# Index

# 01 **Welcome**

The various changes in the audiovisual industry have occurred at an accelerated pace, feeding off social, economic and cultural movements around the world. For this reason, audiovisual production has become an art that helps to create a product for different media and other sectors. On the other hand, the impact of technology in this sector is undeniable, making it possible to adapt to the new demands of modern generations. Consequently, it is necessary to have professionals who are capable of successfully managing a production and post-production team and have the skills to successfully face the reality of journalism in different areas. This and other fundamentals can be accurately appreciated in the program designed for Audiovisual Business Management.

*Know the working environment of the production team: technological means, technical routines and human resources"*

# 02 Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

Why Study at TECH? | 07 tech

GG

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

# tech 08 | Why Study at TECH?

# At TECH Technological University

# Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

# The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

# of TECH students successfully complete their studies

# Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

executives trained each year

different nationalities

# Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

# Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

# **Multicultural Context**

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

# Why Study at TECH? | 09 tech

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

# Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

# Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

# **Academic Excellence**

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

# **Economy of Scale**

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

# 03 Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

66

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

# tech 12 | Why Our Program?

This program will provide students with a multitude of professional and personal advantages, particularly the following:

# A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

# Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

# Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

# Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

# Why Our Program? | 13 tech

# Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

> You will find a network of contacts that will be instrumental for professional development.

# Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

# Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

## Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

# 04 **Objectives**

Academic excellence and the development of students' professional skills is fundamental for TECH, for this reason, with the MBA in Audiovisual Business Management program, the future graduate will acquire the necessary knowledge to understand the needs and advantages of teamwork in multi-camera audiovisual projects, being able to move television programs from the set to the screen. After completing the program, the student will be able to acquire the capacity for theoretical and critical analysis of the organizational structures of audiovisual communication.

Study the processes of creation, realization and post-production of audiovisual works and manage the management of a work team in an audiovisual company"

# tech 16 | Objectives

Your goals are our goals. We work together to help you achieve them. The MBA in Audiovisual Business Management will enable the student:

Have the transversal and specific competencies necessary to successfully face the reality of cultural journalism in different fields

Know and develop the essential guidelines for documentation in cultural journalism

In-depth knowledge of digital communication and cultural journalism

Know how to identify, create and develop stories with the different points that encompass it, marked by rigor and personal branding

Know the creative path of the idea, from the script to the product on screen

# Objectives | 17 tech

# Learning the basics of staging elements

Know the basis of the functioning of the audiovisual system (to fix fundamental contents, to know the authors/texts worked on in each topic)

Acquire the capacity for theoretical and critical analysis of the organizational structures of audiovisual communication (understanding the main ideas, relating concepts and elements)

Be able to analyze and foresee the necessary means from a sequence

Study in depth the historical, economic-political, social and technological framework in which audiovisual products are produced, distributed and consumed

# tech 18 | Objectives

11

Identify the theoretical concepts that define the production processes of audiovisual works

Relate cinema to other pictorial arts such as photography and painting

Knowledge of the legal framework and legislation governing the audiovisual production sector and its repercussions on the different production formats

Ability and skill in film directing/filmmaking according to a schedule, script and shooting plan

Analyze and design innovative strategies that contribute to the improvement of management and decision-making processes, as well as to the development of information products in line with the needs of audiences and advertisers

# Objectives | 19 tech

Knowledge of executive production strategies in the development and subsequent distribution of audiovisual projects

Know the modifications and hybridizations that occur in television genres in the context of contemporary television

Recognize the different formats in the context of the current television landscape

Identify the marketing design of an audiovisual production through its impact on the different contemporary audiovisual media

Identify the keys to a format, its structure, operation and impact factors

# 05 **Skills**

At the end of the MBA in Audiovisual Business Management program, the professional will have developed a series of competencies that will allow him or her to perform optimally in his or her job, being able to continue on his or her career path. Consequently, you will understand the global management of a communication project in each and every one of its phases, being able to make the right decisions in the face of any eventuality and maintaining objective thinking at all times.

5 This program will become an open door to new professional opportunities. Don't miss this opportunity"

# Describe what cultural journalism is

Know the composition of the audiovisual production teams

Know how to move efficiently through the 3.0 network

Using social networks in a journalistic environment

Organize a staging

Planning narrative actions adjusted to the available means

# Using the multi-camera system

Know and apply the organizational structures of audiovisual communication

07

Mastering the different phases of the audiovisual project

Know how to adapt to the consumption patterns of the moment

# tech 24 | Skills

Know the relational code of the different agents of audiovisual communication

Knowledge of the legal framework

# Have a contextual view

Describe the historical evolution of audiovisual production

Create products adjusted to available financing

# Distribute the budget in different items

# Organize the different human teams

Planning the amortization of audiovisual products

17

Know the distribution channels

Produce an audiovisual product in different media

# 06 Structure and Content

The management of an audiovisual company requires a profile of excellence. For that reason, TECH has developed a program that focuses on ensuring compliance with the labor requirements that today's world demands. Through a 100% online modality, the professional will have the opportunity to identify the differences between the different ways of approaching the study of audiovisual reception and the current state of the art. In this way, you will be able to take 12 months of learning in a unique and stimulating way, following practical examples and the guidance of a specialist faculty in this area.

GG II

Interpret, analyze and comment on a television format from a professional, aesthetic and cultural perspective"

# tech 28 | Structure and Content

# Syllabus

The various changes that have developed in the audiovisual industry have been enhanced by different factors, such as the industrial revolution, social changes and, of course, the advance of technology. Thus, it has become essential to have professionals who have a thorough understanding of a range of knowledge in these different areas.

The MBA in Audiovisual Business Management program ensures that students fully understand the tools they need to organize and manage the processes of the different departments involved in an audiovisual production. For this reason, the syllabus will begin with a review of the concepts of industry and culture, as well as the technique focused on the realization of projects from a theoretical and practical point of view.

In this way, everything you will learn will be converted into real working skills that will allow you to boost your capacity intensively. In this way, the future graduate will understand the structure of the audiovisual system and the way in which the production of this type of content contemplates its financing and its investment valuation in terms of costs and benefits. Throughout 1,500 hours of learning, the student will analyze a multitude of case studies through individual and teamwork. Thus, they will be able to know the bases that determine the direction of actors in fiction and the creation of narrative discourse.

Students will also be motivated to learn in depth about the new genres and formats that are being used in TV. Know how to make use of information through social networks and develop a communication plan. In this way, a program focused on the current demands of this sector is created that will prepare graduates to face the challenges of managing a department in this field.

This program takes place over 12 months and is divided into 10 modules:

Module 1	Cultural Journalism
Module 2	Theory and Technique of Production
Module 3	Structure of the Audiovisual System
Module 4	Audiovisual Production
Module 5	Fiction Production and Acting Direction
Module 6	Cultural Industries and New Communication Business Models
Module 7	Management and Promotion of Audiovisual Products
Module 8	Television Genres, Formats and Programming
Module 9	Audiovisual Audiences
Module 10	Television Scriptwriting: Programs and Fiction

# Structure and Content | 29 tech

# Where, When and How is it Taught?

TECH offers the possibility of taking this program completely online. During the 12 months of training, the student will be able to access all the contents of this program at any time, which will allow him/her to self-manage his/her study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

# 07 **Methodology**

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.** 

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

## tech 38 | Methodology

### TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

666 At TECH, you will experience a learning methodology that is shaking the foundation methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

# Methodology | 39 tech

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

# tech 40 | Methodology

### **Relearning Methodology**

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

## Methodology | 41 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

> Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

## tech 42 | Methodology

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.
