# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of modern culture, helping to expand knowledge and interact with people from other parts of the world, learning about the traditions of other countries, establishing friendships or doing business.

However, simply knowing foreign languages is not enough in modern society. Nowadays it is essential to have a qualification that accredits and recognizes competence in a given language. In fact, many schools, universities and companies only accept candidates who certify their level by means of an official qualification based on the Common European Framework of Reference for Languages (CEFR).

Thus, this university program is a great opportunity for all those who are interested in improving their level of German while preparing to certify their level.

*Proof of a B1 level in German is essential for access to master's and doctoral programs and scholarships. Get it thanks to this university course"*

## tech 10 | Is it Important to Obtain a Language Certification?

### TECH Technological University

The Common European Framework of Reference for Languages is the only recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards diplomas that are recognized throughout the European Union.

At TECH we offer you the only intensive program of preparation of oral communicative competence to guarantee you to obtain your level certificate based 100% on the CEFR, the only system recognized and accepted throughout Europe.

# What Is Level B1?

Level B1 is part of the Independent User Level, which is divided into two sublevels: First and Second Independent User Level (B1 and B2).

B1 level has two main features: The first is the ability to maintain an interaction and make oneself understood in a variety of situations; for example: generally understanding the main ideas of extended discussions around him/her as long as the speech is clearly articulated at standard language level; offers and asks for personal opinions in an informal discussion with friends; expresses in an understandable way the main idea he/she wants to get across; flexibly uses broad, simple language to express much of what he/she wants; is able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what he/she wants; expresses him/herself understandably, although pauses for some grammatical and lexical planning and some correctness are evident, especially in long periods of free production.

The second feature is the ability to know how to deal flexibly with everyday problems, such as, for example: coping with less common situations in public transport, the typical situations that often arise when making travel reservations through an agency or when traveling; participates in conversations on usual matters without having anticipated it; being able to raise complaints; taking the initiative in an interview or consultation (e.g., knows how to initiate a new topic), although still being noticeably dependent on the interviewer during the interaction; knowing how to ask someone to clarify or develop what he or she has just said.

*Obtain the CEFR German Level B1 certificate thanks to the conversational improvement that this university program will provide you"*

03

# Our Methodology

The Online Conversation Lessons program for Level B1 in German is an intensive certificate preparation course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, TECH employs a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test

“

*This program is unique: it allows you to work at your own pace, with native teachers, in small groups based on specific practice of the CEFR competencies in each session"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's German Level B1 oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to comprehensively prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and, guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*...All of this is enhanced with the best 100% online teaching methodology: Relearning...*

Our school is the first in the world to combine storytelling with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called Relearning. Our language school is the first licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

### Relearning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous, real-time communication, as this type of interaction has been proven to enhance personal involvement, work interaction, social-emotional relationships and personal interactions, increasing motivation. (Krasinski, 2008).

*...with a professional, personalized and expert-led syllabus...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “Neurocognitive context-dependent learning”, the different elements of our intensive German B1 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

*... and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect through your mobile device and learn with the best native teachers.*
