01 Welcome

Project Management is a particularly critical area for companies, since the professional in charge of this task must plan and safeguard the successful execution of each step. In construction, the importance of this professional profile is greater, which is why TECH has developed this specific program that will train students to lead all types of projects, taking into account their management and the dimensions of their scope, complying with all the stages set by the main international entities recognized in this field. Thus, at the end of the program, the professional will be able to manage any construction project, thanks to this very complete curriculum developed by experts in the sector and with the seal of excellence that TECH stands for.

Postgraduate Diploma in Project Management in Construction Projects.
TECH Technological University

“

You will be able to perform Project Management tasks as an expert thanks to the keys that this program gives you, knowing how to successfully manage the schedule of a construction project, the management of purchases and the optimization of resources"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

executives trained each year

200+

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, volume + technology = a groundbreaking price. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to Harvard Business School case studies"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04

Objectives

This program is designed for the student to acquire the necessary knowledge to specialize as a project manager in the construction sector, developing new competencies and enhancing their skills for academic and professional growth, taking into consideration all the necessary aspects to manage the work efficiently and optimizing resources. Thus, after completing the program, the professional will be able to make decisions from a global perspective that includes conceptual, basic and detailed engineering, to the final testing of the installation, training of personnel and delivery of the final result to the client.

With TECH you will be able to specialize as a project manager, a position that requires ambitious, demanding and analytical profiles, with a global mindset and determined to achieve objectives"

Your objectives are those of TECH.

TECH works together to help you achieve them

The Postgraduate Diploma in Project Management in Construction Projects will train you to:

01

Acquire the ability to control the scope of a project

04

Obtain a detailed knowledge for the preparation of the schedule

02

Perform requirements management analysis

03

Being able to control and analyze the schedule

05

Perform an in-depth analysis of the recovery plan

06

Have a thorough knowledge of the subject matter and perform an analysis of the acceleration plan

08

Acquire a detailed knowledge of the importance of quality

09

Perform an analysis of possible non-conformities

07

Have the ability to manage project quality

10

Analyze the importance of controlling stakeholders

11

Gain an in-depth knowledge of integration management and control

14

Analyze the resources required and the steps for cost control

12

Be able to manage project purchases

13

Understand the importance of a good buying cycle

15

Be able to optimize resources and manage costs in a project

16

Master financial terms such as Cash Flow, Project Margin and Earned Value

17

Have a detailed knowledge of the S-curve and the ability to elaborate and analyze it.

18

Acquire in-depth financial knowledge on specific project parameters such as: VAN, TIR and PayBack

05

Structure and Content

This program comprises a curriculum structured around the requirements of the profession, from managing the scope and schedule of a project to managing communications and quality, purchasing, resources and costs. In this way, the project will be successful. Thus, through a complete tour through 4 modules with quality and up-to-date content, prepared by experts, the students will achieve the proposed objectives, obtaining a professional and personal growth that will allow them to carry out the indicated functions.

“

This is the most comprehensive curriculum on Project Management in Construction Projects currently offered in the educational market"

Syllabus

The Postgraduate Diploma in Project Management in Construction Projects of TECH Technological University is an intensive program that prepares the student to master all the aspects surrounding the correct management of construction projects. The content is designed to promote the development of managerial and administrative skills that allow for more rigorous decision making in uncertain environments, facing the business challenges that may arise.

The program deals in depth with the world of construction from the approach of project management, addressing all the points it contemplates, such as its scope and the control of resources and expenses. It is designed to provide business professionals with an in-depth understanding of the sector, guiding them towards decision-making and project leadership from a strategic, international and innovative perspective.

A plan designed for students, focused on their professional improvement, which prepares them to achieve excellence in the field of management and business administration in this sector. A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional faculty, which will provide you with the skills to efficiently manage today's construction projects.

This Postgraduate Diploma takes place over 6 months and is divided into 4 modules:

Module 1 Project Management in Projects: Scope and Schedule Management

Module 2 Project Management in Projects: Communications and Quality Management

Module 3 Project Management in Projects: Purchasing and Resources Management

Module 4 Project Management in Projects: Cost Management

Where, When and How is it Taught?

TECH offers the possibility of taking this program completely online. Throughout the 6 months of training, you will be able to access all the contents at any time, allowing you to self-manage your study time.

A unique, key and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Project Management in Projects: Scope and Schedule Management

1.1. Scope Control 1.1.1. Scope of the Project 1.1.2. Project Scope Baseline 1.1.3. The Importance of the Control Account	1.2. Requirements Management 1.2.1. Requirements Management 1.2.2. Categories 1.2.3. Management Process	1.3. Scope Management 1.3.1. Scope Management Planning 1.3.2. Gathering Requirements 1.3.3. Particularities of the Scope	1.4. Scope Study 1.4.1. Preparation of the WBS 1.4.2. Scope Validation 1.4.3. Scope Control
1.5. Schedule Control 1.5.1. Project Schedule 1.5.2. Schedule Baseline 1.5.3. Critical Path Analysis	1.6. Elaboration of the Schedule 1.6.1. Gantt Chart 1.6.2. Predecessor and Successor Activities 1.6.3. Restrictions between Activities	1.7. Schedule Management 1.7.1. Schedule Management Planning 1.7.2. Description of Activities 1.7.3. Sequencing of Activities	1.8. Study and Analysis of the Schedule 1.8.1. Estimated Duration of Activities 1.8.2. Schedule Development 1.8.3. Schedule Control
1.9. Construction Project Acceleration Plan 1.9.1. Acceleration Plan Analysis 1.9.2. Schedule 1.9.3. Resources	1.10. Construction Project Recuperation Plan 1.10.1. Recuperation Plan Analysis 1.10.2. Schedule 1.10.3. Resources		

Module 2. Project Management in Projects: Communications and Quality Management

2.1. Communications Control 2.1.1. Project Communications 2.1.2. Dimensions of Project Communication 2.1.3. Communication Skills	2.2. Project Communications 2.2.1. Meeting Communications 2.2.2. Channels of Project Communication 2.2.3. Formal Forms of Communication	2.3. Communications Management 2.3.1. Communications Management Planning 2.3.2. Project Communication Management 2.3.3. Control	2.4. Project Quality Control 2.4.1. Project Quality 2.4.2. Project Quality Costs 2.4.3. Importance of Quality
2.5. Project Quality Management 2.5.1. Quality Management Planning 2.5.2. Quality Management 2.5.3. Control	2.6. Quality: Project Non-Conformities 2.6.1. The Importance of NC 2.6.2. Customer Non-conformities 2.6.3. Contractor Non-conformities	2.7. Project Stakeholder Management 2.7.1. Stakeholder Expectation Management 2.7.2. Interpersonal and Team Skills 2.7.3. Conflict Management	2.8. Project Stakeholder Analysis 2.8.1. Identifying Stakeholders 2.8.2. Engagement Planning 2.8.3. Engagement Management and Monitoring
2.9. Project Integration Management 2.9.1. Development of the Project Charter 2.9.2. Development of the Project Management Plan 2.9.3. Direction and Management of Project Work	2.10. Project Integration Control 2.10.1. Project Knowledge Management 2.10.2. Work Control 2.10.3. Integrated Change Control and Project Closure		

Module 3. Project Management in Projects: Purchasing and Resources Management

3.1. Purchasing Control 3.1.1. Purchases in Project 3.1.2. The Buyer 3.1.3. The Supplier	3.2. Project Purchasing Cycle 3.2.1. Purchasing Cycle Analysis 3.2.2. Description of Stages 3.2.3. Study of Stages	3.3. Purchase Contract 3.3.1. Elements of the Contract 3.3.2. Contract Terminology in Contract 3.3.3. Control of Claims and Litigation	3.4. Project Purchasing Management 3.4.1. Types of Suppliers 3.4.2. Procurement Category 3.4.3. Types of Contracts
3.5. Project Purchasing Analysis 3.5.1. Purchasing Management Planning 3.5.2. Purchase Execution 3.5.3. Purchasing Control	3.6. Resource Control 3.6.1. Project Resources 3.6.2. Conflict Management Skills 3.6.3. Conflict Levels and Resolution	3.7. Management of Resources by Objectives 3.7.1. Management by Objectives (MBO) 3.7.2. Different Roles in Projects 3.7.3. Types of Leadership	3.8. Project Resource Management 3.8.1. Resources Management Planning 3.8.2. Estimation of Activity Resources 3.8.3. Obtaining the Necessary Resources
3.9. Project Resource Analysis 3.9.1. Resource Team Development 3.9.2. Team Management 3.9.3. Equipment Control	3.10. Analysis of the Resource Interview Process from the PM 3.10.1. Interview Process 3.10.2. Analysis by the Project Manager 3.10.3. Factors to Consider for a Successful Result		

Module 4. Project Management in Projects: Cost Management

4.1. Cost Control: Project Margin 4.1.1. Project Costs 4.1.2. Initial Margin Calculation 4.1.3. Financial Control	4.2. Cost Control: Cash Flow 4.2.1. Project Cash - Flow Analysis 4.2.2. Production 4.2.3. Factors	4.3. Estimation of Activity Costs 4.3.1. Cost Estimation Techniques 4.3.2. Factors in Favor and Against the Estimation of Activities 4.3.3. Aspects to be Taken into Account in Cost Estimates	4.4. Control and Management of Earned Project Value 4.4.1. Basics of Earned Value 4.4.2. Processes 4.4.3. Control and its Importance in the Project
4.5. Control and Management of Earned Project Term 4.5.1. Basics of Earned Term 4.5.2. Processes 4.5.3. Control and its Importance in the Project	4.6. Project Cost Management 4.6.1. Plan 4.6.2. Cost Estimates 4.6.3. Determination of the Budget	4.7. Project Cost Analysis 4.7.1. Cost Control 4.7.2. Production Control 4.7.3. Cost Analysis vs. Production	4.8. S-curve Management in the Project 4.8.1. Fundamentals of the S-curve 4.8.2. Processes for Management 4.8.3. Importance of the S-curve
4.9. Control and Elaboration of the S-curve in the Project 4.9.1. Production 4.9.2. Monitoring 4.9.3. Control and Deviations	4.10. Project Financial Study 4.10.1. NPV- Net Present Value 4.10.2. IRR-Internal Rate of Return on Project 4.10.3. Payback-Recovery Period		

06

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: Relearning.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the New England Journal of Medicine have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Business School we use the Harvard case method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world"

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This intensive program from TECH Technological University School of Business prepares students to face all the challenges in this area, both nationally and internationally. We are committed to promoting personal and professional growth, the best way to strive for success, that is why TECH uses Harvard case studies, with which we have a strategic agreement that allows us to provide our students with material from the best university the world.

“ You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best business cases used at Harvard Business School. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

07

Our Students' Profiles

This Postgraduate Diploma is aimed at business professionals seeking a higher specialization to become successful project managers in the field of construction projects. Students who understand the importance of continuing their studies during their working life, in order to achieve that higher education with which to reach their professional goals. In addition, thanks to its 100% online, format, students of different nationalities are involved.

“

Count on this TECH qualification and you will stand out from the competition. Acquire the attributes of a successful project manager”

José Antonio Madrigal

Associate Architect

"With this TECH program I have updated my knowledge of the sector from a business perspective, an aspect that I was looking for with a view to my future career as I have immersed myself in a project for which I needed to master this field. The structure of the syllabus is a success, it has fulfilled my expectations"

08

Course Management

The program's teaching staff includes leading international experts in the field of Construction Projects, who belong to the branches of engineering and business, with special dedication to Project Management. They have poured into this curriculum their knowledge and extensive experience in their professional careers, in addition to other experts of recognized prestige in related areas that complete the agenda of the Postgraduate Diploma in an interdisciplinary way, making it a unique academic experience for the student.

“

You will learn all about the S-Curve and acquire the skills to optimally develop and analyze it under the guidance of industry experts"

International Guest Director

With an extensive professional career of more than 20 years focused on project management and operational transformations, Pierre-Yvez Galopin is a prominent international expert in the field of Construction Engineering. He has spent most of his career in reference entities in countries such as France, Finland and Chile. In this way, he has held important positions as General Technical Director, where he has provided holistic advice to projects in the bidding, construction and operation phase on a global scale.

As such, he has worked directly in more than 40 operations, in addition to having negotiated more than 200 contracts in various sectors such as Heavy Industry, Mining, Oil and Gas. His work philosophy is based on achieving operational excellence, which has driven him to remain at the forefront of areas such as external cost maintenance, as well as the different phases of studies in construction. Thanks to this, it is considered a reference in the optimization of large investment projects through the disruptive methodology of Value Engineering.

In his constant effort to promote progress in the construction sector, he has developed multiple specialized articles on his findings and research. In fact, he is one of the people in charge of preparing press releases in the Communication Department of Boston Consulting Group. As such, he has contributed to increase the knowledge of citizens in aspects such as the applications of Artificial Intelligence in commercial activities, the management of Greenfield or Brownfield investment projects and even the most recent trends in construction materials. In this regard, he highly values networking networks and is an active participant on LinkedIn, where he takes the opportunity to make key connections, share industry knowledge and stay up-to-date on industry opportunities.

Dr. Galopin, Pierre-Yves

- ♦ Associate Director and Partner at Boston Consulting Group, Boston, United States
- ♦ Director of Development Projects at Sembcorp Industries, Santiago de Chile
- ♦ Co-Founder and Advisor at Tellus Chile
- ♦ Operations Manager at OSD Pipelines, Chile
- ♦ EPCM Engineer at Hatch, Chile
- ♦ Area Manager and Civil Engineer at Bouygues, Finland
- ♦ Civil Engineer at Degremont, Paris
- ♦ Management Consultant at Partners in Performance, Latin America

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

- Turnkey EPC Project Management Course
- Industrial Instrumentation Course

09

Impact on Your Career

TECH is aware that taking a program of these characteristics is a great economic, professional and, of course, personal investment. The ultimate goal of carrying out this great effort should be to achieve professional growth, so that the professional's job placement or promotion in this sector is in line with expectations. TECH is committed to this objective and achieves it through the design of competitive programs with the best experts in the sector.

“

Advance your career, become a
successful project manager and
broaden your professional horizon”

Are you ready to take the leap? Excellent professional development awaits you

The TECH Postgraduate Diploma in Project Management in Construction Projects is an intensive program that prepares students to face challenges and business decisions related to the management of construction designs. Therefore, its main objective is to promote the personal and professional growth of students, so that they can achieve success in this field of work.

A specific program for those seeking professional excellence.

Do not miss this opportunity offered by TECH and join the future of change in a sector in full expansion.

Thanks to this programme you will receive a large number of job offers with which you will be able to start your professional growth.

When the change occurs

Type of change

Salary increase

The completion of this program represents a salary increase of more than 25% for TECH students.

10

Benefits for Your Company

The Postgraduate Diploma in Project Management in Construction Projects contributes to raising the organization's talent to its maximum potential by promoting high-level leaders. In addition, this program is a unique opportunity to improve the situation of the companies in which they work, since they will be able to apply all these techniques and strategies to improve their results, obtaining greater benefits in the short and long term.

“

By taking this Postgraduate Diploma you will have the opportunity to strengthen your business ties with partners, customers or suppliers with whom to manage future projects"

Developing and retaining talent in companies is the best long-term investment.

01

Intellectual Capital and Talent Growth

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

Be able to make decisions in times of uncertainty and crisis, helping the organization to overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a current project or develop new projects in the field of R&D or Business Development within their company.

06

Increased competitiveness

This Postgraduate Diploma will equip the professionals with the skills to take on new challenges and thus drive the organization forward.

11

Certificate

The Postgraduate Diploma in Project Management in Construction Projects guarantees, addition to the most rigorous and updated training, access to a Postgraduate Diploma issued by TECH Technological University.

“

The construction sector requires efficient Project Managers. Don't hesitate, if you take this program, that will be you"

This Postgraduate Diploma in Project Management in Construction Projects contains the most complete and updated program on the market.

After the student has passed the evaluations, they will receive their corresponding Postgraduate Diploma issued by TECH Technological University by tracked delivery*.

The diploma issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Diploma in Project Management in Construction Projects

Official N° of Hours: 600 h.

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
