# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of modern culture, helping to expand knowledge and interact with people from other parts of the world, learning about the traditions of other countries, establishing friendships or doing business.

However, simply knowing foreign languages is not enough in modern society. Nowadays it is essential to have a qualification that accredits and recognizes competence in a given language. In fact, many schools, universities and companies only accept candidates who certify their level by means of a qualification based on the Common European Framework of Reference for Languages (CEFR).

“

*Proof of a B1 level of Spanish is essential to access master's and doctoral programs or scholarships. Get it thanks to this university course"*

## tech 10 | Is it Important to Obtain a Language Certificate?

### TECH Global University

The Common European Framework of Reference for Languages is the **only system that recognizes and accredits the student's level**. Although there are other certification systems, these come from private institutions and are, therefore, **not valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program of preparation for oral communicative competence to guarantee that you will obtain your level certificate based 100% on the CEFR, the only system recognized and accepted throughout Europe.

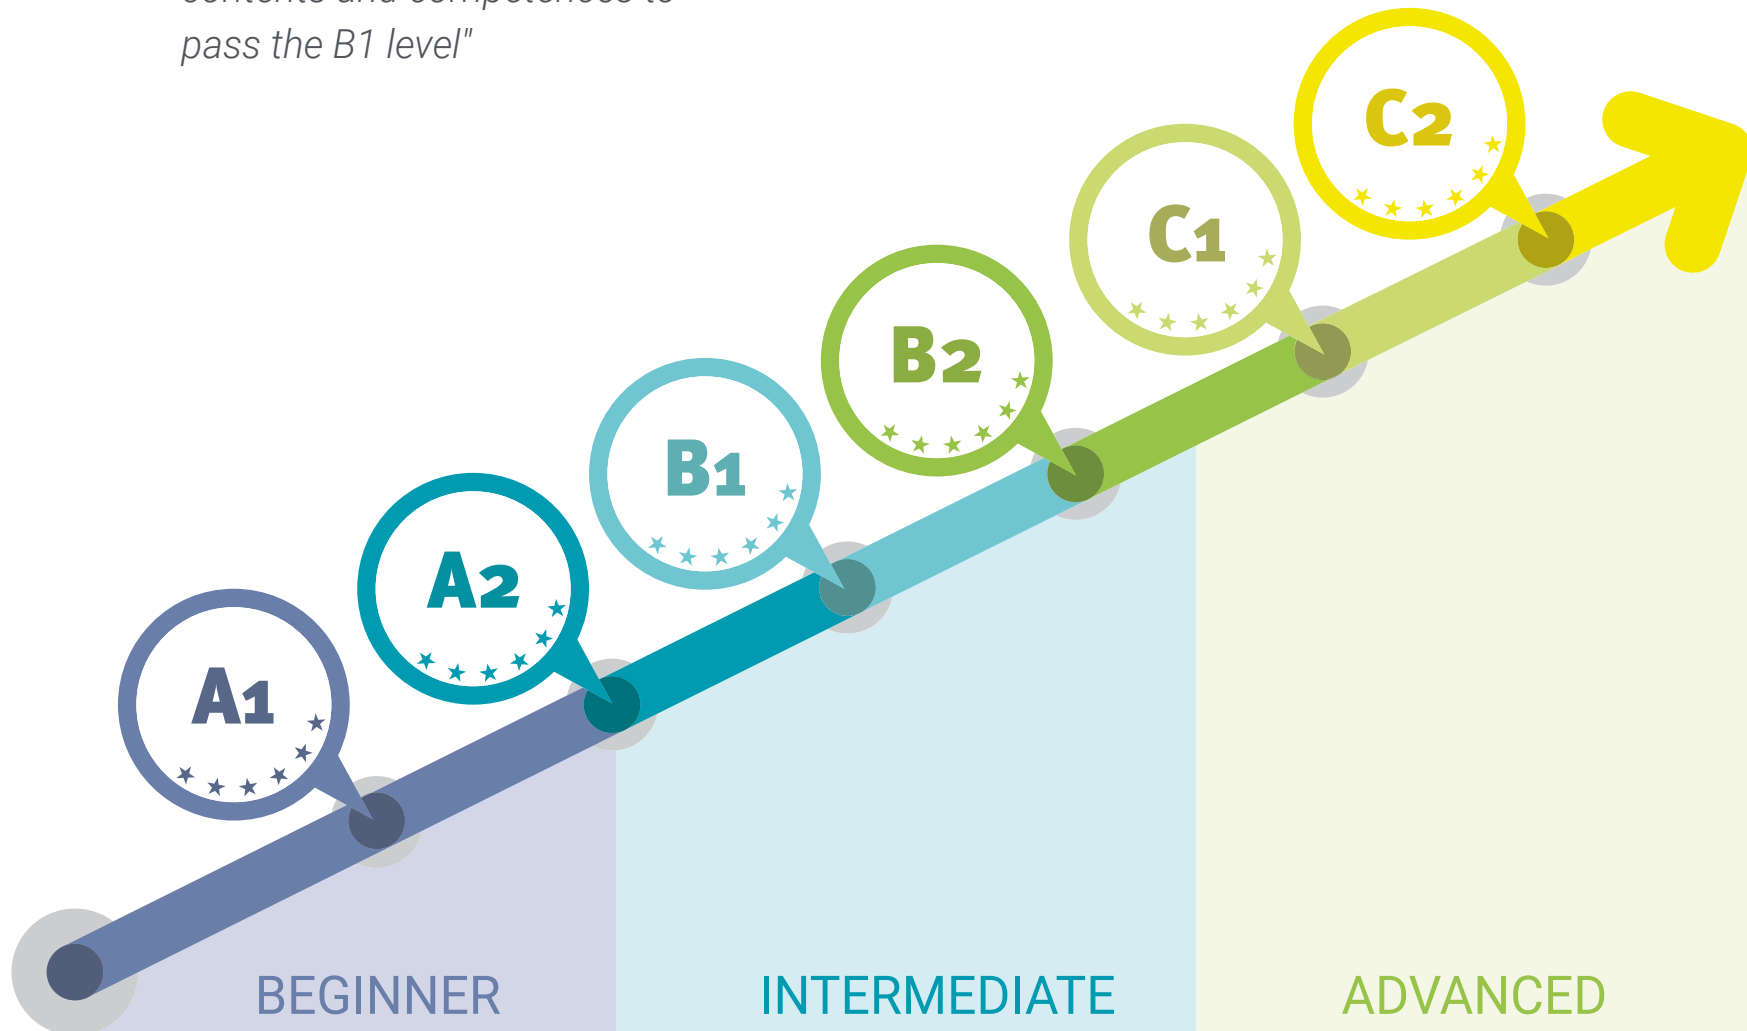

*Be fluent in all types of conversations

# What Is Level B1?

Level B1 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

B1 level has two main features: The first is the ability to maintain an interaction and make oneself understood in a variety of situations; for example: generally understanding the main ideas of extended discussions around them as long as the speech is clearly articulated at standard language level; offers and asks for personal opinions in an informal discussion with friends; expresses in an understandable way the main idea they want to get across; flexibly uses broad, simple language to express much of what they want; is able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they want; expresses themselves understandably, although pauses for some grammatical and lexical planning and some correctness are evident, especially in long periods of free production.

The second feature is the ability to know how to deal flexibly with everyday problems, such as, for example: coping with less common situations in public transport, the typical situations that often arise when making travel reservations through an agency or when traveling; participates in conversations on usual matters without having anticipated it; being able to raise complaints; taking the initiative in an interview or consultation (e.g., knows how to initiate a new topic), although still being noticeably dependent on the interviewer during the interaction; knowing how to ask someone to clarify or develop what he or she has just said.

*Obtain the CEFR Spanish Level B1 certificate thanks to the conversational improvement that this university program will provide you with"*

What are the B1 Level Skills?

Can understand the main points of clear, standard-language texts on familiar matters, whether in work, study or leisure situations

02

Knows how to deal with most of the situations that may arise during a trip in areas where the language is used

“

03

# Our Methodology

The Online Conversation Classes program for B1 Spanish preparation is an intensive course for the Spanish B1 level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, TECH use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

*You will not find a program like this one, which will allow you to work at your own pace, with native teachers, in small groups based on specific practice of the CEFR competencies in each session"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's Spanish Level B1 oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to comprehensively prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-learning Methodology**

We prevent your motivation from waning and offer you the best learning environment.

This intensive oral proficiency preparation program is based on real-time communication, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized updating itinerary  
guided by experts...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, answer your questions or study recommendations.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *“Neurocognitive Context-Dependent Learning* the different elements of our intensive Spanish B1 Language Course are connected with the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

*... and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect with your mobile device and learn with the best native teachers.*

# The Professional Benefits of Spanish

Spanish is the second most widely spoken language in the world, behind Mandarin Chinese and ahead of English and Hindi/Urdu. Recent forecasts show that English, Spanish and Chinese are inevitably the three languages of international communication for the 21st century.

It is spoken in Spain, the Caribbean Islands (Cuba and Puerto Rico), the Dominican Republic, North America (Mexico), Central America (Guatemala, Belize, El Salvador, Honduras, Nicaragua, Costa Rica and Panama) and South America (Colombia, Venezuela, Uruguay, Paraguay, Argentina, Chile, Bolivia, Peru and Ecuador). Spanish is also the second most widely spoken language in the United States.

The Spanish-speaking population represents one of the fastest growing segments in the world, especially in the United States. The Spanish-speaking segment constitutes a huge community that shares products, services and culture; and offers businesses and institutions a truly unique opportunity for growth.

Furthermore, studying Spanish will open many doors at a professional level. Many countries have Spanish as an official language, so there are many jobs for which this can be a fundamental factor.

“

*Spanish is the official language in more than 20 countries and has an increasing weight in others such as the United States”*

# Assessment and Certification

The background features several black graduation caps falling from the top right towards the center. At the bottom, two hands are reaching upwards, one from the left and one from the right. A series of thin, light blue lines curve across the page, starting from the left and ending on the right, passing behind the hands and caps.

The main evaluation objective at TECH is for students to consolidate what they have learned and to be aware of their progress. For this reason, after completing each block, students are shown a report of their results, which visually indicates the skills that they should strengthen.

“

*TECH's B1 level oral communication skills preparation program is the only one that also awards you with a university certificate”*

## Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
