02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”

TECH Global University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

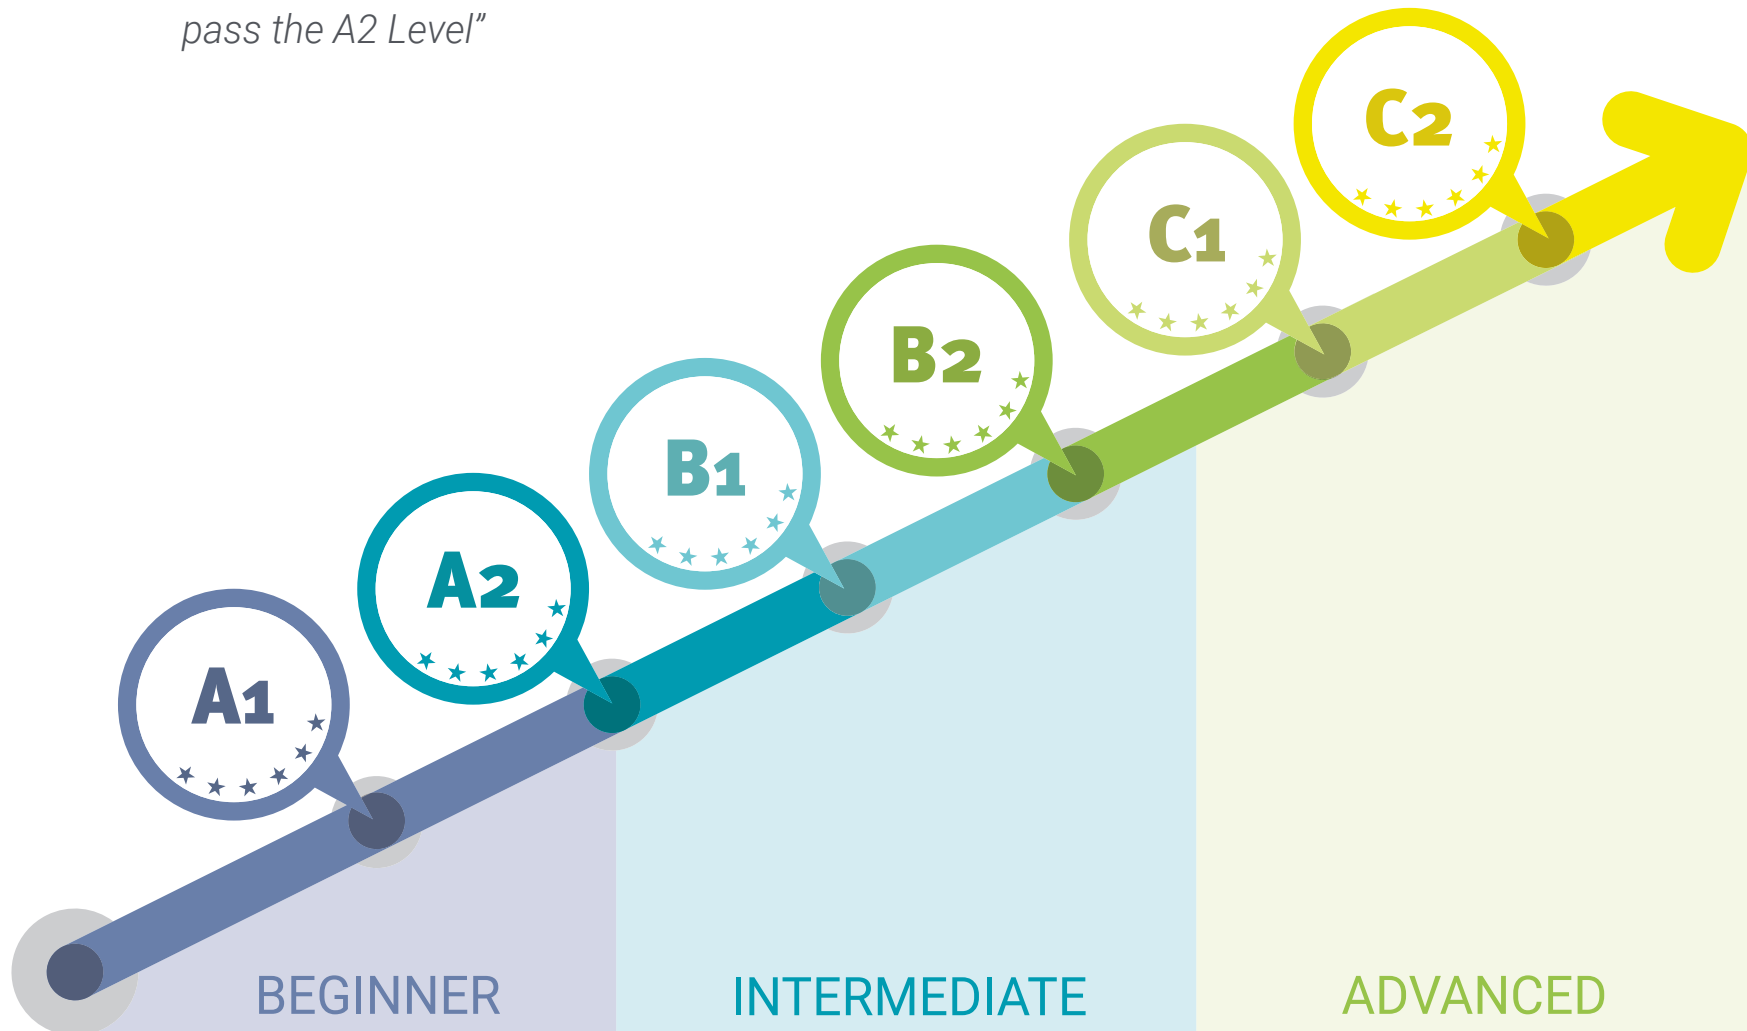

Finally learn to speak fluent Portuguese and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is for life.

“

With this program you will have all the content and skills you need to pass the A2 Level”

03

What Is Level A2?

Level A2 is part of basic User Level, which is divided into two sublevels: First and Second Basic User Level (A1 and A2).

This level includes most of the descriptors used in social functions, such as: knowing how to use the usual forms of greeting and addressing others politely; greeting people, asking how they are and being able to react to news; getting along well in very brief social exchanges; knowing how to ask and answer questions about what they do at work and in their free time; knowing how to make an invitation and respond to it; discussing what to do, where to go and preparing for an appointment; being able to make an offer and accept it.

Here you will also find descriptors on how to function in social life: being able to carry out simple transactions in stores, post offices or banks; knowing how to get simple travel information; using public transport (buses, trains and cabs); asking for basic information, asking and explaining how to get to a place and buys tickets; ordering and providing everyday goods and services.

A person with long dark hair, wearing a colorful plaid shirt, is holding a white circular sign with the text 'A2' in large red letters. The background features a decorative graphic of many thin, light blue lines that curve across the top of the page.

Our Methodology

The A2 Portuguese Online Conversation Classes program is an intensive course to prepare for the A2 Level Portuguese certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

In no other course will you work at your own pace, with native teachers, in small groups based on practicing the specific CEFR skills in each session and practicing the specific CEFR skills in each unit"

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's A2 Portuguese Online Conversation Classes program offers you a method based on interaction and synchronous and direct communication between teacher and student comprehensive preparation for the official oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and , to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

... All of this is enhanced with the best 100% online teaching methodology: Re-learning....

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called **Re-learning**. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, Objective, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous communication, in real time, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized and expert-led
training itinerary...*

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, e-mail contact with the technical secretary and chat).

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an Internet connection (computer, tablet, smartphone)”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our Portuguese A2 Level Online Conversation Classes are connected to the context in which the participant will take his or her certification exam in order to guarantee success on the day of the test.

... and all this with teachers at the forefront of technology and education...

The Professional Benefits of Portuguese

With approximately 220 million speakers, Portuguese is the sixth most spoken native language and the third most spoken language in the world using the Latin alphabet, after Spanish and English.

Portuguese is the official language of Portugal, where it is spoken by about 10 million people, and of Brazil (Brazilian). It is also the language of administration in Angola, Mozambique, Guinea-Bissau, Cape Verde and Sao Tome and Principe. Other Portuguese enclaves include Goa, East Timor and Macau. It is also spoken in areas of China and India that were colonies of Portugal, as well as in border areas of Argentina, Uruguay and Paraguay.

Portuguese is an emerging language, thanks, among other reasons, to the great economic development of Brazil, where the first language is Portuguese. Brazil is an emerging and very powerful economic power in Latin America, whose position in the world is likely to prosper even more in the coming years.

Starting an international expansion into Brazil may be a possible task for someone who does not know the language, but it is not going to be as fast or as effective compared to someone who is fluent in the language. Brazil represents a market of 190 million inhabitants. Its GDP is almost twice that of Mexico, five times that of Venezuela or Argentina, ten times that of Chile and twelve times that of Peru. The country is also part of the BRIC group (Brazil, Russia, India, China) and is considered the seventh largest economy in the world.

“

Learning the language is one of the keys to developing trust and long-term relationships, which can then materialize in the development of economic or other projects. Any company that aspires to do business in the South American giant will need to have a top executive fluent in Portuguese”

11

Assessment and Certification

The main evaluation objective at TECH is for students to consolidate what they have learned and to be aware of their progress. For this reason, after completing each block, students are shown a report of their results, which visually indicates the skills that they should strengthen.

“

The A2 Level Portuguese Online Conversation program at TECH is the only one that also gives you an academic certificate”

Certification

At the end of the course the student will receive a certificate of recognition that confirms that they are prepared to obtain official certification for this level.
