# 01 Welcome

In order to pass the Level A1 Russian test it is essential to have a good knowledge of the language, including its oral expression, as this part of the evaluation is usually the most complex for students. TECH, being aware of this, has adapted these Online Classes to the Common European Framework of Reference for Languages (CEFR). This gives an additional, international quality to the program, as the most basic questions of Russian will be practiced orally, adapted to Level A1.

Presentation video

## Introduction

Russia is a country with a low rate of unemployment, around 5%. This means that it is a region that offers good job opportunities, but requires foreigners to have a good knowledge of the language. Therefore, it is important to get off to a good start in learning Russian and to begin practicing it orally from its most basic level, A1. TECH has compiled the most important topics and questions in the CEFR for this level, ensuring that the learner delves into topics such as oral presentations, their familiar and immediate environment, their tastes and hobbies.

*In the A1 Russian Online Conversation Classes program, we work on skills with more than 100 different oral expression and interaction activities and prepare you to pass the oral component of the official Russian A1 certificate.*

# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

*The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”*

## TECH Global University

The Common European Framework of Reference for Languages is the **only official system of recognition and accreditation of the student's level**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

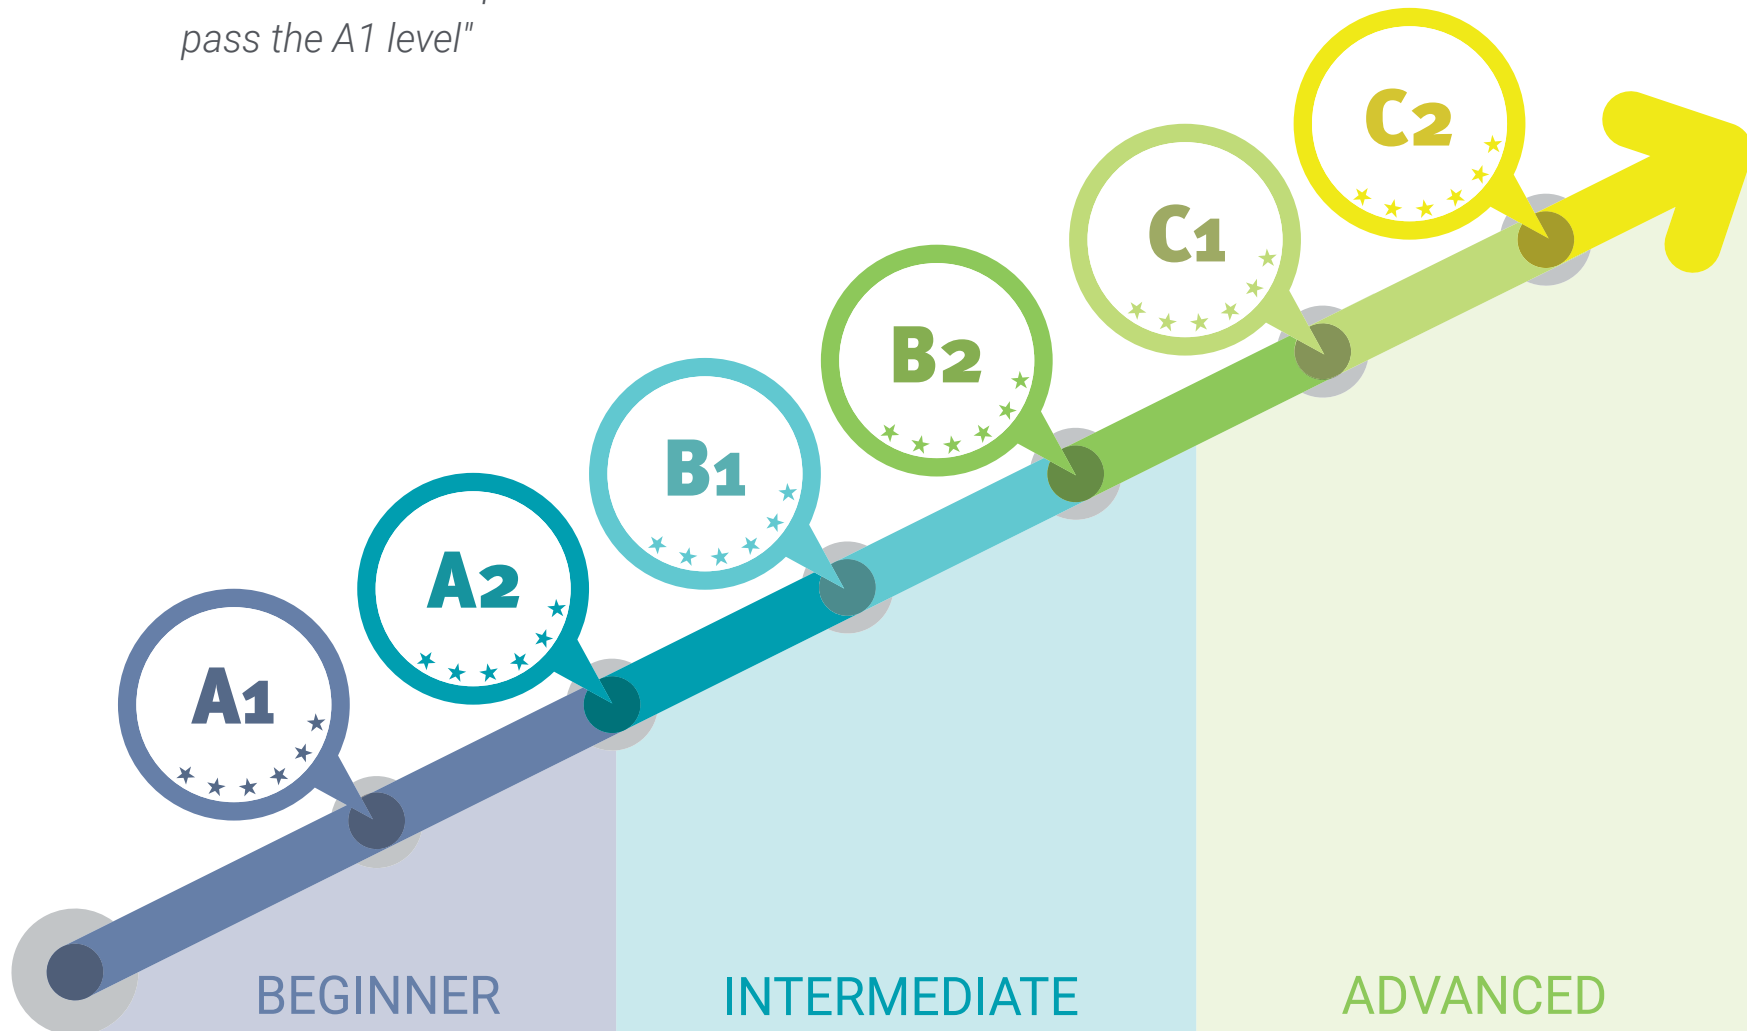

*Learn to speak Russian and make the most of it by obtaining an official qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.*

“

*With this preparation program you will have all the necessary contents and competences to pass the A1 level”*

03

# What Is Level A1?

Level A1 is part of the Beginner Level, which is divided into two courses: First and Second Beginner Level (A1 and A2). The first course covers the requirements of the A1 proficiency level as established by the Common European Framework of Reference for Languages, the only official system in the European Union for recognizing and accrediting language proficiency and the only certificate that has official validity and is requested by universities, companies, competitive examinations, etc.

A person with long dark hair, wearing a colorful plaid shirt, is holding a white circular sign with the text 'A1' in large red letters. The background features a decorative graphic of many thin, light blue lines that curve across the top of the page.

**A1**

“

*In TECH's A1 Russian Online Conversation Classes Program, we prepare you thoroughly to obtain your official A1 Russian certificate”.*

## What are the A1 Level Skills?

At this level, as defined by the Common European Framework of Reference for Languages, students progress in language skills to develop what are considered "Basic User" skills with the ability to:

“*Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH*”

01

Understand and use common everyday expressions and simple sentences to satisfy immediate needs

02

Interact in an elementary way as , long as the interlocutor speaks slowly and clearly and is willing to cooperate

03

Introduce yourself and others, ask for and give basic personal information about your address, your belongings, and people you know

Level A1 (Access) is considered to be the lowest level of general language use, the point at which the learner can interact in a simple way, can ask and answer questions about themselves, about where they live, about people they know and things they have, can make simple statements in areas of immediate need or on everyday topics and can respond to such questions when asked, rather than simply relying on a very limited, rehearsed and lexically organized repertoire of phrases used in concrete situations.

*TECH helps students to obtain their qualification with an intensive training program that is based 100% on the CEFR"*

# Our Methodology

The A1 Russian Online Conversation Classes program is an intensive course for the Russian A1 level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

*In no other course will you work at your own pace, with native teachers, in small groups based on practicing the specific CEFR skills in each session and practicing the specific CEFR skills in each unit"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's Russian Level A1 Oral Proficiency Preparation Program offers you a method based on interaction and synchronous and direct communication between teacher and student to prepare for the official oral level certification test in a comprehensive way. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

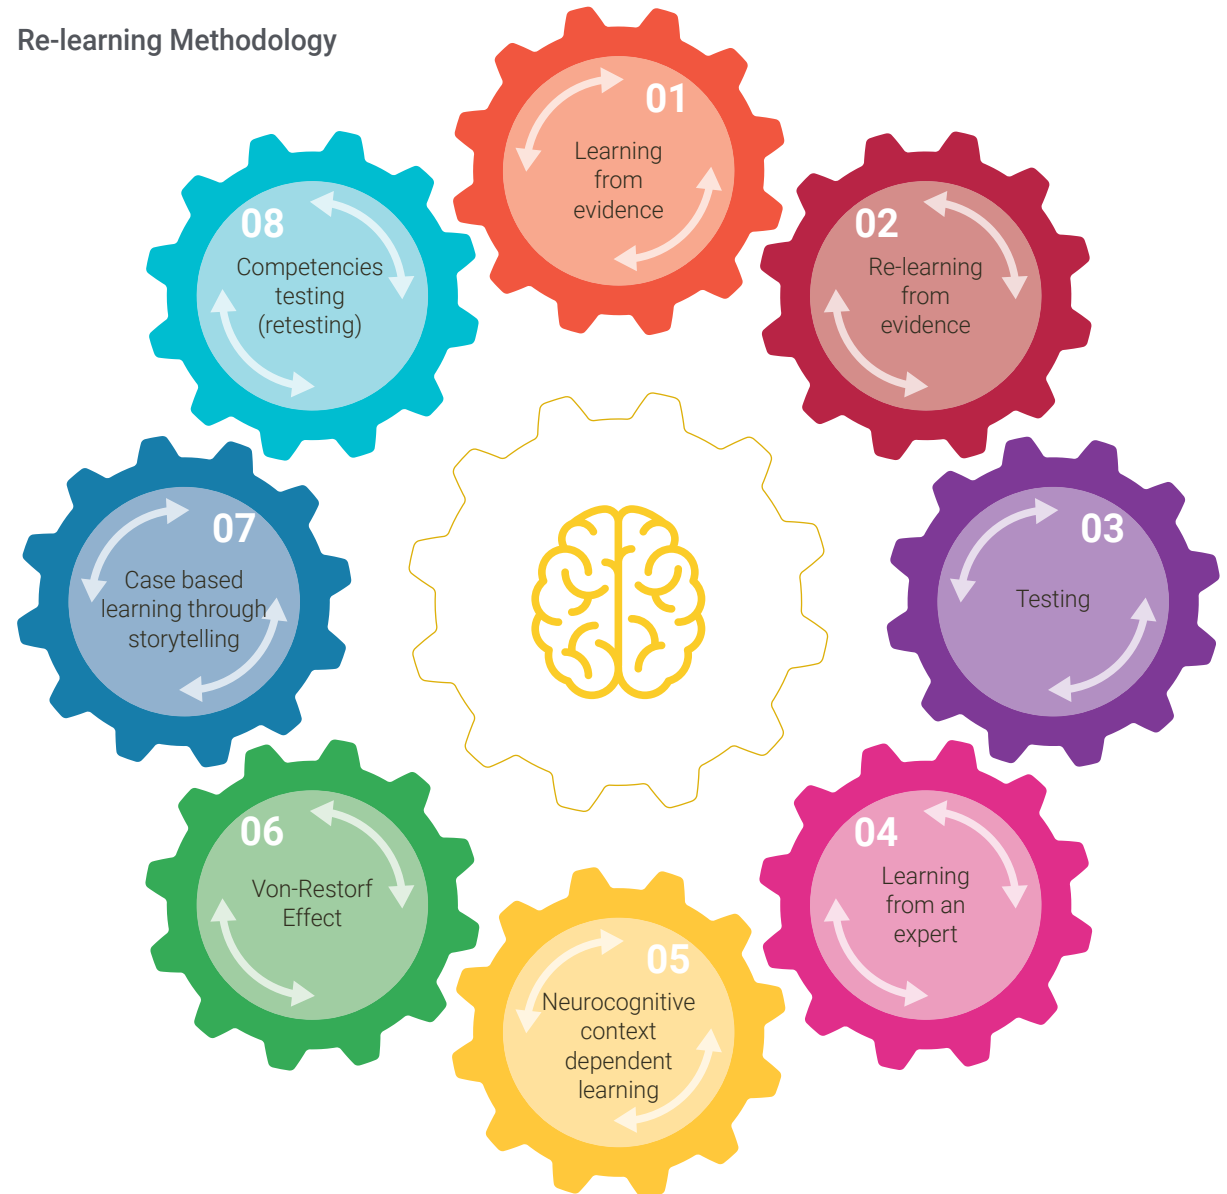

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*Our A1 CEFR oral communication skills preparation program is the only one on the market licensed to use the Relearning methodology, which enhances learning by optimizing the effort/result ratio.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

### Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

This intensive oral proficiency preparation program is based on real-time communication, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized and expert-led training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *"Neurocognitive context-dependent learning"*, the different elements of our intensive A1 Russian course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

*...and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect with your mobile device and learn with the best native teachers.*

# The Professional Benefits of Russian

Russia is one of the principle economic powers of the world, being the leaders in a multitude of economic and financial sectors. It is especially prominent in the energy field, with some of the most powerful oil and natural gas extraction companies in the world.

This makes Russia an attractive destination for thousands of people looking for a job opportunity in some of these fields or even outside of them, as the Russian employment rate is very high. In addition, it should be noted that Russian citizens generally do not speak more widely spoken languages such as English.

This makes it difficult to interact with any foreign person, making it even more important to acquire a good language base. Therefore, the best way to do it is orally, practicing the most basic topics in Level A1 until the students can manage and maintain simple conversations about themselves, their environment, their work, their tastes or hobbies.

This TECH university program give students the opportunity to orally practice Russian, with this being possible thanks to a comfortable 100% online format allowing students to avoid the costs of physically going to academies or language schools.

“

*Russian is an essential language to develop your professional career in Russia, Belarus, Ukraine or Kazakhstan”*

11

# Assessment and Certification

The main evaluation objective in TECH is that the student consolidates what they have learned and is aware of their progress. For this reason, after completing each block, the student is shown a report of the results, which visually indicates the skills that they should strengthen.

“

*TECH'S A1 level oral communication skills preparation program is the only one that also awards you with a university certificate”*

## Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
