Is it Important to Obtain a Language Certificate?

Speaking languages is fundamental these days. On the one hand, tourism is one of the most important forms of leisure, and mastering the language of the country you are visiting can greatly enhance your travel experience. On the other hand, having a language certificate can open doors to job opportunities, scholarships, academic positions, competitive examinations, employment opportunities or simply facilitate various administrative processes. So, this qualification is essential for anyone who wishes to have all those opportunities thanks to their spoken proficiency in English, since this university program prepares students to pass the oral component of the C2 English exam, according to the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”

TECH Global University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and , are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

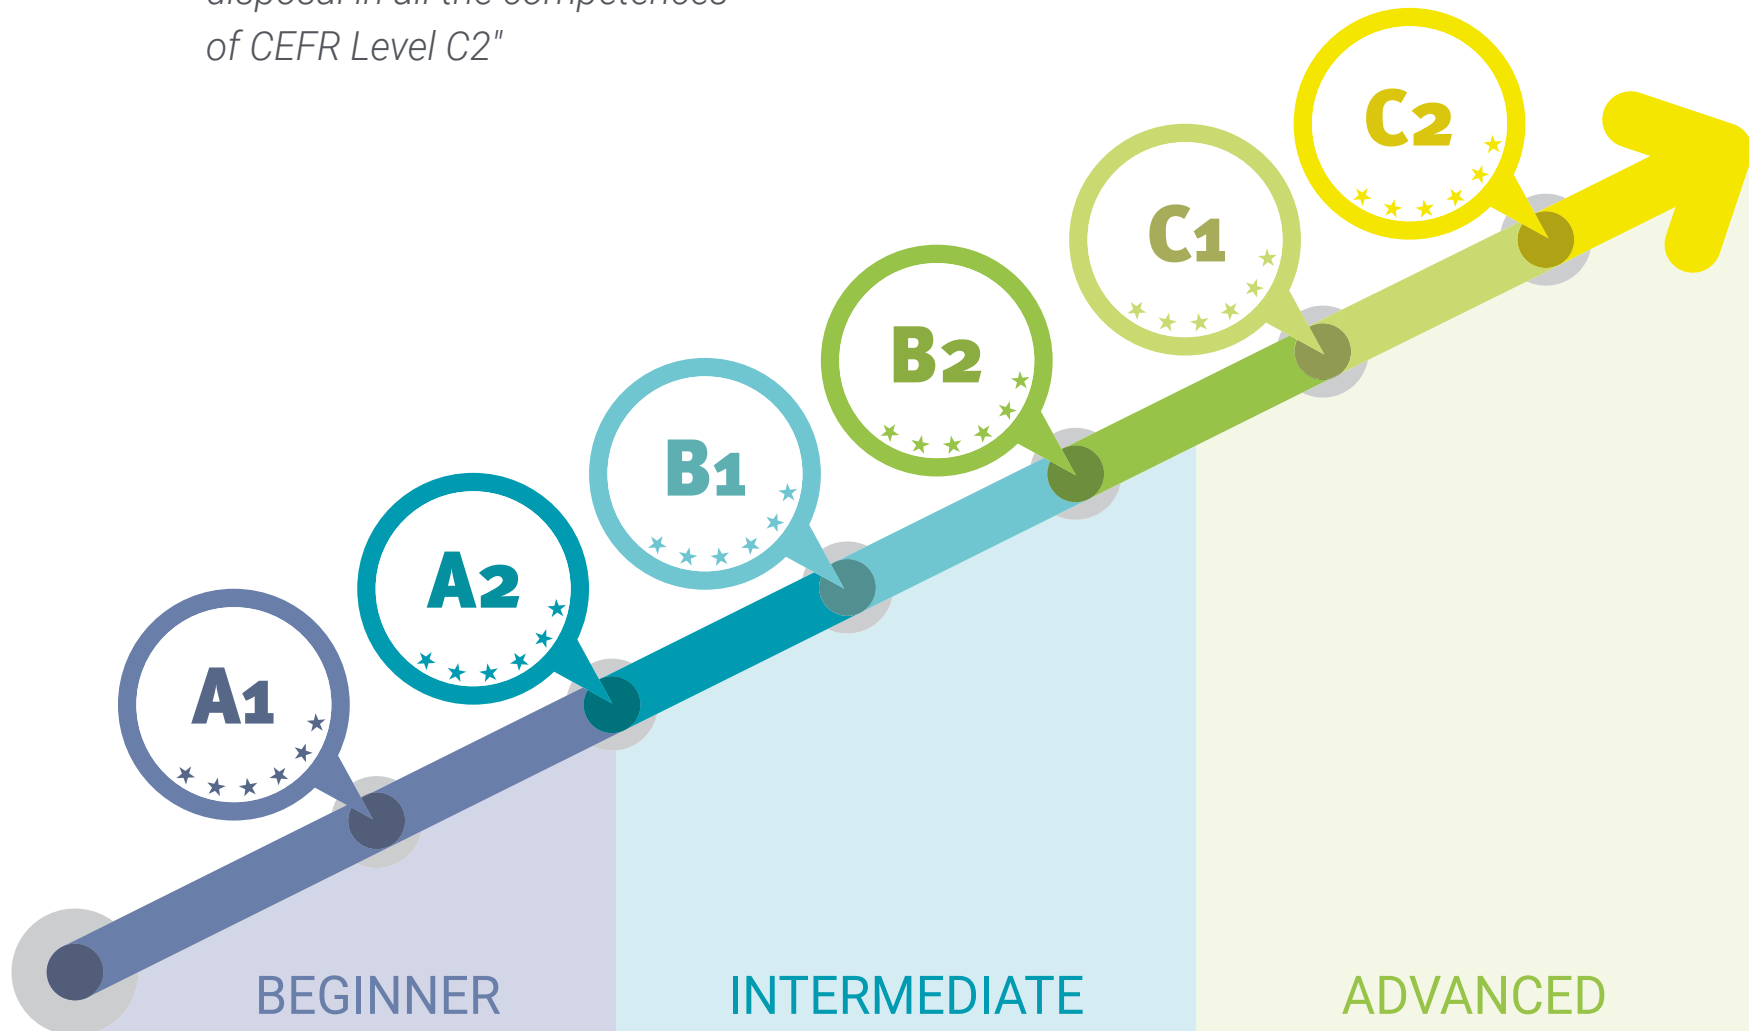

*Master English to the highest level,

Level C2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Although level C2 has been referred to as Mastery, it does not imply native or near-native proficiency. The descriptors graded here include: is able, by reasonably employing a wide range of modification mechanisms, to accurately convey subtle nuances of meaning; has a good command of idiomatic and colloquial expressions, and is aware of the connotative level of meaning; knows how to circumvent difficulties so discreetly that the interlocutor hardly notices.

Our Methodology

The C2 English Online Conversation Classes is an intensive preparation course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

In no other course will you work at your own pace, with native teachers, in small groups based on specific practice of the CEFR skills in each session"

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C2 English oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student, in order to comprehensively prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, Objective, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous communication, in real time, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

...with a personalized and expert-led training itinerary...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our intensive English C2 level preparation course are connected to the context in which the participant will take his or her certification exam in order to guarantee success on the day of the test.

... and all this with teachers at the forefront of technology and education...

The Professional Benefits of English

English is so universal that nowadays, a minimum command of it is no longer a competitive advantage, but rather an essential requirement in most job offers. A lack of this knowledge closes many doors to better job offers in all kinds of fields of work.

In addition to being the official language of world powers such as the United Kingdom or the United States, English can serve as a working language in international projects, world conferences or any other place where people of all nationalities meet.

Therefore, it is the most commonly used language in major organizations such as the UN itself, the WHO, NATO, the IMF, among many others. To work in any organization that operates at a global level, knowing English is essential, and the higher the level, the greater the opportunities for professional and personal development.

“

Add English to your resumé and give a powerful boost to your employability in a multitude of sectors thanks to this TECH university program"

11

That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.
