tech 06 | Introduction

Psychology applied to rugby helps improve team cohesion and communication between players, making them work together and support each other, which can lead to greater effectiveness on the field. It allows the development of a winning mentality and enhances teamwork to achieve objectives. This discipline is an important tool for rugby players and can help them reach their full potential both on and off the field.

For this reason, TECH has designed a Postgraduate Certificate in Applied Psychology with which it seeks to provide students with the necessary skills and competencies to be able to perform their work as specialists, with the highest possible efficiency and quality. Thus, throughout this program, aspects such as Psychological Preparation for Sports, Physical Activity, Sports Coaching, Psychological Techniques for Athletes or the Sports Elite are addressed.

All this, thanks to a convenient 100% online modality that allows students to organize their schedules and studies, being able to combine them with their other day-to-day work and interests. In addition, this degree has the most complete theoretical and practical materials on the market, facilitating the student's study process and allowing them to achieve their objectives efficiently.

This **Postgraduate Certificate in Applied Psychology** contains the most complete and up-to-date scientific program on the market. The most important features include:

- The development of case studies presented by experts in Applied Psychology
- The graphic, schematic and eminently practical contents of the book provide sporting and practical information on those disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Become an expert in Psychological Preparation for Sport without time limits and with total freedom of organization"

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Reach your most demanding professional goals in the field of Psychology Applied to Sports Activity, thanks to a unique and completely updated program.

Put your skills to the test in the world of Sports, with a specialization focused on optimizing sports performance through Psychology.

tech 10 | Objectives

General Objectives

- Know in depth about Rugby XV and VII, as well as the rest of the modalities
- Know how to deepen, develop, and a physical and technical
- Acquire a specialization in Rugby oriented nutrition, according to the modality and position of the player
- How to manage emotions and apply psychology to the sports field

 - 1.3.1. Optimization of the Athlete's Learning and Search for Consistency in their Performance
 - 1.3.2. Psychological intervention with young athletes and the transition to professional sport
 - 1.3.3. Talent Management
- 1.4. Psychological intervention in competitive sport: sports elite
 - 1.4.1. Optimal level of activation and emotional management in sports practice
 - 1.4.2. Stress and Anxiety Intervention
 - 1.4.3. Locus of control of the elite athlete
- 1.5. Psychological variables in sports performance
 - 1.5.1. Positive and emotional psychology
 - 1.5.2. Self-confidence and self-concept in the athlete
 - 1.5.3. Athlete's Personality
- 1.6. Individual and group intervention in sports coaching: planning and implementation of a psychological program
 - 1.6.1. Psychological intervention techniques
 - 1.6.2. Design of individualized intervention plans
 - 1.6.3. Design of intervention plans in the teams
- 1.7. Tools in sports coaching: M.E.T.A., D.A.F.O. and Wheel of Life
 - 1.7.1. M.E.T.A. Model
 - 1.7.2. SWOT Analysis
 - 1.7.2. Wheel of life

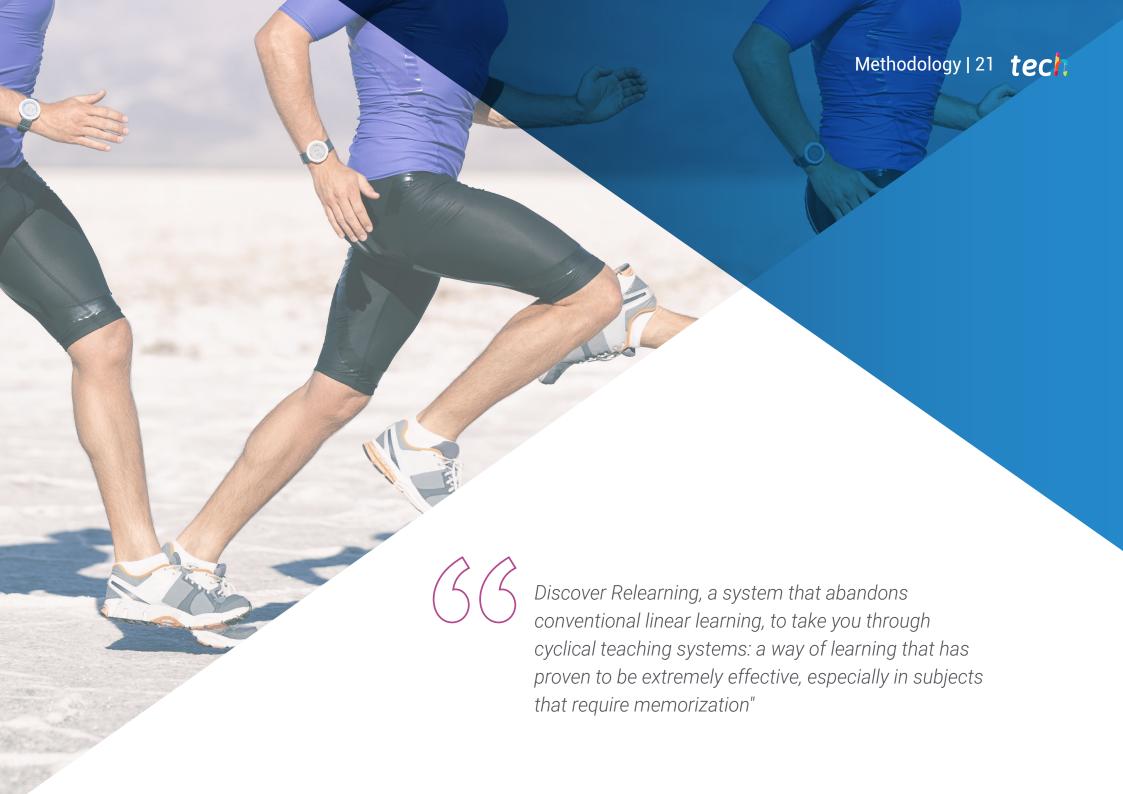

Structure and Content | 19 tech

- 1.8. Burnout in the athlete
 - 1.8.1. Symptoms of the syndrome
 - 1.8.2. Actions with the athlete
 - 1.8.3. Prevention of new cases
- 1.9. Health and emotional well-being of the athlete
 - 1.9.1. Effects of overtraining
 - 1.9.2. Psychological implications of sports injury prevention and recovery of sports injuries
 - 1.9.3. Flow
- 1.10. Withdrawal from sporting activities
 - 1.10.1. Transition from elite sport and return to normalcy
 - 1.10.2. Redefining the athlete's identity
 - 1.10.3. New roles acquired

Acquire new knowledge in a progressive and natural way, thanks to the most efficient teaching methodology, TECH Relearning"

tech 22 | Methodology

Case Study to contextualize all content

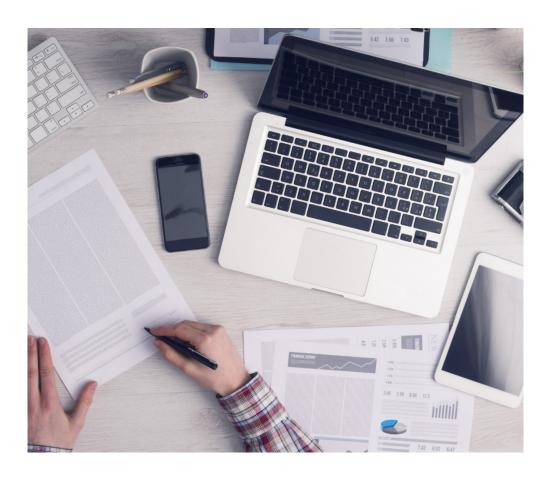

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology, we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

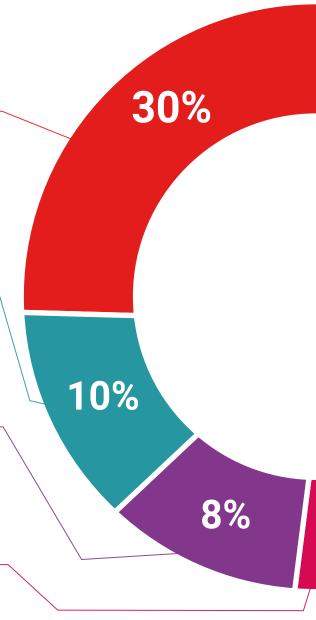

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

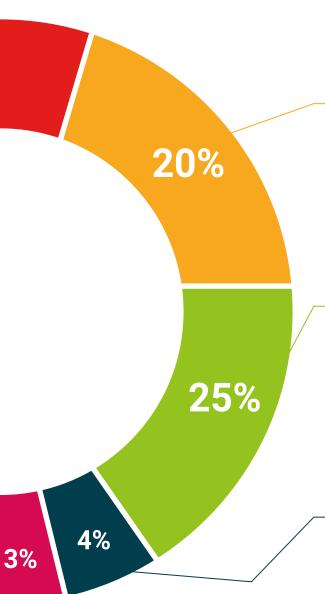

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Methodology | 27 tech

Case Studies

Students will complete a selection of the best case studies chosen specifically for this situation. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

tech 30 | Certificate

This **Postgraduate Certificate in Applied Psychology** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
