Introduction

Although sports entities are generally regulated by specific laws and regulations, they are also subject to civil and commercial laws just like any other company. Given this heterogeneous legal nature, it is essential to have a comprehensive understanding of its legal regime, something that can be done with guarantees from TECH. Because of this, this program will address the regulatory framework of sports clubs, sports corporations, federations or professional leagues in order to determine the overall context of the organizational structure. Undoubtedly, a unique opportunity presented in an attractive online format.

“

*The legal regime of sports entities
is the area you were looking for to
boost your career. Enroll now!”*

The legal regime of sports entities at a general level poses a number of challenges, including the regulation of the ownership and management of sports clubs, the protection of athletes' rights or transparency and integrity in administration and finance. In addition, the interaction between Sports Law and Public Law can also be complicated and requires careful interpretation.

This is why sports professionals will find the opportunity to perfect their knowledge of the structures of sport that encompass their activity with this program. This will even allow them to provide appropriate advice to other athletes and members of this field.

To this end, the course will outline the crossbreeding of the entities, their regulatory framework, organizational structure and functions. This not only takes into account the legal-sports context, but also the commercial regulations in line with accounting issues. In this way, sport will be analyzed within the concept of economic activity with its specificities.

With this complete preparation, the student will be ready to take the next step in their professional career, supported by a solid teaching team of experts in the field. At the same time, you will have unlimited access to an extensive digital catalog of resources through the Online Campus.

This **Postgraduate Certificate in Legal Regime of Sports Entities** contains the most complete and updated scientific program on the market. Its most notable features are:

- ♦ The development of case studies presented by experts in the legal regime of sports entities
- ♦ The graphic, schematic and eminently practical contents of the program provide legal and practical information on those disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will learn about the specificities of the legal and regulatory context of the entities in this field, mastering the legal figures of relevance in professional sports"

“

You will go through the characteristics of the federated pyramid system to examine its hierarchy and competencies”

With this Postgraduate Certificate you will master the coordination between professional leagues and sports federations to establish their impact on clubs and SAD.

If you want to handle with solvency practical issues on the management of subsidies related to the Superior Sports Council, this is your program.

The program includes, in its teaching staff, professionals from the sector who contribute to this training with their work experience, as well as renowned specialists from reference societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

02 Objectives

The heterogeneity of the legal regime of sports entities is what has led TECH to design a program that emphasizes each of their specificities through a global approach. In this way, the teaching team and the contents they have developed will guarantee the correct acquisition of competencies by the students that will allow them to manage in this area of growing interest.

“

TECH's objectives are the same as yours: to make you a leading expert to advise on issues such as the fit between federated and non-federated sport”

General Objectives

- ♦ Update legal knowledge on the commercial aspects of sports law
- ♦ Delve into in the main commercial contracts related to sports
- ♦ Consolidate knowledge on the employment relationship of the professional team athlete
- ♦ Identify the characteristics of taxation from the double perspective of the legal entity and the individual
- ♦ Analyze the application of criminal law in the field of sports
- ♦ Examine the concept of Sports Justice and its performance in the sports field
- ♦ Update legal knowledge on the management of the assets of professional athletes

Specific Objectives

- Develop the characteristic notes of an organizational system to contain specificities also in the framework of the accounting management, through the analysis of the normative and conceptual context
- Determine the legal figures of relevance in professional sports, such as Sports Corporations and professional leagues

Achieves the objectives of the program to determine the regulatory framework of sports foundations and analyze the figure of sports volunteering"

03

Course Management

The teaching team that teaches this Postgraduate Certificate will more than meet the expectations of the students. In this sense, the professors have developed their careers as jurists specializing in sports law, delving into subfields such as the sports market and the sports industry. In fact, they have represented leading European professional clubs, so this background is a guarantee for the student.

“

To stand out thanks to the advice of the best is one of TECH's premises; take this program and deepen in the keys that will give you lawyers of great professional sports clubs"

 - 1.10.1. Regulatory Framework
 - 1.10.2. Concept, internal structure
 - 1.10.3. The figure of the sports volunteer
 - 1.10.4. Other examples of "sports foundations"

“ *The agenda does not leave behind any of the elements that make up the International Olympic Committee, also examining other relevant global institutions*”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology, we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this situation. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06 Certificate

The Postgraduate Certificate in Legal Regime of Sports Entities guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Legal Regime of Sports Entities** contains the most complete and up-to-date scientific on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.
