02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

Nowadays, it is essential to have an official qualification that accredits and recognizes our competence in a given language. In fact, many schools, universities and companies that **only** accept candidates who certify their level by means of an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

The ability to communicate effectively in another language and accredit it with an official CEFR qualification is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

tech 10 | Is it Important to Obtain a Language Certification?

TECH Technological University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

Learn English and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate gives you a certificate for life.

“

Contains the most comprehensive and complete syllabus on the market: the 44 specific topics required by the CEFR for A1”

03

What Is Level A1?

One of the purposes of the CEFR is to help users describe the levels of language proficiency required by existing examinations and assessment programs in order to facilitate comparisons between different certification systems. Therefore, these levels are a universal scale used to unify and clarify the different language level evaluation systems.

A person with long dark hair, wearing a colorful plaid shirt, is holding a white circular sign with the text 'A1' in red. The sign is positioned in the center-left of the frame. In the background, there are several thin, light blue wavy lines that sweep across the top and right side of the image. The overall background is white.

Our objective is to strengthen your skills in a changing, real and multicultural context and thus guarantee your success in passing the test. To this end, we emulate the test using mock tests throughout the course.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

This TECH Language Course encouraged me to give it a try and I am amazed at the involvement of all the teachers and the amount of exercises and material to study. I recommend it to all those who are still hesitating to take the leap"

The Professional Benefits of English

Today, English is the universal language, it is almost mandatory for work in all parts of the world and it is essential in any area of personal or professional life; it is the language used in the economic field, international trade, tourism, diplomacy, industry, etc. Everything is written, spoken and read in English nowadays; it has become the second most widely spoken language in the world. In the globalized world in which we live, it is the tool that enables communication with people from all countries.

English is the language most widely used as a first or second language, the former by some 400 million people worldwide, while an estimated 2 billion people are learning it as a second language. Which means that in less than a decade, English will be spoken by some 3 billion people, almost half of the Earth's total population. All things considered, there is no doubt that it will become (if it is not already) a fundamental requirement for accessing a large part of job offers, scholarships, university careers, business, etc.

English will give us access to a better education and, therefore, the possibility of a better job. Our job opportunities will multiply as soon as we master the language. Whether in governmental areas or in multinational companies, regardless of the field of work, English will always bring advantages when it comes to promotion or access to another job, helping to improve the current employment situation of the person who masters it.

Another important reason to learn English is that we will be able to access a better education, without limiting ourselves to universities or training centers in our own country. It will also give us access to more current and complete information, we will learn about the latest advances and we will be able to access most scientific, academic and technological texts written in English. According to a study, more than 56% of Internet sites are published in English.

“

Today, English is the universal language. It is almost obligatory for work in all parts of the world, it is fundamental in any area of personal or professional life"
