01 Welcome

In a world where work environments are diverse and embody different types of risks that compromise the health of workers, it is vital for there to be a figure that guarantees the well-being of these people, whether physical or psychological. This highly valuable position requires a very specific set of knowledge in multiple aspects such as risk assessment or types of risk agents. For this reason, TECH has developed a cutting-edge program that will allow the professional to specialize in this field in an excellent way, thus being able to access higher positions of responsibility in the field of occupational safety, which will surely provide a better economic retribution.

Postgraduate Diploma in Safety and Hygiene at Work.
TECH Technological University

“

This Postgraduate Diploma is the ideal tool for the manager or professional, as it will allow him/her to understand the occupational risks inherent to each position and how to prevent them"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Re-learning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School *case studies*. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to Harvard Business School case studies."

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies.

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This comprehensive educational program is specially designed to train professionals in the techniques to manage successful occupational risk planning, implementing in-company measures to ensure health and safety as a means to maximize well-being within organizations of all sizes and sectors. In this way, the professional will acquire specific work and planning management skills that will enable him/her to become an expert in the field. All this, accompanied by the best teaching material and the best teachers in the sector.

“

Enroll now in this Postgraduate Diploma and do not miss the job opportunity you have been waiting for to improve professionally in the field of occupational hazards"

TECH makes the objectives of its students its own.
They work together to achieve them.

The Postgraduate Diploma in Safety and Hygiene at Work will train the student to:

01

Approach to the concept of occupational accident

02

Accident analysis: before and after

03

Perform risk evaluations

04

Identify all types of specific techniques for specific hazards

05

Identify the types of Protective Equipment

06

Approach to the concept of hygiene at work

08

Identify the scientific bases of the new labor landscape

09

Learn more about prevention techniques against SARS-COV-2

07

Identify the type of agents that can cause hazards and accidents

10

Develop an action protocol to prevent contagion

05

Structure and Content

This course has a concise and straightforward structure and content, focused on the student's improvement through excellent theoretical and practical knowledge of occupational health and safety. The teaching staff in charge of writing the entire syllabus has extensive professional experience in the subject and shares, throughout the 3 modules that make up the program, all their advice to help students reach their professional zenith.

“

What you study is very important. The abilities and skills you acquire are fundamental. You won't find a more complete syllabus than this one. Trust TECH's endorsement"

Syllabus

This program focuses on the main current market needs in occupational safety and hygiene at work, so the student is precisely acquiring the knowledge that will better boost his or her professional career.

Throughout the 450 hours planned in this degree, the professors exemplify a multitude of real and practical cases of occupational risk in which the student will verify, in situ, how to apply in an authentic way all the theoretical contents learned. It is therefore a complete contextual course that the student will be able to start using even before completing the program.

With high quality didactic material, written following the most innovative educational

methodologies, and a teaching staff that will not hesitate to help students with any question, this is the best possible opportunity to become a professional and improve your career in the field of occupational health and safety.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1

Safety At Work

Module 2

Industrial Hygiene

Module 3

New Landscape in Relation to Occupational Hazard Prevention and How to Deal With it

Where, when, and how it is taught

TECH offers the possibility of taking this program completely online. Throughout the 6 months of training, the student will be able to access all the contents of this program at any time, allowing them to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Safety At Work

1.1. The Occupational Accident

- 1.1.1. Introduction
- 1.1.2. Definition From Several Points of View: Safety, Medicine and Legality
- 1.1.3. Occupational Safety: Scientific Safety and Integrated Safety
- 1.1.4. Causes of Accidents. The Human Factor and its Impact

1.2. Statistical Analysis of Accidents

- 1.2.1. Introduction
- 1.2.2. Classification of Accidents: Factors and Systems
- 1.2.3. Statistical Indexes
- 1.2.4. Graphic Representation. Evolution of the Accident Rate in Spain

1.3. Safety Techniques

- 1.3.1. Introduction
- 1.3.2. Concept and Definition of Safety Techniques
- 1.3.3. Classification of Safety Techniques
- 1.3.4. Analytical and Operative Techniques

1.4. Risk Assessment

- 1.4.1. Introduction
- 1.4.2. Definition of Risk Evaluation and Its Objective
- 1.4.3. Stages of Risk Evaluation
- 1.4.4. Types of Risk Evaluation. Their Obligatory Nature

1.5. Analytical Techniques After the Accident. Investigating Accidents

- 1.5.1. Notifying Accidents
- 1.5.2. Recording Accidents
- 1.5.3. Investigating Accidents

1.6. Analytical Techniques Prior to the Accident. Safety Inspections

- 1.6.1. Safety Inspection
- 1.6.2. Work Analysis
- 1.6.3. Statistical Analysis

1.7. Standardization

- 1.7.1. Safety Rules. Advantages of Normalization
- 1.7.2. Requirements and Characteristics of the Rules
- 1.7.3. Producing and Implementing Rules
- 1.7.4. Classification of the Rules

1.8. Order and Cleanliness in the Workplace

- 1.8.1. Introduction
- 1.8.2. Safety Signage
- 1.8.3. Panel Signage
- 1.8.4. The Color of Industry

1.9. Individual Protection

- 1.9.1. Introduction
- 1.9.2. Concept of PPE. Conditions, Characteristics and Selection
- 1.9.3. PPE Classification
- 1.9.4. CE Conformity Marking. Use and Conservation

1.10. Risks At Work

- 1.10.1. Introduction
- 1.10.2. Classification of Risks at Work
- 1.10.3. Safety Techniques Applied to Machines

Module 2. Industrial Hygiene**2.1. Introduction to Hygiene at Work**

- 2.1.1. Introduction and Main Concepts
- 2.1.2. Environmental Factors
- 2.1.3. Types of Contaminants and Routes of Entry Into the Organism
- 2.1.4. Effects of the Contaminants

2.2. Theoretical Hygiene. Assessing the Hygienic Risk

- 2.2.1. Introduction
- 2.2.2. Criteria for Evaluating the Hygienic Risk
- 2.2.3. Regulations
- 2.2.4. Dermal Exposure to Chemical Contaminants

2.3. Evaluating and Monitoring Hygienic Risk

- 2.3.1. Introduction
- 2.3.2. Scope of the Hygienic Risk. Field Hygiene and Operational Hygiene
- 2.3.3. Types of Preventive Control Measures

2.4. Types of Agents

- 2.4.1. Introduction
- 2.4.2. Agent Classification
- 2.4.3. Protection Against Agents

2.5. Individual Protection Against Hygienic Risks

- 2.5.1. Introduction
- 2.5.2. Respiratory Protection Equipment
- 2.5.3. Hearing Protection Equipment
- 2.5.4. Eye and Face Protection Equipment

2.6. Risks and Severe Accidents

- 2.6.1. Introduction
- 2.6.2. Metallurgical Industry
- 2.6.3. Chemical Industry
- 2.6.4. Severe Accidents

2.7. Vibrations

- 2.7.1. Introduction
- 2.7.2. Effects of Vibrations
- 2.7.3. Risk Evaluation
- 2.7.4. Exposure Control

2.8. Non-Ionizing Radiation

- 2.8.1. Introduction
- 2.8.2. Magnitudes and Units of Measurement
- 2.8.3. Effects of Non-Ionizing Radiation

2.9. Ionizing Radiation

- 2.9.1. Introduction
- 2.9.2. Nature of Ionizing Radiation
- 2.9.3. Effects of Ionizing Radiation
- 2.9.4. Preventive Measures

2.10. Thermohygrometric Environment

- 2.10.1. Introduction
- 2.10.2. Thermal Environment and Organism
- 2.10.3. Evaluating Heat Exposure
- 2.10.4. Thermal Comfort and Exposure to the Cold

Module 3. New Landscape in Relation to Occupational Hazard Prevention and How to Deal With it

3.1. 2020 Health Situation

- 3.1.1. Introduction
- 3.1.2. COVID-19 Health Crisis
- 3.1.3. Government Communications

3.2. COVID-19. Evolution and Data

- 3.2.1. Introduction
- 3.2.2. COVID-19 Pandemic Declaration
- 3.2.3. Evolution and Data on the Pandemic

3.3. Epidemiological Analysis of COVID-19

- 3.3.1. Introduction
- 3.3.2. Previous Reports
- 3.3.3. Situation of the Health Department
- 3.3.4. Demographic, Clinical and Epidemiological Characteristics

3.4. New Normality: Applying Risk Prevention

- 3.4.1. Introduction
- 3.4.2. New Normality. How COVID-19 Has Impacted Our Lives
- 3.4.3. PPEs Used Against COVID-19

3.5. Early Response Plan in a Pandemic Control Scenario

- 3.5.1. Medical history
- 3.5.2. Justification of the Early Response Plan
- 3.5.3. Legislative Framework
- 3.5.4. Early Response Plans

3.6. Early Detection, Surveillance and Controlling of COVID-19

- 3.6.1. Introduction
- 3.6.2. Case Detection
- 3.6.3. Case Notification
- 3.6.4. Interpreting Serological Tests

3.7. Guidelines for the Prevention and Control of COVID-19 in Different Vulnerable Industries or Sectors

- 3.7.1. Introduction
- 3.7.2. Transport and Mobility
- 3.7.3. Training and Information on Preventive Measures
- 3.7.4. Collaborating With Health Inspectors

3.8. R5adar COVID App

- 3.8.1. Introduction
- 3.8.2. Description and Operation of the Application
- 3.8.3. Contact Identification
- 3.8.4. Evaluation and Communication

3.9. Clinical Management of COVID in ICUs

- 3.9.1. Introduction
- 3.9.2. Procedure
- 3.9.3. Prevention of Complications in Critically Ill Patients
- 3.9.4. Following and Monitoring the Clinical Response

3.10. Education Sector: One of the Most Vulnerable

- 3.10.1. Introduction
- 3.10.2. Prevention, Hygiene and Health Promotion Measures Against COVID-19 in Educational Centers
- 3.10.3. Guidelines for Action When Cases of Infection Appear

06

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning.***

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have ***considered it to be one of the most effective.***

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Business School we use the Harvard case method.

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world”

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This intensive program of the School of Business of TECH Technological University prepares students to face all the challenges in this area, both nationally and internationally. We are committed to promoting personal and professional growth, the best way to walk towards success, so TECH uses case studies from Harvard, with which we have a strategic agreement that allows us to bring our students the materials of the best university in the world.

“ *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Re-learning Methodology

Our University is the first in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Re-learning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Re-learning.

Our business school is the only one in Spanish-speaking countries licensed to incorporate this successful method. In 2019 we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best Spanish online university indicators.

In our program learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success. In fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

Based on the latest evidence in neuroscience, not only do we know how to organize information, ideas, images, memories, but we also know that the place and context where we have learned something is crucial for us to be able to remember it and store it in the hippocampus, and retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents, international guidelines... in TECH's virtual library, the student will have access to everything they need to complete their training.

Case Studies

They will complete a selection of the best business cases used at Harvard Business School. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents in an attractive and dynamic way in multimedia packages that include audio, videos, images, diagrams and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Re-Testing

The student's knowledge is periodically assessed and re-assessed throughout the program, through evaluative and self-evaluative activities and exercises: in this way, students can check how they are doing in terms of achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma in Safety and Hygiene at Work is a program aimed at legal and management professionals who want to update their knowledge, discover new ways to ensure occupational health and safety, minimizing the risks inherent to each type of job. All this taking into account the importance of preserving the safety and health of the company's employees. Thus, after the training, the professional will be able to position themselves as a manager, auditor or trainer in the field of Occupational Hazard Prevention.

“

Whether you have your own company or you want to become an expert in this sector, the program proposed by TECH will be your main asset to achieve your professional goals”

This program represents a salary increase of more than **25%** for our students.

10

Benefits for Your Company

The Postgraduate Diploma in Safety and Hygiene at Work helps raise the organization's talent to its maximum potential by training high-level leaders.

Participating in this program is a unique opportunity to access a powerful network of contacts in which to find future professional partners, customers or suppliers. In addition, thanks to this training, your company will be up to date in the prevention of occupational hazards, avoiding possible fines and compensation for accidents at work.

“

Gain a global vision of occupational hazards and bring more innovative strategies to the companies you work with”

Developing and retaining talent in companies is the best long-term investment.

01

Intellectual Capital and Talent Growth

You will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the manager and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, in turn helping the organization overcome obstacles

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main providers of Occupational Hazard Prevention.

05

Project Development

You will be able to work on a real project or develop new projects in the R&D or Business Development area of your company.

06

Increased competitiveness

This program will equip our students with the skills to take on new challenges and drive the organization forward

11 Certificate
