01

Welcome

Lean Manufacturing has positioned itself as an excellent tool for optimizing production processes in companies. Through its implementation, companies eliminate those activities that do not generate any type of value, creating products in a reduced time and with a minimum cost. Therefore, experts in the mastery of this organizational model are highly required by organizations to occupy reference positions, in order to improve their productive development. In view of this situation, TECH has designed this program, which improves the student's skills in the management of Lean work methodologies and strategies for waste reduction. 100% online and without leaving your home, you will fully boost your career prospects.

Postgraduate Diploma in Production in Lean Manufacturing Systems
TECH Technological University

“

Through this Postgraduate Diploma, you will learn the leading Lean work methodologies and you will be able to optimize the productive organization of your company”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story" for incorporating an innovative interactive multi-video system in the programs.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

This Postgraduate Diploma has been designed with the objective of favoring the acquisition of state-of-the-art knowledge and excellent skills on Lean Manufacturing Systems Production by the student. Throughout this academic experience, you will delve into the organizational differences between a traditional and a Lean production model or the cutting-edge techniques to solve team efficiency problems with solvency. All this, enjoying the best educational methodology in the pedagogical panorama and in only 6 months.

“

Increase your ability to solve efficiency problems related to the use of machinery through this program"

TECH makes the goals of their students their own goals too
Working together to achieve them

The Postgraduate Diploma in Production in Lean Manufacturing Systems will train the student to:

01

Integrate the Lean philosophy in the current context of Industry 4.0

04

Delve into the use of Standard Work to standardize processes and foster continuous improvement

02

Apply the Lean Manufacturing philosophy in logistics and office and service environments

03

Analyze the organizational differences between a traditional production system and a Lean system

05

Share best practices and experiences in the implementation of work cells and continuous improvement groups in different industries

06

Substantiate the concept of equipment efficiency and its impact on the income statement

08

Measure the Overall Equipment Effectiveness of equipment in any enterprise

09

Analyze the implications of equipment purchasing decisions and be able to optimize them

07

Know the techniques of inefficiency analysis in the equipment

10

Implement best practices in equipment safety management and equipment energy consumption management

05

Structure and Content

This Postgraduate Diploma is taught in a 100% online mode to enable effective learning through the development of schedules tailored to the needs of each student. Likewise, the student will have at their disposal didactic resources in avant-garde formats such as explanatory videos or evaluative exercises, with the idea of providing them with an education based on their study preferences.

“

The 100% online modality of this program will allow you to study without the need to leave your own home”

Syllabus

The Postgraduate Diploma in Production in Lean Manufacturing Systems has been developed with the premise of providing students with the skills required to optimize their production decision making in different business environments. In this way, through it, you will be fully prepared to face with solvency all the challenges that this business field presents on a daily basis.

Throughout 6 months of learning, the student will obtain an excellent didactic content of a theoretical-practical nature, which will allow them to acquire a remarkable global vision of this area and to closely analyze real business cases to enrich their professional skills. Theoretical-practical, which will allow them to acquire a notorious global vision of this area and to closely analyze real business cases to enrich their professional skills.

This Postgraduate Diploma delves in depth into the principles, characteristics and different applications of Lean Manufacturing, the distribution of production in this type of systems or the strategies of Total Productive Maintenance and Overall Equipment

Effectiveness. In this way, you will understand the keys to this model of work organization.

It is, therefore, a unique opportunity to acquire a series of competencies that will guarantee the student to stand out in the field of management and corporate management. You will also benefit from an exclusive teaching methodology and high quality didactic materials, designed by the best experts in the field of Lean Manufacturing.

This Postgraduate Diploma is developed over 6 months and is divided into 3 modules:

Module 1

Lean Manufacturing Principles and Context

Module 2

Evolution of production organization in a Lean system

Module 3

TPM (Total Productive Maintenance), OEE (Overall Equipment Effectiveness)

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Lean Manufacturing Systems Production completely online. Throughout the 6 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Lean Manufacturing Principles and Context

1.1. Lean Manufacturing

- 1.1.1. Lean Manufacturing Origin
- 1.1.2. Lean Manufacturing Principles
- 1.1.3. Benefits of Lean Manufacturing Methodology

1.2. Benefits of Lean Manufacturing Methodology Production philosophy at the Toyota plant

- 1.2.1. Toyota Production System (TPS)
- 1.2.2. Key principles of the TPS
- 1.2.3. The Pillars of TPS

1.3. Precursors of Lean Manufacturing

- 1.3.1. Kiichiro Toyoda, Taiichi Ohno and Shigeo Shingo
- 1.3.2. Edward Deming
- 1.3.3. James Womack, Daniel Jones and Michael George

1.4. Lean Concept and its Application in Production

- 1.4.1. Value Identification and Value Stream Mapping
- 1.4.2. Creation of continuous flow and establishment of Pull Production
- 1.4.3. Pursuit of Perfection

1.5. Lean Manufacturing and Total Quality Management

- 1.5.1. Lean Manufacturing y Total Quality Management
- 1.5.2. Commonalities between Lean Manufacturing and Total Quality Management
- 1.5.3. Differences between Lean Manufacturing and Total Quality Management

1.6. Lean Manufacturing y 6 Sigma

- 1.6.1. Lean Manufacturing y 6 Sigma
- 1.6.2. Commonalities between Lean Manufacturing and 6 Sigma
- 1.6.3. Differences between Lean Manufacturing and 6 Sigma

1.7. Lean Manufacturing and Process Reengineering

- 1.7.1. Lean Manufacturing and Process Reengineering
- 1.7.2. Commonalities between Lean Manufacturing and process reengineering
- 1.7.3. Differences between Lean Manufacturing and Process Reengineering

1.8. Lean Manufacturing and Theory of Constraints (TOC)

- 1.8.1. Lean Manufacturing and Theory of Constraints (TOC)
- 1.8.2. Commonalities between Lean Manufacturing and Theory of Constraints (TOC)
- 1.8.3. Differences between Lean Manufacturing Theory of Constraints (TOC)

1.9. Lean Manufacturing Integration with Industry 4.0

- 1.9.1. Evolution of Lean Manufacturing in the Industry 4.0 era
- 1.9.2. Integration of Lean Manufacturing with Industry 4.0
- 1.9.3. Future of Lean Manufacturing in the era of Industry 4.0

1.10. Applications of the Lean philosophy in other areas: Lean Logistics, Lean Office, Lean Service

- 1.10.1. Lean Logistics, Lean Office, Lean Service. Applications
- 1.10.2. Lean Logistics applications
- 1.10.3. Lean Office applications
- 1.10.4. Lean Service

Module 2. Evolution of production organization in a Lean system
2.1. The organization of production in a Lean system

- 2.1.1. The Organization of Production. Key Concepts
- 2.1.2. Company Structure and Organization
- 2.1.3. Production systems and work organization

2.2. Organizational differences between a traditional production system and a Lean system

- 2.2.1. Types of organizational structure
- 2.2.2. Organizational differences between a traditional system and a Lean system
- 2.2.3. Organizational advantages of the Lean system

2.3. Concept of "Work Cells" and their impact on efficiency and continuous improvement

- 2.3.1. Advantages of "Work Cells"
- 2.3.2. Structure/ Types of "Work Cells"
- 2.3.3. Management routines "Work Cells" to impact efficiency and continuous improvement

2.4. Implementation of "Continuous Improvement Teams" (Kaizen Teams) to ensure a focus on continuous improvement and problem solving

- 2.4.1. Incorporation of the Kaizen Teams Concept in the organization
- 2.4.2. Activities and methodology
- 2.4.3. Kaizen Teams Roles and Responsibilities

2.5. Importance of "Autonomy and Accountability" in the evolution towards a lean system and the improvement of efficiency and quality

- 2.5.1. Self-managed and agile teams as a key to organizational evolution
- 2.5.2. The development of people as an added value to the Lean organization
- 2.5.3. Structure for leading "Autonomy and accountability" towards a Lean system

2.6. Use of Standard Work to standardize processes and encourage continuous improvement

- 2.6.1. Standard Work. Key Elements
- 2.6.2. Benefits of Standard Work as an object of continuous improvement
- 2.6.3. Implementation of Standard Work in organizations

2.7. Systems for promoting polyvalence and training in lean organizations: The polyvalence matrix

- 2.7.1. Polyvalence Promotion and Training Systems in Lean Organizations: The Polyvalence Matrix
- 2.7.2. Advantages of a multipurpose system
- 2.7.3. Implementation of the polyvalence promotion system

2.8. Evolution of production organization through waste elimination and continuous improvement

- 2.8.1. Analysis of non-value-adding activities as a basic Lean practice
- 2.8.2. Waste elimination/reduction strategy
- 2.8.3. Implementing a waste elimination/reduction model

2.9. Implementation of Work Cells and continuous improvement groups in different industries. Practical Examples

- 2.9.1. Implementation of Work Cells in the Automotive Sector
- 2.9.2. Implementation of work cells in the textile sector
- 2.9.3. Implementation of Work Cells in the Food Sector

2.10. Importance of the evolution of the production organization towards a Lean system

- 2.10.1. Main aspects in the evolution towards a Lean system
- 2.10.2. Improved productivity and production organization
- 2.10.3. Utility of the Lean System for the evolution of the production organization

Module 3. TPM (Total Productive Maintenance), OEE (Overall Equipment Effectiveness)

3.1. TPM Total Productive Maintenance

- 3.1.1. TPM Total Productive Maintenance. Fundamentals
- 3.1.2. Emergence, objectives and benefits
- 3.1.3. TPM Pillars

3.2. Improved machine efficiency OEE: Problem Identification and Problem Solving Techniques

- 3.2.1. Identification of efficiency problems
- 3.2.2. Solving efficiency problems
- 3.2.3. Machine efficiency monitoring

3.3. Techniques to Reduce Downtime in the Production Process, Maintenance Planning and Programming

- 3.3.1. Production planning and maintenance
- 3.3.2. Autonomous Maintenance
- 3.3.3. SMED

3.4. Equipment Maintenance Management and Purchasing. Decision Criteria

- 3.4.1. Technical requirements and specifications
- 3.4.2. Costs and investment
- 3.4.3. Supplier evaluation: criteria

3.5. Preventative Maintenance Prevention of equipment failures

- 3.5.1. Installation of the equipment: Maintainability criteria
- 3.5.2. Preventative Maintenance
- 3.5.3. Example of a preventive maintenance plan in the railway industry

3.6. Predictive Maintenance Equipment failure prediction

- 3.6.1. Predictive Maintenance
- 3.6.2. Sensorization of equipment
- 3.6.3. Algorithm development with AI

3.7. Safety Improvement Techniques in the Production Process, Identification and Elimination of Hazards in the Workplace

- 3.7.1. Identification of hazards in the workplace
- 3.7.2. Risk assessment and protection measures
- 3.7.3. Emergency Planning

3.8. Guidance for the Implementation of TPM in the Organization, Planning, Training and Implementation of Maintenance Systems

- 3.8.1. The 14 steps for TPM implementation
- 3.8.2. Implementation planning
- 3.8.3. TPM training and maintenance

3.9. Improved energy efficiency: How to optimize energy use and reduce costs through the implementation of TPM

- 3.9.1. Energy efficiency of equipment
- 3.9.2. Measuring consumption and efficiency
- 3.9.3. Identification and elimination of energy losses and improvement

3.10. Examples of TPM implementation

- 3.10.1. Example of application in the railway sector
- 3.10.2. Examples in the pharmaceutical sector
- 3.10.3. Example of application in the sector

“

Enjoy a wide variety of textual and multimedia learning formats and choose the ones that best suit your study circumstances”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma is aimed at university graduates, diploma holders and university graduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The Postgraduate Diploma can also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Lean Manufacturing.

“

If you are interested in increasing your skills in Production in Lean Manufacturing Systems in just 6 months, this is the program for you"

Average Age

Between **35** and **45** years old

Years of Experience

Training

Educational Profile

Geographical Distribution

Richard Morales

CEO of an industrial company

"For several years now, I have had a strong interest in the world of Lean Manufacturing, so I decided to take this program to improve my skills in this area. I especially highlight the quality of its contents, completely aligned with the needs of today's professional market".

08

Course Management

Thanks to the untiring commitment of this academic institution to provide the highest educational level to its programs, this program has a highly prestigious teaching staff. In this way, these professionals are specialists in areas such as Lean Management or project management, fields in which they currently perform their functions. Therefore, the knowledge that they will transfer to the students will be in tune with recent advances in these fields.

A black and white photograph showing three people from a different perspective, looking down at a screen. The image is partially obscured by a dark blue diagonal shape in the top right corner and a white diagonal shape in the bottom right corner.

“

This teaching staff is made up of experts with experience in the field of Lean Management to provide you with the most professionally applicable knowledge in this field"

Management

Mr. Jover Miravittles, Luis

- ♦ President and Founding Partner Grupo Quarck, S.L. Founding Partner
- ♦ Senior Partner in LOGIXS
- ♦ Vice President of €-Corp. S.L
- ♦ IQS Executive Education Director
- ♦ Associate Professor at IE Business School
- ♦ Coordinator of the Master's Degree in Integral Business Management at the Universidad Iberoamericana in Mexico City
- ♦ Advisor to the employers' association Cecot
- ♦ Chemical Engineer at the Chemical Institute of Sarria (IQS)
- ♦ Master in Business Administration MBA IESE
- ♦ Member of the Hispack organizing committee

Professors

Mr. Gustavo, Vitriago Pérez

- ♦ Project Manager in Euroports
- ♦ Software Implementation Consultant at Software Tecnic Tecnocim
- ♦ Senior Consultant at ACTIO Consulting Group
- ♦ Lean Six Sigma Consultant
- ♦ Senior Consultant in Business Performance Consulting
- ♦ Continuous Improvement Specialist & Auditor at Esteban Ikeda/JC
- ♦ Bachelor of Science in Naval Sciences Naval Administration and Logistics
- ♦ Master's Degree in Integral Logistics by Johnson Controls International
- ♦ Master in Automated Production and Robotics by the Polytechnic University of Catalunya
- ♦ Black Belt Certification Training - Six Sigma by Kanban University

Ms. Díaz Pizarro, Cristina

- ♦ Assistant Branch Manager, Banco Santander
- ♦ Double Degree in Business Administration and Tourism Management from the University of Extremadura
- ♦ University Degree in Neuromarketing from Ineaf Business School
- ♦ MIFID II Certification In Financial Advice by Santander Financial Institute
- ♦ Real Estate Credit Products Specialist by Santander Financial Institute

09

Impact on Your Career

TECH has developed this Postgraduate Diploma with the main intention of ensuring the professional growth of its students, multiplying their options to enjoy top-level jobs. Because of this, all the economic, personal and time effort that will be devoted to this program will be greatly rewarded.

“

TECH's goal is to work hard to help you achieve your professional goals"

**Are you ready to take the leap?
Excellent professional development awaits you.**

Production in Lean Manufacturing Systems The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

The high professional quality that you will acquire with this Postgraduate Certificate program will increase the possibilities of accessing a considerable salary increase.

A Postgraduate Diploma that will become the key that will open the door to a promising future in the area of criminal management through Corporate Compliance.

Time of Change

Type of change

Salary increase

This program represents a salary increase of more than **27%** for our students

10

Benefits for Your Company

The Postgraduate Diploma in Production in Lean Manufacturing Systems allows to increase the quality of companies through the training of first level professionals. In this educational environment, the student will be part of a network in which they will find potential suppliers, customers or business partners, thus broadening their business scope.

“

The professional highly trained in Lean Manufacturing is able to provide a competitive advantage in the field of production to companies in different sectors"

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Diploma in Production in Lean Manufacturing Systems guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Diploma in Production in Lean Manufacturing Systems** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Diploma in Production in Lean Manufacturing Systems**

Official N° of Hours: **450 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
