelligence in the financial sector to automate processes and manage risks. In this sense, students will develop advanced skills to master the main Machine Learning techniques, which will allow them to analyze different liquidity risks. At the same time, professionals will handle state-of-the-art software such as Python to carry out simulations that model different market scenarios. In this way, they will be able to appreciate the behavior of variables such as interest rates or asset prices.

“

You will acquire advanced skills in the interpretation of financial data and optimize strategic decision making based on analytical data”

TECH makes the goals of their students their own goals too.

Working together to achieve them

Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence will enable students to:

01

Apply Artificial Intelligence techniques in financial decision making

04

Automate routine financial processes using machine learning

02

Develop predictive models for financial risk management

03

Optimize the allocation of financial resources using AI algorithms

05

Implement natural language processing tools for financial data analysis

06

Design recommender systems for the financial sector

08

Evaluate the impact of Artificial Intelligence on companies' profitability

09

Improve financial fraud detection with the use of Artificial Intelligence

07

Analyze large volumes of financial data using Big Data techniques

10

Create financial asset valuation models using Artificial Intelligence

11

Develop financial simulation tools based on Artificial Intelligence algorithms

12

Apply data mining techniques to identify financial patterns

13

Develop optimization models for financial planning

14

Use neural networks to improve prediction of market trends

15

Develop AI-based solutions for financial product personalization

16

Implement AI systems for automated investment decision making

18

Investigate the use of Artificial Intelligence in financial regulation and compliance

19

Develop AI solutions to reduce costs in financial processes

17

Develop analytical capabilities to interpret the results of financial AI models

20

Identify opportunities for innovation in the financial sector through Artificial Intelligence

05

Structure and Content

This program has been designed by real experts in Artificial Intelligence. Therefore, the curriculum will delve into issues such as the implementation of automatic payment systems using Stripe Radar, bank reconciliation with Machine Learning and the application of predictive models with Power BI. In this way, students will obtain advanced skills to automate financial processes through cutting-edge Deep Learning techniques. In addition, the teaching contents will delve into a variety of simulation methods for risk management in order for graduates to model different economic scenarios to analyze the performance of investments or assets.

“

You will be highly qualified to model financial risks by applying state-of-the-art Machine Learning and predictive analytics models”

Syllabus

The Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence of TECH Global University is a high intensity program that prepares you to face economic challenges and strategic decisions in the field of Financial Advisory.

The syllabus will delve into issues such as the implementation of automatic payment systems using Stripe Radar, bank reconciliation with Machine Learning and the application of predictive models with Power BI.

In this way, students will obtain advanced technical skills to carry out simulations that model different economic scenarios to analyze the return on investments.

This Postgraduate Diploma takes place over 3 months and is divided into 3 modules:

Module 1	Automation of Financial Department Processes with Artificial Intelligence
Module 2	Financial Data Analysis and Visualization with Plotly and Google Data Studio
Module 3	Artificial Intelligence for Financial Risk Management with TensorFlow and Scikit-learn

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence completely online. Throughout the 3 months of the educational program, the students will be able to access all the contents of this program at any time, allowing them to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Automation of Financial Department Processes with Artificial Intelligence

1.1. Automation of Financial Processes with Artificial Intelligence and Robotic Process Automation (RPA)

- 1.1.1. AI and RPA for Process Automation and Robotization
- 1.1.2. RPA Platforms for Financial Processes: UiPath, Blue Prism, and Automation Anywhere
- 1.1.3. Evaluation of RPA Use Cases in Finance and Expected ROI

1.2. Automated Invoice Processing with AI with Kofax

- 1.2.1. Configuration of AI Solutions for Invoice Processing with Kofax
- 1.2.2. Applying Machine Learning Techniques for Invoice Classification
- 1.2.3. Automation of the Accounts Payable Cycle with Artificial Intelligence Technologies

1.3. Payment Automation with Artificial Intelligence Platforms

- 1.3.1. Implementing Automated Payment Systems with Stripe Radar and Artificial Intelligence
- 1.3.2. Using AI Predictive Models for Efficient Cash Management
- 1.3.3. Security in Automated Payment Systems: Fraud Prevention with Artificial Intelligence

1.4. Bank Reconciliation with Artificial Intelligence and Machine Learning

- 1.4.1. Automation of Bank Reconciliation Using AI with Platforms such as Xero
- 1.4.2. Implementing Machine Learning Algorithms to Improve Accuracy
- 1.4.3. Case Studies: Efficiency Improvements and Error Reduction

1.5. Cash Flow Management with Deep Learning and TensorFlow

- 1.5.1. Predictive Cash Flow Modeling with LSTM Networks Using TensorFlow
- 1.5.2. Implementing LSTM Models in Python for Financial Forecasting
- 1.5.3. Integrating Predictive Models into Financial Planning Tools

1.6. Inventory Automation with Predictive Analytics

- 1.6.1. Using Predictive Techniques to Optimize Inventory Management
- 1.6.2. Applying Predictive Modeling with Microsoft Azure Machine Learning
- 1.6.3. Integrating Inventory Management Systems with ERP

1.7. Creating Automated Financial Reports with Power BI

- 1.7.1. Automating the Generation of Financial Reports Using Power BI
- 1.7.2. Developing Dynamic Dashboards for Real-Time Financial Analysis
- 1.7.3. Case Studies of Improvements in Financial Decision Making with Automated Reporting

1.8. Purchasing Optimization with IBM Watson

- 1.8.1. Predictive Analytics for Purchase Optimization with IBM Watson
- 1.8.2. AI Models for Negotiations and Pricing
- 1.8.3. Integrating AI Recommendations into Purchasing Platforms

1.9. Customer Service with Financial Chatbots and Google DialogFlow

- 1.9.1. Implementing Financial Chatbots with Google DialogFlow
- 1.9.2. Integrating Chatbots in CRM Platforms for Financial Support
- 1.9.3. Continuous Improvement of Chatbots Based on User Feedback

1.10. Artificial Intelligence-Assisted Financial Auditing

- 1.10.1. AI Applications in Internal Audits: Transaction Analysis
- 1.10.2. Implementing AI for Compliance Auditing and Discrepancy Detection
- 1.10.3. Improving Audit Efficiency with Artificial Intelligence Technologies

Module 2. Financial Data Analysis and Visualization with Plotly and Google Data Studio**2.1. Fundamentals of Financial Data Analysis**

- 2.1.1. Introduction to Data Analysis
- 2.1.2. Tools and Techniques for Financial Data Analysis
- 2.1.3. Importance of Data Analysis in Finance

2.2. Techniques for Exploratory Analysis of Financial Data

- 2.2.1. Descriptive Analysis of Financial Data
- 2.2.2. Visualization of Financial Data with Python and R
- 2.2.3. Identifying Patterns and Trends in Financial Data

2.3. Financial Time Series Analysis

- 2.3.1. Fundamentals of Time Series
- 2.3.2. Time Series Models for Financial Data
- 2.3.3. Time Series Analysis and Forecasting

2.4. Correlation and Causality Analysis in Finance

- 2.4.1. Correlation Analysis Methods
- 2.4.2. Techniques for Identifying Causal Relationships
- 2.4.3. Applications in Financial Analysis

2.5. Advanced Visualization of Financial Data

- 2.5.1. Advanced Data Visualization Techniques
- 2.5.2. Tools for Interactive Visualization (Plotly, Dash)
- 2.5.3. Use Cases and Practical Examples

2.6. Cluster Analysis in Financial Data

- 2.6.1. Introduction to Cluster Analysis
- 2.6.2. Applications in Market and Customer Segmentation
- 2.6.3. Tools and Techniques for Cluster Analysis

2.7. Networks and Graph Analysis in Finance

- 2.7.1. Fundamentals of Network Analysis
- 2.7.2. Applications of Graph Analysis in Finance
- 2.7.3. Tools for Network Analysis (NetworkX, Gephi)

2.8. Text and Sentiment Analysis in Finance

- 2.8.1. Natural Language Processing (NLP) in Finance
- 2.8.2. Sentiment Analysis in News and Social Media
- 2.8.3. Tools and Techniques for Text Analysis

2.9. Financial Data Visualization and Analysis Tools with AI

- 2.9.1. Python Data Analysis Libraries (Pandas, NumPy)
- 2.9.2. Visualization Tools in R (ggplot2, Shiny)
- 2.9.3. Practical Implementation of Analysis and Visualization

2.10. Projects and Practical Applications of Analysis and Visualization

- 2.10.1. Development of Financial Data Analysis Projects
- 2.10.2. Implementation of Interactive Visualization Solutions
- 2.10.3. Evaluation and Presentation of Project Results

Module 3. Artificial Intelligence for Financial Risk Management with TensorFlow and Scikit-learn

3.1. Fundamentals of Financial Risk Management

- 3.1.1. Basic Concepts of Risk Management
- 3.1.2. Types of Financial Risks
- 3.1.3. Importance of Risk Management in Finance

3.2. Credit Risk Models with Artificial Intelligence

- 3.2.1. Machine Learning Techniques for Credit Risk Assessment
- 3.2.2. Credit Scoring Models (Scikit-Learn)
- 3.2.3. Implementing Credit Risk Models with Python

3.3. Market Risk Models with Artificial Intelligence

- 3.3.1. Market Risk Analysis and Management
- 3.3.2. Applying Predictive Models for Market Risk
- 3.3.3. Implementing Market Risk Models

3.4. Operational Risk and Its Management with Artificial Intelligence

- 3.4.1. Concepts and Types of Operational Risk
- 3.4.2. Applying AI Techniques to Operational Risk Management
- 3.4.3. Tools and Practical Examples

3.5. Liquidity Risk Models with Artificial Intelligence

- 3.5.1. Fundamentals of Liquidity Risk
- 3.5.2. Machine Learning Techniques for Liquidity Risk Analysis
- 3.5.3. Practical Implementation of Liquidity Risk Models

3.6. Systemic Risk Analysis with Artificial Intelligence

- 3.6.1. Systemic Risk Concepts
- 3.6.2. AI Applications in Systemic Risk Assessment
- 3.6.3. Case Studies and Practical Examples

3.7. Portfolio Optimization with Risk Considerations

- 3.7.1. Portfolio Optimization Techniques
- 3.7.2. Incorporating Risk Measures in the Optimization
- 3.7.3. Portfolio Optimization Tools

3.8. Simulation of Financial Risks

- 3.8.1. Simulation Methods for Risk Management
- 3.8.2. Applying Monte Carlo Simulations in Finance
- 3.8.3. Implementing Simulations with Python

3.9. Risk Assessment and Continuous Risk Monitoring

- 3.9.1. Continuous Risk Assessment Techniques
- 3.9.2. Risk Monitoring and Reporting Tools
- 3.9.3. Implementing Continuous Monitoring Systems

3.10. Projects and Practical Applications in Risk Management

- 3.10.1. Development of Financial Risk Management Projects
- 3.10.2. Implementation of AI Solutions for Risk Management
- 3.10.3. Evaluation and Presentation of Project Results

“

You will have a library of teaching resources available 24 hours a day and with material that stands out for its quality. What are you waiting for to enroll?"

06

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the quality of teaching, quality of materials, course structure and objectives is excellent. Not surprisingly, the institution became the best rated university by its students on the Trustpilot review platform, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

Case Studies

Students will complete a selection of the best case studies in the field. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Testing & Retesting

We periodically assess and re-assess your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an expert strengthens knowledge and memory, and generates confidence for future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

07

Our Students' Profiles

The Postgraduate Diploma is intended for University Graduates, who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.

The diversity of participants with different academic profiles and from multiple nationalities makes up the multidisciplinary approach of this program.

The Postgraduate Diploma is also open to professionals who, being university graduates in any area, have two years of work experience in the field of Financial Management.

“

A syllabus designed to take you to the pinnacle of Financial Management and will enable you to master the most advanced Artificial Intelligence techniques to manage investment risks”

Average Age

Between **35** and **45** years old

Years of Experience

Miguel Sosa Cruz

Financial Advisor at a prestigious bank

"Thanks to the Postgraduate Diploma in Financial Department Process Automation with Artificial Intelligence, I have been able to automate key processes in the financial field, which has significantly improved our efficiency and accuracy. I'm very grateful to TECH!"

08

Course Management

TECH's philosophy is based on offering the most holistic and updated programs in the academic panorama, which is why it carefully selects its teaching staff. For the delivery of this Postgraduate Diploma, we have enlisted the services of the best specialists in the field of Financial Process Automation and Risk Management with Artificial Intelligence. In this way, they have created a myriad of teaching content characterized by its high quality and adaptation to the requirements of the labor market. In this way, students will enter into an experience that will allow them optimize their daily practice considerably.

“

You will have access to a curriculum designed by a renowned teaching team specialized in Artificial Intelligence applied to Financial Processes and Risk Management, which will guarantee you a successful learning experience”

Management

Dr. Peralta Martín-Palomino, Arturo

- ♦ CEO and CTO at Prometheus Global Solutions
- ♦ CTO at Korporate Technologies
- ♦ CTO at AI Shepherds GmbH
- ♦ Consultant and Strategic Business Advisor at Alliance Medical
- ♦ Director of Design and Development at DocPath
- ♦ PhD in Psychology from the University of Castilla La Mancha
- ♦ PhD in Economics, Business and Finance from the Camilo José Cela University
- ♦ PhD in Psychology from University of Castilla La Mancha
- ♦ Master's Degree in Executive MBA from the Isabel I University
- ♦ Master's Degree in Sales and Marketing Management, Isabel I University
- ♦ Expert Master's Degree in Big Data by Hadoop Training
- ♦ Master's Degree in Advanced Information Technologies from the University of Castilla La Mancha
- ♦ Member of the research group SMILE.

Professors

Dr. Carrasco Aguilar, Álvaro

- ◆ Sales & Marketing Coordinator at LionLingo
- ◆ Researcher in Information Technology Management
- ◆ PhD in Social and Health Research: Technical and Economic Evaluation of Technologies, Interventions and Policies Applied to Health Improvement from the University of Castilla La Mancha
- ◆ Master's Degree in Social and Health Research from the University of Castilla La Mancha
- ◆ Degree in Political Science and Administration at the University of Granada
- ◆ Award for "Best Scientific Article for Technological Innovation for the Efficiency of Health Expenditure"
- ◆ Regular speaker at international scientific congresses

“

Take the opportunity to learn about the latest advances in this field in order to apply it to your daily practice"

09

Impact on Your Career

Through this Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence, professionals will experience a leap in quality in their careers. Students will use the main tools of Artificial Intelligence to automate administrative tasks such as account reconciliation, reporting and accounting. This will enable them to reduce reliance on manual tasks, save time and minimize associated costs.

“

You will handle sophisticated Deep Learning techniques to implement automated solutions to identify risks such as the probability of default or lack of liquidity”

If you want to make a positive change in your profession, the Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence will help you achieve it.

Are you ready to take the leap? Excellent professional development awaits you

TECH's Postgraduate Diploma in Financial Process Automation and Risk Management with Artificial Intelligence is an intensive program that prepares you to face challenges and business decisions in the field of Financial Process Automation and Risk Management with Artificial Intelligence. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

You will be able to apply Artificial Intelligence algorithms in financial processes such as income and expense forecasting.

When the change occurs

Type of change

Salary increase

This program represents a salary increase of more than **26.24%** for our students

10

Benefits for Your Company

Graduates of this TECH program are able to apply Machine Learning algorithms and analyze large volumes of economic data, identifying patterns and trends that help in making more accurate strategic decisions. Professional skills that will make them fit to drive any company towards excellence and impose a comprehensive technological transformation. Therefore, this program is an unparalleled opportunity for companies to have an expert of prestige and highly competitive skills.

“

Do not miss the opportunity to join the most competitive technology companies thanks to the knowledge of Artificial Intelligence that TECH offers you”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development
