Being able to certify the level of a language is essential nowadays, since accreditation is required in many employment processes, scholarships, academic positions, job vacancies or competitive examinations. For this reason, this group conversation program has been designed with the passing of the oral test of the Common European Framework of Reference for Languages (CEFR), a highly prestigious language recognition system. In this way, the student will not only improve their Italian, but will also have the opportunity to certify it.

"

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH Global University helps you to achieve it with an intensive 100% CEFR training"

TECH Global University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards diplomas that are recognized throughout the European Union.

At TECH Global University we offer you the only intensive program designed to prepare you to obtain your official diploma based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

Learn to speak Italian and make the most of it by obtaining an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR diploma gives you a diploma for life.

With this preparation program you will have all the necessary contents and competences to pass the A1 level"
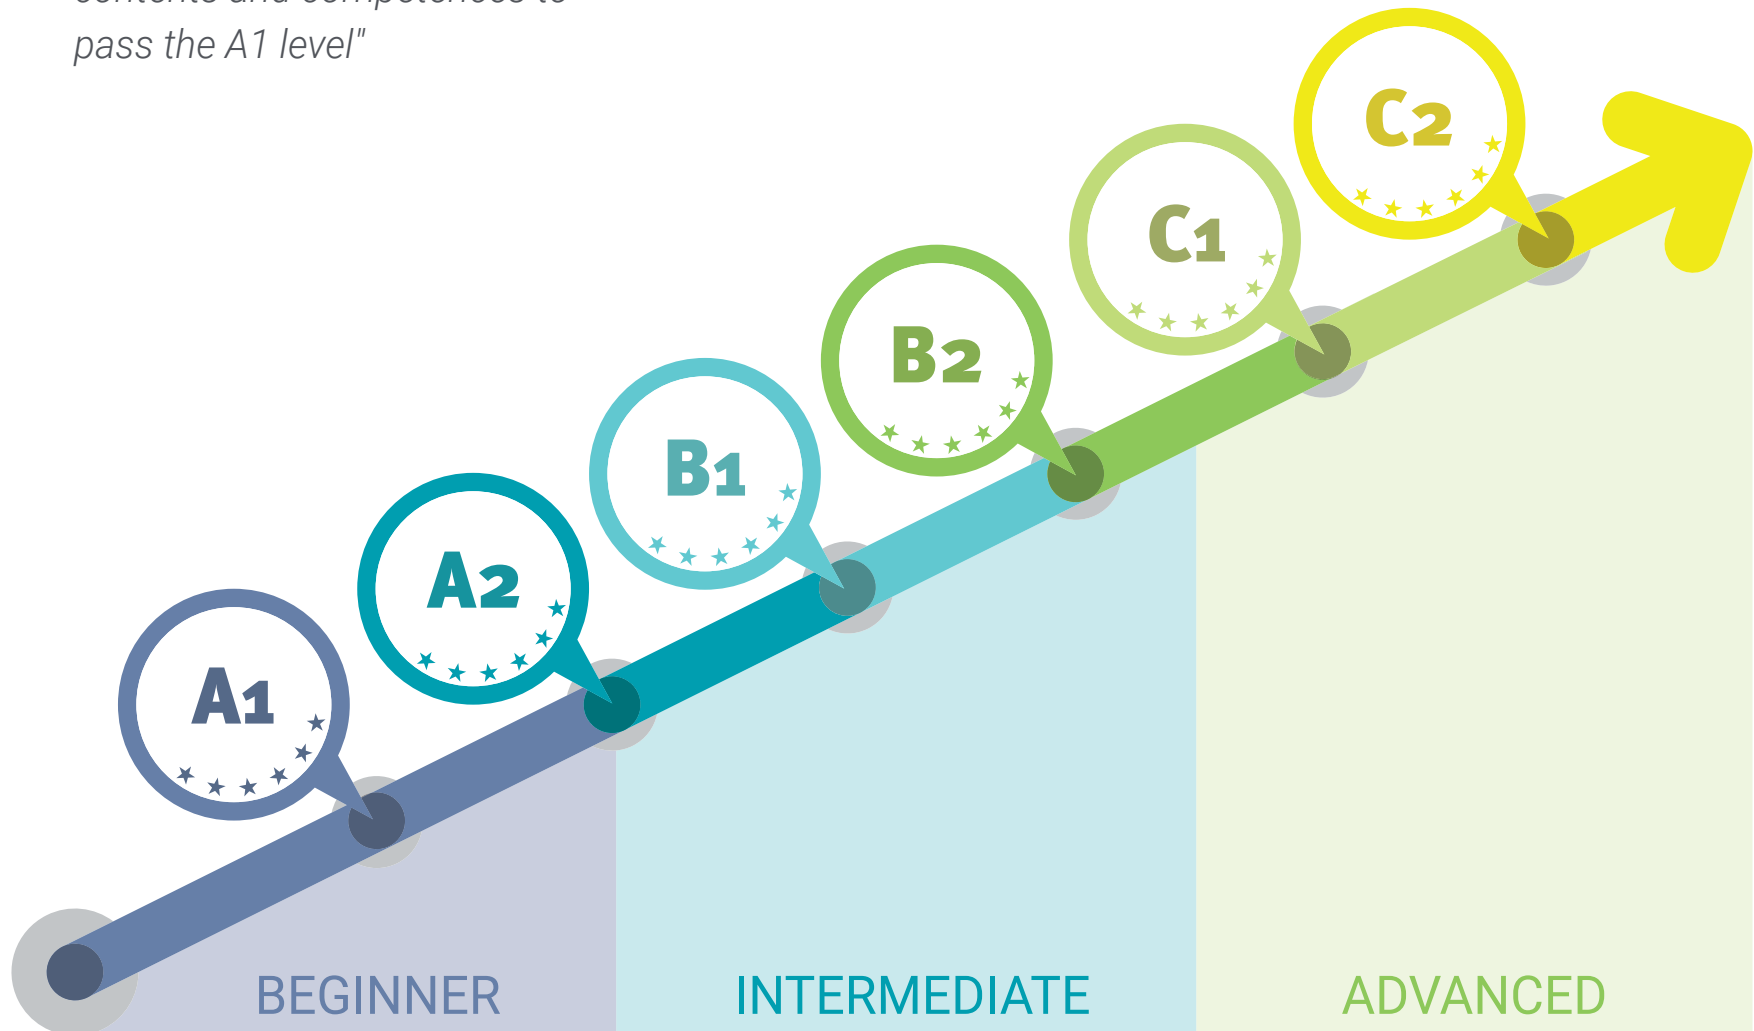

03
What Is Level A1?

Level A1 is part of the Beginner Level, which is divided into two courses: First and Second Beginner Level (A1 and A2). The first course covers the requirements of the A1 proficiency level as established by the Common European Framework of Reference for Languages, the only official system in the European Union for recognizing and accrediting language proficiency and the only diploma that has official validity and is requested by universities, companies, competitive examinations, etc.

"

In TECH's Online Conversation Classes program we will thoroughly prepare you to obtain your official A1 Italian diploma"

What are the A1 Level Skills?

At this level, as defined by the Common European Framework of Reference for Languages, students progress in language skills to develop what are considered "Basic User" skills with the ability to:

01 Understand and use common everyday expressions and simple sentences to satisfy immediate needs

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH"

02 Interact in an elementary way as long as the interlocutor speaks slowly and clearly and is willing to cooperate

03 Introduce yourself and others, ask for and give basic personal information about your address, your belongings, and people you know

Level A1 (Access) is considered to be the lowest level of general language use, the point at which learners can interact in a simple way, can ask and answer questions about themselves, about where they live, about the people they know and the things they have, can make simple statements in areas of immediate need or on very everyday topics and can respond to such questions when they are put to them, rather than simply relying on a very limited, rehearsed and lexically organized repertoire of phrases used in specific situations.

Our Methodology

The A1 Italian Online Conversation Classes program is an intensive preparation course for the A1 Italian level diploma based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

In no other course will you work at your own pace, with native teachers, in small groups based on specific practice of the CEFR skills in each session"

The TECH Global University method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

The A1 Italian Level oral proficiency preparation program of TECH Global University offers you a method based on interaction and synchronous and direct communication between teacher and student to thoroughly prepare for the oral test for the official Italian Level certification. Our objective is to strengthen your skills in a changing, real and multicultural context and, guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)"

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *"Neurocognitive context-dependent learning"*, the different elements of our intensive Italian A1 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

Communicative competence is not merely limited to the knowledge and ability to use the linguistic code, but has other broader dimensions, which place it in direct relation with other competences such as information processing and digital competence, learning to learn, social and civic competence, or cultural and artistic competence.

This implies a cultural immersion that is only possible through direct and continuous interaction with native speakers and real conversational situations.

TECH offers you what you were looking for: a practical language program completely adapted to your goals.

08
Course Structure and Content

To encourage a continuous and progressive improvement of your oral level, the teaching team has devised a program covering the most common social situations and contexts. In this way, the group will review their oral skills in a familiar or basic professional environment, being able to intervene on several occasions given the small size of the class. This provides a common environment in which to polish mistakes and reach an optimal level of competence to pass the A1 Level test with ease.

Where, When and How is it Taught?

This course takes place over 4 months and consists of 40 60-minute live sessions taught by native-speaking teachers.

Each session is structured as follows:

- Practice of oral interaction skills
- Practice of oral expression skills
- Simulation of real situations
- Tips and tricks to prepare for the test
- Summary and closing
- Download printable sheets

You will surround yourself with people who share your goals and affinities, creating a common and collaborative learning environment"

A1 Level Learning Objectives

In each program, native teachers prepare a series of items that students must overcome in order to satisfactorily reach the course goals. Group sizes are small, giving the student the opportunity to intervene multiple times to improve the language. Thanks to TECH's unique methodology, all the proposed objectives can be achieved in the shortest possible time, resulting in effective and efficient teaching.

- Helping to learn the language from scratch, polishing common mistakes and offering methods to become more fluent in speech
- Master the use of new basic words to develop conversations in different contexts
- Assimilate grammatical rules and listening comprehension through continuous speech
- Practice listening and oral interaction skills with peers who share the same interests and language level
- Focus on everyday issues, such as individual presentations, family, work, travel or daily routine
- Enable the student to initiate and maintain a simple conversation on their own, making use of the most common language

You will focus your practice to exceed by far the CEFR Level A1"

The Professional Benefits of Italian

Italian is a beautiful and romantic language, the language of ancient medieval thinkers, historical writers, and possesses a unique musicality and conceptual richness in a wide variety of fields. It is the language of Dante, Petrarch and Boccaccio, three great Italian writers, but it is also the language of art, history, science, gastronomy and fashion.

As the birthplace of Latinity, Italy played a decisive role in the diffusion of Latin and the culture of the Roman Empire in the rest of Europe, both in Ancient times and in the ages that followed. Similarly, after the affirmation of the Neo-Latin languages and the constitution of modern linguistic in Europe, Italian has had, at times, moments of great importance in the international linguistic context.

Approximately 70 million people worldwide speak Italian (60 million in Italy and around 10 million in the rest of the world). It is the official language in Italy, Switzerland, San Marino and Vatican City. It is spoken, at least in part, in eleven countries, to which must be added some twenty countries with a large Italian community, such as Argentina, Germany, Australia and the USA.

Italian is one of the official languages of the European Union, therefore speaking Italian will open the doors to many international organizations and also the possibility of working in many of the large Italian companies with international presence. The Italian economy is principally based in three sectors, tourism, the automotive industry and fashion.
For all these reasons, Italian is found amongst the ten most useful languages in the world and its considered necessary to succeed in the 21st Century"
