# Introduction

Nowadays, globalization and the emergence of English as the lingua franca of international trade have led both the legal and international relations sectors to search for professionals with a high level of linguistic competence. It is no easy task to reach a high level of proficiency in legal English. However, TECH offers this intensive program designed by native teachers with years of experience in the sector. It allows students to develop their English communication skills and abilities, 100% online, in order to be able to understand and express themselves fluently in potentially complex situations related to the work and legal environment.

“

*With this high-level program, you will be able to use legal terminology accurately and effectively in the work environment"*

Advanced knowledge of the English language is essential for professional development, regardless of the professional sector involved. A good command of the language will enable professionals to function naturally in complex environments, allowing them to advance in their careers and venture into the international world. This intensive program, consisting of online classes with native teachers, offers a realistic and up-to-date depiction of the use of the English language in a demanding work and business environment, which will allow the professional to master the necessary communicative skills and stand out in a highly competitive sector.

This specialization is the perfect balance between autonomous work, classes with highly qualified native speakers and top quality educational material, adapted to the professional needs of the 21st century. Starting from a B1 level of English of the Common European Framework of Reference for Languages (CEFR), throughout the program the student will acquire the appropriate knowledge and skills for B2/C1 level. The main objective is to help students acquire the communication skills required to be successful in the labor market.

The contents designed by TECH will be the professional's main weapon in order to apply the most innovative knowledge in the workplace. In this way, this program will enable students to solve demanding communicative tasks and to fulfil the associated complex functions, both in a professional environment and in everyday situations. All of this will be achieved through high-quality materials, classes and case studies taught by native teachers with extensive teaching experience.

This **Postgraduate Diploma in Advanced Legal English** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- ♦ Practical case studies presented by experts
- ♦ The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies for teaching languages
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*You will have access to the latest resources and tools that enable you to assess and improve your own learning and use of the language”*

“

*You will improve your communicative competence quickly and efficiently with native teachers who have years of experience in university teaching”*

The teaching staff includes professionals who contribute their experience to this program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive experience to learn in real situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise during the course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

*Content that is accessible from any fixed or portable device with an Internet connection*

*You will learn to interact with native speakers with an advanced degree of fluency and ease*

“

*You will study with a methodology created for professionals, with the aim of achieving the greatest impact in the shortest possible time”*

04

# Methodology

This program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Global University School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

**Classes**

There is scientific evidence suggesting that observing third-party experts can be useful.  
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

**Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
