01
Welcome

In the area of medical management, the clinical management of health services, people and talent management in the organization, and economic and investment assessment stand out. All of these are fundamental aspects in the daily activity of health managers. Thanks to this program, the student will develop skills and knowledge in Medical and Health Services Management, under the guidance of professionals with extensive experience in the sector. In this way, the new challenges of the sector, such as the approach to complexity and chronicity, the relationships between professional groups, citizens and providers, the development of new health technologies, the need to increase efficiency in the use of resources, or to gain its position in the interdisciplinary team, will be the main challenges to be addressed.

Postgraduate Diploma in Medical Administration and Health Services Management.
TECH Technological University

An intensive program that will provide you with the keys to manage health services with a strategic perspective"

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

tech

" *TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"*

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+ executives trained each year

200+ different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03
Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01 A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02 Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03 Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04 Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05　Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06　Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07　Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08　Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04
Objectives

This program is designed to strengthen management and leadership skills, as well as to develop new skills and abilities that will be essential in your professional development. After the program, the student will be able to make global decisions with an innovative perspective and an international vision.

" *This program will generate a sense of confidence in the performance of medical and clinical unit management, and will help you grow professionally"*

Your goals are our goals.
We work together to help you achieve them.

The **Postgraduate Diploma in Medical and Health Services Management** trains students to:

01 Analyze the theories and models regarding the organization and functioning of Healthcare Systems, focusing on their political, social, legal, economic and organizational structure

02 Improve knowledge and professional skills in health management from the viewpoint of clinical management, knowing the practical methodological tools to apply in the critical areas of health management and direction, both institutional and day-to-day

03 Approach clinical management using the criteria of efficacy, efficiency, effectiveness, equity, performance and profitability and the solution of problems through the appropriate use of information systems

04 Describe the principles of clinical management that allow for planning, organization, management and evaluation of a center, service or care unit

05 Describe, compare and interpret characteristics and performance data of different health models and systems

06 Apply the essential concepts and methods of planning, organization and management of health institutions

08 Understand, interpret, transmit and apply regulatory norms for the activities and functions of health professionals regarding clinical management in accordance with the legal framework of the health sector

09 Recognize and know how to apply and interpret health law in order to contextualize clinical practice in terms of professional and social responsibility, as well as the ethical aspects associated with health care

07 Contextualize the care and medical division in the interdisciplinary team and learn about the new challenges of the health sector

10 Understand and know how to carry out an economic analysis of the functioning of health institutions and the economic behavior of the agents involved in health systems

11 Incorporate the fundamental concepts of the techniques and instruments of economic evaluation applied to management practices in healthcare systems

12 Analyze and apply techniques, styles and methods to define, conduct and lead professional-talent management policies in health institutions

13 Recognize, apply and know how to assess the usefulness in the clinical context of the different management tools that can be applied to the context of healthcare practice

14 Develop the ability to analyze different health benefits

05
Structure and Content

The structure of the curriculum has been designed by a team of professionals knowledgeable about the implications of medical training in health management; aware of the relevance of current specialization and committed to quality teaching through new educational technologies.

"

Health services are essential in society, so their proper management will be a benefit to all"

Syllabus

The Postgraduate Diploma in Medical and Health Services Management of TECH Technological University is an intensive program that prepares students to face business challenges and decisions globally.

Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Throughout 500 hours of study, the students will analyze a multitude of practical cases through individual work, which will be a beneficial contribution to their professional development. It is, therefore, an authentic immersion in real business situations.

This Postgraduate Diploma in Medical and Health Services Management deals in depth with all areas of healthcare organizations and entities, and is designed for managers to understand medical management from a strategic, international and innovative perspective.

A plan designed for study, focused on their professional development, which prepares them to achieve excellence in healthcare management. A program that understands their needs and those of their company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide them with the competencies to solve critical situations in a creative and efficient way.

This Postgraduate Diploma takes place over 6 months and is divided into 5 modules:

Module 1	The Medical and Healthcare Department in the Health System
Module 2	Clinical Management
Module 3	People and Talent Management
Module 4	Management and Economic Assessment
Module 5	Competency Management

Where, When and How is it Taught?

TECH offers the possibility of taking this program completely online. Throughout the 6 months of specialization, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Medical and Healthcare Division in the Healthcare System

1.1. Classic Medical Management vs. Healthcare Management
1.1.1. Structure and Content of Health System Governing Bodies. Current Organization Charts and Future Alternatives
1.1.2. Physicians as Managers: From Board Members to Care Directors and Managers, Including General Management

1.1.4. Medical Division: Critical Areas
1.1.5. Different Organizational Structures within the Medical Division

1.2. Management Information Systems and Electronic Medical Records
1.2.1. Control Panels
1.2.2. Electronic Medical Records
1.2.3. Assisted Prescription Systems
1.2.4. MBDS, ICD
1.2.5. Other Useful Information Systems in Health Management

1.3. Continuity of Care: Integration of Primary Care, Hospital Care and Social Healthcare
1.3.1. Healthcare Continuity in the Care Process. Integrated Healthcare Processes
1.3.2. Moving Towards a Public Healthcare Model

1.4. Bioethics and Humanization in Medical Practice
1.4.1. Bioethical Principles
1.4.2. Ethics Committees in Health Organizations
1.4.3. Humanization of Healthcare

1.5. Medical and Healthcare Management: Relations with the Nursing Division
1.5.1. Knowledge Management Tools for Clinical and Healthcare Management
1.5.2. Medical and Healthcare Management: Relations with the Nursing Division

1.6. Public Health, Promotion of Health and Health Education for Health Care Directorates
1.6.1. Public Health Concept and Scope
1.6.2. Promotion of Health and Heath Education
1.6.3. Prevention Programs Types

Module 2. Clinical Management

2.1. Regulation of Clinical Management
2.1.1. Different Definitions and Visions of Clinical Management
2.1.2. Different Decrees and Regulations on Clinical Management
2.1.3. Levels of Autonomy

2.2. Processes and Protocols in Clinical Management. Handling Scientific Evidence
2.2.1. Types and Classification of Scientific Evidence
2.2.2. Protocols, Clinical Practice Guidelines, Clinical Pathways: Differences
2.2.3. Grade and Healthcare Routes

2.3. Patient Classification Systems
2.3.1. Patient Classification Systems
2.3.2. Patient Dependency Analysis. Dependency Scales and Classification
2.3.3. Calculation of Staffing/Cash Flow Based on Patient Classification. Workload Distribution

2.4. Models and Clinical Management Units: Inter-hospital Units
2.4.1. Types of Clinical Management Units
2.4.2. Mixed Primary and Specialized Care Units
2.4.3. Interservice Units
2.4.4. Inter-hospital Units

2.5. Prudent Drug Prescription. Electronic Prescription
2.5.1. Prudent Prescribing: Choosing Wisely
2.5.2. "Non-action" Strategies

2.6. Prescription Complementary Tests
2.6.1. Prudent Prescribing vs. Defensive Medicine
2.6.2. Prescription Audits and Prescription Monitoring: Results

Module 3. People and Talent Management

3.1. Health Professionals. Types and Relations

3.1.1. Health Professions Management: Types of Professionals and Their Interactions
3.1.2. Training of Health Personnel with Special Emphasis on Physicians, Situation and Opportunities for Improvement

3.2. Rights and Responsibilities. Retributions

3.2.1. Worker's Statute. Rights and Responsibilities
3.2.2. Statutory and Civil Servant Personnel: Statutory Personnel Status. Disciplinary Regime. Incompatibilities
3.2.3. Remuneration of Civil Servants and Statutory Personnel
3.2.4. Labor Personnel in Public Administrations and Private Institutions
3.2.5. Trade Unions. Representation, Participation and Collective Bargaining. Personnel Boards and Works Councils

3.3. Working Hours in Units and Services

3.3.1. Working Hours: Personal Leave and Leaves of Absence for Statutory and Civil Servant Personnel
3.3.2. Collective Bargaining Agreements in the Health Sector
3.3.3. Shift Work and On-call System. Shift Planning Systems. Turnover. Continued Care
3.3.4. Staff Management Based on the Demand for Care

3.4. Employability Tools in the Private and Public Sector

3.4.1. Public Employment Offers. Types of offers. Merit Scales
3.4.2. Personnel Selection Systems in the Private Sector
3.4.3. Terminations or Dismissals, Motivation, Justification and Communication, thereof

3.5. Staff Evaluation and Talent Development. Social and Institutional Climate

3.5.1. Welcoming, Mentoring and Dismissal Plans
3.5.2. Talent Detection and Development
3.5.3. Institutional and Social Climate: Measurement and Improvement

3.6. Visibility in Clinical and Care Management: Blogs and Networks

3.6.1. The Digital Revolution in Healthcare Practice and Clinical Management. Description of New Digital Tools. How to Improve Visibility
3.6.2. Experiences with Networks and Blogs of Health Professionals

Module 4. Management and Economic Assessment

4.1. Cost Calculation

4.1.1. Weighting and Calculation of Health Costs
    4.1.1.1. Cost/Benefit
    4.1.1.2. Cost/Utility
    4.1.1.3. Cost/Productivity

4.2. Budget and Accounting

4.2.1. General Accounting Principles
4.2.2. What is a Budget? Types of Budgeting and Financial Management
4.2.3. Retrospective Budget of Income and Expenses
4.2.4. Prospective Public Budget by Chapters
4.2.5. Public Legislation on Budgets

4.3. Purchasing, Contracting and Supplies

4.3.1. Purchasing Management. Purchasing and Procurement Commissions
4.3.2. Integrated Procurement Systems. Centralized Purchasing
4.3.3. Management of Public Service Contracting: Tenders and Agreements
4.3.4. Hiring in the Private Sector
4.3.5. Supply Logistics

4.4. Efficiency and Sustainability of Health Systems

4.4.1. Financial Situation of the Public Health System, Sustainability Crisis
4.4.2. Spending for Health Benefits. Comparison of Investments for Further Health Benefits
4.4.3. Expenditure Control in the Public Health System

4.5. Funding Models

4.5.1. Financing Based on Historical Budget and Activity
4.5.2. Capitation Funding
4.5.3. Financing by DRGs and Processes, Payment per Procedure
4.5.4. Incentives for Professionals Based on Funding

4.6. Clinical and Economic Management Agreements and Contracts

4.6.1. Management Agreements. Definition and Models
4.6.2. Development and Assessment of a Management Agreement

Module 5. Competency Management

5.1. Performance Evaluation. Competency Management

5.1.1. Definition of Competencies
5.1.2. Performance Evaluation Procedure. Implementation
5.1.3. Feedback from Professions for Improving their Performance and Self-Assessment
5.1.4. Training Itinerary Design for Skills Development

5.2. Methods and Techniques

5.2.1. The Assessment Interview. Instructions for the Assessor
5.2.2. Main Common Errors and Impediments in Assessment
5.2.3. Motivational Interview
5.2.4. Miller's Pyramid

06
Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

> "Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07
Our Students' Profiles

The students of this TECH Postgraduate Diploma are professionals with extensive experience in the sector, who wish to improve their qualifications to access management positions in the healthcare field. Therefore, this program will be a great opportunity for their careers, allowing them to access positions that require higher qualifications and, at the same time, are better paid. Undoubtedly, this is the necessary step to give a boost at a professional level.
