01 Welcome

In the midst of the digital transformation in many sectors, the figure of the technology project manager has become essential for the vast majority of companies. This in-demand profile requires a high level of technical knowledge of the tasks performed by the team, as well as management and efficient leadership skills. This program prepares students in the management of computer projects and teams in a technological environment, enabling them to aspire to positions of greater responsibility and financial compensation. Supported by didactic material created by the best experts in the industry, students will be able to meet demand for specialization in constantly growing a sector.

Postgraduate Diploma in IT Project and Team Management in Technological
Environments TECH Technological University

“

Companies need efficient, competent leaders capable of managing IT projects and teams in highly technological environments. With TECH's help, you can be that leader”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

The main objective for this The Postgraduate Diploma at TECH is to consolidate student abilities and skills in the field of IT project management, with advanced techniques and methodologies taught by industry experts. In this way, the contents are taught from a largely practical point of view, adopting today's business perspective when looking for new technology project managers.

“

TECH's goal is to take you to the top of the best technology companies, providing you with the best resources available”

TECH makes the goals of their students their own goals too.
Together they work to achieve them.

The Postgraduate Diploma in IT Project and Team Management in Technological Environments will allow students to:

01

Generate specialized knowledge on project management and Agile project management

05

Generate specialized knowledge on process and requirements analysis during software development processes

02

Develop elements and processes in Scrum framework and Kanban methods

06

Integrate process analysis into project management methodologies

03

Examine the PMI methodology for Project Management, analyzing and examining the project evolution in real cases

07

Know the best practices in data management to ensure the integrity of designed information systems

04

Establish a series of patterns to understand the differences between Scrum, Kanban and PMI and to determine which is the most appropriate in each situation

08

Examine the phases of the data analytics lifecycles and their relation to project management and quality strategy

09

Analyze the different roles and functions of new information systems analysts

13

Develop management skills to maximize performance in a technology company

10

Unravel the different data collection methods to gain in-depth knowledge of them and their best use

14

Determine leadership as a support model with respect to traditional authoritarian methodologies

11

Develop practical business examples with the knowledge acquired

15

Formulate strategies for favorable conflict resolution and negotiation techniques

12

Understand the impulse of human resources in companies as a means of economic and professional growth

16

Contemplate emotional intelligence as a basic tool to optimize company results

05

Structure and Content

The Postgraduate Diploma in IT Project and Team Management in Technological Environments at TECH is taught in a 100% online format, so students can adapt the learning experience to their own availability, schedules and interests. This is a unique opportunity to boost any career of anyone that wants to reach the most ambitious management positions in today's market, both in the field of IT and technological projects.

“

Your studies, expertise and skills are fundamental. This Postgraduate Diploma will take them to the next level to access the best management positions in technological environments”

Syllabus

The Postgraduate Diploma in IT Project and Team Management in Technological Environments at TECH Technological University is an intensive program that prepares students to face challenges and business decisions in the world of project management in technological environments. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Over 450 teaching hours, students will learn the different *frameworks* to efficiently operate a work team, as well as various techniques to promote a healthy relationship between the different members for better overall performance.

This Postgraduate Diploma delves into the most innovative work methodologies in the area of technological project management, valuing both technical and human factors in the management of such a specialized work team.

A curriculum for students to focus their professional career toward the most demanded positions of responsibility and management in the industry. With the innovative program content, supported by the best educational methodology and an exceptional teaching staff, graduates will stand out above the rest of candidates in leading professional IT project teams.

This Postgraduate Diploma is developed over 6 months and is divided into 3 modules:

- Module 1** / Using Agile in Technology Project Direction and Management
- Module 2** / Requirements Management and Process Analysis in Software Development Projects
- Module 3** / Team Management in IT Projects

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in IT Project and Team Management in Technological Environments completely online. Over the course of 6 months, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Agile Technology Project Direction and Management

1.1. Project Management

- 1.1.1. Project Management
- 1.1.2. Phases of a Project

1.2. Project Direction According to the Project Management Institute

- 1.2.1. PMI and PMBOK
- 1.2.2. Project, Program and Project Portfolio
- 1.2.3. Evolution and Process Assets at Organizations That Work with Projects

1.3. Process Management according to the Process Management Institute

- 1.3.1. Process Groups and Knowledge Areas
- 1.3.2. Process Matrix

1.4. Agile Methodologies for Project Management

- 1.4.1. Application Motivation
- 1.4.2. Agile Values and Principles in the Agile Manifesto
- 1.4.3. Application Scenarios

1.5. Scrum for Agile Project Management: Framework Description

- 1.5.1. Agile Management Framework
- 1.5.2. Scrum Pillars and Values

1.6. Scrum for Agile Project Management: Implementing Models

- 1.6.1. Framework Implementation
- 1.6.2. People, Roles and Responsibilities on Scrum
- 1.6.3. Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective and Sprint Refinement

1.7. Scrum for Agile Project Management

- 1.7.1. Product Backlog, Sprint Backlog and Incremental Backlog
- 1.7.2. Scrum Team Agreements
- 1.7.3. Performance Assessment

1.8. KANBAN for Agile Project Management

- 1.8.1. The Model
- 1.8.2. Kanban Method, Elements and Benefits
- 1.8.3. Typical Usage Scenarios

1.9. KANBAN for Agile Project Management: Implementing Models

- 1.9.1. Fundame
- 1.9.2. Application
- 1.9.3. Performance Assessment

1.10. Project Direction Model Selection

- 1.10.1. Criteria for Selecting a Management Model Type
- 1.10.2. Traditional Methods vs. Agile Methods
- 1.10.3. Conclusions

Module 2. Requirements Management and Process Analysis in Software Development Projects**2.1. Systems Analysis**

- 2.1.1. Systems Analyst Functions
- 2.1.2. Software Development Cycle: SDLC and OO Agile
- 2.1.3. SDLC, OO and Agile

2.2. Importance of Systems Analysis and Design

- 2.2.1. Information Systems
- 2.2.2. Integrating IT Technologies: HW and Software
- 2.2.3. Methodology Selection

2.3. Software Development Life Cycle

- 2.3.1. Campaigns and Types
- 2.3.2. Redemption and Drive
- 2.3.3. Types of Strategies
- 2.3.4. Digital Marketing Plans

2.4. Systems Model and Design: Integration

- 2.4.1. Dependencies with Other Operating Systems in the Organization
- 2.4.2. Integration with Project Management Methodologies such as PMBOK
- 2.4.3. Integration with Agile Methodologies

2.5. Requirements

- 2.5.1. Interactive Methods: Interviews, JAD and Questionnaires
- 2.5.2. Non-Interactive Methods: Observation, Document Review
- 2.5.3. Sampling Techniques: Sampling

2.6. Processes Analysis: DFDs

- 2.6.1. Multilevel DFD Development
- 2.6.2. Types of DFDs: Physical and Logical, Based on Events
- 2.6.3. Partitioning DFDs

2.7. Processes Analysis: Data Dictionary

- 2.7.1. Creating Data Dictionaries Based on Previous DAFD
- 2.7.2. Data Dictionary Nomenclature
- 2.7.3. XML Creation for Data Exchange with Other Systems

2.8. Processes Analysis: Processes Specifications

- 2.8.1. Structured and Semi-structured Decisions
- 2.8.2. If-The-Else
- 2.8.3. Decision Tables and Trees

2.9. Importance of Design

- 2.9.1. Output Design
- 2.9.2. Input Design
- 2.9.3. Validating Design

2.10. Database Design

- 2.10.1. Normalization of Data
- 2.10.2. E-R Diagrams: One-to-many and Many-to-many Relationships
- 2.10.3. Destandardization

Module 3. Team Management in IT Projects

3.1. Team Management

- 3.1.1. Management Skills
- 3.1.2. Human Capital Management and Managerial Functions
- 3.1.3. Classification and Types of Management Skills
- 3.1.4. Group Leadership Management in Companies

3.2. Team Building

- 3.2.1. Team Management
- 3.2.2. Performance Evaluation
- 3.2.3. Delegation and Empowerment
- 3.2.4. Commitment Management

3.3. Work Teams

- 3.3.1. Culture: Mission, Vision, Values
- 3.3.2. Planning and Strategy
- 3.3.3. Organization and Monitoring
- 3.3.4. Feedback and Feedforward
- 3.3.5. Results Assessment

3.4. Stages in Team Training

- 3.4.1. Dependence Stage
- 3.4.2. Counter-Dependence Stage
- 3.4.3. Independence Stage
- 3.4.4. Interdependence Stage

3.5. IT Project Organization

- 3.5.1. Company Planning
- 3.5.2. Time Planning
- 3.5.3. Resource Planning
- 3.5.4. Costs Planning

3.6. Talent Management in Companies

- 3.6.1. Talent
- 3.6.2. Talent Management
- 3.6.3. Talent Dimensions
- 3.6.4. Attracting Talent

3.7. Company Communication

- 3.7.1. The Company's Communication Process
 - 3.7.1.1. Internal Relationships and Communication in Companies
 - 3.7.1.2. Relation between Company Organization and Communication: Centralization or Decentralization
 - 3.7.1.3. Internal and External Communication Tools

- 3.7.2. Interpersonal Relations in the Company
 - 3.7.2.1. Interpersonal Communication and Conflicts
 - 3.7.2.2. Communication Filters and Barriers
 - 3.7.2.3. Criticism and Active Listening
 - 3.7.2.4. Active Listening Techniques

3.8. Negotiation Techniques in Companies

- 3.8.1. Negotiation at the Managerial Level in Technology Companies
 - 3.8.1.1. Negotiation
 - 3.8.1.2. Styles of Negotiation
 - 3.8.1.3. Negotiation Phases
- 3.8.2. Negotiation Techniques
 - 3.8.2.1. Negotiation Strategies and Tactics
 - 3.8.2.2. Negotiation Types
- 3.8.3. The Figure of the Negotiating Subject
 - 3.8.3.1. Negotiator Characteristics
 - 3.8.3.2. Types of Negotiators
 - 3.8.3.3. Psychology in Negotiation

3.9. Coaching and Business Management

- 3.9.1. Business Coaching
- 3.9.2. Coaching in Practice
- 3.9.3. Coaching in Organizations

3.10. Mentoring and Business Management

- 3.10.1. Mentoring
- 3.10.2. The 4 Processes of a Mentoring Programme
 - 3.10.2.1. Processes
 - 3.10.2.2. Mentors in Companies
 - 3.10.2.3. Protégés in Technological Companies
- 3.10.3. Benefits of Mentoring in Companies
 - 3.10.3.1. Benefits to the Organization: Mentor and Mentee
- 3.10.4. Differences between Mentoring and Coaching

3.8. Negotiation Techniques in Companies

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The student profile for this Postgraduate Diploma in IT Project and Team Management in Technological Environments is that of professionals in the IT and technology field who want to build their career toward work team management. These students seek to balance their work or personal obligations with their studies, since TECH's online teaching gives them the flexibility and quality they need to improve their career.

“

If you want to boost your career with a better economic and labor projection, you are in the right place. TECH will help you to raise the level of your professional profile”
