

Executive Master's DegreeDeFi and Passive Income

» Modality: online

» Duration: 12 months

» Certificate: TECH Technological University

» Dedication: 16h/week

» Schedule: at your own pace

» Exams: online

» Aimed at: University graduates who have previously completed any of the qualifications in the field of Computer Science, Economics, Finance, Technology, Innovation or *Blockchain* Research

01 **Welcome**

Decentralized Finance (DeFi) and Passive Income have become increasingly important in both the financial and economic spheres. The main reason is that they offer the opportunity to carry out transactions and access services without the need for traditional intermediaries, such as banks. In addition, these operations have a high level of security, which prevents data manipulation. Users therefore enjoy a greater degree of autonomy and control over their assets. In this context, this university program will enable entrepreneurs to face challenges and take advantage of the possibilities offered by the DeFi sector. To this end, the syllabus will provide them with the skills and competencies to generate passive income in an intelligent way.

tech 08 | Why Study at TECH?

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95%

of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

+200

executives prepared each year

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

A

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

Why Study at TECH? | 09 tech

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

tech 12 | Why Our Program?

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

tech 16 | Objectives

TECH makes the goals of their students their own goals too Working together to achieve them

The Executive Master's Degree in DeFi and Passive Income will enable the students to:

Understand advanced strategies in DeFi and Passive Income in the cryptocurrency and blockchain ecosystem

Assimilate the fundamental concepts of cryptocurrency lending, including the process, types of loans, and interest rates

Identify the advantages of DeFi, including global access and transparency, and analyzing challenges, such as security and regulation

Investigate case studies of hacks and losses of funds related to digital wallets, to learn from common mistakes

Know the essential strategies and tools used in yield farming, in order to maximize returns on cryptocurrency investments

Understand the legal or regulatory implications of DEX and its relationship with financial and supervisory authorities

Encourage proper risk management in DeFi and promote security practices for asset protection

Analyze how DeFi is redefining financial transactions, economic inclusion and traditional intermediation

Evaluating and selecting suitable assets for tokenization

Assess the risks, challenges and opportunities in the cryptographic space, considering legal, ethical and sustainable aspects

Maximize passive income through effective implementation of DeFi strategies

Apply the latest trends in yield farming and participation in DAOs

Master the variety of digital wallets, executing rigorous security practices

Master the most popular lending and stakingplatforms, using them efficiently

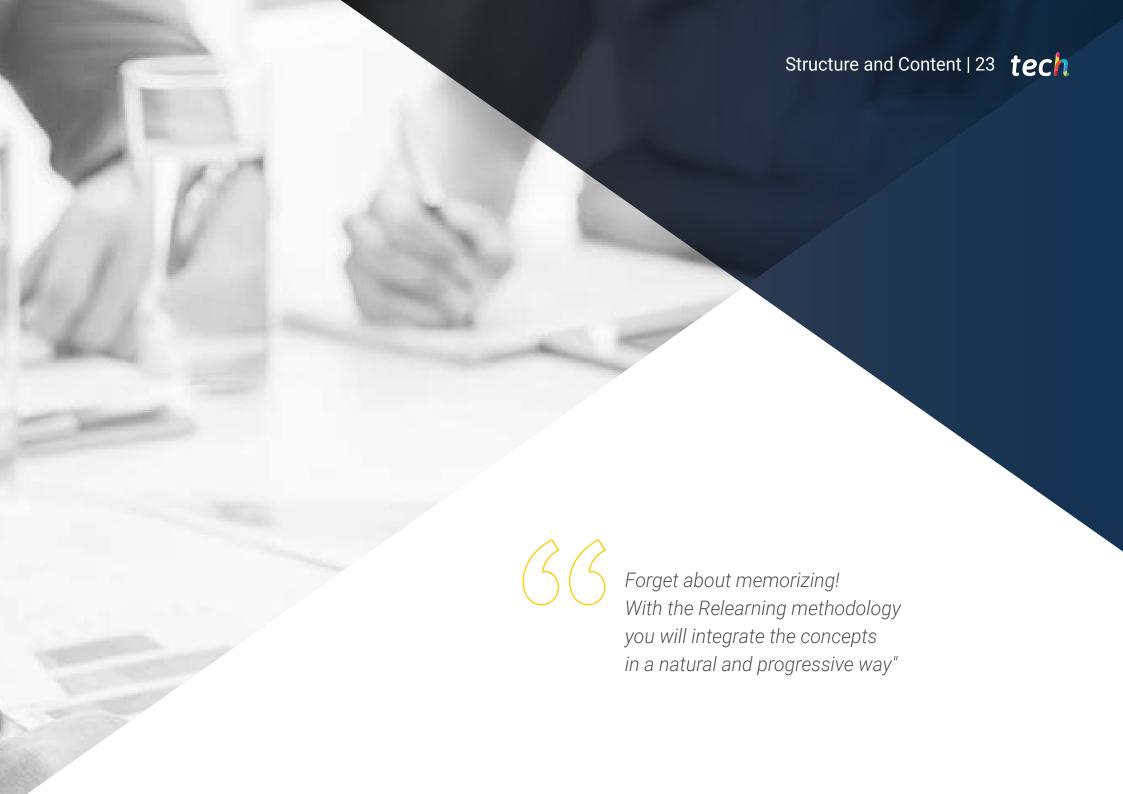

Use the most commonly used DEX protocols, such as Uniswap, SushiSwap and PancakeSwap

Preparing your own investment strategy and adapting to changing trends in the DeFi space

tech 24 | Structure and Content

Syllabus

The Executive Master's Degree in DeFi and Passive Income is an intensive program that will provide the entrepreneurs with a deep understanding of decentralized financial technology and how to leverage it to generate passive income in the world of digital finance. Structured in 10 modules, the syllabus will address essential aspects in order to implement the best strategies to invest in cryptocurrencies safely.

Through 1,500 hours of training, students will be prepared to face real-world challenges in the field of DeFi and Passive Income. Backed by the best faculty, graduates will evaluate the risks associated with these activities and make investment decisions from a holistic approach.

This syllabus will thoroughly analyze the most effective tactics in decentralized finance, ranging from *staking and yield farming* strategies to yield optimization. Professionals will thus understand the advantages of DeFi, including its global access and transparency.

This is an academic pathway aimed at achieving the highest level of excellence in the financial landscape. In this way, they will delve into a new way of understanding the economy, while making the most of the business opportunities that arise around the *crypto*world.

This Executive Master's Degree takes place over 12 months andis divided into 10 modules:

Module 1	Advanced DeFi and Passive Income Strategies
Module 2	DeFi, Wallets and Security
Module 3	Lending and Staking applied to DeFi
Module 4	Yield Farming applied to DeFi
Module 5	Liquidity and Decentralized Markets (DEX)
Module 6	Tokenization of assets applied to DeFi and Passive Income
Module 7	Passive Investment Strategies
Module 8	NFTs and DeFi
Module 9	Cryptographic Derivatives Strategies and Advanced Trading
Module 10	Integration of DeFi into traditional investment strategies

Where, When and How is it Taught?

TECH offers the possibility of developing this Executive Master's Degree in DeFi and Passive Income completely online. Throughout the 12 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

tech 26 | Structure and Content

Mod	dule 1. Advanced DeFi and Passive Incor	me Str	ategies				
1.1. 1.1.1. 1.1.2. 1.1.3.	Staking and Yield Farming Strategies Yield Optimization in Liquidity Pools	1.2. 1.2.1. 1.2.2. 1.2.3.	Risk management in DeFi Risk assessment in DeFi protocols Portfolio diversification and loss mitigation Security tools and practices in DeFi	1.3. 1.3.1. 1.3.2. 1.3.3.	Financing and lending in DeFi Lending and collateralization platforms Leverage strategies at DeFi Debt management and automatic payments		Arbitrage strategies Identification of arbitrage opportunities in DeFi Tools and strategies for executing successful arbitrations Risks associated with DeFi arbitration
1.5. 1.5.1. 1.5.2. 1.5.3.	Participation in DAOs for passive income	1.6. 1.6.1. 1.6.2. 1.6.3.	Taxation in the DeFi world Tax implications of DeFi transactions Compliance and reporting of cryptocurrency revenues Legal and tax advice on DeFi	1.7. 1.7.1. 1.7.2. 1.7.3.	Exit and withdrawal strategies Exit planning of DeFi investments Strategies to secure gains and minimize losses Safe and efficient withdrawal of assets	1.8. 1.8.1. 1.8.2. 1.8.3.	Passive Income Success Stories Case studies of projects that have achieved significant Passive Income Lessons learned from successful strategies Case studies of successful Staking and Yield Farming Strategies
1.9.1 1.9.2 1.9.3	Creation of a diversified and sustainable portfolio	1.10.1 1.10.2	Integration of DeFi into traditional investment strategies Incorporation of DeFi into a traditional investment portfolio Diversification strategies that include digital assets Importance of long term planning in DeFi				

Mod	dule 2. DeFi, Wallets and Security					
2.1.2.1.1.2.1.2.2.1.3.	Implementation of multi-signature wallets in transactions	 2.2. Wallet management in mobile d 2.2.1. Mobile wallets 2.2.2. Wallet applications on iOS and Android devices 2.2.3. Security and best practices in the use of mobile wallets 	2.3.1. 2.3.2. 2.3.3.	of digital wallets Creating a wallet Private key management	2.4.1. 2.4.2.	cryptocurrencies
2.5. 2.5.1. 2.5.2. 2.5.3.	Secure passwords and password management practices	 2.6. Hacking and loss of funds case studies 2.6.1. Examples of famous hacks 2.6.2. Common causes of loss of funds 2.6.3. Lessons learned from past incidents 	2.7. 2.7.1. 2.7.2. 2.7.3.	Lost wallet recovery procedures	2.8. 2.8.1. 2.8.2. 2.8.3.	
2.9.1. 2.9.2. 2.9.3.	Importance of keeping private keys secure	2.10. Advanced security strategies 2.10.1. Cold storage and hardware wallets 2.10.2. Segregated Witness (SegWit) and its impact on security 2.10.3. Smart contracts and security in cryptocurrency wallets	\$

Module 10. Integration of DeFi into traditional investment strategies							
 10.1. Successful case studies with DeFi development and passive income 10.1.1. Bitcoin: The pioneering digital currency 10.1.2. Ethereum and smart contracts 10.1.3. Factors behind the success of these cryptocurrencies 	 10.2. Supply chain transformation with blockchain and DeFi 10.2.1. Product tracking success stories 10.2.2. Blockchain management in logistics 10.2.3. Impact on efficiency and transparency 	 10.3. Financial innovation with cryptocurrencies, DeFi and passive income 10.3.1. Cryptocurrencies and the banking sector 10.3.2. DeFi and access to financial services 10.3.3. Notable cases of financial innovation 	 10.4. Blockchain in the healthcare industry applied to DeFi 10.4.1. Electronic medical records in <i>blockchain</i> 10.4.2. Tracking of drugs and medical devices 10.4.3. Improved security and privacy of healthcare data 				
10.5. Success of cryptocurrency and DeFi companies	10.6. Blockchain in the public sector applied to DeFi	10.7. Innovation in education with blockchain and DeFi	10.8. Tokenization of real assets on DeFi platforms				
10.5.1. Cases of cryptocurrency exchanges 10.5.2. Digital wallets and their role in adoption 10.5.3. Marketing and growth strategies	10.6.1. Implementation of <i>blockchain</i> in governments 10.6.2. Successful cases of public administration 10.6.3. Benefits and challenges in government adoption	10.7.1. Blockchainbased learning platforms10.7.2. Certifications and degree verification10.7.3. Outstanding cases of blockchain based education	10.8.1. Tokenization of real assets 10.8.2. Tokenized financial assets 10.8.3. Advantages and challenges in the tokenization of real assets				
10.9. Cryptocurrencies and micropayments with passive income	10.10. Emerging and future use cases in DeFi						
10.9.1. Use of cryptocurrencies in micropayments 10.9.2. Applications in digital content and games 10.9.3. Impact on the digital economy	 10.10.1. Exploration of emerging projects and technologies 10.10.2. Trends and predictions for the future of cryptocurrencies and <i>blockchain</i> 10.10.3. Challenges and opportunities in the evolving field 						

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

tech 38 | Methodology

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

tech 40 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 41 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 42 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

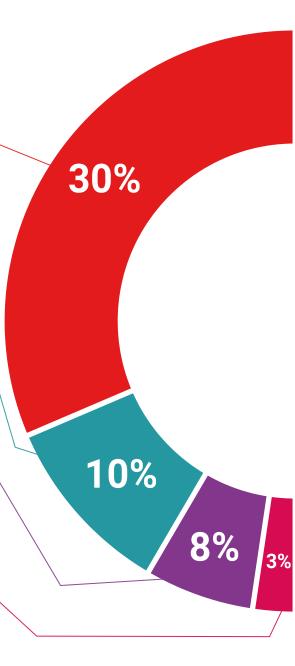

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

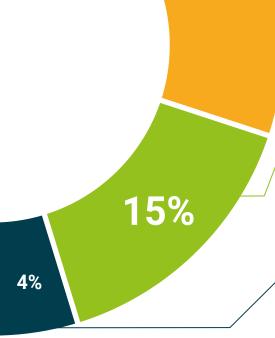

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

 \bigcirc

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
