01 Welcome

In order to access the most privileged positions in any industry, a full command of the language is required. Nearly 70% of job offers for positions of responsibility require full mastery of the language, which, in the case of international business, is often Chinese. Companies such as Lenovo or Tencent are leaders in their industry and it is common for American companies to allocate more resources to China. Therefore, having a C2 level of Chinese becomes essential if you want to project your career towards the highly successful internships within these companies.

Presentation video

“

Become an expert in Chinese thanks to TECH's comprehensive preparation with this C2 Language Course"

Introduction

English is the most predominant language in the world by total number of speakers, but Chinese is the most spoken if we count native speakers, which is a great sign of the exponential growth of this culture and language. Compared to other more traditionally widespread languages, Chinese is a safe bet for the future that will help any candidates who can speak it to a C2 level stand out. For this reason, this C2 Chinese Language Course focuses on all the linguistic skills and abilities that the student must acquire in order to pass the corresponding level test.

Such a deep and developed knowledge of Chinese will give you a strong advantage in the fastest growing economy in the last decades.

TECH's unique methodology will allow you to combine your day-to-day responsibilities with Chinese studies at the highest level.

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

Nowadays, students must have a certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

tech 10 | Is it Important to Obtain a Language Certification?

TECH Global University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency.** Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

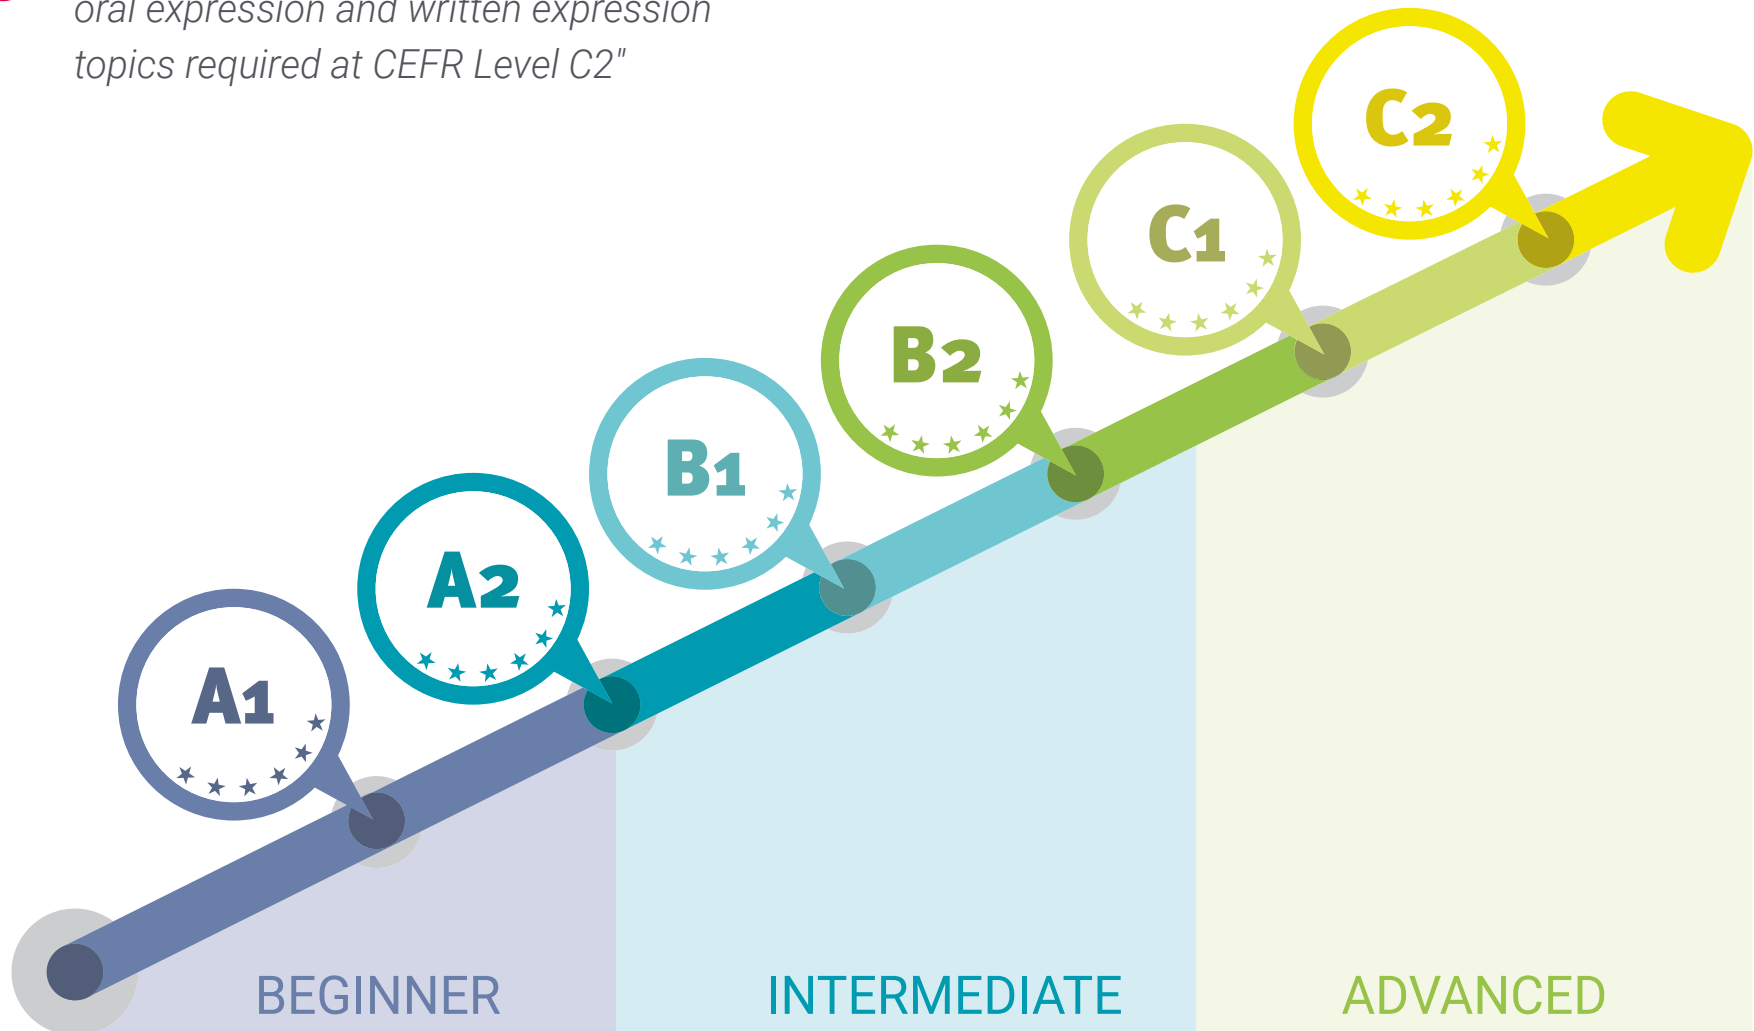

Learn Chinese and make the most of it by accrediting it with a qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.

“

You will find the main grammar, vocabulary, oral expression and written expression topics required at CEFR Level C2”

03

What Is Level C2?

Level C2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Although level C2 has been referred to as Mastery, it does not imply native or near-native proficiency. It is intended to characterize the degree of precision, appropriateness and ease of use in the language that typifies the speech of bright students. The descriptors graded here include: is able, by reasonably employing a wide range of modification mechanisms, to accurately convey subtle nuances of meaning; has a good command of idiomatic and colloquial expressions, and is aware of the connotative level of meaning; knows how to circumvent difficulties so discreetly that the interlocutor hardly notices.

“

In TECH's C2 Level Language Course, we thoroughly prepare you to obtain your Chinese C2 language certificate"

What are the C2 Level Skills?

01

Can easily understand virtually everything he/she hears or reads

02

Can reconstruct information and arguments from various sources, whether in spoken or written language, and present them in a coherent and summarized manner

“

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH"

03

Can express him/herself spontaneously, with great fluency and with a degree of precision that allows him/her to differentiate fine nuances in meaning even in more complex situations

Our Methodology

The TECH program is a C2 Chinese Language Course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method in which the student works intensively and repeatedly on all the contents required by the CEFR, thoroughly preparing them to pass the test.

“

In no other course will you find pre-test knowledge activation questions, lesson tests, grammar tests, a final test and specific practice of CEFR skills in each unit"

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C2 Chinese Language Course offers you a revolutionary method to comprehensively prepare for the level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the test official using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Our school is the first in the world to combine storytelling with a 100% online

All of this is enhanced with the best 100% online teaching methodology: Relearning.

learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called **Relearning**. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, Objective, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Relearning Methodology

In TECH's C2 Chinese Language Course, learning is not a linear process, but rather a spiral (we learn, unlearn, forget and) relearn. Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 35,000 university graduates with unprecedented success, in fields as diverse as Biochemistry, Genetics, Surgery, International Law, Management Skills or Financial Markets and Instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

with a professional, personalized and expert led syllabus...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called **Neurocognitive context-dependent learning**, the different elements of our intensive Chinese C2 level preparation course are connected to the context in which the participant will take his or her official certification exam in order to guarantee success on the day of the test.

- ◆ Discuss the application of law and morality

"It is difficult to grow in my sector, as competition is extremely high. In the end I got very frustrated hyper-specializing when the ideal choice was languages. Thanks to TECH I was able to improve my level of Chinese, since many of our business relations are based there, and by demonstrating my proficiency in Level C2 I was able to reach the position of responsibility I had been pursuing for years"

María Roldán

Department Manager in a multinational technology company

"I had wanted to study abroad for many years, but I was hesitant about where to study. I was attracted to China's exotic nature and, thanks to TECH's courses, I was able to prepare myself in record time to reach a moderate level. Now that I'm settled in the country, I'm confident enough to continue advancing to Level C2"

Our Students' Profiles

We know that learning a language isn't easy. Many of us have tried, and failed, for years to consolidate our knowledge and acquire the skills required to obtain qualifications that demonstrate what we have learned. Level exams are complex tests that must be prepared thoroughly and with good expert guidance.

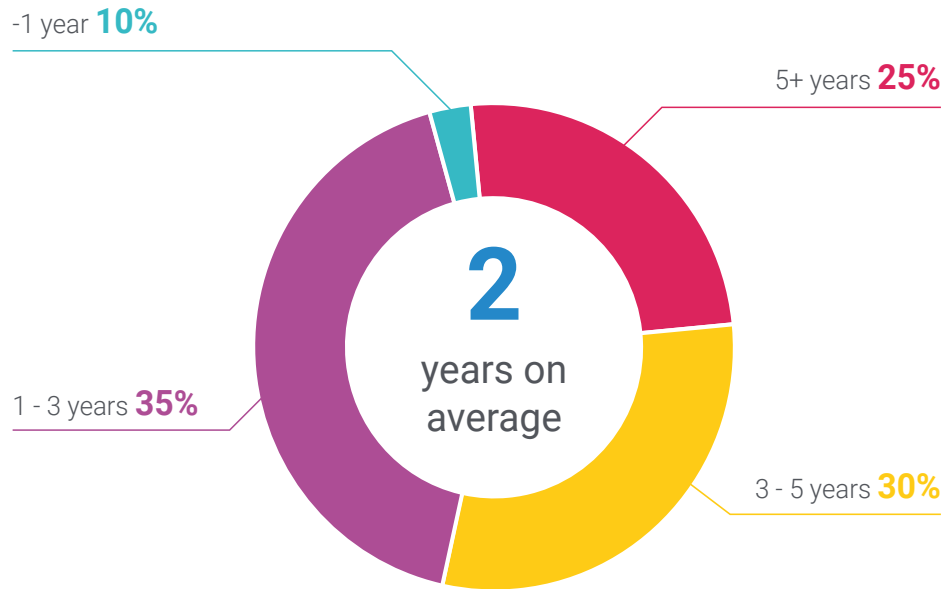

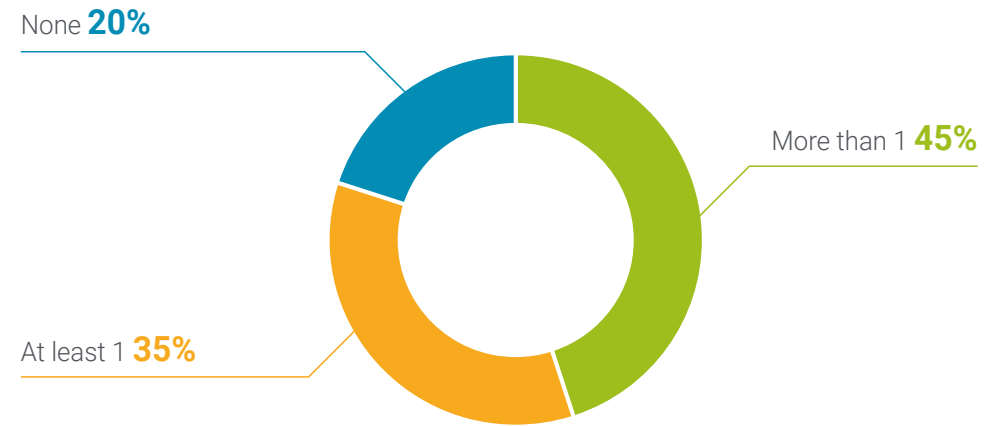

“

Many of our students have come from other preparation methods that have led to loss of motivation. At TECH, 9 out of 10 students recommend us”

The Professional Benefits of Chinese

The Chinese language, the highest expression of Chinese culture, based on symbols, is more than 5,000 years old and gives rise to more than 55 languages and 2,000 dialects as a result of its geographical, phonetic and dialectical variants. Mandarin Chinese is the official language of the People's Republic of China and is also spoken in countries such as Cambodia, Burma, Indonesia, Malaysia, the Philippines, Singapore, Thailand and Taiwan.

Mandarin Chinese is an original Beijing dialect which, according to official statistics, is the most widely spoken language in the world with more than 1.3 billion speakers. It is one of the six official languages of the United Nations (UN) along with Arabic, English, French, Russian, Spanish and French.

Nowadays, it seems essential in the multicultural and global society in which we live to broaden our knowledge and teaching of the Chinese language, to know its language, habits and customs, which will lead us to improve our international and commercial relations, to close economic agreements and to establish direct contact with Chinese citizens.

China is in fashion. Its spectacular growth is increasingly attracting Spanish entrepreneurs who are looking for an opportunity in the Asian colossus. But doing business in China can be a nightmare if you are not prepared. The cultural differences are so vast that they extend to all aspects of the business world: negotiation, contracts, legislation or a simple working dinner. For this reason, guanxi or social relations should also be studied.

“

Understanding the cultural context of communication is fundamental to successfully decoding a message”

Assessment and Certification

The main evaluation objective of TECH'S assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

*TECH's intensive C2 Language Course
is the only one that also awards you
with a university certificate"*

Chinese C2 training course evaluation tests

The assimilation of the contents is constantly and progressively evaluated. To do so, the student must pass an automatically corrected evaluation test at the end of each module and a final test that covers all the contents of the level.

Its main objective is for the student to consolidate what they have learned and to be aware of their progress, for this reason, after the evaluation test is completed, the student is shown a report of the results.

“

Only TECH will award you, upon successful completion of the course, a university certificate”

Training course evaluation criteria

- Communicative effectiveness: comprehensibility, fulfillment of expected functions, accuracy, sociolinguistic appropriateness
- Interactive and speaking skills: responsiveness and cooperation, coherence of ideas, organization, relevant and sufficient development
- Use of language: linguistic resources, formal elements of cohesion and fluency
- Formal correction: grammar, discourse cohesion, vocabulary and pronunciation

If you pass our course, you will obtain a C2 Chinese language qualification from TECH.

The certificate, which indicates successful completion of the course, will state the language studied and the level passed, according to the Common European Framework of Reference from Languages (CEFR).

The certificate issued by **TECH Global University** only provides "pass" or "fail" as grading options, and does not express a numerical grade. Before receiving the certificate, you will be emailed a form to verify your data.

The CEFR C2 Chinese Language Course an intensive course lasting a maximum of 4 months.

Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
